Large temperature fluctuations, condensation, shock, vibration, electromagnetic interference, and more: Electrical and mechanical components for the railway industry must provide safe and reliable operation even under extreme application conditions at all times. This is why, Siemens leaves nothing to chance when developing these components. Right from the start, sound technology, application and service know-how go hand in hand with the highest quality standards.

As a global technology and innovation leader, we continuously push progress and help our customers overcome challenges e.g. by using the so-called digital twin. This cross-domain digital model integrates all data of a physical asset (product, plant or infrastructure systems) from the early design phase to engineering, commissioning, and service. The digital twin offers real value throughout the entire asset lifecycle, reducing over-engineering as well as improving component reliability with predictive engineering system simulation. It also reduces the costs for design, dimensioning and commissioning and accelerates your engineering and project execution.

We have been your reliable partner in the railway industry for decades. Our comprehensive experience in the fields of rolling stock and infrastructure is directly incorporated in the development of our components as is the knowledge we have gained from close cooperation with international standards committees. Therefore, you can rely on our components' guaranteed compliance with railway-specific requirements and standards.

Developed, tested and certified in accordance with current standards and directives

Siemens is a founding member of the IRIS Initiative, and consistently implements its requirements.

Our railway components comply with all the relevant standards, for example: DIN, EN, IEC, IEEE, ISO, EAC/GOST and ANSI, as well as the current fire protection standard EN45545.

With our certified components, we actively support the worldwide vehicle approval process.

Electrical components for the railway industry – SIRIUS

Overview

SIRIUS range of electrical components for the railway industry

Whether for rolling stock or infrastructure applications, we offer a comprehensive portfolio of electrical components for countless applications. One of our portfolio highlights is SIRIUS, the complete range for industrial controls. SIRIUS offers everything required for the switching, protection, or starting of

loads, as well as for their monitoring, control, detection, commanding, signaling, or supply. Our portfolio is rounded out by numerous products specifically developed and tested for the railway industry.

SIRIUS 3RV2 motor starter protectors for motor protection

- Spring-loaded or screw-type connection system on the terminals (also ring cable lug connection on request)
- For screw and snap-on mounting on DIN rail
- Short-circuit breaking capacity up to 100 kA
- Trip class 10 (sizes S00-S3)
- Integrated motor protection up to 100 A at +70 °C
- Comprehensive accessories/infeed systems
- Rated current:
 - Up to +60 °C 100 %
 - Up to +70 °C 87 %
- Mechanical service life:
 - 250 to 500 switching cycles

SIRIUS 3RT2 motor contactors up to 45 kW

- Spring-loaded or screw-type connection system on the terminals (also ring cable lug connection on request)
- Coil with suppressor diode or varistor circuit
- For screw and snap-on mounting on DIN rail
- Extended operating range: 0.7 – 1.25 x Us
- Communication via IO-Link for stationary applications
- Mounting:
 - Electronic coil: clearance up to ambient temperatures of 70 °C is not required
- Contacts:
 - Electronic coil: Auxiliary switches expandable in the same way as standard contactors

SIRIUS 3RT1 motor contactors from 55 to 250 kW

- Screw-type connection system via busbar connection or box terminal
- Optional control via a separate control signal input of 24 to 110 V DC (operating range from 0.7 to 1.25 x Us)
- Can be used at ambient temperatures up to 70 °C
- Contacts:
 - Two NO contacts and two NC contacts as standard
 - Auxiliary switches expandable in the same way as standard contactors

Electrical components for the railway industry – SIRIUS

1

SIRIUS 3RF solid-state switching devices

- Solid-state switching devices for switching 1- and 3-phase resistive and 3-phase motor loads
- Spring-loaded, screw-type and ring cable lug connection system
- Extremely durable, low-maintenance, rugged, and reliable thanks to long switching service life
- Wear- and noise-free switching, also for noise-sensitive areas
- Expandable functionality through plug-on function modules
- Vibration resistance in accordance with EN 61373 Category 1, Class B

SIRIUS 3TC DC contactors

- 3TC44 for screw and snap-on mounting on DIN rail
- 3TC48 to 3TC78 for screw mounting
- Solenoid coil fitted with varistor
- Extended operating range: $0.7 - 1.25 \times U_s$
- Contactors for switching DC voltages up to 1500 V
- Version with series resistor:
 - Mounting clearance up to ambient temperatures of 70 °C is not required
 - Mounting: with size 2 (3TC44) a clearance of 10 mm is required
 - Contacts: auxiliary switches not expandable; two NO contacts and one NC contact as standard

Introduction

1

Electrical components for the railway industry – SIRIUS

SIRIUS 3RH2 contactor relays

- Spring-loaded and screw-type connection system on all terminals (also ring cable lug connection on request)
- Coil with suppressor diode or varistor circuit
- For screw and snap-on mounting on DIN rail
- Extended operating range: 0.7 to 1.25 x Us
- Electronic coil with very low switch-on and holding power
- With electronic coil:
 - Ambient temperature up to 70 °C
 - Mounting without clearance
 - A 4-pole auxiliary switch block can be mounted
- Standard coil (coupling contactors):
 - Ambient temperature > 60 °C
 - Mounting with a clearance of 10 mm
 - It is not possible to mount an auxiliary switch block

SIRIUS 3RH2 latched contactor relays

- Screw-type connection system
- Solenoid coil fitted with varistor
- For screw and snap-on mounting on DIN rail
- Extended operating range: 0.7 – 1.25 x Us
- Electronic coil with very low switch-on and holding power
- With electronic coil:
 - Ambient temperature up to 70 °C
 - Mounting without clearance
 - A 4-pole auxiliary switch block can be mounted

SIRIUS 3TH4 contactor relays with 8 and 10 contacts

- Screw-type connection system
- Solenoid coil fitted with varistor
- For screw and snap-on mounting on DIN rail
- Extended operating range: 0.7 – 1.25 x Us
- The contacts are not expandable
- Mounting:
 - At ambient temperatures between 55 °C and 70 °C a clearance of 10 mm is required for side-by-side mounting

SIRIUS ACT push buttons and signaling devices

- Modern design and flexible concept:
 - 4 design lines in plastic, shiny metal and matte metal in 22/30 mm
 - Actuators, holders, contact module and LED modules can be ordered individually and combined freely
- Broad product range:
 - State-of-the-art functions, such as ID key-operated switches on RFID basis
 - Customized variants, e.g. special tumbler arrangements, labeling, pre-assembled enclosures
- Communication:
 - Communication-enabled due to optional connection to AS-Interface, IO-Link or PROFINET
- Ruggedness:
 - Degree of protection IP69K is our standard

Electrical components for the railway industry – SIRIUS

SIRIUS monitoring relays

- Monitoring relays for electrical parameters, thermistor motor protection, temperature, filling level, speed
- All versions with removable terminals, featuring either spring-loaded or screw-type connection system
- Applicability in all networks thanks to wide voltage range
- Variable adjustability
- 3-phase current monitoring integrated in the main circuit
- Communication via IO-Link for stationary applications

SIRIUS 3RQ coupling relays

- SIRIUS 3RQ2 coupling relays in robust industrial housing (22.5 mm width) and 3RQ3 coupling relays in slim design (6.2 mm)
- Coupling technology with power, plug-in and coupling relays in accordance with the railway standard
- Coupling links with two-tier design and connections on two levels
- Versions with removable terminals, featuring either spring-loaded or screw-type connection system
- Versions with very slim design of only 6.2 mm (3RQ3)
- Versions with up to 3 changeover contacts in width of only 22.5 mm (3RQ2), also available with hard gold-plated contacts for switching of small currents
- Low power consumption
- Applicability in all networks thanks to wide voltage range
- Version with solid-state compatible outputs (hard gold-plating)

SIRIUS 3RP2 timing relays

- Electronic timing relays (multifunction) with up to 15 time ranges
- Electronic timing relays with two changeover contacts and positively-driven relay contacts
- Individual or selectable time ranges
- Switch position and voltage indication via LED
- With removable terminals, featuring either spring-loaded or screw-type connection system
- For screw and snap-on mounting on DIN rail
- Electronic timing relays with positively-driven relay contacts:
 - 2 changeover contacts
 - Vibration resistance in accordance with DIN EN 61373 Category 1, Class B
 - Interference immunity in accordance with EN 50121-3-2

SIRIUS 3SK1 safety relays

- Suitable for all safety applications up to SIL 3/PL e
- Modular hardware configuration
- Simple commissioning using DIP switches and software parameter assignment
- Simple selection thanks to a small number of multifunctional devices
- SIRIUS safety relays can be integrated into systems simply and independently of the automation solution
- More functionality and flexibility through freely configurable safety logic
- Vibration resistance in accordance with DIN EN 61373 Category 1, Class B
- Interference immunity in accordance with EN 50121-3-2 Table 1

SIRIUS 3SE5 position switches

- Modular device design with easy plug-in connection system
- Four different enclosure versions in plastic and metal
- Optional LED display for all enclosures
- Positive opening of NC contacts
- Area of application up to SIL 3 in accordance with IEC 62061
- High contact reliability, also with 5 V DC/1 mA
- Safety position switches with separate actuator with/without tumbler
- High degree of protection up to IP 66/IP 67
- Extended temperature range: -40 °C to +85 °C
- Versions with increased corrosion protection

Introduction

1

Electrical components for the railway industry – SENTRON

Overview

SENTRON protection and switching devices

Tested protection and switching devices from the SENTRON portfolio ensure reliable low-voltage power distribution in infrastructure and railway applications.

The perfectly coordinated components offer outstanding flexibility, convenience, and safety for the railway industry.

5SY4 MCBs

- Optional top or bottom infeed thanks to identical terminals
- Convenient entry thanks to large and easily accessible wiring space
- Rapid manual removal from the busbar assembly
- Vibration- and shock-proof in accordance with DIN EN 61373 and DIN EN 50155 "1B"
- Applicability at ambient temperatures from -40 °C to +70 °C, with max. humidity of 95 %
- Rated switching capacity: 10 kA AC
- Vibration resistance:
 - According to IEC 60068-2-6. 50 m/s² with 25 to 150 Hz and 60 m/s² with 35 Hz (4sec)
 - According to EN 61373 Category 1, Class B

5SY5 MCBs

- Optional top or bottom infeed thanks to identical terminals
- Convenient entry thanks to large and easily accessible wiring space
- Rapid manual removal from the busbar assembly
- Vibration- and shock-proof in accordance with DIN EN 61373 and DIN EN 50155 "1B"
- Applicability at ambient temperatures from -40 °C to +70 °C, with max. humidity of 95 %
- Rated switching capacity: 10 kA AC and 1 kA DC
- Vibration resistance:
 - According to IEC 60068-2-6. 50 m/s² with 25 to 150 Hz and 60 m/s² with 35 Hz (4sec)
 - According to EN 61373 Category 1, Class B

5ST3010 auxiliary switches (AS) for MCBs

- 5ST3 add-on components: can be combined with 5SY MCBs and 5SU1 RCBOs
- Signaling of the miniature circuit breaker's contact position by the auxiliary switch (AS) – released by hand or due to fault
- Auxiliary switch version with test button for testing of the control circuit without switching the miniature circuit breaker
- Rated breaking capacity: 60 A
- Ambient temperatures: -25 °C to +55 °C
- Climate resistance: according to IEC 60068-2-30 28 cycles

5SV RCCBs

- Enhanced comfort and safety due to improved design
- Comprehensive uniform accessories for additional functions
- Consistent busbar system concept for all RCCBs with N connection on the right or left
- Easy removal of individual equipment from the linked assembly
- Rated residual current: 30, 300 mA
- Quick and easy replacement thanks to fast manual removal of the RCCBs from the assembly

Electrical components for the railway industry – SENTRON

5SU1 RCBOs

- Clear, visible and controllable connection of the supply line
- Convenient entry thanks to large and easily accessible wiring space
- Peak withstand current (> 1 kA) for safe operation
- Retrofitting of add-on components for miniature circuit breakers on the right side
- Rated residual current: 10, 30, 300 mA, Rated current: 6 to 40 A
- Width: 2 WU
- For all 10 kA versions up to 40 A:
 - Full insulation through integrated, movable terminal covers in the area of conductor entries
 - Replacement time savings thanks to rapid manual removal of the miniature circuit breakers from the assembly when changing the connections

Remote controlled mechanisms 5ST30

- The market's most modular system
- Easy selection between manual/off/RC mode
- Easy connection to RCBOs, RCDs, MCBs, and other devices with adapters
- Rated voltages: 12 ... 30/177 ... 270 V AC or 12...48 V DC
- Width: 2 WU
- Applicability at ambient temperatures from -40 °C to +70 °C
- Climate resistance: according to IEC 60068-2-30 28 cycles
- Vibration resistance: according to IEC 60068-2-6. 50 m/s² with 10 to 150 Hz

3NA3360, 3NA3812 LV HRC fuse links

- Fuse links with combined indicator: fuse disconnection signaled by color change from red to white
- Insulated metal grip lugs embedded in upper and lower cover of the fuse link in plastic for increased safety during replacement
- Imprinted sign for insulated grip lugs
- Rated breaking capacity: 25 kA DC
- Rated current: 2 to 315 A
- Contact blade: corrosion-free, silver-plated
- Climatic withstand capability: -20 °C up to +50 °C with 95% relative humidity

3NH3030 LV HRC fuse bases and accessories

- Made of ceramic material for screw mounting
- With flat connections, screw
- Weight per product unit: 0.217kg

Vacuum interrupters for medium-voltage contactors and circuit breakers

- Extremely safe switching and long service life due to vacuum design
- Many years of manufacturing experience, with more than 5 million interrupters supplied
- Customer-specific development according to OEM customer requirements
- High product variance for different switching applications
- Use in:
 - Medium- and low-voltage switching devices
 - Medium-voltage contactors, circuit breakers, load-break switches and switch disconnectors for railway applications

3AH47 VCB for traction applications

- Rated voltages up to 27.5 kV, frequencies of 16.7 - 60 Hz, Rated current up to 2500 A
- Rated short-circuit breaking current up to 50 kA
- 1-, 2- and 3-pole version
- Vertical pole assembly fixed to operating mechanism via post insulators
- Customer benefits:
 - compact & high mechanically stable design
 - various additional equipment available
 - economical integration
 - competent consultation by our experts

Introduction

1

Electrical components for the railway industry – Surge arresters

Overview

Siemens surge arresters for railway applications – reliable, stable and safe overvoltage protection

Siemens has been designing and manufacturing surge arresters for all kinds of applications since 1925. For more than 80 years we've been manufacturing surge arresters for rail systems. Continuous research and development, the wealth of Siemens know-how, and comprehensive worldwide experience give Siemens surge arresters a leading edge in overvoltage protection. Their uncompromising quality ensures a long service life and the highest reliability in any application.

Siemens surge arresters are an indispensable aid to insulation coordination in electrical power systems. Valuable equipment, such as traction vehicles, is optimally protected against lightning and switching overvoltages. Siemens surge arresters have been designed to meet the requirements of a wide range of common installation environments, from arctic cold to the heat of the desert and the dampness of tropical climates.

All Siemens surge arresters feature a superior sealing system that reliably prevents moisture ingress to ensure the highest possible degree of overvoltage protection and decades of trouble-free service.

3EB4 surge arrester for railway applications

- Housing made of glass fiber reinforced plastic (FRP) tube and silicone rubber sheds
- For AC systems up to 25 kV
- For DC systems up to 3 kV
- Train speeds up to 420 km/h
- Short circuit current capability 50 kA
- Tested according to IEC 60099-4 (AC version) and EN 50526-1 (DC version)
- Fire test according to DIN EN 45545-2
- Shock and vibration test according to IEC 61373
- For use on:
 - High-speed trains and intercity trains
 - Commuter and regional trains
 - (Multi-traction) locomotives
 - Urban transportation (light rail, metros and tram cars)

3EB5 surge arrester for railway applications

- Cage design™ with directly molded silicone rubber housing
- For AC systems up to 25 kV
- For DC systems up to 3 kV
- Travel speed up to 200 km/h
- Short circuit current capability 65 kA
- Tested according to IEC 60099-4 (AC version) and EN 50526-1 (DC version)
- Fire test according to DIN EN 45545-2
- Shock and vibration test according to IEC 61373
- For use on:
 - Intercity trains
 - Commuter and regional trains
 - (Multi-traction) locomotives
 - Urban transportation (light rail, metros and tram cars)

Introduction

1

Electrical components for the railway industry – SIDOOR

Overview

SIDOOR – Innovative door control systems and now also for metro gap filler control systems

In the field of railway applications, we offer SIDOOR automatic control system for platform screen doors (PSDs), train doors and now also for gap fillers.

Safe and convenient operation of the doors or steps is always ensured (friction and energy limitation).

Controller for gap filler – SIDOOR ATE530G coated

- Extends a step until 30 kg within 1 s by a maximum of 163 mm against a fixed stop
- Project specific EC motor
- Ice function: A higher extension force can be created within the first 50 mm (parameterizable)
- Variant with additional, transparent protective coating to prevent impairment or damage by moisture and atmospheric pollutants
- Certified according to: DIN EN 50657: 2017 (Basic Integrity)

Controllers for platform screen doors – SIDOOR ATE530S and SIDOOR ATE531S

- Less mounting and wiring effort thanks to PROFINET. Furthermore, program changes, software updates and the teach-in drive of all SIDOOR systems can be started from a platform or even from the metro line control center. This substantially reduces commissioning times.
- Seamless integration into the TIA system architecture and expansion of the inputs and outputs for additional actuators and sensors, for example by SIPLUS ET 200SP RAIL
- Detailed diagnostics and parameter assignment options
- The 5 inputs and 2 outputs can be individually configured
- Freely configurable unlocking sequences
- Certified according to: IEC 62061 (SIL 2 for named functions), EN 60335-1, EN ISO 13849-1, EN 14752 (power and energy)
- SIDOOR ATE530S coated (fig. without lid)
 - Variant with additional, transparent protective coating to prevent impairment or damage by moisture and atmospheric pollutants
 - Corresponds to EN 50155 chapter 12, chapter 9.4
- SIDOOR ATE531S (fig. without lid)
 - Coated like ATE530S, and with temperature range extended to +70 °C

Motors for platform screen doors – SIDOOR MEG251 and SIDOOR MED280

- Low noise, low heat rise, maintenance-free
- SIDOOR MEG251 left/right:
 - Compact size – EC geared motor for door weights up to 250 kg
 - For retrofit applications (replacement for SIDOOR ATE250S, including SIDOOR MEG250)
- SIDOOR MED280:
 - Gearless EC direct drive for door weights up to 280 kg – provides even higher reliability and energy balance = less wear = long service life
 - Just one motor for different installation orientations = asset minimization

Door drive for interior railway doors – SIDOOR ATD400T with SIDOOR MDG180 DIN EN 45545-2

- Complies with the new fire protection standard for components in rail vehicles according to DIN EN 45545-2 – Hazard Level HL 3
- Certified safety according to DIN EN 14752 (fail-safe limitation of force and energy)
- Extended operating temperature range: -25 °C to +70 °C and for 10 minutes up to +85 °C with reduced track-related speed profile parameters
- SIDOOR MDG180 DIN EN 45545-2 left/right:
 - Compact design – DC geared motor for door weights up to 180 kg
- SIDOOR ATD400T:
 - Including push-to-open and push-to-close function

Electrical components for the railway industry – SIPLUS extreme RAIL

Overview

SIPLUS extreme RAIL – automation with railway approvals

Thanks to their extensive approvals and conformity to railway standards, the new SIPLUS extreme RAIL products are the perfect choice for a wide range of rolling stock and trackside applications. Based on SIMATIC industrial controllers, common

features such as integrated system diagnostics and security and safety are already included. Whether simple, complex or distributed - SIPLUS extreme RAIL offers a durable and robust solution for your automation tasks.

SIPLUS extreme RAIL-Controller

- Basic and advanced controller for use in simple applications such as sanding systems and hygiene cubicles up to complex setups such as HVAC, signaling systems and interlockings
- Compliant to EN 50155, EN 45545 and EN 50124
- Failsafe controller certified for EN 50126, EN 50128, EN 50129 and EN 50159
- Insulation testing for every item
- Conformal Coating
- Temperature classes TX: -40 °C to +85 °C* and T1: -25 °C to +70 °C* (* includes +15 K overtemperature for 10 minutes)
- PROFINET, Ethernet, CAN, OPC UA and PROFISAFE communication
- High electromagnetic immunity to interference (EMC) and mechanical resilience (vibration and shock)
- Integrated system diagnostics and security
- 110 V IOs available

SIPLUS extreme Rail HMI

- HMI Panels for visualization of simple, medium and complex applications
- Compliant to EN 50155, EN 45545 and EN 50124
- Insulation testing for every item
- Conformal Coating
- Temperature class T1: -25 °C to +70 °C* (* includes +15 K overtemperature for 10 minutes)
- PROFINET, Ethernet, CAN, OPC UA and PROFISAFE communication
- High electromagnetic immunity to interference (EMC) and mechanical resilience (vibration and shock)
- Integrated system diagnostics and security
- Horizontal installation

SIPLUS extreme Rail Distributed I/O

- Distributed I/O controller for medium and complex applications
- Compliant to EN 50155, EN 45545 and EN 50124
- Failsafe controller certified for EN 50126, EN 50128, EN 50129 and EN 50159
- Insulation testing for every item
- Conformal Coating
- Temperature classes TX: -40 °C to +85 °C* and T1: -25 °C to +70 °C* (* includes +15 K overtemperature for 10 minutes)
- Seamless integration into the common TIA Portal engineering framework
- PROFINET, Ethernet, CAN, OPC UA and PROFISAFE communication
- High electromagnetic immunity to interference (EMC) and mechanical resilience (vibration and shock)
- Integrated system diagnostics and security

Introduction

Electrical components for the railway industry – SCALANCE | RUGGEDCOM

1

Overview

Communication solutions for railway industry with SCALANCE and RUGGEDCOM

Siemens offers a wide range of communication products and technologies that are specifically designed to give railway operators all the tools they need for continuously trouble-free railway operation based on current security standards – from the integration of legacy infrastructure to long-haul fiber backbones

and widespread wireless connectivity for mobile and stationary applications. Siemens is active worldwide, and has the knowledge and experience to deliver complete, standardized communication solutions to the railway industry.

SCALANCE XC-200

- Meets the railway standard EN 50121-4 (trackside)
- Redundant power supply
- Up to 24 x RJ45 ports 10/100 Mbit/s for mounting in the control cabinet
- Additional versions with optical ports (SC/ST/LC) up to 1 Gbit/s and with conformal coating (XC-200EEC) available
- Slot for optional C-PLUG removable data storage medium for easy device replacement without additional equipment such as a field PG
- Fast mobile network diagnostics by smartphone or tablet via WLAN and NFC (Near Field Communication)

SCALANCE XP208EEC, XP208PoE EEC, XP216EEC and XP216PoE EEC

- Meets the railway standards EN 50155 and EN 45545-2 (train- and trackside)
- Managed Switch, high degree of protection (IP 65) for use outside the control cabinet, temperature range -40 °C to +70 °C with coated PCBs (conformal coating), stable metal enclosure
- Flat type for installing in partitions etc., many mounting options
- Clearly highlighted diagnostic area
- Supports PoE ports (IEEE 802.3 at type 2, 30 W per port)
- Variants:
 - XP208EEC: 8-port managed switch
 - XP208PoE EEC: 8-port managed switch, 4 ports with PoE function
 - XP216EEC: 16-port managed switch
 - XP216PoE EEC: 16-port managed switch, 8 ports with PoE function

SCALANCE XR324-12M TS / XR324-4M PoE TS

- Meets the railway standards EN 50155, EN 45545-2 and EN 50121-4 (train- and trackside)
- Modular, managed Layer 2 Industrial Ethernet 19" rack switches
- Redundancy functions for highly available ring topologies, tried and tested in industrial applications (MRP/HRP), equipped with additional IT functions, e.g. VLAN, RSTP, MSTP
- Gigabit Ethernet support on all 24 ports
- Ambient temperature -40 °C to +70 °C
- Can be used in harsh environments due to vibration-proof/shock-proof plug-in connection
- Variants:
 - SCALANCE XR324-12 M TS: 12 slots for electrical (RJ45 / M12) and/or optical 2-port media modules (multi-mode or single-mode), which are inserted into the media module slots of the basic unit
 - SCALANCE XR324-4M PoE TS:
 - 16 integrated RJ45 ports, of which 8 are PoE-capable
 - 4 slots for electrical (RJ45 / M12) and/or optical 2-port media modules, which are inserted into the media module slots (multi- or single-mode) of the basic unit

SCALANCE XM408-8C with Port Extender PE408PoE

- Meets the railway standard EN 50121-4 (trackside)
- SCALANCE XM408-8C with 8 ports available in total, of which
 - up to 8 x 10/100/1000 Mbit/s are RJ45 ports with retaining collars
 - up to 8 x SFP slots (combo ports), 100 or 1000 Mbit/s of either electric port or SFP slot
- Two port extenders with 8 ports each can be connected to implement a maximum of 24 ports in one switch
- Fast mobile network diagnostics by smartphone or tablet via WLAN and NFC
- High-speed media redundancy through integral redundancy manager even for large networks, for both Gigabit Ethernet and Fast Ethernet
- Opt. activation of the Layer 3 functions in connection with the KEY-PLUG XM-400
- PE408PoE Port Extender for SCALANCE XM-400 managed modular IE switch; extension by 8 x 10/100/1000 Mbit/s RJ45 with up to 8 ports PoE according to IEEE 802.3 at type 2

Electrical components for the railway industry – SCALANCE | RUGGEDCOM

1

SCALANCE M876-4 + ANT896-6MH

- Meets the railway standards EN 50155 and EN 50121-4
- 3G/LTE router for wireless connection via the mobile radio network – perfect for large bandwidth requirements, e.g. for video transmission, data link for automatic ticket machines, infotainment services, internet on board and telemetry
- Bandwidth up to 100 Mbit/s downlink and 50 Mbit/s uplink (LTE)
- Redundant power supply
- Managed 4-port switch, network management via SNMP
- Integrated firewall and IPsec/OpenVPN
- Ambient temperature -20 °C to +60 °C
- 2G/3G/4G antenna ANT896-6MH for mounting on the vehicle roof

SCALANCE W774-1 M12 EEC and SCALANCE W778-1 M12 EEC

- Meets the railway standards EN 50155 and EN 50121-4
- Industrial Wireless LAN access points for installation in control cabinets or for indoor use with IEEE 802.11a/b/g/n support and data transfer rates up to 300 Mbit/s
- Low-profile, compact aluminum enclosure, shock and vibration-proof, for high mechanical requirements, variants in protection class IP30 and IP65
- M12 connections for 10/100 Mbit/s with PoE
- Coated PCBs (conformal coating) and extended temperature range (-30 °C to +70 °C)
- Mounting outside of the cabinet also possible thanks to IP65 protection class (SCALANCE W778-1 M12)
- Additional functions (iFeatures) can be activated optionally with a KEY-PLUG, e.g. iPRP for reliable redundancy with WLAN

SCALANCE W788-2 M12 EEC and SCALANCE W1788-2 M12 EEC

- Meets the railway standards EN 50155, EN 45545-4 and EN 50121-4
- Industrial Wireless LAN access point for installation in control cabinets or for indoor use with IEEE 802.11a/b/g/n support and data transfer rates up to 450 Mbit/s
- SCALANCE W1788-2 M12 EEC: further 802.11ac support, transfer rates up to 1700 Mbit/s
- Rugged aluminum enclosure, shock and vibration-proof, for high mechanical requirements, protection class IP65, coated PCB (conformal coating)
- M12 connection for 10/100/1000 Mbit/s with PoE
- Antenna positioning optimized for 3 x 3 MIMO technology (W1788: 4 x 4 MIMO); no interference between the antennas for direct mounting on the device
- Ambient temperatures: -40 °C to +70 °C (W788-2 M12 EEC), -20 °C to +60 °C (W1788-2 M12 EEC)
- Additional functions (iFeatures) can be activated optionally with a KEY-PLUG, e.g. iPRP for reliable redundancy with WLAN (for W1788 with CLP in 2019)

SCALANCE W786

- Meets the railway standard EN 50121-4
- IWLAN access points for outdoor use with IEEE 802.11a/b/g/n support and data transfer rates up to 450 Mbit/s, RJ45 or SFP connections for 10/100 Mbit/s with PoE
- Rugged, impact-resistant plastic enclosure, shock and vibration-proof for demanding mechanical requirements, Protection class IP65, resistant to condensation, UV radiation and saltwater spray
- Additional functions (iFeatures) can be activated optionally with a KEY-PLUG, e.g. iPRP for reliable redundancy with WLAN

Introduction

1

Electrical components for the railway industry – SCALANCE | RUGGEDCOM

IWLAN accessories: antennas and cables

- Remote antennas increase the reliability of wireless links by optimizing signal reception and emission
- Use in Industrial Wireless LAN (IWLAN) and WLAN according to IEEE 802.11 with 2.4 GHz and 5 GHz with data transfer rates up to 450 Mbit/s
- The connection cables meet the increased requirements for environmental conditions and fire protection that are required for use in vehicles (including EN 45545-2)

RUGGEDCOM RS900G / RS900GP

- Meets the railway standard EN 50121-4
- Managed Ethernet switch for reliable operation in critical infrastructure
- Multiple fiber connector types (LC, SC, ST, SFP)
- Long-haul optics allow Gigabit uplinks for distances up to 70 km
- Operating temperature from -40 °C to +85 °C
- Variants:
 - RS900G: Managed Ethernet switch with 10 ports, Gigabit fiber-optic uplinks and 128 bit encryption
 - RS900GP: Managed Ethernet switch with 10 ports, of which 8 are Power-over-Ethernet (PoE) ports and 2 Gigabit uplinks, with 128 bit encryption

RUGGEDCOM RSG920P

- Meets the railway standards EN 45545-2 and EN50121-4
- High port density to meet the Ethernet requirements along the track
- Compact layer 2 Gigabit switch with 20 Gigabit ports, including 4 PoE ports and 4 SFP slots and I/Os with PoE supply
- SFP ports for greater flexibility and migration in future Ethernet networks
- 19" switch performance features in compact design to save space
- Application and commissioning with USB console and MicroSD firmware/configuration
- RPS1300 power supply suitable for Power-over-Ethernet devices, max. power 140 W

RUGGEDCOM RSG907R / RSG909R

- Meets the railway standard EN 50121-4
- PRP/HSR coupling functionality to cover all types of redundant network topologies
- 3 x RNA (Redundant Network Access) and coupler Ethernet ports according to IEC 62439-3 (1000BASE-X), plus RSG907R: 4 x SAN (Singly Attached Node) fiber optic ports (LC, 100BASE-FX) RSG909R: 6 x SAN (Singly Attached Node) copper Ethernet (RJ45)
- Power redundancy: Integrated power supply with redundant inputs
 - Universal high voltage range: 88 – 300 VDC or 85 – 264 VA;
 - Universal low voltage power supply range: 10 – 60 VDC

RUGGEDCOM RX1400

- Meets the railway standard EN 50121-4
- Rugged Industrial Ethernet switch and TCP/IP router with LTE and fiber-optic WAN options in compact design
- For safe, cost-effective implementation of extensive communication applications and a high processing performance in harsh industrial environments
- 4 x Fast Ethernet copper ports and 2 x Gigabit SFP slots (Small Form Factor Pluggable)
- Supports multi-mode and single-mode SFPs for distances up to 100 km
- Equipped with GPS input
- Available with or without LTE modem for Europe, North America, the Asia-Pacific Region and Japan
- Operating temperatures from -40 °C to +85 °C; fanless operation
- The RUGGEDCOM VPE1400 provides a virtualized environment to run a guest Linux operating system and third party applications on the RX1400, enabling intelligence at the network edge

Electrical components for the railway industry – SCALANCE | RUGGEDCOM

RUGGEDCOM RX1500

- Meets the railway standards EN 50155 and EN 50121-4
- Modular and field-replaceable layer 2 and layer 3 switch and router
- M12 line modules with very wide range of functions (M12/RJ45, Fast Ethernet / Gigabit, etc.)
- ROX II software features with integrated router/firewall / VPN / VRRP/MPLS
- Input voltage: 24 V DC, 48 V DC, 88 to 300 V DC, and 85 to 264 V AC for worldwide operability
- Operating temperature from -40 °C to +85 °C

RUGGEDCOM RSG2100 / RSG2100P

- Meets the railway standard EN 50121-4
- Modular fully managed Ethernet switch for use in electrically harsh and climatically demanding environments
- Up to 3 Gigabit Ethernet ports and 16 Fast Ethernet ports (copper and /or fiber optic)
- 2-port modules for outstanding flexibility
- Store and forward switching
- Supports many fiber-optic types (multi-mode, single-mode) with diverse connectors (ST, MTRJ, LC, SC, SFP)
- Fully integrated, dual redundant (optional) power supplies
- Variant available with up to 4 ports conforming with IEEE 802.3af (10/100BaseTX)

RUGGEDCOM RSG2300 / RSG2300P

- Meets the railway standard EN 50121-4
- Fully managed Ethernet rack switch with 32 ports and 4 modular Gigabit uplink ports and 24 Fast Ethernet copper ports
- Optional: up to 4 x 1000LX Gigabit Ethernet ports (copper and/or fiber-optic) and up to 8 x 100FX Fast Ethernet ports (copper and/or fiber-optic)
- Non-blocking, store and forward switching
- Supports many fiber-optic types (multi-mode, single-mode) with diverse connectors (ST, MTRJ, LC, SC, SFP)
- Fully integrated, doubly redundant (optional) power supplies
- Variant available with up to four ports conforming with IEEE 802.3af (10/100BaseTX)

RUGGEDCOM RST2228 / RST2228P

- Meets the railway standard EN 50121-4
- 19" Layer 2 rack switch with up to 28 Ports: 4 x 1/10 Gigabit ports (SFP), 24 Gigabit/Fast Ethernet ports (SFP, RJ45, LC)
- Power-over-Ethernet Variant available
- Supports IEEE 8023.at/802.3bt (draft) with max. 60W per port
- Maximum Power budget 500W
- Modular; field-replaceable Ethernet media modules with 4 ports for outstanding flexibility
- Supports IEEE 1588 v2 time synchronization with hardware time stamping and transparent clock
- Non-blocking, store and forward switching
- Integrated dual redundant power supplies

RUGGEDCOM WIN

- First broadband wireless product portfolio designed for private networks delivering the benefits of 4G technology to critical infrastructure applications in harsh environments
- Provides enhanced security, network simplicity and private network feature set
- Mobile WiMAX compliance based on IEEE 802.16e standard and WiMAX Forum Wave2 (MIMO) certification
- Lowest frequency use: leverages OFDMA and built-in GPS to enable users to deploy an entire network on a single frequency channel
- Quality of service: separate traffic types over the air and guarantee latency, minimum bandwidth and jitter, according to application needs
- Stand-alone architecture: does not require an entire network infrastructure to be in place, while maintaining the interoperability and technology advances of broadband wireless
- Improved security: built-in features ensure NERC CIP compliance, such as two-factor mutual authentication and AES encryption
- Operating temperature from -40 °C to +75 °C

Introduction

1

Electrical components for the railway industry – Siemens Propulsion System

Overview

Components for the propulsion system

Siemens, as the inventor of electric traction, has always felt itself obligated to provide efficient, reliable drive systems for high-speed trains, locomotives, EMUs, metros, tram cars, trolley buses and mining trucks.

Following this tradition, we offer tailor-made components which are of course perfectly coordinated with one another (for example as a motor-gear unit). We are innovation drivers of energy efficiency, and offer extensive, worldwide service solutions, including retrofits, from a single source.

Pantograph

- Rated voltage: 0.6 – 25 kV; AC/DC
- Rated current: up to 4000 A
- Operating speed: up to 400 km/h
- (Static) contact force: 60-150 N
- Working height: up to 3200 mm
- Pan profiles: 1450, 1550, 1600, 1800, 1950 mm
- Option:
 - Automatic dropping device (ADD), raised height limit, electronic control for contact force tracking, lowered position monitoring, lowered position locking, monitoring of the wear on the contact strips

Transformers

- Rated voltage: 1.5/3 kV DC; 12/15/25 kV AC and special voltages
- Frequency: 16 2/3 – 60 Hz
- Rated power: up to 12 MVA
- Installation location: Underfloor, roof, machine room
- Feature:
 - Integrated transformer & inductor design, cooling system and expansion tank
 - High-class insulating material for maximum energy density
 - Ester cooling and insulating fluid for the highest environmental and fire protection requirements
- Option:
 - Multi-system transformers for cross-border travel, as well as integrated line filter & 2nd harmonic inductors, HEP/AUX transformers with filter, auxiliary and heating circuit windings according to customer specifications

Traction converter

- Rated voltage: 600/750/1500/3000 V DC
- Rated power: up to 1.6 MW per axle; in group supply up to 2.2 MW
- Efficiency: up to 98%
- Installation location: underfloor, roof, machine room
- Feature:
 - Cooling: Naturally or forced air cooling, water cooling
 - Ambient temperatures: -40 °C to +70 °C
- Option:
 - Single and multi-system configuration; group, bogie and individual axle control including redundancy concept; integrated on-board converter

Battery charger

- Rated voltage: 670/750/1500 V DC
- Rated power: 6 kW to 60 kW
- Output voltage: 24 – 110 V DC
- Feature:
 - Cooling: Naturally or forced air cooling, water cooling
- Option:
 - SiC technology, bidirectional, suitable for deserts and / or low temperatures

Electrical components for the railway industry – Siemens Propulsion System

1

On-board converter

- Rated voltage: 600/750 V DC; 1000 V AC; 1500/3000 V AC/DC
- Rated power: 20 kVA to 500 kVA
- Output voltage: 24 to 110 V DC, 1 AC/3 AC/3 AC+N, fixed/variable frequency
- Efficiency > 92 %
- Installation location: Underfloor, roof, machine room
- Feature:
 - Full and partial redundancy
 - Cooling: Naturally or forced air cooling, water cooling
 - Ambient temperatures: -40 °C to +55 °C
- Option:
 - SiC technology, integrated battery charger, parallel connection of converter without additional synchronous line, suitable for deserts and/or low temperatures

Traction motor

- Rated voltage: 750 – 4200 V DC
- Rated power: up to 1600 kW
- Rated speed: up to 8000 rpm
- Starting torque: up to 42000 Nm
- Cooling: Self-ventilated or forced-cooled, water-cooled
- Feature:
 - Synchronous (permanent-magnet-excited) and asynchronous motors
 - Open or encapsulated
- Type:
 - Semi-, fully suspended, or nose-suspended drive
 - Wheel hub motor

Coupling

- Membrane coupling:
 - Size 200 to 465 for 70% and 100% LF drives (fully suspended), with and without torque limiter
- Cardan joint and wedge-type integrated coupling:
 - Sizes 350 to 370 for 70% LF drives (fully suspended), up to size 680 for locomotive drives
- Guide coupling:
 - Sizes 330 to 365 for 100% LF drives (fully suspended)
- Gear coupling:
 - Metro: Axle-mounted drives, with and without torque limiter
 - EMU/high-speed: Normal and low temperature version, with and without torque limiter
- Steel multiple-disk coupling:
 - Locomotives
- Option:
 - Project-specific design and optimization of the couplings based on the relevant specification and requirement

Gear unit

- Axle loads: up to 32.5 t
- Rated speeds: up to 10.000 rpm
- Power: up to 1300 kW
- Ambient temperatures: -50 °C to +45 °C
- Type:
 - Bevel, bevel helical and helical gear units for semi- and fully suspended drive concepts
- Feature:
 - Gear unit and coupling as optimized system from a single source
 - Design optimized for noise and weight
 - Gear unit manufacture and gearing design and manufacturing competence in one company
- Option:
 - Suitable for deserts and/or low temperatures, specific grounding and/or current insulation solutions, special solutions for integration into digitized logistics systems (e.g. RFID), digital maintenance documentation for optimizing service processes

Overview

The SIRIUS family of controls

The SIRIUS modular system with its components for the switching, starting, protection and monitoring of motors and industrial systems stands for the fast, flexible and space-saving construction of control cabinets.

3RT2 contactors**Size S00 with mountable accessories**

① Contactor size S00

- ② 2-pole auxiliary switch block, laterally mountable
- ③ 1-pole auxiliary switch block, for snapping onto the front cable entry from the top
- ④ 2-pole auxiliary switch block, for snapping onto the front cable entry from the bottom
- ⑤ 4-pole auxiliary switch block, for snapping onto the front
- ⑥ 3RA28 function module
- ⑦ 3RA27 function module for AS-Interface, direct-on-line starting
- ⑧ 3RA27 function module for IO-Link, direct-on-line starting
- ⑨ Surge suppressor with/without LED
- ⑩ Three-phase feeder terminal

- ⑪ Star jumper, 3-pole, without connecting terminal
- ⑫ Link for paralleling, 3-pole, with connecting terminal
- ⑬ Solder pin adapter
- ⑭ Connection module (adapter and connector) for contactors with screw-type connection
- ⑮ Safety main current connector for two contactors

Assembly kit 3RA2913-2AA1 comprising:

- ⑯ Wiring modules on the top and bottom for connecting the main, auxiliary and control current paths, electrical interlock¹⁾ included, can be broken off (NC contact interlock)
- ⑰ Mechanical interlocks²⁾
- ⑱ Two connecting clips for two contactors²⁾

- For contactors
- For contactors and coupling contactors

¹⁾ 3RT201. contactors with one NC contact in the basic unit are required for the electrical interlock. An additional NO contact is required for momentary-contact operation.

²⁾ The parts ⑰ and ⑱ can only be ordered together as 3RA2912-2H mechanical connectors.

Power Contactors for Switching Motors

General data

3RT2 contactors

Size S0 with mountable accessories

① Contactor size S0

- ② 2-pole auxiliary switch block, laterally mountable
- ③ 1-pole auxiliary switch block, for snapping onto the front cable entry from the top
- ④ 4-pole auxiliary switch block, for snapping onto the front cable entry from the bottom
- ⑤ 2-pole auxiliary switch block, for snapping onto the front cable entry from the bottom
- ⑥ Surge suppressor with/without LED
- ⑦ 3RA27 function modules for AS-Interface, direct-on-line starting
- ⑧ 3RA28 function modules
- ⑨ 3RA27 function modules for IO-Link, direct-on-line starting
- ⑩ Pneumatically delayed auxiliary switch block
- ⑪ Mechanical latching block

- ⑫ Link for paralleling, 3-pole, with connecting terminal
- ⑬ Connection module (adapter and plug) for contactors with screw-type connection
- ⑭ Coil terminal module, on the top and bottom
- ⑮ Three-phase feeder terminal
- ⑯ Link for paralleling (star jumper), 3-pole, without connecting terminal
- ⑰ Safety main current connector for two contactors

Assembly kit 3RA2923-2AA1 comprising:

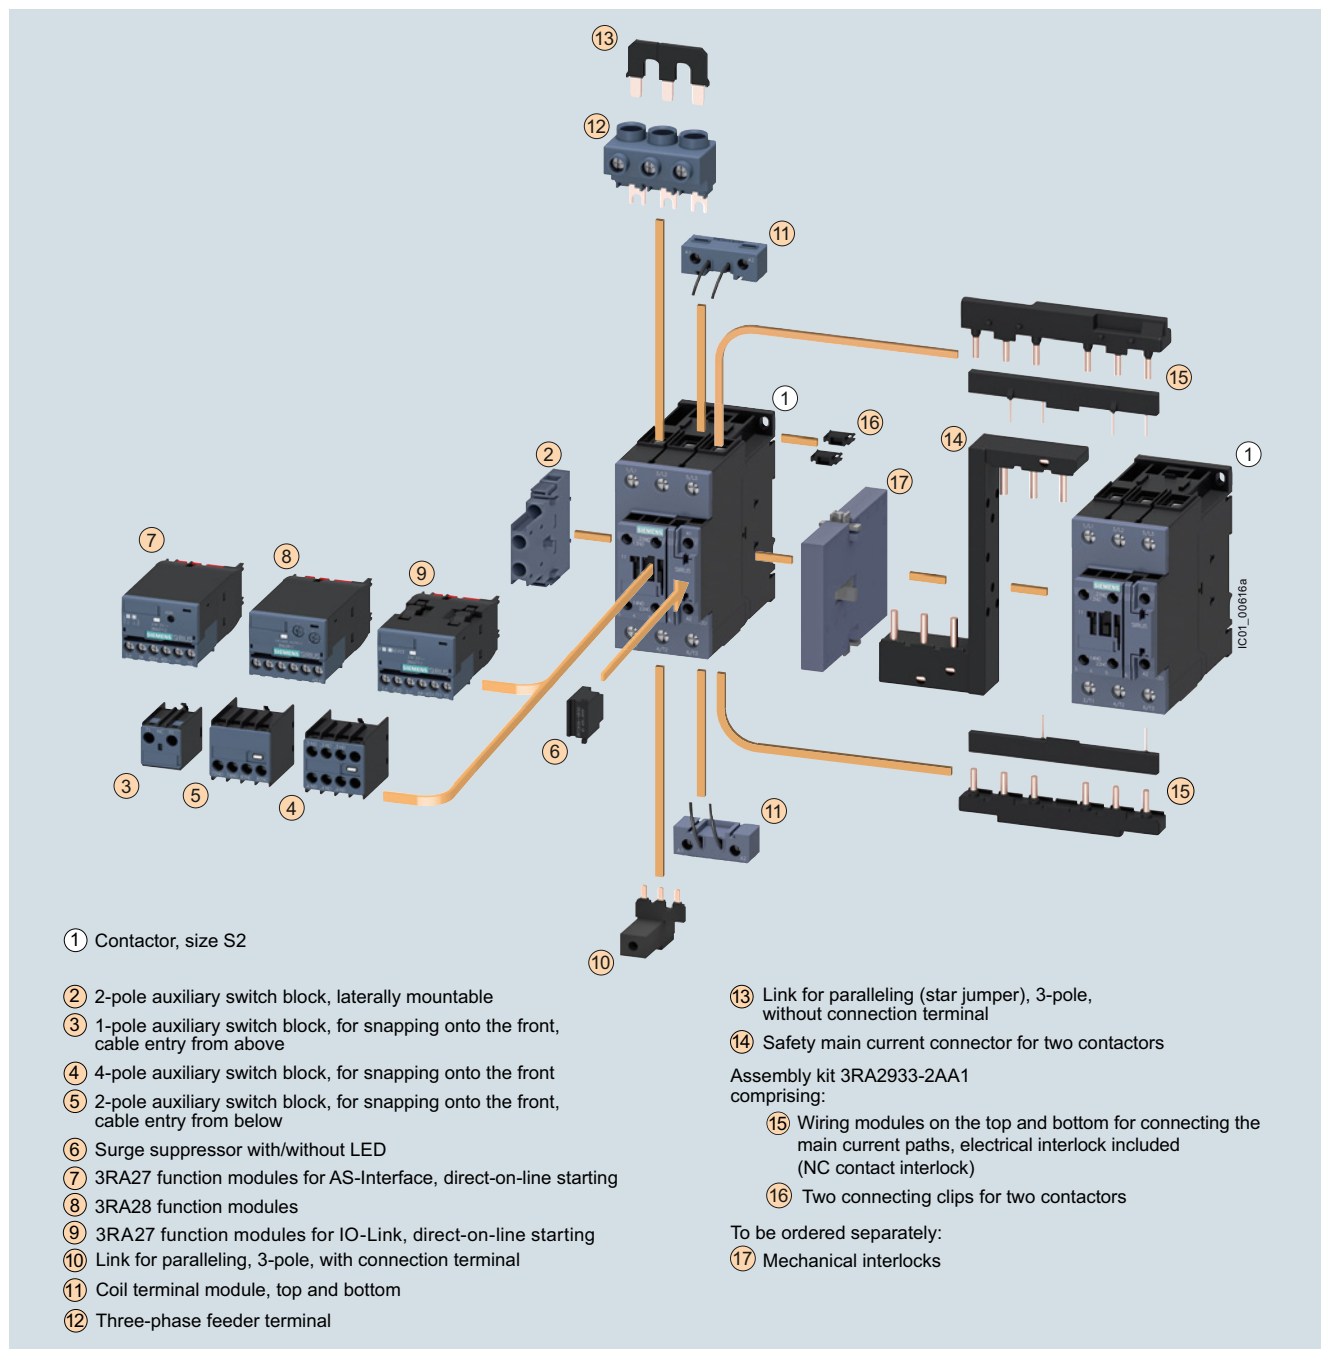

- ⑱ Wiring modules on the top and bottom for connecting the main current paths, electrical interlock included (NC contact interlock)
- ⑲ Mechanical interlocks¹⁾
- ⑳ Two connecting clips for two contactors¹⁾

● For contactors

● For contactors and coupling contactors

¹⁾ The parts ⑲ and ⑳ can only be ordered together as 3RA2912-2H mechanical connectors.

Accessories and spare parts, see pages 2/44 to 2/58.

3RT2 contactors**Size S2 with mountable accessories**

Accessories and spare parts, [see pages 2/44 to 2/58](#).

Power Contactors for Switching Motors

General data

3RT2 contactors

Size S3 with mountable accessories

① Contactor, size S3

- ② 2-pole auxiliary switch block, laterally mountable
- ③ 1-pole auxiliary switch block, for snapping onto the front, cable entry from above
- ④ 4-pole auxiliary switch block, for snapping onto the front
- ⑤ 2-pole auxiliary switch block, for snapping onto the front, cable entry from below
- ⑥ Surge suppressor with/without LED
- ⑦ 3RA27 function modules for AS-Interface, direct-on-line starting
- ⑧ 3RA28 function modules
- ⑨ 3RA27 function modules for IO-Link, direct-on-line starting

- ⑩ Links for paralleling, 3-pole, with connection terminal
- ⑪ Coil terminal module, top and bottom
- ⑫ Single-phase infeed terminals (3 units)
- ⑬ Links for paralleling (star jumper), 3-pole without connecting terminal

Assembly kit 3RA2943-2AA1 comprising:

- ⑭ Wiring modules on the top and bottom for connecting the main, auxiliary and control current paths, electrical interlock¹⁾ included, can be broken off (NC contact interlock)
- ⑮ Two connectors for two contactors

To be ordered separately:

- ⑯ Mechanical interlock

¹⁾ 3RT201. contactors with one NC contact in the basic unit are required for the electrical interlock. An additional NO contact is required for momentary-contact operation.

Accessories and spare parts, see pages 2/44 to 2/58.

3RT1 contactors

Power Contactors for Switching Motors

SIRIUS 3RT contactors, 3-pole up to 250 kW

Overview

Contactors with screw terminals: 3RT2 (sizes S00 to S3) and 3RT1 (sizes S6 to S12)

3RT contactors, sizes S00 to S12

Our power range:

- Contactors for switching motors:
 - Size S00: 3RT201 up to 7.5 kW
 - Size S0: 3RT202 up to 18.5 kW
 - Size S2: 3RT203 up to 37 kW
 - Size S3: 3RT204 up to 55 kW
 - Sizes S6 to S12: 3RT10 up to 250 kW
- For vacuum contactors for switching motors, see from page XX/X onwards:
 - Sizes S10 and S12: 3RT12 up to 250 kW
 - Size 14: 3TF6 up to 450 kW

Standards

IEC/EN 60947-1,
IEC/EN 60947-4-1,
IEC/EN 60947-5-1 (auxiliary switches)

Ambient conditions

If the devices are used in ambient conditions which deviate from common industrial conditions (IEC 60721-3-3 "Stationary Use, Weather-Protected"), information must be obtained about possible restrictions with regard to the reliability and endurance of the device and possible protective measures. In this case contact our Technical Assistance,
Tel.: +49 (911) 895-5900
E-mail: technical-assistance@siemens.com

Auxiliary contact complement

- Size S00: An auxiliary contact is integrated in the basic device.
- Sizes S0 to S3: The basic units contain two integrated auxiliary contacts (1 NO + 1 NC). All basic units, with the exception of coupling relays S00 and S0, can be expanded using auxiliary switch blocks, [see page 2/46 for the permitted selection of auxiliary switches](#).
- Sizes S6 to S12: These contactors are supplied with two laterally mounted auxiliary switch blocks. The fitting of auxiliary switches is possible on the front and on the side (the 3RT12 vacuum contactor is an exception: only lateral fitting of auxiliary switches is possible here).

For detailed information about fitting of auxiliary switches, [see pages 2/46 to 2/51](#).

Contact reliability

If voltages ≤ 110 V and currents ≤ 100 mA are to be switched, the auxiliary contacts of the 3RT contactors or 3RH contactor relays should be used as they guarantee a high level of contact reliability.

These auxiliary contacts are particularly suitable for solid-state circuits with currents ≥ 1 mA at a voltage ≥ 17 V.

Connection methodsMain circuit

- Sizes S00 and S0: screw or spring-type terminals, spring-type terminals with convenient plug-in design for device connectors
- Sizes S2 and S3: screw terminals with box terminal; direct connection to the connecting bar possible with cable lugs for S3 when the box terminal is removed.
- Sizes S6 to S12: screw terminals with connecting bars that the cables can be connected to using either cable lugs or flexible or rigid busbars. Alternatively, box terminals are available as accessories.

Auxiliary/control circuit

- Sizes S00 to S12: Screw or spring-type terminals

Electromagnetic compatibility (EMC)

The 3RT contactors fulfill the requirements for environment category A.

Note:

When the contactors are used in an environment with frequency converters, the configuration notes in the Manual "SIRIUS – SIRIUS 3RT Contactors/Contactor Assemblies" must be observed, see "More information" on page 2/15.

Short-circuit protection

Refer to the manuals for details of short-circuit protection of the contactors with overload relays; see "More information" on page 2/15.

Ratings of three-phase motors

The quoted rating (in kW) refers to the output power on the motor shaft (according to the nameplate).

The power rating specifications of the contactors in kW (in accordance with IEC 60947-4-1, Table G) are guide values for 4-pole standard motors at 50 Hz AC and specified voltage (e.g. 400 V). The actual starting and rated data of the motor to be switched must be considered when selecting the units. The motor current, motor protection device and the permissible contactor current according to the utilization category must be aligned with each other.

Contactors with voltage tap-off3RT2 contactors

The size S00 to S3 contactors with voltage tap-off are special versions for mounting the SIRIUS 3RA27 function modules for connection to the control system via IO-Link or AS-Interface (see page 2/12).

Without a function module, these contactors can be used like the standard versions.

For more information on IO-Link and AS-Interface, see Catalog IC 10 "Industrial Communication", from page 2/1 onwards.

Control supply voltage

Different versions of operating mechanisms are available depending on the contactor size:

- AC or DC operation for sizes S00 to S3
- AC/DC operating mechanism for sizes S0 to S12 that can operate on AC (50 to 60 Hz) or DC.

Operating mechanism types3RT2 contactors

3RT2 contactors are available as versions with conventional AC or DC operating mechanisms or as versions with a wide-range solid-state operating mechanism and a universal actuating voltage (AC or DC operation possible).

DC coupling contactors with reduced power consumption are also ideally suited for connection to the controller.

With an operating range between 0.8 to 1.1 x U_s , control takes place via the control supply voltage connection A1 - A2 as is typically the case.

3RT1 contactors

The following control and/or actuator versions are available in sizes S6 to S12:

- Conventional operating mechanisms
- Solid-state operating mechanisms
Overvoltage damping of the operating mechanism coil is already integrated in the electronics for contactors with solid-state operating mechanisms. The operating mechanisms are powered via a supply voltage with an operating range from 0.8 to 1.1 x U_s , optionally also controlled depending on the chosen mode of operation. Alternatively, control is via the separate 24 V DC control signal input. Various rated voltage ranges for AC/DC control are available.

The following versions are available:

- With two operating modes: Direct control or via CPU input
- As above, but additionally with remaining lifetime indication (RLT)
- With fail-safe PLC input for simplification of safety applications (without mode of operation selection)

Solenoid coils/drive units3RT2 contactors

Coil replacement is possible for sizes S0 to S3.

3RT1 contactors

The operating mechanisms for 3RT10...A/-N/-P contactors are removable and can be replaced simply by unlocking and pulling them out.

IMPORTANT: Removal or changing of the operating mechanism is not permitted for 3RT10...S contactors with fail-safe control.

Power Contactors for Switching Motors

SIRIUS 3RT contactors, 3-pole up to 250 kW

Type
Size

3RT contactors
S00 to S12

Contact endurance of the auxiliary contacts

It is assumed that the operating mechanisms are switched randomly, i.e. not synchronized with the phase angle of the supply system.

The contact endurance is mainly dependent on the breaking current.

Sizes S00 to S3

Diagram legend:

I_a = Breaking current

I_e = Rated operational current

The characteristic curves apply to:

- Integrated auxiliary contacts on 3RT20
- 3RH2911, 3RH2921 auxiliary switch blocks¹⁾

Sizes S6 to S12

Diagram legend:

I_a = Breaking current

I_e = Rated operational current

The characteristic curves apply to:

- Integrated auxiliary contacts on 3RT10
- 3RH1911, 3RH1921 auxiliary switch blocks³⁾

¹⁾ 3RH22, 3RH29, 3RT2. ...-...4, 3RT2. ...-...6: $I_e = 6$ A for AC-15/AC-14 and DC-13, 3RT2.4: $I_e = 6$ A for AC-15/AC-14.

²⁾ For laterally mountable auxiliary switch blocks, DC-13/at 24 V: max. 6 A.

³⁾ For laterally mountable auxiliary switch blocks, only the rated operational voltages up to 500 V apply.

Type **3RT2 contactors**
 Size **S00 and S0**

Contact endurance of the main contacts

The characteristic curves show the contact endurance of the contactors when switching resistive and inductive AC loads (AC-1/AC-3) depending on the breaking current and rated operational voltage. It is assumed that the operating mechanisms are switched randomly, i.e. not synchronized with the phase angle of the supply system.

The rated operational current I_e complies with utilization category AC-4 (breaking 6 times the rated operational current) and is intended for a contact endurance of approximately 200 000 operating cycles.

If a shorter contact endurance is sufficient, the rated operational current I_e /AC-4 can be increased.

If the contacts are used for mixed operation, i.e. normal switching (breaking the rated operational current according to utilization category AC-3) in combination with intermittent inching (breaking several times the rated operational current according to utilization category AC-4), the contact endurance can be calculated approximately from the following equation:

$$X = \frac{A}{1 + \frac{C}{100} \left(\frac{A}{B} - 1 \right)}$$

Characters in the equation:

- X Contact endurance for mixed operation in operating cycles
- A Contact endurance for normal operation ($I_a = I_e$) in operating cycles
- B Contact endurance for inching ($I_a = \text{multiple of } I_e$) in operating cycles
- C Inching operations as a percentage of total switching operations

Type	3RT1054	3RT1055, 3RT1056	3RT1064, 3RT1065, 3RT1066	3RT1075	3RT1076
Size	S6		S10	S12	
General data					
Permissible mounting position					
The contactors are designed for operation on a vertical mounting surface.					
Mechanical endurance	Operating cycles	10 million			
Electrical endurance		For contact endurance of the main contacts, see page 2/18 .			
Rated insulation voltage U_i (pollution degree 3)	V	1 000			
Rated impulse withstand voltage U_{imp}	kV	8			
Protective separation between the coil and the main contacts according to IEC 60947-1, Appendix N	V	690			
Mirror contacts		Yes, acc. to IEC 60947-4-1, Appendix F			
A mirror contact is an auxiliary NC contact that cannot be closed simultaneously with an NO main contact.					
Permissible ambient temperature					
• During operation	°C	-25 ... +60			
• During storage	°C	-55 ... +80			
Degree of protection acc. to IEC 60529					
• On front		IP00 (IP20 with box terminal/cover)			
• Connecting terminal		IP00 (for higher degree of protection, use additional terminal covers)			
Touch protection acc. to IEC 60529					
Finger-safe for vertical touching from the front with cover					
Shock resistance					
• Rectangular pulse	g/ms	8.5/5 and 4.2/10			
• Sine pulse	g/ms	13.4/5 and 6.5/10			
Electromagnetic compatibility (EMC)					
See page 2/13					

Power Contactors for Switching Motors

SIRIUS 3RT contactors, 3-pole up to 250 kW

Type			3RT105.	3RT106.	3RT107.
Size			S6	S10	S12
Control					
Operating range of the solenoid operating mechanism AC/DC			0.8 x $U_{s \min}$... 1.1 x $U_{s \max}$		
Power consumption of the solenoid operating mechanism (with cold coil and rated range $U_{s \min}$... $U_{s \max}$)					
• Conventional operating mechanisms					
- AC operation	Closing at $U_{s \min}$	VA/p.f.	250/0.9	490/0.9	700/0.9
	Closing at $U_{s \max}$	VA/p.f.	300/0.9	590/0.9	830/0.9
	Closed at $U_{s \min}$	VA/p.f.	4.8/0.8	5.6/0.9	7.6/0.9
	Closed at $U_{s \max}$	VA/p.f.	5.8/0.8	6.7/0.9	9.2/0.9
- DC operation	Closing at $U_{s \min}$	W	300	540	770
	Closing at $U_{s \max}$	W	360	650	920
	Closed at $U_{s \min}$	W	4.3	6.1	8.5
	Closed at $U_{s \max}$	W	5.2	7.4	10
• Solid-state operating mechanisms

¹⁾ Alternatively, the 3RT1054 contactor (55 kW) can also be supplied with busbar connections instead of box terminals. In the 8th position of the article number, the "1" must be replaced with "6" for screw terminals, e.g. 3RT1054-6N..., for spring-type terminals, the "3" must be replaced with "2", e.g. 3RT1054-2N....

Other voltages, see www.siemens.com/ic10, Chapter 3 on request.

Accessories and spare parts, see www.siemens.com/ic10, Chapter 3.

Power Contactors for Switching Motors

Accessories and Spare Parts for SIRIUS 3RT Contactors and SIRIUS 3RH2 Contactor Relays

General data

Overview

Extensive accessories and spare parts are available for SIRIUS 3RT power contactors and SIRIUS 3RH2 contactor relays.

These components are easily fitted to the contactors without the use of any tools according to requirements.

Overview graphics with mountable accessories

- For 3RT2 contactors, see pages 2/5 to 2/8
- For 3RT1 contactors, see pages 2/9 to 2/11
- For 3RH2 contactor relays, see page 2/84

Power Contactors for Switching Motors

Accessories and Spare Parts for SIRIUS 3RT Contactors and SIRIUS 3RH2 Contactor Relays

Auxiliary switch blocks, instantaneous

Selection and ordering data

Auxiliary switch: Terminal designations and identification numbers for auxiliary contacts

Terminal designations

The terminal designations are 2-digit, e.g. 13, 14, 21, 22:

- Tens digit: Sequence digit
 - Related terminals have the same sequence digit
- Units digit: Function digit
 - 1-2 for normally closed contacts (NC)
 - 3-4 for normally open contacts (NO)

Identification numbers

The identification number indicates the number and type of the auxiliary contacts, e.g. 40, 31, 22, 13:

- 1st digit: number of normally open contacts (NO)
- 2nd digit: number of normally closed contacts (NC)

Examples:

- 31 = 3 NO + 1 NC
- 40 = 4 NO

Selection aid for mountable auxiliary switch blocks for power contactors and contactor relays

The auxiliary switch blocks of the 3RH29 series for mounting on the front and side can be used for 3RT2 power contactors as well as for 3RH2 contactor relays.

The possible combinations of basic unit and mounted auxiliary switch block can be found in the tables, see pages 2/47 to 2/51.

Where the columns and lines intersect (blue and green in the example) you will find the identification number for the combination of basic unit (column) and auxiliary switch block (line).

Additional auxiliary switch blocks		3-pole contactors

Contactors for railway applications

- For SIRIUS 3RT contactors with extended operating range, 3-pole, see page 2/63
- For SIRIUS 3RH2 contactor relays with extended operating range, see page 2/68
- For 3TH4 contactor relays, 8-pole, see page 2/71
- For 3TC contactors for switching DC voltage, 2-pole, see page 2/72

Contactors for Special Applications

SIRIUS 3RT.4 contactors for resistive loads (AC-1), 3-pole

Overview

Standards

IEC 60947-1, EN 60947-1,
IEC 60947-4-1, EN 60947-4-1,
IEC 60947-5-1, EN 60947-5-1 (auxiliary switches)

The contactors are suitable for use in any climate. They are finger-safe according to IEC 60529.

3RT.4 contactors are used for switching resistive loads (AC-1) or as contactors, that normally only have to carry the current, for example for variable-speed drives.

The accessories and spare parts of the 3RT contactors can also be used here, [see from page 2/44 onwards](#).

For a general description of 3RT contactors, sizes S3 to S12, [see from page 2/5 onwards](#).

Size S3: AC or AC/DC operation

- Coil circuits (varistors, diodes, etc.) can be retrofitted
- Auxiliary switches can be retrofitted
- Main and control conductors: Screw terminals

Sizes S6 to S12: AC/DC operation (50/60 Hz AC and DC)

- Withdrawable coils with integrated coil circuit (varistor)
- Auxiliary and control conductors: Screw terminals
- Main conductors: Busbar connections

Operating mechanism types

Two types of solenoid operation are available:

- Conventional operating mechanisms
- Solid-state operating mechanisms
 - The operating mechanism for the contactors features solid-state control of the contactor coil. Overvoltage damping of the operating mechanism coil is already integrated in the electronics. The operating mechanisms are powered via a supply voltage with an operating range from 0.7 to 1.25 x U_s , optionally also controlled depending on the chosen mode of operation. Alternatively, control is via the separate 24 V DC control signal input. Various rated voltage ranges for AC/DC control are available.
 - This version is additionally available with a 24 V DC PLC relay output and a remaining lifetime indicator (RLT).

Note:

Further information on the products can be found in the Catalog IC 10 catalogue and on the Internet at www.siemens.com/sirius

¹⁾ 600 A for 3RT1476 . N. contactor

²⁾ Industrial furnaces and electric heaters with resistance heating, etc. (increased power consumption on heating up has been taken into account).

Overview

Standards

IEC 60947-4-1, EN 60947-4-1,
IEC 60077-2, EN 60077-2

The contactors are finger-safe according to IEC 60529 (exception: S3 series resistor). The auxiliary conductor and coil terminals are all spring-type terminals.

Ambient temperature

The permissible ambient temperature for operation of the contactors (across the full coil operating range) is -40 to +70 °C.

Performance range

3RT contactors are available in all sizes from S00 to S12 up to 250 kW or 500 A (AC-3 at 400 V).

Operating range of contactor operating mechanisms

Sizes S00 to S3

The solenoid coils of the 3RT2 contactors have an extended coil operating range from max. 0.7 to 1.25 x U_s and are fitted as standard with surge suppressors. The opening delay is consequently 2 to 5 ms longer than for standard contactors.

Sizes S6 to S12

The operating mechanism for the 3RT10 contactors features solid-state control of the contactor coil. Overvoltage damping of the operating mechanism coil is already integrated in the electronics. The operating mechanisms are powered via a supply voltage with an operating range of 0.7 to 1.25 x U_s , optionally also controlled depending on the chosen mode of operation. Alternatively, control is via the separate 24 to 110 V DC control signal input.

Three rated voltage ranges are available as direct voltage (DC):

- 24 V DC
- 72 V DC
- 110 V DC

Application

Besides standard approval in compliance with IEC 60974-4-1, the contactors with an extended operating range are also approved in compliance with IEC 60077-2, thus fulfilling the requirement for use in railway applications.

Thus, their suitability for increased requirements such as an

- extended temperature range in comparison with the regular standard IEC 60497-4-1 or
- extended operating range of the solenoid coils or also
- increased resistance to mechanical oscillations and vibrations is warranted. The design of the terminals in the spring-type connection system also contributes toward vibration resistance.

3RT20 contactors with conventional coil

Control and auxiliary circuits

These contactors have an extended operating range from 0.7 to 1.25 x U_s ; on size S00 the coils are fitted with suppressor diodes, on size S0 with varistors. An additional series resistor is not required.

Note:

An additional auxiliary switch block cannot be mounted.

Side-by-side mounting

A clearance of 10 mm is required for side-by-side mounting at ambient temperatures > 60 °C ≤ 70 °C.

3RT201 contactors with series resistor

Control and auxiliary circuits

The solenoid coils of these contactors have an extended coil operating range from 0.7 to 1.25 x U_s (exception 3RT204.-X...-0LA2: 0.7 to 1.2 x U_s) and are fitted as standard with a surge suppressor (suppressor diode or varistor as preferred).

The DC solenoid systems of the contactors are modified (to holding excitation) by means of a series resistor.

3RT201 to 3RT204 contactors with solid-state operating mechanism, extended operating range

Control and auxiliary circuits

The solenoid coils of these contactors have an extended coil operating range from 0.7 to 1.25 x U_s (exception 3RT204.-X...-0LA2: 0.7 to 1.2 x U_s) and are fitted as standard with varistors to provide protection against overvoltage.

The contactors are energized via upstream control electronics which ensure the coil operating range of 0.7 to 1.25 x U_s at an ambient temperature of 70 °C. They are supplied as complete units with integrated coil electronics. A varistor is integrated for damping opening surges in the coil.

The possibility of mounting auxiliary switches is the same as that for equivalent standard contactors for switching motors in the matching size (see overview diagrams of the 3RT20 contactors from page 2/5 onwards).

Side-by-side mounting

With these contactor versions in sizes S00 and S0, side-by-side mounting is permitted at ambient temperatures up to 70 °C.

¹⁾ It is not possible to mount an auxiliary switch block. A clearance of 10 mm is required for side-by-side mounting at ambient temperatures > 60 °C.

²⁾ One 4-pole auxiliary switch block according to EN 50005 can be mounted from -40 to 70 °C; no clearance required.

³⁾ NC contact cannot be used because it is used for switching of the series resistor.

Accessories and spare parts, see page 2/44 onwards.

Accessories and spare parts, see page 2/44 onwards.

Contactors for Special Applications

Contactors for Railway Applications

SIRIUS 3RH2 contactor relays with extended operating range

Overview

DC operation

IEC 60947-4-1, EN 60947-4-1

The contactor relays are finger-safe according to IEC 60529. The size S00 contactor relays have spring-type connections for all terminals.

Ambient temperature

The permissible ambient temperature for operation of the contactor relays (across the full coil operating range) is -40 to +70 °C.

Uninterrupted duty at temperatures > +60 °C reduces the mechanical endurance, the current carrying capacity of the conducting paths and the switching frequency.

Control and auxiliary circuits

The solenoid coils of the contactor relays have an extended coil operating range from 0.7 to 1.25 x U_s and are fitted as standard with surge suppressors. The opening delay is consequently 2 to 5 ms longer than for standard contactors.

Application

For operation in installations which are subject both to considerable variations in the control voltage and to high ambient temperatures, e.g. railway applications under extreme climatic conditions, rolling mills, etc.

Also for control supply voltages with battery buffering to extend the operating time in the event of battery charge failure.

Contactor relays with conventional coil

Control and auxiliary circuits

These contactor relays have an extended operating range from 0.7 to 1.25 x U_s ; the coils are fitted with suppressor diodes as standard. An additional series resistor is not required.

Note:

An additional auxiliary switch block cannot be mounted.

Side-by-side mounting

A clearance of 10 mm is required for side-by-side mounting at ambient temperatures > 60 °C ≤ 70 °C.

Contactor relays with series resistor

Control and auxiliary circuits

The DC solenoid systems of the contactor relays are modified (to holding excitation) by means of a series resistor.

The size S00 contactor relays are supplied prewired with a plug-on module containing the series resistor. A surge suppressor (a suppressor diode or varistor as preferred) is integrated.

A 4-pole auxiliary switch block (according to EN 50005) can be fitted additionally.

Side-by-side mounting

Side-by-side mounting is permissible at ambient temperatures up to 70 °C.

Contactor relays with solid-state operating mechanism

Control and auxiliary circuits

The solenoid coils of these contactor relays have an extended coil operating range from 0.7 to 1.25 x U_s and are fitted as standard with varistors to provide protection against overvoltage.

The contactor relays are energized via upstream control electronics which ensure the coil operating range of 0.7 to 1.25 x U_s at an ambient temperature of 70 °C. They are supplied as complete units with integrated coil electronics. A varistor is integrated for damping opening surges in the coil.

Overview

Standards

IEC 60947-4-1, EN 60947-4-1

The contactor relays are finger-safe according to IEC 60529. Terminal covers may have to be fitted onto the connecting bars, depending on the configuration with other devices.

Ambient temperature

The permissible ambient temperature for operation of the contactors (across the full coil operating range) is

-50 to +70 °C. Uninterrupted duty at temperatures < -25 °C and > +55 °C reduces the mechanical endurance, the current carrying capacity of the conducting paths and the switching frequency.

A clearance of 10 mm is required for side-by-side mounting at ambient temperatures > 55 °C. There is no need to reduce the technical specifications.

Application

For operation in installations which are subject both to considerable variations in the control voltage and to high ambient temperatures, e.g. in railway applications.

Control and auxiliary circuits

The solenoid coils of the contactor relays have an extended coil operating range from 0.7 to 1.25 x U_s and are fitted as standard with varistors to provide protection against overvoltage. The opening delay is consequently 2 to 5 ms longer than for standard contactors.

Contactors for Special Applications

Contactors for Railway Applications

3TC contactors for switching DC voltage, 2-pole

Overview

Standards

IEC 60947-4-1, EN 60947-4-1

The contactors are finger-safe according to IEC 60529 (exception: series resistor). Terminal covers may have to be fitted onto the connecting bars, depending on the configuration with other devices.

All specifications and technical specifications not mentioned here are identical to those of the standard 3TC contactors.

Ambient temperature

The permissible ambient temperature for operation of the contactors (across the full coil operating range) is -50 to +70 °C. Uninterrupted duty at temperatures < -25 °C and > +55 °C reduces the mechanical endurance, the current carrying capacity of the conducting paths and the switching frequency.

At ambient temperatures > 55 °C, a clearance of 10 mm is required for side-by-side mounting of size 2 contactors. There is no need to reduce the technical specifications.

Ratings of three-phase motors

The quoted rating (in kW) refers to the output power on the motor shaft (according to the nameplate).

The power rating specifications of the contactors in kW are guide values for 4-pole standard motors at 50 Hz AC and specified voltage (e.g. 400 V). The actual starting and rated data of the motor to be switched must be considered when selecting the units.

Series resistor

The DC solenoid systems of the 3TC contactors must be modified (to hold-in coil) by means of a series resistor. This series resistor is supplied separately packed with the contactors.

With types 3TC48, the series resistor must be attached onto the right-hand side of the auxiliary switch block by means of the enclosed mounting parts and sets of links provided, while in the case of the 3TC44 it must be mounted and wired between the contactor poles. With types 3TC52 and 3TC56, the series resistor must be attached separately next to the contactors.

Auxiliary contacts

The contactors are equipped with two lateral auxiliary switch blocks each with 1 NO + 1 NC contact. Further auxiliary switch blocks cannot be fitted to the DC-operated contactors.

One NC contact is required for the series resistor function. Two NO contacts and one NC contact are thus freely available.

Reversing contactors

With the 3TC52 and 3TC56 contactors, the series resistor must be connected using an additional K2 reversing contactor (3RT1317-1F.40). This contactor is automatically included in the scope of supply in the same packaging as the contactor.

Dimensions

Attaching resistors and varistors increases the width of the contactors.

Application

For operation in installations which are subject both to considerable variations in the control voltage and to high ambient temperatures, e.g. in railway applications.

Control and auxiliary circuits

The solenoid coils of the contactors have an extended coil operating range from 0.7 to $1.25 \times U_s$ and are fitted as standard with varistors to provide protection against overvoltage. The opening delay is consequently 2 to 5 ms longer than for standard contactors.

All spare parts not mentioned here are identical to those of the basic units of the 3TC contactors, see [page 2/78](#).

Overview

3TC4 and 3TC5

IEC 60947-1, EN 60947-1,
IEC 60947-4-1, EN 60947-4-1,
IEC 60947-5-1, EN 60947-5-1 (auxiliary switches)

The contactors are finger-safe according to IEC 60529. Terminal covers may have to be fitted onto the connecting bars, depending on the configuration with other devices.

The DC motor ratings given in the tables are applicable to the DC-3 and DC-5 utilization categories with two-pole switching of the load or with the two conducting paths of the contactor connected in series.

One contactor conducting path can switch full power up to 220 V. For voltages over 220 V, the two conducting paths are to be switched in series, see "Rated data of the main contacts", page 2/73.

Auxiliary contacts

The contactors are equipped with two lateral auxiliary switch blocks each with 1 NO + 1 NC contact. On the contactors 3TC48 to 3TC56 with AC operation, a second auxiliary switch block can be mounted on the right and left. On contactors with DC operation, expansion of the auxiliary contacts is not possible.

3TC7

IEC 60947-4-1, EN 60947-4-1

The contactors are suitable for use in any climate. They are suitable for switching and controlling DC motors as well as all other DC circuits.

The solenoid excitation is configured for a particularly large operating range. It is between 0.7 or 0.8 and $1.2 \times U_s$.

3TC74 contactors can be used at up to 750 V/400 A and 50 Hz in AC-1 operation.

For voltages over 750 V, the two conducting paths (3TC74: two contactors) are to be switched in series, see "Rated data of the main contacts", page 2/76.

Application

The contactors are suitable for switching and controlling DC motors as well as all other DC circuits.

A version with an especially large actuating voltage is available for operation in electrically driven vehicles and in switchgear with a particularly large coil operating range (see page 2/80).

Overview

Contactor relays
Size S00 with accessories

Contactors Relays

SIRIUS 3RH2 contactor relays, 4-pole and 8-pole

Standards

IEC 60947-1, EN 60947-1,
IEC 60947-4-1, EN 60947-4-1,
IEC 60947-5-1, EN 60947-5-1

The 3RH2 contactor relays are available with screw or spring-type terminals. The basic unit contains four contacts with terminal designations according to EN 50011.

The 3RH2 contactor relays are suitable for use in any climate. They are finger-safe according to IEC 60529.

The 3RH21 coupling contactor relays for switching auxiliary circuits are tailored to the special requirements of working with electronic controls.

Contact reliability

High contact stability at low voltages and currents, suitable for solid-state circuits with currents ≥ 1 mA at a voltage of ≥ 17 V.

Surge suppression

RC elements, varistors, diodes or diode assemblies (combination of a diode and a Zener diode) can be plugged onto all 3RH2 contactor relays from the front for damping opening surges in the coil. The plug-in direction is determined by a coding device.

Coupling contactor relays have a low power consumption and an extended solenoid coil operating range.

Depending on the version, the solenoid coils of the coupling contactor relays are supplied without overvoltage damping (versions 3RH21...-HB40 or 3RH21...-MB40-OKT0) or with a diode or suppressor diode connected as standard.

Accessories

The accessories for the 3RT2 contactors in size S00 can also be used for the 3RH2 contactor relays (see from page 2/44 onwards).

Auxiliary switch blocks

The 3RH21 contactor relays (with the exception of coupling contactor relays) can be expanded by up to four contacts by the addition of mounted auxiliary switch blocks.

The auxiliary switch block can easily be snapped onto the front of the contactor relays. The auxiliary switch block has a centrally positioned release lever for disassembly.

The conventional front auxiliary contacts fulfill the characteristics of positively driven operation and are therefore suitable for safety applications.

Contactor relays
3RH2
S00

Permissible mounting position

The contactor relays are designed for operation on a vertical mounting surface.

Upright mounting position

Special version required

with the exception of 3RH21*X* and 3RT201*X*

Positively-driven operation of contacts in contactor relays

3RH2:

Yes, in the basic unit and the auxiliary switch block as well as between the basic unit and the front-mounted auxiliary switch block (removable) according to:

- ZH1/457
- IEC 60947-5-1, Appendix L

3RH22:

Yes, in the basic unit and the auxiliary switch block as well as between the basic unit and the mounted auxiliary switch block (permanently mounted) according to:

- ZH1/457
- IEC 60947-5-1, Appendix L

Note:

3RH2911-.NF. solid-state compatible auxiliary switch blocks have no positively-driven contacts.

Explanations:

There is positively-driven operation if it is ensured that the NC and NO contacts cannot be closed at the same time.

ZH1/457

Safety Rules for Controls on Power-Operated Metalworking Presses.

IEC 60947-5-1, Appendix L

Low-voltage switchgear and controlgear, control circuit devices and switching elements; special requirements for positively-driven contacts

Contact reliability

Contact reliability at 17 V, 1 mA acc. to IEC 60947-5-4

Frequency of contact faults $< 10^{-8}$, i.e. < 1 fault per 100 million operating cycles

Contact endurance for AC-15/AC-14 and DC-13 utilization categories

The contact endurance is mainly dependent on the breaking current. It is assumed that the operating mechanisms are switched randomly, i.e. not synchronized with the phase angle of the supply system.

If magnetic circuits other than the contactor coil systems or solenoid valves are present, e.g. magnetic brakes, protective measures for the load circuits are necessary, e.g. in the form of RC elements and freewheel diodes.

The characteristic curves apply to:

- 3RH21/3RH22 contactor relays¹⁾
- 3RH24 latched contactor relays
- 3RH2911 auxiliary switch blocks¹⁾
- Auxiliary switch blocks for snapping onto the front, max. 4-pole, and for mounting onto the side in size S00

Diagram legend:

I_a = Breaking current

I_e = Rated operational current

¹⁾ 3RH22, 3RH2911: $I_e = 6$ A for AC-15/AC-14 and DC-13.

Overview

Standards

IEC 60947-1, EN 60947-1,
IEC 60947-5-1, EN 60947-5-1

The 3TH42 and 3TH43 contactor relays are suitable for use in any climate. They are finger-safe according to IEC 60529.

Note:

The 3TH42 and 3TH43 contactor relays feature positively-driven operation in accordance with IEC 60947-5-1, Ed. 3.1.

Terminal designations according to EN 50011

In terms of their terminal designations, identification numbers and identification letters, the 3TH42 and 3TH43 contactor relays conform to the standard EN 50011 for particular contactor relays.

Contact reliability

High contact stability at low voltages and currents as a result of double-break contacts, suitable for solid-state circuits with currents ≥ 1 mA at a voltage of ≥ 17 V.

Surge suppression

The 3TH42 and 3TH43 contactor relays can be equipped with RC elements, varistors, diodes or diode assemblies (combination of a diode and a Zener diode) for damping opening surges. The surge suppressors can be mounted directly on the coil (see page 2/97).

Note:

The OFF-delay times of the NO contacts and the ON-delay times of the NC contacts increase if the contactor coils are attenuated against voltage peaks (suppression diode 6x to 10x; diode assembly 2x to 6x, varistor +2 to 5 ms).

Mounting

Note:

With 3TH4 contactor relays with AC operation, an overvoltage of $1.1 \times U_s$, an ambient temperature ≥ 45 °C and 100% ON-period of all contactors, a minimum clearance of 5 mm between the contactors shall be observed in the case of side-by-side mounting.

Technical specifications

Contactor relays

Type **3TH42, 3TH43**

Contact endurance for AC-15/AC-14 and DC-13 utilization categories

The contact endurance is mainly dependent on the breaking current. It is assumed that the operating mechanisms are switched randomly, i.e. not synchronized with the phase angle of the supply system.

If magnetic circuits other than the contactor coil systems or solenoid valves are present, e.g. magnetic brakes, protective measures for the load circuits are necessary.

RC elements or freewheel diodes are suitable as protective measures for the circuits.

Coupling Relays

SIRIUS 3RQ3 coupling relays, narrow design

Overview

SIRIUS 3RQ3 coupling relays

SIRIUS 3RQ3 coupling relays in narrow design are used for coupling control signals from and to a controller, and they are available in different versions:

- Coupling relays with relay output (not plug-in)
- Coupling relays with plug-in relays
- Coupling relays with semiconductor output (not plug-in)

Coupling relays with relay output (not plug-in)

AC and DC operation

IEC 60947-5-1, EN 60947-5-1

The input and output coupling relays differ with regard to the positioning of the terminals and the LEDs.

Coupling relays with plug-in relays

AC and DC operation

IEC 60947-1

The coupling relays are plug-in, so the relay can be replaced quickly at the end of its service life without detaching the wiring.

Coupling relays with semiconductor output (not plug-in)

AC and DC operation

IEC 60947-1, EN 60664-1 and EN 50005;
coupling relays with semiconductor output: EN 60747-5;
Programmable controllers: IEC 61131-2

The input and output coupling relays differ with regard to the positioning of the terminals and the LEDs.

The coupling relays with semiconductor output have extremely high contact reliability, so they are especially suitable for electronic systems.

For test purposes, versions are available with manual-0-automatic switches.

For your orders, please use the article numbers quoted in the selection and ordering data.

Coupling Relays

SIRIUS 3RQ3 coupling relays, narrow design

Benefits

General

- All versions with screw or spring-type terminals (push-in technology)
- TOP wiring with spring-type terminals (push-in) for quick and reliable wiring
- Reduced space requirement in the control cabinet thanks to a consistent width of 6.2 mm
- Reduced inventory due to fewer variants
- Clearly visible functional state of the coupling relay by green LED
- Integrated reverse polarity protection and EMC arc-suppression diode
- Standardized accessories across the entire 3RQ3 series
- Universal bridging option using connecting combs for all terminals
- Galvanic isolation plate for isolating different voltages for neighboring units
- Clip-on labels available as set for individual labeling

Coupling relays with relay output (not plug-in)

- Permanently soldered relays for enhanced contact reliability
- Device variants with hard gold-plated contacts, hence high contact reliability at low currents

Coupling relays with plug-in relays

- Fast replacement of the relays with existing wiring
- Tested complete units → lower assembly time
- Individual relays available as spare parts
- Device variants with hard gold-plated contacts, hence high contact reliability at low currents

Coupling relays with semiconductor output (not plug-in)

- Long service life since there is no mechanical wear
- High switching frequency thanks to short make-break times
- Vibration-resistant
- No contact bounce
- Extremely high contact reliability
- Noise-free switching
- Low control power required
- Switching of DC and capacitive loads

Application

- Electrical separation between the input and output circuit
- Adjustment of different signal levels
- Signal amplification

Application example motor controller

Coupling Relays

SIRIUS 3RQ2 coupling relays with industrial enclosure

Overview

SIRIUS 3RQ2 coupling relays, screw terminals, 3 changeover contacts

More information

Homepage, see <https://www.siemens.com/relais>

Industry Mall see www.siemens.com/product?3RQ2

Conversion tool, e.g. from 3RS181 to 3RQ3, see <http://www.siemens.com/sirius/conversion-tool>

3RQ2 coupling relays in their 22.5 mm industrial enclosure serve to couple control signals to and from a controller and replace the 3RS18 coupling relays. The 3RQ2 has an impressively high-quality industrial enclosure finished in modern titanium gray so that it fits in visually with the SIRIUS series of relays.

The series consists of devices with up to three changeover contacts with screw or spring-type terminals (push-in) and, with its wide voltage range from 24 to 240 V AC/DC, is a genuine highlight in the coupling relay market.

Thanks to terminal assignment that is identical to the previous version, existing products can easily be converted.

The reduced variety of components simplifies product selection and standardization.

Numerous accessories are available for the 3RQ2 coupling relays, for example replacement terminals, push-in lugs for wall mounting and coding pins.

Note:

The Article No. scheme shows an overview of product versions for better understanding of the logic behind the article numbers.

For your orders, please use the article numbers quoted in the selection and ordering data.

Benefits

- Permanent wiring due to removable terminals in screw or spring-type technology (push-in)
- Replacement of individual terminals minimizes wiring effort
- A product for all voltages from 24 to 240 V AC/DC
- Reduced costs thanks to fewer versions
- Especially high contact reliability even at low currents thanks to versions with hard gold-plated contacts
- International standards and certifications including CE, UL/CSA, EAC and confirmations for rail, and more

Application

- Galvanic isolation between input and output circuit
- Signal amplification
- Adjustment of different signal levels
- Contact multiplication

Power regulators	<ul style="list-style-type: none"> • The power regulator regulates the current by means of a solid-state switching device depending on a setpoint value. Closed-loop control: full-wave control or generalized phase control. 	3RF29.0-0HA..	2/140

Use of SIRIUS solid-state switching devices for switching motors in conjunction with IE3/IE4 motors

Note:

When using SIRIUS solid-state switching devices for switching motors in conjunction with highly energy-efficient IE3/IE4 motors, please observe the information on dimensioning and configuring, see "Configuration Manual for SIRIUS Controls with IE3 Motors", <https://support.industry.siemens.com/cs/ww/en/view/94770820>.

SIRIUS 3RF solid-state switching devices

Three-phase solid-state contactor and single-phase solid-state relay

The SIRIUS 3RF2 solid-state switching devices reliably switch a wide range of different loads with alternating voltages in 50 and 60 Hz systems.

SIRIUS 3RF2 solid-state switching devices for resistive loads:

- Solid-state relays
- Solid-state contactors
- Function modules

SIRIUS 3RF3 solid-state switching devices for switching motors:

- Solid-state contactors
- Solid-state reversing contactors

SIRIUS 3RF2 – for almost unending activity

Conventional electromechanical controlgear is often overtaxed by the rise in the number of switching operations. A high switching frequency results in frequent failure and short replacement cycles. However, this does not have to be the case, because with the latest generation of our SIRIUS 3RF2 solid-state switching devices we provide you with solid-state relays and contactors with a particularly long endurance – for almost unending activity even under the toughest conditions and under high mechanical load, but also in noise-sensitive areas.

Proven time and again in service

SIRIUS 3RF2 solid-state switching devices have firmly established in industrial applications. They are used above all in applications where loads are switched frequently – mainly with resistive load controllers, with the control of electrical heat or the control of valves and motors in conveyor systems. In addition to its use in areas with high switching frequencies, their silent switching means that SIRIUS is also ideally suited for use in noise-sensitive areas, such as offices or hospitals.

The most reliable solution for any application

Compared to mechanical controlgear, our SIRIUS 3RF2 solid-state switching devices stand out due to their considerably longer service life. Thanks to the high product quality, their switching is extremely precise, reliable and, above all, insusceptible to faults. With its variable connection methods and a wide spread of control voltages, the SIRIUS 3RF2 family is universally applicable. Depending on the individual requirements of the application, our modular controlgear can also be quite easily expanded by the addition of standardized function modules.

Ideal for operation with heating control systems

The 3RF2 solid-state switching devices can be used for example in the SIPLUS HCS3001 heating control system. They are optimally connected to the digital output module of the HCS3001

by means of preassembled cables. This saves considerable wiring outlay in the control circuit and shortens mounting time.

The HCS3001 is a modular heating control system for the optimization of plastic processing machines. It enables individual solutions for many different heating control applications. With each basic unit it is possible to use up to four 6-channel digital outputs to control solid-state switching devices and four 4-channel temperature measuring modules. Current or current-and-voltage measuring modules can be used to monitor the loads. Communication with the higher-level control system is performed via PROFIBUS DP.

SIPLUS heating control system

Also for switching motors

In order to achieve higher productivity, the switching frequency is continuously increased. It is no problem for our SIRIUS solid-state contactors to switch motors. With three-phase motors up to 7.5 kW, they can reliably withstand even the highest switching frequencies. Even a continuous change in the direction of rotation is possible with the solid-state reversing contactors. Both versions can be perfectly combined with components from the SIRIUS modular system. Connecting with SIRIUS motor starter protectors or SIRIUS overload relay can be implemented without any further steps.

Always on the sunny side with SIRIUS

Because SIRIUS 3RF2 offers even more:

- The space-saving and compact side-by-side mounting ensure reliable operation up to an ambient temperature of +60 °C.
- Thanks to fast configuration and the ease of mounting and start up, you save not only time but also expenses.

Connection methods

The solid-state switching devices are available with screw terminals (box terminals), spring-type terminals or ring terminal lugs.

-  Screw terminals
-  Spring-type terminals
-  Ring terminal lug connection

The terminals are indicated in the corresponding tables by the symbols shown on orange backgrounds.

Note:

The Article No. scheme shows an overview of product versions for better understanding of the logic behind the article numbers.

For your orders, please use the article numbers quoted in the selection and ordering data.

Benefits

Features

- Considerable space savings thanks to a width of only 22.5 mm
- Variety of connection methods: Screw terminal, spring-type connection or ring terminal lug, there is no problem – they are all finger-safe
- Flexible for all applications with function modules for retrofitting
- Possibility of fuseless short-circuit proof design

Benefits

- Saves time and costs with fast mounting and commissioning, short start up times and easy wiring
- Extremely long life, low maintenance, rugged and reliable
- Space-saving and safe thanks to side-by-side mounting up to an ambient temperature of +60 °C
- Modular design: Standardized function modules and heat sinks can be used in conjunction with solid-state relays to satisfy individual requirements
- Safety due to lifelong, vibration-resistant and shock-resistant spring-type terminal connection method even under tough conditions

Application

Applications

Example: Plastics processing industry

Thanks to their high switching endurance SIRIUS 3RF2 solid-state switching devices are ideal for controlling electrical heat. This is because the more precise the temperature regulation process has to be, the higher the switching frequency. The accurate regulation of electrical heat is used for example in many processes in the plastics processing industry:

- Band heaters heat the extrudate to the correct temperature in plastic extruders
- Heat emitters heat plastic blanks to the correct temperature
- Heat drums dry plastic granules
- Heating channels keep molds at the correct temperature in order to manufacture different plastic parts without defects

The powerful SIRIUS 3RF2 solid-state relays and contactors can be used for the simultaneous control of several heating loads. By using a load monitoring module the individual partial loads can easily be monitored, and in the event of a failure a signal is generated to be sent to the controller.

Solid-State Switching Devices for Resistive/Inductive Loads

General data

Use in fuseless load feeders

Compared with the fused configuration of load feeders, short circuit and line protection using miniature circuit breakers is easy to achieve with SIRIUS 3RF2 solid-state relays and contactors.

A special version of the solid-state contactors can be protected against damage in the case of a short circuit with a miniature circuit breaker with type B tripping characteristic. This allows the low-cost and simple design of fuseless load feeders with full protection of the switchgear.

More information

Notes on integration in the load feeders

The SIRIUS solid-state switching devices are very easy to integrate into the load feeders thanks to their industrial connection method and design.

Particular attention must however be paid to the circumstances of the installation and ambient conditions, as the performance of the solid-state switching devices is largely dependent on these. Depending on the version, certain restrictions must be observed. Detailed information in relation to solid-state contactors, e.g. on minimum spacing, and in relation to solid-state relays on the choice of heat sink can be found in the technical specifications and in the product data sheets, see <https://support.industry.siemens.com/cs/ww/en/ps/16222>.

Short-circuit and overload protection

Despite the rugged power semiconductors that are used, solid-state switching devices respond more sensitively to short-circuits in the load feeder. Consequently, special precautions have to be taken against destruction, depending on the type of design.

Siemens generally recommends using SITOP solid-state protection fuses. These fuses also provide protection against destruction in the event of a short circuit even when the solid-state contactors and solid-state relays are fully utilized.

Alternatively, if there is lower loading, protection can also be provided by standard fuses or miniature circuit breakers. This protection is achieved by overdimensioning the solid-state switching devices accordingly. The technical specifications and the product data sheets contain details both about the solid-state fuse protection itself and about use of the devices with conventional protection equipment.

Electromagnetic compatibility (EMC)

The solid-state switching devices are suitable for interference-free operation in industrial networks without further measures. If they are used in public networks, it may be necessary for conducted interference to be reduced by means of filters.

This does not include the solid-state contactors for resistive loads of the special type 3RF23...-CA.. "Low Noise". These comply with the class B limit values up to a rated current of 16 A. If other versions are used, and at currents of over 16 A, standard filters can be used in order to comply with the limit values. The decisive factors when it comes to selecting the filters are essentially the current loading and the other parameters (operational voltage, design type, etc.) in the load feeder.

Suitable filters can be ordered from EPCOS AG. For more information, see www.epcos.com.

Product information and technical specifications

For product data sheets with detailed technical specifications, dimensional drawings and characteristic curves, see <https://support.industry.siemens.com/cs/ww/en/ps/16222>.

For additional information, please enter the article number of the required device under the tab "Product List".

Overview

Solid-state relays (without heat sink)

SIRIUS solid-state relays are suitable for surface mounting on existing cooling surfaces. Mounting is quick and easy, involving just two screws. The special technology of the power semiconductor ensures there is excellent thermal contact with the heat sink. Depending on the nature of the heat sink, the capacity reaches up to 88 A on resistive loads.

The solid-state relays are available in three different versions:

- 3RF21 single-phase solid-state relay with a width of 22.5 mm
- 3RF20 single-phase solid-state relay with a width of 45 mm
- 3RF22 three-phase solid-state relay with a width of 45 mm

The 3RF21 and 3RF22 solid-state relays can be expanded with various function modules to adapt them to individual applications.

Version for resistive loads "zero-point switching"

This standard version is often used for switching space heaters on and off.

Version for inductive loads "instantaneous switching"

In this version the solid-state relay is specifically matched to inductive loads. Whether it is a matter of frequent actuation of the valves in a filling plant or starting and stopping small operating mechanisms in packet distribution systems, operation is carried out safely and noiselessly.

Special "low noise" version

Thanks to a special control circuit, this special version can be used in public networks up to 16 A without any additional measures such as interference suppressor filters. As a result, in terms of emitted interference, it conforms to limit value curve class B according to IEC 60947-4-3.

Single-phase solid-state relays with a width of 22.5 mm

With its compact design and a width of just 22.5 mm, which is not exceeded even for currents of up to 88 A, the 3RF21 solid-state relay offers an ultra-small footprint. The logical connection method, with the power infeed from above and load connection from below, ensures tidy installation in the control cabinet.

Single-phase solid-state relays with a width of 45 mm

The solid-state relays with a width of 45 mm provide for connection of the power supply lead and the load from above. This makes it easy to replace existing solid-state relays in existing arrangements. The connection of the control cable is as space-saving as the 22.5 mm design, as it is simply plugged on.

Three-phase solid-state relays with a width of 45 mm

With its compact design and a width of just 45 mm, which stays the same even at currents of up to 55 A, the 3RF22 solid-state relay offers an ultra small footprint. The logical connection method, with the power infeed from above and load connection from below, ensures tidy installation in the control cabinet.

The three-phase solid-state relays are available with

- Two-phase control (suitable in particular for circuits without connection to the neutral conductor) and
- Three-phase control (suitable for star circuits with connection to the neutral conductor or for applications in which the system requires all phases to be switched)

Selection notes

When selecting solid-state relays, in addition to information about the network, the load and the ambient conditions it is also necessary to know details of the planned design. The solid-state relays can only conform to their specific technical specifications if they are mounted with appropriate care on an adequately dimensioned heat sink.

Mounting solid-state relays directly on a mounting plate made of sheet steel is inadequate in terms of heat dissipation.

The following procedure is recommended:

- Determine the rated current of the load and the mains voltage
- Select the relay design and choose a solid-state relay with higher rated current than the load
- Determine the thermal resistance of the proposed heat sink
- Check the correct relay size with the aid of the diagrams

Solid-State Switching Devices for Resistive/Inductive Loads

Solid-State Relays

SIRIUS 3RF20 solid-state relays, single-phase, 45 mm

Overview

Single-phase solid-state relays (without heat sink) with a width of 45 mm

The solid-state relays with a width of 45 mm provide for connection of the power supply lead and the load from above. This makes it easy to replace existing solid-state relays in existing arrangements.

The connection of the control cable is as space-saving as the 22.5 mm design, as it is simply plugged on.

Solid-State Switching Devices for Resistive/Inductive Loads

Solid-state Contactors

General data

Overview

Solid-state contactors (with integrated heat sink)

The complete units consist of a solid-state relay plus optimized heat sink, and are therefore ready to use. They offer defined rated currents to make selection as easy as possible. Depending on the version, current intensities of up to 70 A are achieved. Like all of our solid-state switching devices, one of their particular advantages is their compact and space-saving design.

With their insulated mounting foot they can easily be snapped onto a standard mounting rail, or they can be mounted on support plates with fixing screws. This insulation enables them to be used in circuits with protective extra-low voltage (PELV) or safety extra-low voltage (SELV) in building management systems. For other applications, such as for extended personal safety, the heat sink can be grounded through a screw terminal.

The solid-state contactors are available in 2 different versions:

- 3RF23 single-phase solid-state contactors

Single-phase versions

The 3RF23 solid-state contactors can be expanded with various function modules to adapt them to individual applications.

Version for resistive loads "zero-point switching"

This standard version is often used for switching space heaters on and off.

Version for inductive loads "instantaneous switching"

In this version the solid-state contactor is specifically matched to inductive loads. Whether it is a matter of frequent actuation of the valves in a filling plant or starting and stopping small operating mechanisms in packet distribution systems, operation is carried out safely and noiselessly.

Special "low noise" version

Thanks to a special control circuit, this special version can be used in public networks up to 16 A without any additional measures such as interference suppressor filters. As a result, in terms of emitted interference, it conforms to limit value curve class B according to IEC 60947-4-3.

Special "short-circuit proof" version

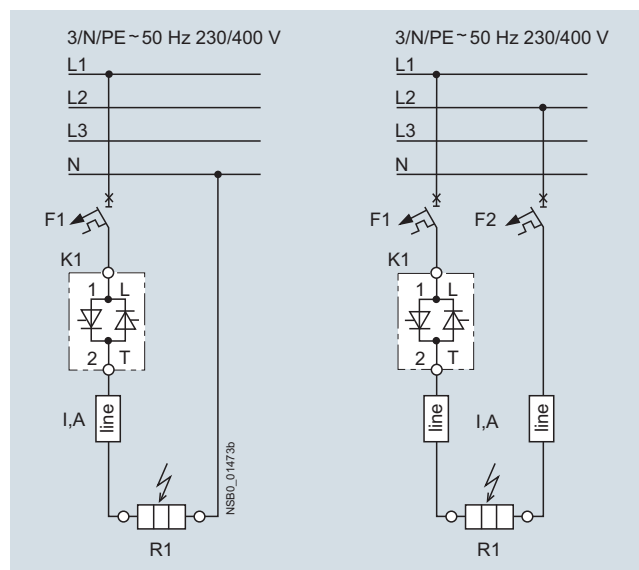

Skillful matching of the power semiconductor with the performance capacity of the solid-state contactor means that "short-circuit strength" can be achieved with a standard miniature circuit breaker. In combination with a B-type MCB or a conventional line protection fuse, the result is a short-circuit resistant feeder.

In order to achieve problem-free short-circuit protection by means of miniature circuit breakers, however, certain boundary conditions must be observed. As the magnitude and duration of the short-circuit current are determined not only by the short circuit breaking response of the miniature circuit breaker but also the properties of the wiring system, such as the internal resistance of the input to the network and damping by controls and cables, particular attention must also be paid to these parameters. The necessary cable lengths are therefore shown for the main factor, the line resistance, in the table below.

The following miniature circuit breakers with a B characteristic and 10 kA or 6 kA breaking capacity protect the 3RF23...-DA.. solid-state contactors in the event of short circuits on the load and the specified conductor cross-sections and lengths:

Rated current of the miniature circuit breaker	Example of type ¹⁾	Max. conductor cross section	Minimum cable length from contactor to load
6 A	5SY4106-6	1 mm ²	5 m
10 A	5SY4110-6	1.5 mm ²	8 m
16 A	5SY4116-6	1.5 mm ²	12 m
		2.5 mm ²	20 m
20 A	5SY4120-6	2.5 mm ²	20 m
25 A	5SY4125-6	2.5 mm ²	26 m

¹⁾ The miniature circuit breakers can be used up to a maximum rated voltage of 480 V!

Solid-state contactor protection

The setup and installation above can also be used for the solid-state relays with a I^2t value of at least 6 600 A²s.

Three-phase versions

The three-phase solid-state contactors for resistive loads up to 50 A are available with

- Two-phase control (suitable in particular for circuits without connection to the neutral conductor) and
- Three-phase control (suitable for star circuits with connection to the neutral conductor or for applications in which the system requires all phases to be switched)

The converter function module can be snapped onto both versions for the simple power control of AC loads by means of analog signals.

- Check the correct contactor size with the aid of the rated current diagram, taking account of the installation conditions

Selection and ordering data

Selection notes

The solid-state contactors are selected on the basis of details of the network, the load and the ambient conditions. As the solid-state contactors are already equipped with an optimally matched heat sink, the selection process is considerably simpler than that for solid-state relays.

The following procedure is recommended:

- Determine the rated current of the load and the mains voltage
- Select a solid-state contactor with the same or higher rated current than the load

Solid-State Switching Devices for Resistive/Inductive Loads

Function Modules

General data

Overview

Function modules for SIRIUS 3RF2 solid-state switching devices

A great variety of applications demand an expanded range of functionality. With our function modules, these requirements can be met really easily. The modules are mounted simply by clicking them into place; straight away the necessary connections are made with the solid-state relay or contactor.

The plug-in connection to control the solid-state switching devices can simply remain in use. The external connections have screw terminals.

The following function modules are available:

- Converters
- Load monitoring
- Heating current monitoring
- Power controllers
- Power regulators

With the exception of the converter, the function modules can be used only with single-phase solid-state switching devices.

Recommended assignment of the function modules to the 3RF21 single-phase solid-state relays

¹⁾ The technical specifications must be taken into account when selecting the function modules. More combinations may be possible if the solid-state relays and contactors are not fully loaded, e.g. a load monitor for 20 A can also be operated with a solid-state contactor for 30 A if the load current during operation does not exceed 20 A.

²⁾ For line voltages in the range from 110 to 230 V, the versions of the 3RF29...-0.A13 function modules can also be combined with more voltage-resistant versions of the solid-state contactors (3RF23...-...4, -...5 or -...6).

Type	3RF29..-0EA..	3RF29..-0FA..	3RF29..-0GA..	3RF29..-0HA..	3RF29..-0JA..	3RF29..-0KA..
General data						
Ambient temperature						
• During operation, derating from 40 °C	°C	-25 ... +60				
• During storage	°C	-55 ... +80				
Installation altitude	m	0 ... 1 000; derating from 1 000				
Shock resistance acc. to IEC 60068-2-27	g/ms	15/11				
Vibration resistance acc. to IEC 60068-2-6	g	2				
Degree of protection	IP20					
Electromagnetic compatibility (EMC)						
• Emitted interference						
- Conducted interference voltage acc. to IEC 60947-4-3	Class A for industrial applications ¹⁾					
- Emitted, high-frequency interference voltage according to IEC 60947-4-3	Class B for residential, business and commercial applications					
• Interference immunity						
- Electrostatic discharge acc. to IEC 61000-4-2 (corresponds to degree of severity 3)	kV	Contact discharge 4; air discharge 8; behavior criterion 2				
- Induced RF fields acc. to IEC 61000-4-6	MHz	0.15 ... 80; 140 dB μ V; behavior criterion 1				
- Burst acc. to IEC 61000-4-4	2 kV/5.0 kHz; behavior criterion 2					
- Surge acc. to IEC 61000-4-5	kV	Conductor - ground 2; conductor - conductor 1; behavior criterion 2				

Type	3RF29..-0EA18	3RF29..-0FA08	3RF29..-0GA.3	3RF29..-0GA.6
Main circuit				
Rated operational voltage U_e	V AC	-- ¹⁾		110 ... 230
• Operating range	V AC	--		93.5 ... 253
• Rated frequency	Hz	--		50/60
Rated insulation voltage U_i	V	--		600
Voltage measuring				
• Measuring range	V	--	93.5 ... 253	340 ... 660
Mains voltage, fluctuation compensation	%	--		20

¹⁾ Versions are independent of the main circuit.

Type	3RF29..-0HA.3 3RF29..-0KA.3	3RF29..-0HA.6 3RF29..-0KA.6	3RF29..-0JA.3	3RF29..-0JA.6
Main circuit				
Rated operational voltage U_e	V AC	110 ... 230	400 ... 600	110 ... 230
• Operating range	V AC	93.5 ... 253	340 ... 660	93.5 ... 253
• Rated frequency	Hz	50/60		340 ... 660
Rated insulation voltage U_i	V	600		
Voltage measuring				
• Measuring range	V	93.5 ... 253	340 ... 660	93.5 ... 253
Mains voltage, fluctuation compensation	%	20		

Type	3RF29..-...0.	3RF29..-...1.	3RF29..-...3.
Control circuit			
Method of operation	DC operation		AC/DC operation
Rated control supply voltage U_s	V	24	110
Rated control current	mA	15	
Rated frequency of the control supply voltage	Hz	--	50/60
Actuating voltage, max.	V	30	121
Rated control current	mA	15	
At maximum voltage			
Response voltage	V	15	90
• For operating current	mA	2	
Drop-out voltage	V	5	15

Solid-State Switching Devices for Resistive/Inductive Loads

Function Modules

SIRIUS converters for 3RF2

Overview

Converters for 3RF2 solid-state switching devices

These modules are used to convert analog control signals, such as those output from many temperature controllers for example, into a pulse-width-modulated digital signal. The connected solid-state contactors and relays can therefore regulate the output of a load as a percentage.

Application

This function module is used for conversions from an analog input signal to an on/off ratio with time basis 1 s. The module can only be used in conjunction with 3RF21 and 3RF23 single-phase solid-state switching devices or 3RF22 three-phase devices. It can be used on versions with 24 V DC and 24 V AC/DC control supply voltage.

Note:

The use of single-pole solid-state switching devices with converters, power controllers or power regulators on AC loads in full-wave control mode is not recommended. As mutual synchronization of the function modules is not possible, fluctuations in the heating power are possible; there is no optimum settling in particular with setpoint values < 50 %.

Function Modules

SIRIUS load monitoring for 3RF2

Overview

Load monitoring for 3RF2 single-phase solid-state switching devices

Many faults can be quickly detected by monitoring a load circuit connected to the solid-state switching device, as made possible with this module. Examples include the failure of load elements (up to 6 in the basic version or up to 12 in the extended version), alloyed power semiconductors, a lack of voltage or a break in a load circuit. A fault is indicated by one or more LEDs and reported to the controller by way of a PLC-compatible output.

The principle of operation is based on permanent monitoring of the current intensity. This figure is continuously compared with the reference value stored once during commissioning by the simple press of a button. In order to detect the failure of one of several loads, the current difference must be 1/6 (in the basic version) or 1/12 (in the extended version) of the reference value. In the event of a fault, an output is actuated and one or more LEDs indicate the fault.

Application

The device is used for monitoring one or more loads (partial loads). The function module can only be used in conjunction with a 3RF21 solid-state relay or a 3RF23 solid-state contactor. The devices with spring-type connections in the load circuit are not suitable.

SIRIUS heating current monitoring for 3RF2

Overview

Heating current monitoring for 3RF2 single-phase solid-state switching devices

Many faults can be quickly detected by monitoring a load circuit connected to the solid-state switching device, as made possible with this module. Examples include the failure of up to six load elements, alloyed power semiconductors, a lack of voltage, or a break in the load circuit. A fault is indicated by LEDs and reported to the controller via relay output (NC).

The principle of operation is based on permanent monitoring of the current intensity. This figure is continuously compared with the reference value stored once during commissioning. In order to detect the failure of one of several loads, the current difference must be 1/6 of the reference value. In the event of a fault, an output is actuated and the LEDs indicate the fault.

The heating current monitoring has a teach input and therefore differs from the load monitoring. This remote teaching function enables simple adjustment to changing loads without manual intervention.

Special version:

Deviations from the standard version

3RF29..-0JA1.-1KK0

If the current is below 50 % of the lower teach current during the teach routine, the device will go into "Standby" mode; the LOAD LED will flicker. The device thus detects a non-connected load, e.g. channels not required for tool heaters, and does not signal a fault. This mode can be reset by re-teaching.

Application

The device is used for monitoring one or more loads (partial loads). The function module can only be used in conjunction with a 3RF21 solid-state relay or a 3RF23 solid-state contactor. The devices with spring-type connections in the load circuit are not suitable.

Solid-State Switching Devices for Resistive/Inductive Loads

Function Modules

SIRIUS power controllers for 3RF2

Overview

Power controllers for 3RF2 single-phase solid-state switching devices

The power controller is a function module for the autonomous power control of complex heating systems and inductive loads.

The following functions have been integrated:

- **Power controller** for adjusting the power of the connected load. The setpoint value is selected via a rotary knob on the module as a percentage of the 100 % power value stored.
- **Inrush current limitation:** With the aid of an adjustable voltage ramp, the inrush current is limited by means of phase control. This is useful above all with loads such as lamps or infrared lamps which have an inrush transient current.
- **Load circuit monitoring** for detecting load failure, partial load faults, alloyed power semiconductors, lack of voltage or a break in the load circuit.

Note:

With the phase control operating mode, a partial load fault is detected by cyclic "scanning" of the load; the exact mode of operation is described in the data sheets!

Special version: Deviations from the standard version

3RF2904-0KA13-0KC0

During the teach routine, the connected solid-state relay or contactor is not activated; i.e. no current will flow. No current reference value is stored. No partial-load monitoring!

3RF29...0KA1.-0KTO

No partial-load monitoring!

Application

The power controller can be used for:

- Complex heating systems
- Inductive loads
- Loads with temperature-dependent resistor
- Loads with ageing after long-time service
- Simple indirect control of temperature

Power control

The power controller adjusts the power in the connected load by means of a solid-state switching device depending on the setpoint selection. It does not compensate for changes in the mains voltage or load resistance. The setpoint value can be predefined externally as a 0 to 10 V signal or internally by means of a potentiometer. Depending on the setting of the potentiometer (t_P), it is controlled according to the principle of full-wave control or generalized phase control.

Note:

In the case of resistive loads, the power is set linear to the setpoint value. During operation of inductive loads, the power control is no longer proportional and linear due to the phase shift between current and voltage.

Full-wave control

In this operating mode the output is adjusted to the required setpoint value by changing the on-to-off period. The period duration is predefined at one second.

See note about AC loads on page 2/142.

Generalized phase control

In this operating mode the output is adjusted to the required setpoint value by changing the current flow angle. In order to observe the limit values of the conducted interference voltage for industrial networks, the load circuit must include a reactor with a rating of at least 200 μH .

Solid-State Switching Devices for Resistive/Inductive Loads

Function Modules

SIRIUS power regulators for 3RF2

Overview

Power regulators for 3RF2 single-phase solid-state switching devices

The power regulator is a function module for the autonomous power control of complex heating systems.

The following functions have been integrated:

- **Power controller with proportional-action control** for adjusting the power of the connected load. The setpoint value is selected via a rotary knob on the module as a percentage of the 100 % power value stored. Changes in the mains voltage or in the load resistance are compensated for in this case.
- **Inrush current limitation:** With the aid of an adjustable voltage ramp, the inrush current is limited by means of phase control. This is useful above all with loads such as lamps which have an inrush transient current.
- **Load circuit monitoring** for detecting load failure, alloyed power semiconductors, lack of voltage or a break in the load circuit. Partial load monitoring is not possible. Load fluctuations are compensated.

Power control

The power regulator adjusts the power in the connected load by means of a solid-state switching device depending on the taught power and the selected setpoint. Changes in the mains voltage or in the load resistance are thus compensated by the power regulator. The setpoint value can be predefined externally as a 0 to 10 V signal or internally by means of a potentiometer. Depending on the setting of the potentiometer (t_R), the adjustment is carried out according to the principle of full-wave control or generalized phase control.

Note:

In the case of resistive loads, the power is set linear to the setpoint value. During operation of inductive loads, the power control is no longer proportional and linear due to the phase shift between current and voltage.

Full-wave control

In this operating mode the output is adjusted to the required setpoint value by changing the on-to-off period. The period duration is predefined at one second.

See note about AC loads on page 2/142.

Generalized phase control

In this operating mode the output is adjusted to the required setpoint value by changing the current flow angle. In order to observe the limit values of the conducted interference voltage for industrial networks, the load circuit must include a reactor with a rating of at least 200 μ H.

Application

The power regulator can be used for:

- Complex heating systems
- Heating elements with temperature-dependent resistor
- Heating elements with ageing after long-time service
- Simple indirect control of temperature

The following illustration shows 3RV2 motor starter protectors/circuit breakers with the accessories which can be mounted for the sizes S00 to S3, see also "Introduction" → "Overview", page 2/147.

Accessories, see page 2/171 onwards.

Mountable accessories

- ① Transverse auxiliary switch
- ② Lateral auxiliary switch with 2 contacts
- ③ Lateral auxiliary switch with 4 contacts
- ④ Shunt release (can not be used with 3RV21 motor starter protectors)
- ⑤ Undervoltage release without/with leading contacts (can not be used with 3RV21 motor starter protectors)
- ⑥ Signaling switch (can not be used with 3RV27 and 3RV28 circuit breakers)
- ⑦ Isolator module (can not be used with 3RV2.4, 3RV27 and 3RV28 circuit breakers)
- ⑧ Terminal block type E or phase barriers

Mountable accessories for SIRIUS 3RV2 motor starter protectors/circuit breakers

SIRIUS motor starter protector with spring-type terminals, size S0 (left) and SIRIUS motor starter protector with screw terminals, size S00 (right)

The SIRIUS 3RV2 motor starter protectors/circuit breakers are compact, current limiting motor starter protectors/circuit breakers which are optimized for load feeders. The motor starter protectors/circuit breaker 2/151s are used for switching and protecting three-phase motors of up to 55/45 kW at 400 V AC and for other loads with rated currents of up to 100 A.

The new 3RV2 motor starter protectors/circuit breakers are usually approved according to IEC and UL/CSA. According to UL 508/UL 60947-4-1, the 3RV2 motor starter protectors/circuit breakers in sizes S00 to S3 are approved as:

- "Manual Motor Controllers"
 - "Manual Motor Controllers" for "Group Installations"
 - "Manual Motor Controllers Suitable for Tab Conductor Protection in Group Installations"
 - "Self-Protected Combination Motor Controllers (Type E)"
- Please note that for this approval the 3RV20 motor starter protectors must be equipped with additional infeed terminals or phase barriers. For more information, see www.siemens.com/ic10, Chapter 7 "Accessories".

Corresponding short-circuit values, see pages 2/151 to 2/154.

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

General data

Type of construction

The 3RV2 motor starter protectors are available in four sizes:

- Size S00 – width 45 mm, max. rated current 16 A, at 400 V AC suitable for three-phase motors up to 7.5 kW
- Size S0 – width 45 mm, max. rated current 40 A, at 400 V AC suitable for three-phase motors up to 18.5 kW
- Size S2 – width 55 mm, max. rated current 80 A, at 400 V AC suitable for three-phase motors up to 37 kW
- Size S3 – width 70 mm, max. rated current 100 A, at 400 V AC suitable for three-phase motors up to 45/55 kW

Connection methods

The 3RV2 motor starter protectors/circuit breakers can be supplied with screw terminals and spring-type terminals.

Screw terminals

Spring-type terminals

The terminals are indicated in the corresponding tables by the symbols shown on orange backgrounds.

Use in hazardous areas

The 3RV20 motor starter protectors for motor protection in sizes S00, S0, S2 and S3 have certification in accordance with both the European explosion protection directive ATEX and the international explosion protection standard (IECEx).

In accordance with the European directive (ATEX), the 3RV20 are able to switch and protect explosion-proof motors of type of protection "Increased Safety EEx e".

In accordance with the international guideline (IECEx), the 3RV20 are able to switch and protect motors of the types "Increased Safety Ex e" or "Flameproof enclosure Ex d"

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

General data

Application

Operating conditions

3RV2 motor starter protectors/circuit breakers are suitable for use in any climate. They are intended for use in enclosed rooms in which no severe operating conditions (such as dust, caustic vapors, hazardous gases) prevail. When installed in dusty and damp areas, suitable enclosures must be provided.

3RV2 motor starter protectors/circuit breakers can optionally be fed from the top or from below.

The permissible ambient temperatures, the maximum switching capacities, the tripping currents and other boundary conditions can be found in the technical specifications and tripping characteristics.

3RV2 motor starter protectors/circuit breakers are suitable for operation in IT systems (IT networks). In this case, the different short-circuit breaking capacity in the IT system must be taken into account, [see page 2/153](#).

Since operational currents, starting currents and current peaks are different even for motors with identical power ratings due to the inrush current, the motor ratings in the selection tables are only guide values. The specific rated and startup data of the motor to be protected is always paramount to the choice of the most suitable motor starter protector/circuit breaker. This also applies to motor starter protectors for transformer protection.

Possible uses

The 3RV motor starter protectors/circuit breakers can be used:

- For short-circuit protection
- For motor protection (also with overload relay function)
- For system protection
- For short-circuit protection for starter combinations
- For transformer protection
- As main and EMERGENCY-STOP switches
- For operation in IT systems (IT networks)
- For switching of DC currents
- In areas subject to explosion hazard (ATEX)

Special versions of 3RV2 motor starter protectors/circuit breakers can be used for low ambient temperatures down to -50°C or also for system protection. More detailed information is available on request.

Use of SIRIUS protection devices in conjunction with IE3/IE4 motors

Note:

For the use of 3RV2 motor starter protectors/circuit breakers in conjunction with highly energy-efficient IE3/IE4 motors, please observe the information on dimensioning and configuring, [see "Configuration Manual for SIRIUS Controls with IE3 Motors"](#) <https://support.industry.siemens.com/cs/ww/en/view/94770820>.

Short-circuit breaking capacity I_{cu} , I_{cs} according to IEC 60947-2

The table shows the rated ultimate short-circuit breaking capacity I_{cu} and the rated service short-circuit breaking capacity I_{cs} of the 3RV2 motor starter protectors/circuit breakers with different operational voltages dependent on the rated current I_n of the motor starter protectors/circuit breakers.

Power can be supplied to the motor starter protectors/circuit breakers via the terminals at the top or at the bottom without restricting the rated data. If the short-circuit current at the place of installation exceeds the rated short-circuit breaking capacity of the motor starter protector/circuit breaker as specified in the

table, a back-up fuse is required. It is also possible to install an upstream motor starter protector/circuit breaker with a limiter function.

The maximum rated current of this back-up fuse is indicated in the tables. The rated ultimate short-circuit breaking capacity then applies as specified on the fuse.

Fuseless design

Motor starter protector/contactors assemblies for short-circuit currents up to 150 kA can be ordered as fuseless load feeders, see www.siemens.com/ic10, Chapter 8 "Load Feeders and Motor Starters for Use in the Control Cabinet".

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

General data

Short-circuit breaking capacity I_{cuIT} in the IT system (IT network) according to IEC 60947-2

3RV2 motor starter protectors/circuit breakers are suitable for use in IT systems. The values of I_{cu} and I_{cs} apply for the three-pole short circuit. In the case of a double ground fault in different phases at the input and output side of a motor starter protector/circuit breaker, the special short-circuit breaking capacity I_{cuIT} applies. The specifications in the table below apply to 3RV2 motor starter protectors/circuit breakers.

If the short-circuit current at the place of installation exceeds the motor starter protector/circuit breaker's specified rated short-circuit breaking capacity, you will need to use a back-up fuse. The maximum rated current of this back-up fuse is indicated in the tables. The rated short-circuit breaking capacity then applies as specified on the fuse.

Limiter function with standard devices for 500 V AC and 690 V AC according to IEC 60947-2

The table shows the rated ultimate short-circuit breaking capacity I_{cu} and the rated service short-circuit breaking capacity I_{cs} with an upstream standard motor starter protector/circuit breaker that fulfills the limiter function at voltages 500 V AC and 690 V AC.

The short-circuit breaking capacity can be increased significantly with an upstream standard motor starter protector/circuit breaker with limiter function. The motor starter

protector/circuit breaker which is connected downstream must be set to the rated current of the load.

With motor starter protector/circuit breaker assemblies, note the clearance to grounded parts and between the motor starter protectors/circuit breaker. Short-circuit proof wiring between the motor starter protectors/circuit breaker must be ensured. The motor starter protectors/circuit breakers can be mounted side by side in a modular arrangement.

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

General data

Permissible rated data of devices approved for North America (UL/CSA)

Motor starter protectors of the 3RV2 series are approved for UL/CSA, and according to UL508/UL 60947-4-1 and CSA C22.2 No. 14/CSA C22.2 No. 60947-4-1 they can be used on their own or as load feeders in combination with a contactor.

These motor starter protectors/circuit breakers can be used as "Manual Motor Controllers" for "Group Installations", as "Manual Motor Controllers Suitable for Tap Conductor Protection in Group Installations" and as "Self-Protected Combination Motor Controllers" (Type E).

3RV2 motor starter protectors as "Manual Motor Controllers"

If used as a "Manual Motor Controller", the motor starter protector is always operated in combination with an upstream short-circuit protection device. Approved fuses or a circuit breaker according to UL 489/CSA C22.2 No. 5 may be used for this purpose. These devices must be dimensioned according to the National Electrical Code (UL) or Canadian Electrical Code (CSA).

The file numbers for the approval of the 3RV2 as a Manual Motor Controller are as follows:

- UL File No. 47705, CCN: NLRV
- CSA Master Contract 165071, Product Class: 3211

1) hp rating = Power rating in horse power (maximum motor rating).

2) FLA = Full Load Amps/motor full load current.

3) Corresponds to "short-circuit breaking capacity" according to UL/CSA.

4) Values in brackets only apply to 3RV2.23 motor starter protectors.

5) With Class J fuse.

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

General data

3RV20 motor starter protectors (up to 100 A) as "Manual Motor Controllers Suitable for Tap Conductor Protection in Group Installations"

The application as "Manual Motor Controllers Suitable for Tap Conductor Protection in Group Installations" is only available for UL.

CSA does not recognize this approval! When the motor starter protector is used as a "Manual Motor Controller Suitable for Tap Conductor Protection in Group Installations", it must always be combined with upstream short-circuit protection. Approved fuses or a circuit breaker according to UL 489 can be used. These devices must be dimensioned according to the National Electrical Code.

The 3RV20 motor starter protectors are approved as "Manual Motor Controllers Suitable for Tap Conductor Protection in Group Installations" under the following file number:

- UL File No. 47705, CCN: NLRV

¹⁾ hp rating = Power rating in horse power (maximum motor rating).

²⁾ FLA = Full Load Amps/motor full load current.

³⁾ Corresponds to "short-circuit breaking capacity" according to UL.

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

General data

3RV20 motor starter protectors (up to 100 A) as "Self-Protected Combination Motor Controllers (Type E)"

UL 508/UL 60947-4-1 approval demands 1-inch through air spacing and 2-inch over surface spacing at line side for "Self-Protected Combination Motor Controllers".

Therefore, 3RV20 motor starter protectors of sizes S00 to S3 are approved according to UL 508/UL 60947-4-1 in combination with the terminal blocks listed below.

CSA does not require these extended clearances. According to CSA, these terminal blocks can be omitted when the device is used as a "Self-Protected Combination Motor Controller".

The 3RV20 motor starter protectors are approved as "Self-Protected Combination Motor Controllers" under the following file numbers:

- UL File No. E156943, CCN: NKJH
- CSA Master Contract 165071, Product Class: 3211 08

¹⁾ Guide value for 4-pole standard motors at 50 Hz 400 V AC. The actual starting and rated data of the motor to be protected must be considered when selecting the units.

²⁾ The setting range of the thermal overload releases has been extended.

³⁾ Suitable for use with IE3 motors up to a starting current of 256 A. For higher starting currents we recommend using 3RV2 motor starter protectors size S2.

⁴⁾ The devices must not be mounted side-by-side and they must not be assembled with link modules with contactors. A lateral clearance of 9 mm is required. For use with IE3 motors we recommend using 3RV2 motor starter protectors size S2.

Auxiliary switches and other accessories can be ordered separately (see "Accessories" from page 2/171 onwards).

¹⁾ Guide value for 4-pole standard motors at 50 Hz 400 V AC. The actual starting and rated data of the motor to be protected must be considered when selecting the units.

²⁾ Suitable for use with IE3/IE4 motors up to a starting current of 780 A. For higher starting currents we recommend using 3VA circuit breakers (see Catalog LV 10).

Auxiliary switches and other accessories can be ordered separately (see "Accessories" from page 2/171 onwards).

¹⁾ Guide value for 4-pole standard motors at 50 Hz 400 V AC. The actual starting and rated data of the motor to be protected must be considered when selecting the units.

²⁾ For overload protection of the motors, appropriate overload relays must be used.

³⁾ Suitable for use with IE3 motors up to a starting current of 256 A. For higher starting currents we recommend using 3RV2 motor starter protectors size S2.

⁴⁾ The devices must not be mounted side-by-side and they must not be assembled with link modules with contactors. A lateral clearance of 9 mm is required. For use with IE3 motors we recommend using 3RV2 motor starter protectors size S2.

Auxiliary switches and other accessories can be ordered separately (see "Accessories" from page 2/171 onwards).

¹⁾ Guide value for 4-pole standard motors at 50 Hz 400 V AC. The actual starting and rated data of the motor to be protected must be considered when selecting the units.

²⁾ For overload protection of the motors, appropriate overload relays must be used.

³⁾ Suitable for use with IE3 motors up to a starting current of 720 A. For higher starting currents we recommend using 3RV2 motor starter protectors size S3.

⁴⁾ Suitable for use with IE3/IE4 motors up to a starting current of 780 A. For higher starting currents we recommend using 3VA circuit breakers (see Catalog LV 10).

Auxiliary switches and other accessories can be ordered separately (see "Accessories" from page 2/171 onwards).

Auxiliary switches and other accessories can be ordered separately (see "Accessories" from page 2/171 onwards).

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

Accessories

Mountable accessories

Overview

Mounting location and function

The 3RV2 motor starter protectors/circuit breakers have three main contact elements. In order to achieve maximum flexibility, auxiliary switches, signaling switches, auxiliary releases and isolator modules can be supplied separately.

These components are easily fitted to the switches without the use of any tools according to requirements.

Overview graphic, [see page 2/148](#).

Front side

Note:

- A maximum of four auxiliary contacts with auxiliary switches can be mounted on each motor starter protector/circuit breaker.

Transverse auxiliary switches, solid-state compatible transverse auxiliary switches

1 NO + 1 NC
or
2 NO
or
1 CO

An auxiliary switch block can be inserted transversely on the front. The overall width of the motor starter protectors/circuit breakers remains unchanged.

Left-hand side

Notes:

- A maximum of four auxiliary contacts with auxiliary switches can be mounted on each motor starter protector/circuit breaker.
- Lateral auxiliary switches (two contacts) and signaling switches can be mounted separately or together.

Lateral auxiliary switches (2 contacts)

1 NO + 1 NC
or
2 NO
or
2 NC

One of the three lateral auxiliary switches can be mounted on the left side per motor starter protector/circuit breaker. The contacts of the auxiliary switch close and open together with the main contacts of the motor starter protector/circuit breaker.

The width of the lateral auxiliary switch with two contacts is 9 mm.

Lateral auxiliary switches (4 contacts)

2 NO + 2 NC

One lateral auxiliary switch with four contacts can be mounted on the left side per motor starter protector/circuit breaker. The contacts of the auxiliary switch close and open together with the main contacts of the motor starter protector/circuit breaker.

The width of the lateral auxiliary switch with four contacts is 18 mm.

Signaling switches

Tripping 1 NO + 1 NC
Short circuit 1 NO + 1 NC

One signaling switch can be mounted on the left side of each motor starter protector.

The signaling switch has two contact systems.

One contact system always signals tripping irrespective of whether this was caused by a short circuit, an overload or an auxiliary release. The other contact system only switches in the event of a short circuit. There is no signaling as a result of switching off with the actuator.

In order to be able to switch on the motor starter protector again after a short circuit, the signaling switch must be reset manually after the error cause has been eliminated.

The overall width of the signaling switch is 18 mm.

Right-hand side

Notes:

- One auxiliary release can be mounted per motor starter protector/circuit breaker.
- Accessories cannot be mounted at the right-hand side of the 3RV21 motor starter protectors for motor protection with overload relay function.

Auxiliary releases

Shunt releases

For remote-controlled tripping of the motor starter protector/circuit breaker. The release coil should only be energized for short periods (see circuit diagrams).

or

Undervoltage releases

Trips the motor starter protector/circuit breaker when the voltage is interrupted and prevents the motor from being restarted accidentally when the voltage is restored. Used for remote-controlled tripping of the motor starter protector/circuit breaker.

Particularly suitable for EMERGENCY-STOP disconnection by way of corresponding EMERGENCY-STOP pushbuttons according to EN 60204-1.

or

Undervoltage releases with leading auxiliary contacts 2 NO

Function and use as for the undervoltage release without leading auxiliary contacts, but with the following additional function: the auxiliary contacts will open in switch position OFF to deenergize the coil of the undervoltage release, thus interrupting energy consumption. In the "tripped" position, these auxiliary contacts are not guaranteed to open. The leading contacts permit the motor starter protector/circuit breaker to reclose.

The overall width of the auxiliary release is 18 mm.

Top

Notes:

- The isolator module for size S2
 - can only be used with 3RV2 motor starter protectors/circuit breakers up to max. 65 A
 - cannot be used with the transverse auxiliary switch
- The isolator module covers the terminal screws of the transverse auxiliary switch. If the isolator module is used, we therefore recommend that either the lateral auxiliary switches be fitted or that the isolator module not be mounted until the auxiliary switch has been wired.

Isolator modules

Isolator modules can be mounted to the upper connection side of the motor starter protectors.

The supply cable is connected to the motor starter protector through the isolator module.

The plug can only be unplugged when the motor starter protector is open and isolates all 3 poles of the motor starter protector from the network. The shock-protected isolation point is clearly visible and secured with a padlock to prevent reinsertion of the plug.

For a complete overview of which accessories can be used for the various motor starter protectors/circuit breakers, [see page 2/147](#).

¹⁾ The voltage range is valid for 100 % (infinite) ON period. The response voltage lies at 0.9 of the lower limit of the voltage range.

²⁾ The voltage range is valid for 5 s ON period at AC 50/60Hz and DC. The response voltage lies at 0.85 of the lower limit of the voltage range.

³⁾ One auxiliary release can be mounted on the right per motor starter protector/circuit breaker (does not apply to 3RV21 motor starter protectors with overload relay function).

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers Accessories

Busbar accessories

Overview

Insulated three-phase busbar system

Three-phase busbar systems provide an easy, time-saving and clearly arranged means of feeding 3RV2 motor starter protectors/circuit breakers with screw terminals. Different versions are available for sizes S00 to S2 and can be used for the various different types of motor starter protectors/circuit breakers (size S0 up to 32 A).

The 3RV1915 and 3RV1935 three-phase busbar systems are generally unsuitable for the 3RV21 motor starter protectors for motor protection with overload relay function according to UL 489/CSA C22.2 No. 5.

The busbars are suitable for between two and five motor starter protectors/circuit breakers. However, any kind of extension is possible by clamping the tags of an additional busbar (rotated by 180°) underneath the terminals of the respective last motor starter protector/circuit breaker.

A combination of motor starter protectors/circuit breakers of size S00 and S0 is possible. The motor starter protectors/circuit breakers are supplied by appropriate infeed terminals.

8US busbar adapters for 60 mm systems

The motor starter protectors/circuit breakers are mounted directly with the aid of busbar adapters on busbar systems with 60 mm center-to-center clearance in order to save space and to reduce infeed times and costs.

The busbar adapters for busbar systems with 60 mm center-to-center clearance are suitable for copper busbars with a width of 12 mm to 30 mm. The busbars can be 5 mm or 10 mm thick.

The motor starter protectors/circuit breakers are snapped onto the adapter and connected on the line side. This prepared unit is then plugged directly onto the busbar system, and is thus connected both mechanically and electrically at the same time.

For further busbar adapters for snap-mounting direct-on-line starters and reversing starters as well as additional accessories such as line terminals

For outgoing terminals, flat copper profile, etc., see [Catalog LV 10 "Low-Voltage Power Distribution and Electrical Installation Technology"](#).

SIRIUS three-phase busbar system size S00/S0

SIRIUS load feeders with busbar adapters snapped onto busbars

SIRIUS three-phase busbar system size S2

The three-phase busbar systems are finger-safe. They are designed for any short-circuit stress which can occur at the output side of connected motor starter protectors/circuit breakers.

The three-phase busbar systems can also be used to construct "Type E Starters" according to UL/CSA. Special infeed terminals must be used for this purpose, however (see ["Selection and Ordering Data"](#), page 2/175).

Terminal blocks and phase barriers for "Self-Protected Combination Motor Controllers (Type E)" according to UL 508/UL 60947-4-1

Note:

UL 508/UL 60947-4-1 approval demands 1-inch through air spacing and 2-inch over surface spacing for "Self-Protected Combination Motor Controllers (Type E)". The following terminal blocks or phase barriers must be used for the 3RV20 motor starter protectors with screw terminals. 3RV20 motor starter protectors with spring-type terminals must be assembled with the 3RV29 infeed system for approval as "Self-Protected Combination Motor Controllers (Type E)" according to UL 508/UL 60947-4-1.

The terminal block or phase barriers cannot be used in combination with the 3RV19.5 three-phase busbars.

For construction with three-phase busbars, see "Busbar Accessories", from page 2/174 onwards.

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

3RV29 infeed system

Overview

More information

Home page, see www.siemens.com/railway-components

Catalog IC 10, see www.siemens.com/ic10

Industry Mall, see www.siemens.com/product?3RV2

Manual "SIRIUS Innovations – SIRIUS 3RV2 Motor Starter Protectors", see <https://support.industry.siemens.com/cs/ww/en/view/60279172>

The 3RV29 infeed system is a convenient means of energy supply and distribution for a group of several motor starter protectors or complete load feeders with a screw or spring-type connection in sizes S00 and S0 (exception: this system cannot be used for 3RV21 motor starter protectors).

Motor starter protectors or load feeders with a rated current of maximum 32 A each can be used.

The system is based on a basic module complete with a lateral incoming unit (three-phase busbar with infeed). This infeed with spring-type terminals is mounted on the right or left, depending on the version, and can be supplied with a maximum conductor cross-section of 25 mm² (with end sleeve). A basic module has two sockets onto each of which a motor starter protector can be snapped.

Expansion modules (three-phase busbars for system expansion) are available for extending the system. The individual modules are connected through an expansion plug.

The electrical connection between the three-phase busbars and the motor starter protectors is implemented through plug-in connectors. The complete system can be mounted on a TH 35 standard mounting rail to IEC 60715 and can be expanded as required up to a maximum current carrying capacity of 63 A.

The system is mounted extremely quickly and easily thanks to the simple plug-in technique. Thanks to the lateral infeed, the system also saves space in the control cabinet. The additional overall height required for the infeed unit is only 30 mm. The alternative infeed possibilities on each side offer a high degree of flexibility for configuring the control cabinet: Infeed on left-hand or right-hand side as well as infeed on one side and outfeed on the other side to supply further loads are all possible. A terminal block with spring-type connections in combination with a standard mounting rail enables the integration of not only SIRIUS motor starter protectors but also single-phase, 2-phase and 3-phase components such as 5SY miniature circuit breakers or SIRIUS relay components.

The 3RV29 infeed system is approved in accordance with IEC to 500 V. It is also UL-approved and authorized for "Self-Protected Combination Motor Controller" (Type E starter) as well as for Type F starter (Type E starter + contactor).

SIRIUS 3RV29 infeed system

Motor Starter Protectors/Circuit Breakers

SIRIUS 3RV2 Motor Starter Protectors/Circuit Breakers

3RV29 infeed system

2

① Three-phase busbars with infeed

A three-phase busbar with infeed unit is required for connecting the incoming supply. These modules comprise one infeed module and two sockets which each accept one motor starter protector. A choice of two versions with infeed on the left or right is available. The infeed is connected to spring-type terminals. They permit an infeed with conductor cross-sections of up to 25 mm² with end sleeve. An end cover is supplied with each module.

② Three-phase busbars for system expansion

The three-phase busbars for system expansion allow the system to be expanded. There is a choice of modules with two or three sockets. The system can be expanded as required up to a maximum current carrying capacity of 63 A. An expansion plug is supplied with each module.

③a Expansion plug

The expansion plug is used for electrical connection of adjacent three-phase busbars. The current carrying capacity of this plug equals 63 A. One expansion plug is supplied with each three-phase busbar for system expansion. Additional expansion plugs are therefore only required as spare parts.

③b Extra-wide expansion plug

The wide expansion plug makes the electrical connection between two three-phase busbars, thus performing the same function as the 3RV2917-5BA00 expansion plug; the electrical characteristics (e.g. a current carrying capacity of 63 A) are identical.

The 3RV2917-5E expansion plug is 10 mm wider than the 3RV2917-5BA00 expansion plug, hence in the plugged state there is a distance of 10 mm between the connected three-phase busbars. This distance can be used to lay the auxiliary current and control current wiring ("wiring duct"). The motor starter protector and contactor can be wired from underneath, which means that the complete cable duct above the system can be omitted.

④ End cover

The end cover is used to cover the three-phase busbar at the open end of the system. This cover is therefore only required once for each system. An end cover is supplied with each three-phase busbar system with infeed. Further end covers are therefore only required as spare parts.

⑤ Terminal block for device infeed

A new addition to the system is a connector for outfeeding to a device slot within a module. This offers the option not only of connecting three-phase loads to the system, but also of integrating single-phase loads into the infeed system.

⑥ Plug-in connector

The plug-in connector is used for the electrical connection between the three-phase busbar and the 3RV2 motor starter protector. These plug-in connectors are available for screw or spring-type terminals.

⑦ Contactor base

Load feeders can be assembled in the system using the S00 and S0 contactor base. The contactor bases are suitable for contactors sizes S00 and S0 with spring-type and screw terminals and are simply snapped onto the three-phase busbars. Direct-on-line starters and reversing starters are possible. One contactor base is required for direct-on-line starters and two are required for reversing starters.

To assemble load feeders for reversing starters, the contactor bases can be arranged alongside each other (90 mm overall width). In this case the mechanical interlocking of the contactors is possible. The S0 contactor bases are also suitable for soft starters size S00 and S0 with screw terminal.

The infeed system is designed for mounting onto a TH 35 standard mounting rail with 7.5 mm overall depth. This standard mounting rail gives the contactor base a stable mounting surface to sit on. If standard mounting rails with a depth of 15 mm are used, the spacer connected to the bottom of the contactor base must be knocked out and plugged into the mating piece that is also on the underside. Then the contactor base also has a stable mounting surface. When standard mounting rails with a depth of 7.5 mm are used, the spacer has no function and can be removed.

The link modules are used for direct start load feeders, in which case the use of a contactor base is not absolutely necessary. Motor starter protector and contactor assemblies can then be directly snapped onto the sockets of the three-phase busbars. For feeders of sizes S00 and S0, the corresponding 3RA1921-1....., 3RA2911-2....., 3RA2921-1..... or 3RA2921-2..... link modules should generally be used.

⑧ Terminal block

The 3RV2917-5D terminal block enables the integration of not only SIRIUS motor starter protectors but also single-phase, 2-phase and 3-phase components. The three phases can be fed out of the system using the terminal block; which means that single-phase loads can also be integrated in the system. The terminal block is plugged into the slot of the expansion plug and thus enables outfeeding from the middle or end of the infeed system. The terminal block can be rotated through 180° and be locked to the support modules of the infeed system. In addition, the 45 mm wide TH 35 3RV1917-7B standard mounting rail option for screwing onto the support plate facilitates plugging the single-phase, two-phase and three-phase components onto the infeed system.

Monitoring and Control Devices

Introduction

Connection methods

The monitoring and control devices are available with screw or spring-type terminals.

Screw terminals

Spring-type terminals

The terminals are indicated in the corresponding tables by the symbols shown on orange backgrounds.

"Increased safety" type of protection EEx e/d according to ATEX directive 94/9/EC

The communication-capable, modularly designed SIMOCODE pro motor management system (SIRIUS Motor Management and Control Devices) protects motors of types of protection EEx e and EEx d in potentially explosive areas.

ATEX approval for operation in areas subject to explosion hazard

The SIRIUS 3RN2 thermistor motor protection relay for PTC sensors is certified according to ATEX Ex II (2) G and D for environments with explosive gas or dust loads.

The SIRIUS SIMOCODE pro 3UF7 motor management system is certified for the protection of motors in areas subject to explosion hazard according to

- ATEX Ex I (M2); equipment group I, category M2 (mining)
- ATEX Ex II (2) GD; equipment group II, category 2 in area GD.

Overview

7PV15, SIRIUS 3RP25 timing relays

Electronic timing relays are used in control, starting, and protective circuits for all switching operations involving time delays. Their fully developed concept and space-saving, compact design make the SIRIUS 3RP timing relays ideal modules for control cabinet, switchgear and control manufacturers in the industry.

With their narrow design, the 7PV15 timing relays are ideal in particular for use in heating, ventilation and air-conditioning systems and in compressors. All 7PV15 timing relays in this enclosure version are suitable for snap-on mounting onto TH 35 standard mounting rails according to IEC 60175. The enclosure complies with DIN 43880.

Benefits

- Clear-cut basic range with five basic units in the case of the 7PV15 timing relays, and seven basic units in the case of the 3RP timing relays
- Logistic advantages provided by versions with wide voltage range and wire setting range
- No tools required for assembly or disassembly on standard mounting rails
- Cadmium-free relay contacts
- Recyclable, halogen-free enclosure
- Optimum price/performance ratio
- Versions with logical separation
- Low variance: One design for distribution boards and for control cabinets
- Compliance with EMC requirements for buildings
- Environmentally friendly laser inscription instead of printing containing solvents
- Timing relays suitable for the 3RT miniature contactors allow smaller tier spacing
- Versions with screw terminals or alternatively with spring-type terminals

Application

Timing relays with ON-delay

- Interference pulse suppression (gating of interference pulses)
- Gradual startup of motors so as not to overload the power supply

Timing relays with OFF-delay

- Generation of overtravel functions following removal of voltage
- Gradual, delayed shutdown, e.g. of motors or fans, to allow a plant to be shut down selectively

Wye-delta timing relays

- Switching over motors from wye to delta with a dead interval of 50 ms to prevent phase-to-phase short circuits

Multifunctional timing relays

- Maximum flexibility, with a device for every application
- Available with relay and semiconductor output

SIRIUS 3RP25 timing relays, 17.5 mm and 22.5 mm

3RP2505 multifunctional timing relays

Two setting options for implementing the multifunctions (A-M):

- ① Determination of 13 functions by the setting A to M, with 1 CO, 1 NO, 2 CO that switch in parallel.
- ② Extended function variance by selecting the time range and determining, whether 2 CO switch in parallel or whether 1 CO switches with delay + 1 CO switches immediately (1 CO + 1 CO)

Setting the functions on the device

The functions of the 3RP2505 multifunctional timing relays can be set by means of the function selector switch. Whether both CO contacts are switched in parallel or one CO contact with a delay and one instantaneously and the choice of time setting range are set by means of the time setting range selector switch. The exact operating time can be adjusted with the operating time switch.

Overview of functions

Identifica- tion letter	13 functions	27 functions
	1 CO, 1 NO (semiconductor), 2 CO switched in parallel, or 2 CO positively driven and switched in parallel with delay	13 functions (A - M) 2 CO switched in parallel + 13 functions (A - M) 1 CO delayed + 1 CO instantaneous (1 CO + 1 CO) and wye-delta function
A	With ON-delay	ON-delay and instantaneous contact
B	OFF-delay with control signal	OFF-delay with control signal and instantaneous contact
C	ON-delay/OFF-delay with control signal	ON-delay/OFF-delay with control signal and instantaneous contact
D	Flashing, symmetrical, starting with interval	Flashing, symmetrical, starting with interval and instantaneous contact
E	Passing make contact, interval relay	Passing make contact, interval relay and instantaneous contact
F	Retriggerable interval relay with deactivated control signal (passing break contact with control signal)	Retriggerable interval relay with deactivated control signal (passing break contact with control signal) and instantaneous contact
G	Passing make contact, with control signal, not retriggerable (pulse-forming with control signal)	Passing make contact, with control signal, not retriggerable (pulse-forming with control signal) and instantaneous contact
H	Additive ON-delay, instantaneous OFF with control signal	Additive ON-delay, instantaneous OFF with control signal and instantaneous contact
I	Additive ON-delay with control signal	Additive ON-delay with control signal and instantaneous contact
J	Flashing, symmetrical, starting with pulse	Flashing, symmetrical, starting with pulse and instantaneous contact
K	Pulse-delayed (fixed pulse (at 1 s) and settable pulse delay)	Pulse-delayed (fixed pulse (at 1 s) and settable pulse delay) and instantaneous contact
L	Pulse-delayed with control signal (fixed pulse (at 1 s) and settable pulse delay)	Pulse-delayed with control signal (fixed pulse (at 1 s) and settable pulse delay) and instantaneous contact
M	Retriggerable interval relay with activated control signal (watchdog)	Retriggerable interval relay with activated control signal and instantaneous contact (watchdog)
--	--	Wye-delta function

The timing relay can be clearly labeled with the selectable functions using a set of labels. This is included in the scope of supply of the multifunctional relay.

The same potential must be applied to terminals A. and B.

Note:

The activation of loads parallel to the start input is permissible when using AC control voltage (see circuit diagram).

Circuit diagram

Relays

Timing Relays

SIRIUS 3RP25 timing relays, 17.5 mm and 22.5 mm

Benefits

- Easy stock keeping and logistics thanks to low variance of devices
- Reduced space requirement in the control cabinet thanks to variants in width 17.5 mm and 22 mm
- Consistent for all functions thanks to wide voltage range from 12 to 240 V AC/DC
- Up to 27 functions according to IEC 61812 in the multifunctional timing relay with wide voltage range
- Multifunctional timing relay with semiconductor output for high switching frequencies, bounce-free and wear-free switching

Standards and approvals

- IEC 60721-3-3 "Classification of environmental conditions"
- IEC 61812-1/DIN VDE 0435 Part 2021 "Specified time relays for industrial use"
- IEC 61000-6-2, IEC 61000-6-3 and IEC 61000-6-4 "Electromagnetic compatibility"
- IEC 60947-5-1 "Low-voltage switchgear and controlgear – Electromechanical control circuit devices"

Application

Timing relays are used in control, starting, and protective circuits for all switching operations involving time delays. They guarantee a high level of functionality and a high repeat accuracy of timer settings.

Enclosure version

All timing relays are suitable for snap-on mounting onto TH 35 standard mounting rails according to IEC 60715 or for screw fixing.

SIRIUS 3RP25 timing relays, 17.5 mm and 22.5 mm

¹⁾ 3RP2540 has a double function:
Function N = OFF-delay
Function O = Positive passing make contact.

Possibilities of operation of the 3RP2560-.SW30 timing relay

Operation 1: Start contact B./A2 is open when control supply voltage A./A2 is applied

The control supply voltage is applied to A./A2 and there is no control signal on B./A2. This starts the $\Upsilon\Delta$ timing. The idling time (coasting time) is started by applying a control signal to B./A2. When the set time t_{idling} (30 ... 600 s) has elapsed, the output relays (17/38 and 17/28) are reset. If the control signal on B./A2 is switched off (minimum OFF period 270 ms), a new timing is started.

Note:

Observe response time (dead time) of 400 ms on energizing control supply voltage until contacts 17/18 and 17/16 close.

Operation 1

Operation 2: Start contact B./A2 is closed when control supply voltage A./A2 is applied

if the control signal B./A2 is already present when the control supply voltage A./A2 is applied, **no** timing is started. The timing is only started when the control signal B./A2 is switched off.

Operation 2

Operation 3: Start contact B./A2 closes while star time is running

If the control signal B./A2 is applied again during the star time, the idling time starts and the timing is terminated normally.

Operation 3

Operation 4: Start contact B./A2 opens while delta time is running and is applied again

If the control signal on B./A2 is applied and switched off again during the delta time, although the idling time has not yet elapsed, the idling time (coasting time) is reset to zero. If the control signal is re-applied to B./A2, the idling time is restarted.

Operation 4

-  Timing relay energized
-  Contact closed
-  Contact open

t_Y = Star time 1 ... 20 s

t_{idling} = Idling time (coasting time) 30 ... 600 s

Note:

The following applies to all operations: The pressure switch controls the timing via B./A2.

Application example based on standard operation

(Operation 1): For example, use of 3RP2560 for compressor control

Frequent starting of compressors strains the network, the machine, and the increased costs for the operator. The new timing relay prevents frequent starting at times when there is high demand for compressed air. A special control circuit prevents the compressor from being switched off immediately when the required air pressure in the tank has been reached. Instead, the valve in the intake tube is closed and the compressor runs in "Idling" mode, i.e. in no-load operation for a specific time which can be set from 30 ... 600 s.

If the pressure falls within this time, the motor does not have to be restarted again, but can return to nominal load operation from no-load operation.

If the pressure does not fall within this idling time, the motor is switched off.

The pressure switch controls the timing via B./A2.

The control supply voltage is applied to A./A2 and the start contact B./A2 is open, i.e. there is no control signal on B./A2 when the control supply voltage is applied. The pressure switch signals "too little pressure in system" and starts the timing by way of terminal B./A2. The compressor is started, enters $\Upsilon\Delta$ operation, and fills the pressure tank.

When the pressure switch signals "sufficient pressure", the control signal B./A2 is applied, the idling time (coasting time) is started, and the compressor enters no-load operation for the set period of time from 30 ... 600 s. The compressor is then switched off. The compressor is only restarted if the pressure switch responds again (low pressure).

Relays

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation

General data

Overview

SIRIUS 3UG4 monitoring relay

Thanks to adjustable delay times the monitoring relays can respond very flexibly to brief faults such as voltage dips or load changes. This avoids unnecessary alarms and disconnections while enhancing plant availability.

The individual 3UG4 monitoring relays offer the following functions in various combinations:

- Undershooting and/or overshooting of liquid levels
- Phase sequence
- Phase failure, neutral conductor failure
- Phase asymmetry
- Undershooting and/or overshooting of limit values for voltage
- Undershooting and/or overshooting of limit values for current
- Undershooting and/or overshooting of limit values for power factor
- Monitoring of the active current or the apparent current
- Monitoring of the residual current
- Monitoring of the insulation resistance
- Undershooting and/or overshooting of limit values for speed

Conversion tool, e.g. from 3UG3 to 3UG4, see www.siemens.com/sirius/conversion-tool

The field-proven SIRIUS monitoring relays for electrical and mechanical variables enable constant monitoring of all important characteristic quantities that provide information about the functional capability of a plant. Both sudden disturbances and gradual changes, which may indicate the need for maintenance, are detected. Thanks to their relay outputs, the monitoring relays permit direct disconnection of the affected system components as well as alerting (e.g. by switching a warning lamp).

Overview

SIRIUS 3UG4615 monitoring relay

Solid-state line monitoring relays provide maximum protection for mobile machines and plants or for unstable networks. Network and voltage faults can be detected early and rectified before far greater damage ensues.

Depending on the version, the relays monitor phase sequence, phase failure with and without N conductor monitoring, phase unbalance, undervoltage or overvoltage.

Phase asymmetry is evaluated as the difference between the greatest and the smallest phase voltage relative to the greatest phase voltage. Undervoltage or overvoltage exists when at least one phase voltage deviates by 20 % from the set rated system voltage or the directly set limit values are overshoot or undershot. The rms value of the voltage is measured.

With the 3UG4617 or 3UG4618 relay, a wrong direction of rotation can also be corrected automatically.

Benefits

- Can be used without auxiliary voltage in any network from 160 to 630 V AC worldwide thanks to wide voltage range
- Variably adjustable to overshoot, undershoot or range monitoring
- Freely configurable delay times and RESET response
- Width 22.5 mm
- Permanent display of actual value and network fault type on the digital versions
- Automatic correction of the direction of rotation by distinguishing between power system faults and wrong phase sequence
- All versions with removable terminals
- All versions with screw or spring-type terminals

Application

The relays are used above all for mobile equipment, e.g. air conditioning compressors, refrigerating containers, building site compressors and cranes.

Function	Application
Phase sequence	<ul style="list-style-type: none"> • Direction of rotation of the drive
Phase failure	<ul style="list-style-type: none"> • A fuse has tripped • Failure of the control supply voltage • Broken cable
Phase asymmetry	<ul style="list-style-type: none"> • Overheating of the motor due to asymmetrical voltage • Detection of asymmetrically loaded networks
Undervoltage	<ul style="list-style-type: none"> • Increased current on a motor with corresponding overheating • Unintentional resetting of a device • Network collapse, particularly with battery power
Overtvoltage	<ul style="list-style-type: none"> • Protection of a plant against destruction due to overvoltage

Technical specifications

3UG4511 monitoring relays

The 3UG4511 phase sequenced relay monitors the phase sequence in a three-phase network. No adjustments are required for operation. The device has an internal power supply and works using the closed-circuit principle. If the phase sequence at the terminals L1-L2-L3 is correct, the output relay picks up after the delay time has elapsed and the LED is lit. If the phase sequence is wrong, the output relay remains in its rest position.

Note:

When one phase fails, connected loads (motor windings, lamps, transformers, coils, etc.) create a feedback voltage at the terminal of the failed phase due to the network coupling. Because the 3UG4511 relays are not resistant to voltage feedback, such a phase failure is not detected. Should this be required, then the 3UG4512 monitoring relay must be used.

Correct phase sequence

Wrong phase sequence

Relays

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation

Line monitoring

3UG4512 monitoring relays

The 3UG4512 line monitoring relay monitors three-phase networks with regard to phase sequence, phase failure and phase unbalance of 10%. Thanks to a special measuring method, a phase failure is reliably detected in spite of the wide voltage range from 160 to 690 V and feedback through the load of up to 90%. The device has an internal power supply and works using the closed-circuit principle. No adjustments are required. If the line voltage is switched on, the green LED will light up. If the phase sequence at the terminals L1-L2-L3 is correct, the output relay picks up. If the phase sequence is wrong, the red LED flashes and the output relay remains in its rest position. If a phase fails, the red LED is permanently lit and the output relay drops.

Note:

The red LED is a fault diagnostic indicator and does not show the current relay status. The 3UG4512 monitoring relay is suitable for line frequencies of 50/60 Hz.

Phase failure

Wrong phase sequence

3UG4513 monitoring relays

The 3UG4513 line monitoring relay monitors three-phase networks with regard to phase sequence, phase failure, phase asymmetry and undervoltage of 20%. The device has an internal power supply and works using the closed-circuit principle. The hysteresis is 5%. The integrated response delay time is adjustable from 0 to 20 s and responds to undervoltage. If the direction is incorrect, the device switches off immediately. Thanks to a special measuring method, a phase failure is reliably detected in spite of the wide voltage range from 160 to 690 V and feedback through the load of up to 80%. If the line voltage is switched on, the green LED will light up. If the phase sequence at the terminals L1-L2-L3 is correct, the output relay picks up. If the phase sequence is wrong, the red LED flashes and the output relay remains in its rest position. If a phase fails, the red LED is permanently lit and the output relay drops.

Note:

The red LED is a fault diagnostic indicator and does not show the current relay status. The 3UG4513 monitoring relay is suitable for line frequencies of 50/60 Hz.

Phase failure and undervoltage

Wrong phase sequence

3UG4614 monitoring relays

The 3UG4614 line monitoring relay has a wide voltage range input and an internal power supply. The device is equipped with a display and is parameterized using three buttons. The unit monitors three-phase networks with regard to phase asymmetry from 5 to 20%, phase failure, undervoltage and phase sequence. The hysteresis is adjustable from 1 to 20 V. In addition the device has a response delay and ON-delay from 0 to 20 s in each case. The integrated response delay time responds to phase asymmetry and undervoltage. If the direction is incorrect, the device switches off immediately. Thanks to a special measuring method, a phase failure is reliably detected in spite of the wide voltage range from 160 to 690 V and feedback through the load of up to 80%.

The 3UG4614 monitoring relay can be operated on the basis of either the open-circuit or closed-circuit principle and with manual or Auto RESET.

With the closed-circuit principle selected

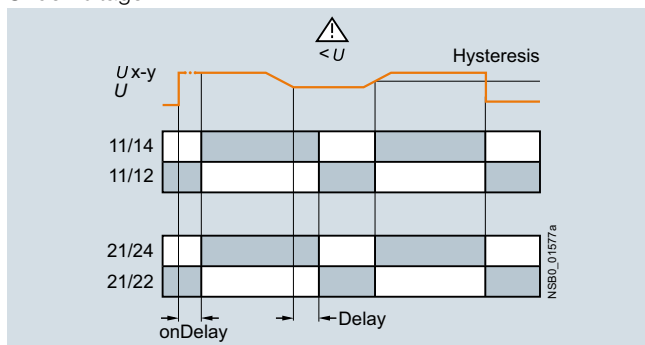

Wrong phase sequence

Phase failure

Undervoltage

Asymmetry

3UG4615/3UG4616 monitoring relays

The 3UG4615/3UG4616 line monitoring relay has a wide voltage range input and an internal power supply. The device is equipped with a display and is parameterized using three buttons. The 3UG4615 device monitors three-phase networks with regard to phase failure, undervoltage, overvoltage and phase sequence. The 3UG4616 monitoring relay monitors the neutral conductor as well. The hysteresis is adjustable from 1 to 20 V. In addition the device has two separately adjustable delay times for overvoltage and undervoltage from 0 to 20 s in each case. If the direction is incorrect, the device switches off immediately. Thanks to a special measuring method, a phase failure is reliably detected in spite of the wide voltage range from 160 to 690 V and feedback through the load of up to 80%.

The 3UG4615/3UG4616 monitoring relay can be operated on the basis of either the open-circuit or closed-circuit principle and with manual or Auto RESET.

Relays

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation

Line monitoring

3UG4617/3UG4618 monitoring relays

The 3UG4617/3UG4618 line monitoring relay has an internal power supply and can automatically correct a wrong direction of rotation. Thanks to a special measuring method, a phase failure is reliably detected in spite of the wide voltage range from 160 to 690 V AC and feedback through the load of up to 80%. The device is equipped with a display and is parameterized using three buttons. The 3UG4617 line monitoring relay unit monitors three-phase networks with regard to phase sequence, phase failure, phase unbalance, undervoltage and overvoltage. The 3UG4618 monitoring relay monitors the neutral conductor as well. The hysteresis is adjustable from 1 to 20 V. In addition the device has delay times from 0 to 20 s in each case for overvoltage, undervoltage, phase failure and phase unbalance. The 3UG4617/3UG4618 monitoring relay can be operated on the basis of either the open-circuit or closed-circuit principle and with manual or Auto RESET.

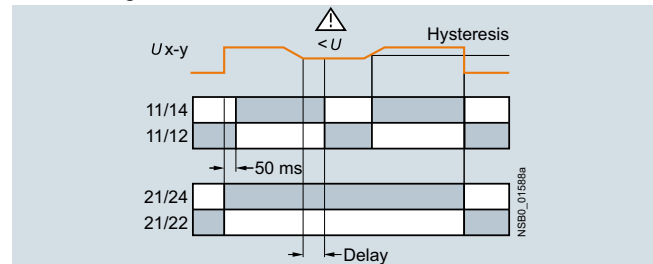

The one changeover contact is used for warning or disconnection in the event of power system faults (voltage, asymmetry), the other responds only to a wrong phase sequence. In conjunction with a contactor reversing assembly it is thus possible to change the direction automatically.

Relays

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation

Voltage monitoring

Overview

SIRIUS 3UG4631 monitoring relay

The relays monitor single-phase AC voltages (rms value) and DC voltages against the set threshold value for overshoot and undershoot. The devices differ with regard to their power supply (internal or external).

Benefits

- Versions with wide voltage supply range
- Variably adjustable to overshoot, undershoot or range monitoring
- Freely configurable delay times and RESET response
- Width 22.5 mm
- Display of ACTUAL value and status messages
- All versions with removable terminals
- All versions with screw or spring-type terminals

Application

- Protection of a plant against destruction due to overvoltage
- Switch-on of a plant at a defined voltage and higher
- Protection from undervoltage due to overloaded control supply voltages, particularly with battery power
- Threshold switch for analog signals from 0.1 to 10 V

Technical specifications

3UG4631/3UG4632 monitoring relays

The 3UG4631/3UG4632 voltage monitoring relay is supplied with an auxiliary voltage of 24 V AC/DC or 24 to 240 V AC/DC and performs overshoot, undershoot or range monitoring of the voltage depending on parameterization. The device is equipped with a display and is parameterized using three buttons.

The measuring range extends from 0.1 to 60 V or 10 to 600 V AC/DC. The threshold values for overshoot or undershoot can be freely configured within this range. If one of these threshold values is reached, the output relay responds according to the set principle of operation as soon as the delay time has elapsed. This delay time U_{Del} can be adjusted between 0.1 s and 20 s.

The hysteresis is adjustable from 0.1 to 30 V or 0.1 to 300 V. The device can be operated on the basis of either the open-circuit or closed-circuit principle and with Manual or Auto RESET. One output changeover contact is available as signaling contact.

With the closed-circuit principle selected

Overvoltage

Undervoltage

Range monitoring

3UG4633 monitoring relays

The 3UG4633 voltage monitoring relay has an internal power supply and performs overshoot, undershoot or range monitoring of the voltage depending on parameterization. The device is equipped with a display and is parameterized using three buttons.

The operating and measuring range extends from 17 to 275 V AC/DC. The threshold values for overshoot or undershoot can be freely configured within this range. If one of these threshold values is reached, the output relay responds according to the set principle of operation as soon as the tripping delay time has elapsed. This delay time U_{Del} can also be adjusted, just like the ON-delay time on_{Del} , from 0.1 to 20 s.

The hysteresis is adjustable from 0.1 to 150 V. The device can be operated on the basis of either the open-circuit or closed-circuit principle and with Manual or Auto RESET. One output changeover contact is available as signaling contact.

Overview

SIRIUS 3UG4622 monitoring relay

The relays monitor single-phase AC currents (rms value) and DC currents against the set threshold value for overshoot and undershoot. They differ with regard to their measuring ranges and control supply voltage types.

Benefits

- Versions with wide voltage supply range
- Variably adjustable to overshoot, undershoot or range monitoring
- Freely configurable delay times and RESET response
- Width 22.5 mm
- Display of ACTUAL value and status messages
- All versions with removable terminals
- All versions with screw or spring-type terminals

Application

- Overcurrent and undercurrent monitoring
- Monitoring the functionality of electrical loads
- Open-circuit monitoring
- Threshold switch for analog signals from 4 to 20 mA

Technical specifications

3UG4621/3UG4622 monitoring relays

The 3UG4621 or 3UG4622 current monitoring relay is supplied with an auxiliary voltage of 24 V AC/DC or 24 to 240 V AC/DC and performs overshoot, undershoot or range monitoring of the current depending on parameterization. The device is equipped with a display and is parameterized using three buttons.

The measuring range extends from 3 to 500 mA or 0.05 to 10 A. The rms value of the current is measured. The threshold values for overshoot or undershoot can be freely configured within this range. If one of these threshold values is reached, the output relay responds according to the set principle of operation as soon as the tripping delay time I_{Del} has elapsed. This time and the ON-delay time on_{Del} are adjustable from 0.1 to 20 s.

The hysteresis is adjustable from 0.1 to 250 mA or 0.01 to 5 A. The device can be operated with Manual or Auto RESET and on the basis of either the open-circuit or closed-circuit principle. The following options are available: response of the output relay when the control supply voltage U_s = ON is applied or not until the lower measuring range limit of the measuring current ($I > 3$ mA/50 mA) is reached. One output changeover contact is available as signaling contact.

With the closed-circuit principle selected upon application of the control supply voltage

Overview

SIRIUS 3UG4641 monitoring relay

The 3UG4641 power factor and active current monitoring device enables the load monitoring of motors.

Whereas power factor (p.f.) monitoring is used above all for monitoring no-load operation, the active current monitoring option can be used to observe and evaluate the load factor over the entire torque range.

Benefits

- Can be used worldwide thanks to wide voltage range from 90 to 690 V (absolute limit values)
- Monitoring of even small single-phase motors with a no-load supply current below 0.5 A
- Simple determination of threshold values by the direct collection of measured variables on motor loading
- Range monitoring and active current measurement enable detection of cable breaks between control cabinets and motors, as well as phase failures
- P.f. or I_{res} (active current) can be selected as the measurement principle
- Width 22.5 mm
- All versions with removable terminals

Application

- No-load monitoring and load shedding, such as in the event of a V-belt tear
- Underload monitoring in the low-end performance range, e.g. in the event of pump no-load operation
- Monitoring of overload, e.g. due to a dirty filter system
- Simple power factor monitoring in power systems for control of compensation equipment
- Broken cable between control cabinet and motor

Technical specifications

3UG4641 monitoring relays

The 3UG4641 monitoring relay is self-powered and serves the single-phase monitoring of the power factor or performs overshoot, undershoot or range monitoring of the active current depending on how it is parameterized. The load to be monitored is connected upstream of the IN terminal. The load current flows through the terminals IN and Ly/N. The setting range for the power factor is 0.1 to 0.99 and for the active current I_{res} it is 0.2 to 10 A. If the control supply voltage is switched on and no load current flows, the display will show $I < 0.2$ and a symbol for overrange, underrange or range monitoring. If the motor is now switched on and the current exceeds 0.2 A, the set ON-delay time begins. During this time, if the set limit values are undershot or exceeded, this does not lead to a relay reaction of the changeover contact. If the operational flowing active current and/or the power factor value falls below or exceeds the respective set threshold value, the spike delay begins. When this time has expired, the relay changes its switch position. The relevant measured variables for overshooting and undershooting in the display flash. If monitoring for active current undershoot is switched off ($I_{res} \blacktriangledown = \text{OFF}$), and if the load current undershoots the lower measuring range threshold (0.2 A), the CO contacts remain unchanged. If a threshold value is set for the monitoring of active current undershooting, then undershooting of the measuring range threshold (0.2 A) will result in a response of the CO contacts.

The relay operates either according to the open-circuit or closed-circuit principle. If the device is set to Auto RESET (Memory = No), depending on the set principle of operation, the switching relay returns to its initial state and the flashing ends when the hysteresis threshold is reached.

If Manual RESET is selected in the menu (Memory = Yes), the switching relay remains in its current switching state and the current measured value and the symbol for undershooting and overshooting continue to flash, even when the measured variable reaches a permissible value again. This stored fault status can be reset by simultaneously pressing the UP▲ or DOWN▼ keys for 2 seconds, or by switching the supply voltage off and back on again.

Relays

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation Residual Current Monitoring

Residual-current monitoring relays

Overview

SIRIUS 3UG4625 monitoring relay

The 3UG4625 residual-current monitoring relays are used in conjunction with the 3UL23 residual-current transformers for monitoring plants in which higher residual currents are increasingly expected due to ambient conditions. Monitoring encompasses pure AC residual currents or AC residual currents with a pulsating DC fault current component (transformer type A in accordance with DIN VDE 0100-530/IEC TR 60755).

Technical specifications

3UG4625 monitoring relays

The main conductor, and any neutral conductor to which a load is connected, are routed through the opening of the annular ring core of a residual-current transformer. A secondary winding is placed around this annular strip-wound core to which the monitoring relay is connected.

If operation of a plant is fault-free, the sum of the inflowing and outward currents equals zero. No current is then induced in the secondary winding of the residual-current transformer.

However, if an insulation fault occurs downstream of the residual current operated circuit breaker, the sum of the inflowing currents is greater than that of the outward currents. The differential current – the residual current – induces a secondary current in the secondary winding of the transformer. This current is evaluated in the monitoring relay and is used on the one hand to display the actual residual current and on the other, to switch the relay if the set warning or tripping threshold is overshoot.

If the measured residual current exceeds the set warning value, the associated changeover contact instantly changes the switching state and an indication appears on the display.

If the measured residual current exceeds the set tripping value, the set delay time begins and the associated relay symbol flashes. On expiry of this time, the associated changeover contact changes the switching state.

ON-delay time for motor start

To be able to start a drive when a residual current is detected, the output relays switch to the OK state for an adjustable ON-delay time depending on the selected open-circuit principle or closed-circuit principle.

The changeover contacts do not react if the set threshold values are overshoot during this period.

Benefits

- Worldwide use thanks to wide voltage range from 24 to 240 V AC/DC
- High measuring accuracy $\pm 7.5\%$
- Permanent self-monitoring
- Variable threshold values for warning and disconnection
- Freely configurable delay times and RESET response
- Permanent display of the actual value and fault diagnostics via the display
- High level of flexibility and space saving through installation of the transformer inside or outside the control cabinet
- Width 22.5 mm
- All versions with removable terminals
- All versions with screw or spring-type terminals

Application

Monitoring of plants in which residual currents can occur, e.g. due to dust deposits or moisture, porous cables and leads, or capacitive residual currents.

With the closed-circuit principle selected

Residual current monitoring with Auto RESET (Memory = no)

If the device is set to Auto RESET, the relay switches back to the OK state for the tripping value once the value falls below the set hysteresis threshold and the display stops flashing.

The associated relay changes its switching state if the value falls below the fixed hysteresis value of 5% of the set warning value.

Any overshoots are therefore not stored.

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation
Residual Current Monitoring

Residual-current monitoring relays

Residual current monitoring with Manual RESET (Memory = yes)

If Manual RESET is selected in the menu, the output relays remain in their current switching state and the current measured value and the symbol for overshooting continues to flash, even when the measured residual current returns to a permissible value. This stored fault status can be reset by pressing the UP▲ or DOWN▼ keys simultaneously for > 2 seconds, or by switching the supply voltage off and back on again.

Note:

Do not ground the neutral conductor downstream of the residual-current transformer as otherwise residual current monitoring functions can no longer be ensured.

Overview

SIRIUS 3UG458. insulation monitor

Insulation monitoring relays are used for monitoring the insulation resistance between ungrounded single or three-phase AC supplies and a protective conductor.

Ungrounded, i.e. isolated networks (IT networks) are always used where high demands are placed on the reliability of the power supply, e.g. emergency lighting systems. IT systems are supplied via an isolating transformer or by power supply sources such as batteries or a generator. While an initial insulation fault between a phase conductor and the ground effectively grounds the conductor, as a result no circuit has been closed, so it is possible to continue work in safety (single-fault safety). However, the fault must be rectified as quickly as possible before a second insulation fault occurs (e.g. according to DIN VDE 0100-410). For this purpose insulation monitoring relays are used, which constantly measure the resistance to ground of the phase conductor and the neutral conductor, reporting a fault immediately if insulation resistance falls below the set value so that either a controlled shutdown can be performed or the fault can be rectified without interrupting the power supply.

Two device series

- 3UG4581 insulation monitoring relays for ungrounded AC networks
- 3UG4582 and 3UG4583 insulation monitoring relays for ungrounded DC and AC networks

Benefits

- Devices for AC and DC systems
- All devices have a wide control supply voltage range
- Direct connection to networks with mains voltages of up to 690 V AC and 1 000 V DC by means of a voltage reducer module
- For AC supply systems: Frequency range 15 to 400 Hz
- Monitoring of broken conductors
- Monitoring of setting errors
- Safety in use thanks to integrated system test after startup
- Option of resetting and testing (by means of button on front or using control contact)
- New predictive measurement principle allows very fast response times

Application

IT networks are used, for example:

- In emergency power supplies
- In safety lighting systems
- In industrial production facilities with high availability requirements (chemical industry, automobile manufacturing, printing plants)
- In shipping and railways
- For mobile generators (aircraft)
- For renewable energies, such as wind energy and photovoltaic power plants
- In the mining industry

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation Insulation Monitoring

For ungrounded AC networks

Overview

SIRIUS 3UG4581 insulation monitor

The 3UG4581 insulation monitoring relays are used to monitor insulation resistance according to IEC 61557-8 in ungrounded AC networks with rated voltages of up to 400 V.

These devices can monitor control circuits (single-phase) and main circuits (three-phase).

They measure insulation resistances between system cables and system ground. If the value falls below the threshold value, the output relays are switched to fault status.

In the case of 3UG4581 a higher-level DC measuring signal is used. The higher-level DC measuring signal and the resulting current are used to determine the value of the insulation resistance of the network which is to be measured.

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation
Insulation Monitoring

For ungrounded DC and AC networks

Overview

SIRIUS 3UG4582 and 3UG4583 insulation monitors

The 3UG4582 and 3UG4583 insulation monitoring relays are used to monitor insulation resistance in ungrounded IT AC or DC networks according to IEC 61557-8.

They measure insulation resistances between system cables and system ground. If the value falls below the threshold value, the output relays are switched to fault status. With these devices, which are suitable for both AC and DC networks, a pulsed test signal is fed into the network to be monitored and the isolation resistance is determined.

The pulsed test signal changes its form according to insulation resistance and network loss capacitance. The changed form is used to predict the changed insulation resistance.

If the predicted insulation resistance matches the insulation resistance calculated in the next measurement cycle, and is lower than the threshold value, the output relays are activated or deactivated, depending on the device configuration. This measurement principle is also suitable for identifying symmetrical insulation faults.

3UG4983 voltage reducer module

The 3UG4983 passive voltage reducer module can be used to allow the 3UG4583 insulation monitoring relay to be used for insulation monitoring of IT networks with rated voltages of up to 690 V AC and 1 000 V DC.

Relays

SIRIUS 3UG45, 3UG46 Monitoring Relays for Stand-Alone Installation

Speed monitoring

Overview

SIRIUS 3UG4651 monitoring relay

The 3UG4651 monitoring relay is used in combination with a sensor to monitor motor drives for overspeed and/or underspeed.

Furthermore, the monitoring relay is ideal for all functions where a continuous pulse signal needs to be monitored (e.g. belt travel monitoring, completeness monitoring, passing monitoring, clock-time monitoring).

Benefits

- Can be used worldwide thanks to wide voltage range from 24 to 240 V (absolute limit values)
- Variably adjustable to overshoot, undershoot or range monitoring
- Freely configurable delay times and RESET response
- Permanent display of actual value and fault type
- Use of up to 10 sensors per rotation for extremely slowly rotating motors
- 2- or 3-wire sensors and sensors with a mechanical switching output or semiconductor output can be connected
- Auxiliary voltage for sensor integrated
- All versions with removable terminals
- All versions with screw or spring-type terminals

Application

- Slip or tear of a belt drive
- Overload monitoring
- Transport monitoring for completeness

Technical specifications

3UG4651 monitoring relays

The speed monitoring relay operates according to the principle of period duration measurement.

In the monitoring relay, the time between two successive rising edges of the pulse encoder is measured and compared to the minimum and/or maximum permissible period duration calculated from the set limit values for the speed.

Thus, the period duration measurement recognizes any deviation in speed after just two pulses, even at very low speeds or in the case of extended pulse gaps.

By using up to ten pulse encoders evenly distributed around the circumference, it is possible to shorten the period duration, and in turn the response time. By taking into account the number of sensors in the monitoring relay, the speed continues to be indicated in rpm.

ON-delay time for motor start

To be able to start a motor drive, and depending on whether the open-circuit or closed-circuit principle is selected, the output relay switches to the GO state during the ON-delay time, even if the speed is still below the set value.

The ON-delay time is started by either switching on the auxiliary voltage or, if the auxiliary voltage is already applied, by actuating the respective NC contact (e.g. auxiliary contact).

Speed monitoring with Auto RESET (Memory = no)

If the device is set to Auto RESET, the output relay switches to the GO state, once the adjustable hysteresis threshold is reached in the range of 0.1 to 99.9 rpm and the flashing stops. Any overshoots or undershoots are therefore not stored.

Speed monitoring with Manual RESET (Memory = yes)

If Manual RESET is selected in the menu, the output relay remains in its current switching state and the current measured value and the symbol for overshooting/undershooting continue to flash, even when the speed returns to a permissible value. This stored fault status can be reset by pressing the UP▲ or DOWN▼ keys simultaneously for > 2 s, by connecting the RESET device terminal to 24 V DC or by switching the control supply voltage off and back on again.

With the closed-circuit principle selected

Speed monitoring

Selection and ordering data

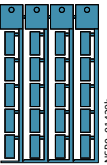

- For speed monitoring in revolutions per minute (rpm)
- Two- or three-wire sensor with mechanical or electronic switching output can be connected
- Two-wire NAMUR sensor can be connected
- Sensor supply 24 V DC/50 mA integrated
- Input frequency 0.1 to 2 200 pulses rpm (0.0017 to 36.7 Hz)
- With or without enable signal for the drive to be monitored
- Digitally adjustable, with illuminated LCD
- Overshoot, undershoot or range monitoring adjustable
- Number of pulses per revolution can be adjusted
- Upper and lower threshold value can be adjusted separately
- Auto, manual or remote RESET options after tripping
- Permanent display of actual value and tripping state
- 1 CO contact

There is no need for complex wiring between the safety evaluation unit and the actuator. • Expansion of the Standard device series by means of wiring • Expansion of the SIRIUS 3SK1 and SIRIUS 3SK2 Advanced device series by means of wiring or without wiring outlay by means of 3ZY12 device connectors 	3SK121, 3SK122, 3SK123	2/241, 2/242

Connection methods

The 3SK safety relays are available with screw or spring-type terminals (push-in).

The 3TK2810 safety relays and the 3RK3 Modular Safety System are available with screw or spring-type terminals.

Screw terminals

Spring-type terminals (push-in)

The terminals are indicated in the corresponding tables by the symbols shown on orange backgrounds.

3SK safety relays: Spring-type terminals (push-in)

Push-in connections are a form of spring-type terminals allowing fast wiring without tools for rigid conductors or conductors equipped with end sleeves.

As with other spring-type terminals, a screwdriver (with 3.0 x 0.5 mm blade) is required to disconnect the conductor. The same tool can also be used to wire finely-stranded or stranded conductors with no end finishing.

The advantages of the push-in terminals are found, as with all spring-type terminals, in speed of assembly and disassembly and vibration-proof connection. There is no need for the checking and tightening required with screw terminals.

Overview

SIRIUS 3SK safety relays

SIRIUS 3SK safety relays are the key elements of a consistent, cost-effective safety chain. Whether you need EMERGENCY-STOP functionality, protective door monitoring, light arrays, laser scanners or the protection of presses or punches – slimline SIRIUS safety relays enable all safety applications to be implemented in the best possible way in terms of engineering and price.

The following safety-related functions are available:

- Monitoring the safety functions of sensors
- Monitoring the sensor leads
- Monitoring the correct device function of the safety relay
- Monitoring the actuators in the shutdown circuit
- Safety-related disconnection when dangers arise

SIRIUS 3SK safety relays are approved for applications up to SIL 3 (IEC 61508/IEC 62061) or PL e (EN ISO 13849-1).

Device series

SIRIUS 3SK safety relays stand out due to their flexibility for both parameterization and system designs with several evaluation units. Optimized solutions when selecting components are facilitated by a clearly structured component range:

- 3SK1 Standard basic units
- 3SK1 Advanced basic units
- 3SK2 basic units
- 3SK output expansions
- 3SK1 input expansions
- Accessories

3SK1 Standard basic units

The 3SK1 Standard basic units are characterized by the following features:

- Compact design
- Simple operation
- Relay and semiconductor outputs
- Economical solution

3SK1 Advanced basic units

The 3SK1 Advanced basic units also offer:

- Universal application opportunities thanks to multifunctionality
- Time-delayed outputs
- Expansion of inputs and outputs

3SK2 basic units

The 3SK2 basic units also offer:

- Up to six fail-safe, independent shutdown functions
- Flexible application thanks to software parameterization
- Powerful semiconductor outputs
- User-friendly diagnostics using diagnostics display and configuring software

In the case of 3SK1 Advanced basic units or 3SK2 basic units, the 3ZY12 device connector allows safety functions involving several sensors and actuators to be constructed very quickly.

System configuration example

The 3SK1 and 3SK2 Standard and Advanced series are a high-quality replacement for the 3TK28 safety relays. In their narrower design, and equipped with greater functionality, they can replace every 3TK28 device. The only exception to this are the 3TK2810 devices.

1) 24 V basic units only.

2) 24 V AC/DC.

3) Possible using 3SK1230 power supply via device connector.

4) Up to 4 independent safe outputs, two of which via device connectors.

5) Up to 6 independent safe outputs, two of which via device connectors.

6) Possible using 3SK1230 power supply by means of wiring.

Parameter assignment

3SK112 and 3SK1112 with DIP switch

The 3SK112 and 3SK1112 safety relays are configurable safety relays. They are used as evaluation units for typical safety chains (detect, evaluate, respond). A number of functions can be set using the DIP switches on the front. 3SK112 and 3SK1112 are therefore universally applicable.

DIP switch No.	OFF	ON	Schematic
1	Autostart sensor input	Sensor input Monitored start	
2	Without crossover monitoring	With crossover monitoring	
3	2 x single-channel sensor connection	1 x 2-channel sensor connection	
4	With start test	Without start test	

3SK2 with software

The 3SK2 safety relays are configured with the SIRIUS Safety ES software. The behavior of a 3SK2 device as well as the functioning of the individual safe outputs can thus be parameterized simply and conveniently in the logic diagram. In addition, the configuration can be printed out for documentation purposes. The software also supports the user during commissioning and troubleshooting by means of online diagnostics and the option of being able to "force" signals in the logic plan. The 3SK2 safety relays thus offer maximum flexibility and universal application options.

Note:

For SIRIUS Safety ES, see www.siemens.com/ic10, Chapter 14 "Parameterization, Configuration and Visualization with SIRIUS".

Enclosure concept

Innovative enclosure concept for SIRIUS 3SK safety relays

Connection methods

The 3SK safety relays are available with screw or spring-type terminals (push-in).

Spring-type terminals (push-in)

Push-in connections are a form of spring-type terminals allowing fast wiring without tools for rigid conductors or conductors equipped with end sleeves.

As with other spring-type terminals, a screwdriver (with 3.0 x 0.5 mm blade) is required to disconnect the conductor. The same tool can also be used to wire finely-stranded or stranded conductors with no end finishing.

The advantages of the push-in terminals are found, as with all spring-type terminals, in speed of assembly and disassembly and vibration-proof connection. There is no need for the checking and tightening required with screw terminals.

Safety Relays

SIRIUS 3SK Safety Relays

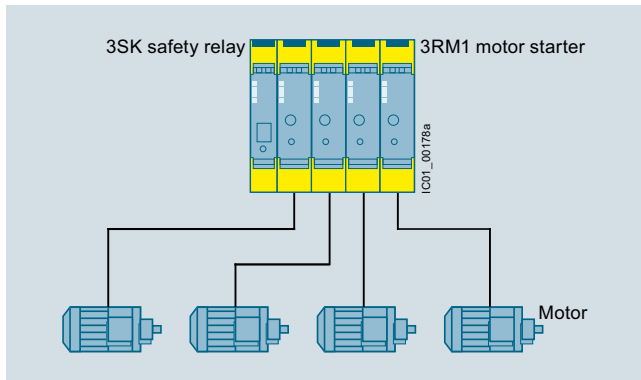

General data

Expansion option by adding the 3RM1 motor starter

With previous safety relay and motor feeder configurations, a huge amount of wiring was required to monitor motor feeders in safety applications.

With the integration of the SIRIUS 3RM1 motor starter into the SIRIUS 3SK safety relay system family, this wiring has been minimized for the first time. Motor starters up to 3 kW can easily be integrated into the safety relay system using SIRIUS 3ZY12 device connectors, without additional wiring between the evaluation unit and the motor starter.

For your orders, please use the article numbers quoted in the selection and ordering data.

Benefits

General

- Approved for all safety applications because of its compliance with the highest safety requirements (SIL 3 and PL e)
- Universally usable thanks to adjustable parameters
- Usable worldwide thanks to globally valid certificates
- Compact SIRIUS design
- Device connectors with standard rail mounting for flexible connectability and expandability
- Removable terminals for greater plant availability
- Yellow terminal covers clearly identify the device as a safety component
- Sensor cable up to 2 000 m long allows it to be used in extensive plants

Relay outputs

- Different voltages can be switched through the floating contacts.
- The power relay contacts allow currents of up to 5 A at AC-15/DC-13 to be connected.

Semiconductor outputs

- Wear-free
- Suitable for operation in frequently switching applications
- Insensitive to vibrations and dirt
- Good electrical endurance

Power outputs (3SK1213 output expansion)

- Different voltages can be switched through the floating contacts.
- The power relay contacts allow currents of up to 10 A AC-15/6 A DC-13 to be switched.
- High mechanical and electrical endurance
- Protective separation between safe outputs and electronics

Expansion option by adding the 3RM1 motor starter

SIRIUS 3SK safety relays are ideal for combining with the SIRIUS 3RM1 motor starters.

Combinations are made by means of

- SIRIUS 3ZY12 device connectors (in combination with 3SK1 Advanced/3SK2) or
- Conventional wiring (for all 3SK1 and 3SK2 basic units)

This makes collective shutdown very easy in assemblies. The wiring, and ultimately the shutting down of the control supply voltage for the expansion components in EMERGENCY-STOP situations, is performed via the device connector. There is no further need for complex looping of the connecting cables between the safety relay and the motor starters.

The 3RM1 motor starter combines the benefits of semiconductor technology and relay technology. This combination is also known as hybrid technology.

The hybrid technology in the motor starter is characterized by the following features:

- The inrush current in the case of motorized loads is conducted briefly via the semiconductors. Advantages include protection of the relay contacts and a long service life due to low wear.
- The uninterrupted current is conducted via relay contacts. Advantages include lower heat losses compared with the semiconductor.
- Shutdown is implemented again via the semiconductor. The contacts are only slightly exposed to arcs, and this results in a longer service life.
- Integrated overload protection

Note:

For SIRIUS 3RM1 motor starters, see www.siemens.com/ic10, Chapter 8.

3ZY12 device connectors

Using 3ZY12 device connectors to combine devices reduces the time required to configure and wire the components. At the same time errors are avoided during wiring, and this considerably reduces the testing required for the fully-assembled application.

Configuration and stock keeping

Variable setting options by means of DIP switches or software, a wide voltage range (3SK1111) and a special power supply unit (3SK1 only) reduce the cost of keeping stocks and the considerations involved in configuration where the evaluation units to be selected are concerned.

Application

3SK1 safety relays

SIRIUS 3SK1 safety relays are used mainly in autonomous safety applications which are not connected to a safety-related bus system. Their function here is to evaluate the sensors and the safety-related shutdown of hazards. Also they check and monitor the sensors, actuators and safety-related functions of the safety relay.

3SK2 safety relays

SIRIUS 3SK2 safety relays are used primarily in autonomous, more complex safety applications for which the functional scope of the 3SK1 devices is no longer sufficient, such as in the implementation of independent shutdown functions. Their function here is to evaluate the sensors and the safety-related shutdown of hazards. Also they check and monitor the sensors, actuators and safety-related functions of the safety relay.

Safety Relays

SIRIUS 3SK Safety Relays

Basic Units

SIRIUS 3SK1 Standard basic units

Overview

The 3SK111 Standard basic units are characterized by simple, variable functionality. These devices are recommended for safety functions requiring only a few sensors and a small number of outputs on the safety relay.

Note:

Use of device connectors not possible.

2

3SK111 Standard basic units

Overview

3SK112 Advanced basic units

The 3SK112 Advanced basic units form an innovative system landscape that allows even complex safety functions with large numbers of sensors and outputs to be built up using the device connectors. It is possible to increase both the number of inputs for sensors and the number of safe outputs of the basic unit without the need for wiring outlay between the devices.

Note:

Use of device connectors possible.

Safety Relays

SIRIUS 3SK Safety Relays

Basic Units

SIRIUS 3SK2 basic units

Overview

2

3SK2 basic units

The 3SK2 basic units have a large number of inputs and outputs within a narrow width. In addition, demanding safety applications can be implemented simply with several independent safety functions. Flexible application options are enabled by powerful semiconductor outputs, as well as by expandability with additional 3SK output expansions and 3RM1 Failsafe motor starters. Flexible time functions and diagnostics options are available.

Starter Kit

Starter Kit

The Starter Kit is a favorably-priced complete package for the simple creation of complex safety applications and comprises:

- 3SK2112-2AA10 basic unit, 22.5 mm wide, with spring-loaded terminal (push-in)
- SIRIUS Safety ES Standard software for configuring, commissioning, operating and diagnosing
- USB PC cable for easy transmission of the configuration to the device by means of USB

Overview

3SK121 output expansion

The 3SK121 output expansions can be used to expand all 3SK basic units.

3SK1211 output expansion

The 3SK1211 output expansion is used to expand the safe outputs of a basic unit by adding another four safe outputs. These outputs have a switching capacity of AC-15 5 A at a switching voltage of 230 V. The devices can be connected to any 3SK basic unit by means of wiring. In addition, the devices with a 24 V DC control supply voltage can also be connected to 3SK1 Advanced and 3SK2 basic units by means of the 3ZY12 device connectors.

3SK1213 output expansion

The 3SK1213 output expansion is used to expand the safe outputs of a basic unit by adding three safe outputs with high switching capacity. These outputs have a switching capacity of AC-15 10 A at a switching voltage of 230 V. The devices can be connected to any 3SK basic unit by means of wiring. As with the 3SK1211, the devices with a 24 V DC control supply voltage can also be connected to 3SK1 Advanced and 3SK2 basic units by means of the 3ZY12 device connectors.

Note:

It is only possible to expand the Standard basic units by means of wiring. Advanced basic units and 3SK2 basic units can be expanded using the 3ZY12 device connector.

Benefits

- Perfect adaptation of the number of inputs
- Simple expansion of instantaneous and time-delayed safe outputs of the Advanced basic units using device connectors
- When using the device connector the outputs on the terminals of the basic device can still be used
- Another two freely parameterizable shutdown functions on 3SK2 basic units when using device connectors
- Expansion with power contacts for high AC-15/DC-13 currents in the control circuit
- No wiring of the feedback circuit to the basic units is required when using device connectors
- Shorter installation times
- Less configuring and testing required

Safety Relays

SIRIUS 3SK Safety Relays

Expansion Units

Input expansions

Overview

3SK1220 sensor expansion

With the input expansions

- 3SK1220 sensor expansion
- 3SK1230 power supply

the 3SK1 Advanced basic units can be made more flexible.

3SK1220 sensor expansion

The 3SK1220 input expansion allows additional sensors to be integrated easily and flexibly. The device monitors two 1-channel sensors or one 2-channel sensor, whatever their output technology (floating/single-ended).

Note:

The 3SK1220 sensor expansion can only be connected to the 3SK1 Advanced basic units by means of the 3ZY12 device connector, see page 2/243.

3SK1230 power supply

The 3SK1230 power supply makes the 3SK1 devices universally usable, whatever control supply voltage is to be used.

Note:

Alongside the 3ZY12 device connector, the 3SK1230 power supply can also be wired to act as a power supply for 3SK1 devices.

Benefits

- A wide voltage range of 110 ... 240 V AC/DC allows the devices to be used worldwide
- Low stock keeping due to little variance
- Flexible expansion of the number of sensors without the need for additional wiring between the devices
- Perfect adaptation of the number of inputs to suit the application
- Universal use thanks to the wide range of adjustable parameters for sensor expansion (parameters as for 3SK1 Advanced basic units)

Overview

Numerous accessories are available for 3SK, such as device connectors, terminals, cables, adapters, covers, memory and diagnostics modules or software.

Device connectors for 3SK112., 3SK12.. and 3SK2

The device connector can be used to connect devices of the 3SK/3RM1 system together, with the last device in a system configuration being placed on a device termination connector. Use of device connectors not possible with 3SK1 standard.

Device connectors are available in various versions specifically for the 3SK safety relays:

For type	Device connectors				Device termination connectors	
	3ZY1212-1BA00 (for 3SK1, width 17.5 mm)	3ZY1212-2BA00 (for 3SK1, width 22.5 mm)	3ZY1212-2GA00 (for 3SK2, width 22.5 mm)	3ZY1212-4GA01 (for 3SK2, width 45 mm)	3ZY1212-2DA00 (for 3SK1, width 22.5 mm)	3ZY1212-0FA01 (for 3SK1, set for enclosures ≥ 45 mm)

SIRIUS 3SE5 Mechanical Position Switches

General data

Overview

The innovative SIRIUS 3SE5 position switches are modern in design, compact, modular and simple to connect. They save time and increase flexibility during installation of a whole range of switch variants. In principle it is possible to combine any enclosure with any operating mechanism, paying due consideration to the EN 50041 and EN 50047 standards where necessary.

Complete units

Popular versions of the position switches in standard enclosures are available as complete units.

3SE5 position switches with plastic and metal enclosures

Modular system

The 3SE5 series is the modular system comprising different sizes of the basic switch and an actuator which must be ordered separately. Thanks to the modular design of the switch the user can select the right solution for his application from numerous versions and install it himself in a very short time.

Simple plug-in mounting enables fast replacement of the actuator heads.

Examples of selection options in the modular system

Design

All enclosure variants have an integrated chlorinated rubber diaphragm for high functional safety in cold and aggressive environments.

Enclosure sizes

The 3SE5 switches are available in five different enclosure sizes with 2 or 3 contacts and with the XL enclosure:

- Open-type position switch IP20 or IP10
- Plastic enclosures according to EN 50047, 31 mm wide, IP65, 1 cable entry
- Metal enclosures according to EN 50047, 31 mm wide, IP66/IP67, 1 cable entry
- Plastic and metal enclosures according to EN 50041, 40 mm wide, IP66/IP67, 1 cable entry
- Plastic enclosures, 50 mm wide, IP66/IP67, 2 cable entries
- Metal enclosures, 56 mm wide, IP66/IP67, 3 cable entries
- XL metal enclosures with 4 to 6 contacts, 56 mm wide, IP66/IP67, 3 cable entries

Enclosure versions

Various basic switches can be selected for the enclosures of the 3SE5 series:

- With contact blocks with two or three contacts (screw terminals) designed as slow-action or snap-action contacts; the slow-action contacts also with make-before-break
- Optional LED status display
- With mounted four- or five-pole M12 connector socket (available for the wide enclosures as an accessory for self-assembly)
- With 6-pole connector socket + PE on the metal enclosures
- Versions with increased corrosion protection
- Versions for operating temperature down to $-40\text{ }^{\circ}\text{C}$
- AS-Interface version with integrated ASIsafe electronics for all enclosure designs (see www.siemens.com/ic10, Chapter 12)

Actuator variants

All operating mechanisms can be rotated around the axis in increments of 22.5° . The following actuator variants are available:

- Standard, rounded and roller plungers
- Roller levers and angular roller levers
- Spring rod
- Twist levers and rod actuators with twist lever actuator
- Fork levers with twist lever actuator

The actuator rollers are available with various materials and diameters.

Twist actuators for twist levers and rod levers, with setting of switching direction to right, left, or right/left (standard for all twist lever actuators except fork levers)

Cover design

The mechanical position switches have a turquoise cover, and the mechanical safety switches have a yellow cover.

On request the switches can be delivered ex works with a yellow cover. The cover does not have any effect on the way the switch works. Both versions can be used in safety applications.

Diverse contact types

Exchangeable two and three-pole contact blocks for all enclosure sizes

The three-pole contact block with snap-action or slow-action contacts is regularly available for all enclosure forms. The same installation space is required as for a two-pole block. The version with 1 NO + 2 NC offers for example more safety through redundant shutdowns (2 NC contacts) with simultaneous signaling (NO contact). The three-pole blocks are also available with make-before-break and with 2 NO + 1 NC.

Contact reliability

The contact blocks ensure an extremely high contact stability. This applies even when the devices are switching low voltages and currents, e.g. 1 mA at 5 V DC.

Positive opening ☺

The NC contacts of the switch are forced open mechanically, positively-driven and reliably by the plunger. This is referred to as "positive opening".

Mounting

Simple plug-in mounting for fast replacement of the actuator heads

Open the cover (1)
Actuate the locking lever (2)
Replace the head (rotatable by 16 x 22.5°) (3)
Lock and close the cover (4)

Quick-connect technology

For plastic enclosure with a width of 31 mm

These position switches can be wired quickly and easily as an added customer benefit. The connecting cable is first connected to the terminals of the contact block and then guided through a slit into the cable gland opening. The time saved through this new connection method is approx. 20 to 25 %.

A cable gland with seal must be used with the quick-connect method.

Optional LED indicators

LED indicators are available for all enclosure sizes except for XL. The enclosures are supplied with an LED signaling indicator (1 x green + 1 x yellow). This is the first time that optical signaling equipment is also available for small standard enclosures according to EN 50047. The LEDs are implemented in 24 V DC and 230 V AC.

Note:

The Article No. scheme shows an overview of product versions for better understanding of the logic behind the article numbers.

For your orders, please use the article numbers quoted in the selection and ordering data.

Benefits

The 3SE5 position switches differ from the previous series through the following new characteristics:

- The modular design of the product range allows a number of versions with a smaller number of bearing types for enclosures and operating mechanisms.
- All actuators can be turned around the axis in increments of 22.5° (see picture, page 2/249).
- Rounded and roller plungers according to EN 50041 with 3 mm overtravel (total travel 9 mm) for greater tolerance when switching.
- All enclosure sizes – now also including the small enclosure 31 mm wide – are optionally available with an LED signaling indicator (see picture, page 2/249).
- All enclosure variants have an integrated chlorinated rubber diaphragm for high functional safety in cold and aggressive environments.
- All contact blocks are replaceable.
- The three-pole contact blocks are available for all enclosure sizes (see picture, page 2/249).
- Elements with 1 NO + 2 NC slow-action contacts with make-before-break and 2 NO + 1 NC.
- The short-stroke contact block 1 NO + 1 NC improves the precision of the switching operation through a reduced actuation path.
- The contact block with 1 NO + 1 NC snap-action contacts with 2 x 2 mm contact opening is suitable for simultaneous disconnection and signaling, particularly in the elevator industry.
- XL metal enclosures for accommodating two 2 or 3-pole contact blocks.
- The plastic enclosure with a width of 31 mm has simple and fast wiring equipment which saves approx. 20 to 25 % of the time when connecting (see picture, page 2/249).
- The ASIsafe electronic component is integrated in the enclosure for the versions with AS-Interface connection (see www.siemens.com/ic10, Chapter 12); an additional adapter is not required.

Application

With the standard position switches, mechanical positions of moving machine parts are converted into electrical signals. Through their modular and uniform design and large number of variants, the devices can comply with practically all requirements in industry.

Devices are available with enclosure versions to suit the particular ambient conditions. Different control tasks can be performed with the best contact blocks suited for the particular purpose. And many different actuator variants are available to match the mechanical configuration of the moving machined parts. Dimensions, fixing points and characteristics are largely in accordance with the EN 50041 or EN 50047 standards.

The devices are suitable for use in any climate.

Standards

IEC 60947-5-1 or EN 60947-5-1

The protective measure of "total insulation" by the molded-plastic enclosure is guaranteed by the use of molded-plastic screw glands.

Safety position switches

For controls according to IEC 60204-1 or EN 60204-1 the devices can be used as a safety position switch. They comply with the standard EN ISO 14119. A TÜV certificate is available. To secure position switches against changes in their position, keyed techniques must be employed on installation.

Safety circuits

Standards IEC 60947-5-1 and EN 60947-5-1 require positive opening of the NC contacts. In other words, for the purposes of personal safety, the assured opening of NC contacts is expressly stipulated for the electrical equipment of machines in all safety circuits and marked in accordance with the IEC standard 60947-5-1 with the symbol .

Category 2 according to EN ISO 13849-1 can be attained with 3SE5 position switches with , and category 3 or 4 when using an additional position switch, if the corresponding fail-safe evaluation units are selected and correctly connected. Example: 3SK or 3TK28 safety relays or the corresponding devices from the ASIsafe, SIMATIC or SINUMERIK programs. The operating mechanisms (actuators) must also be connected to the enclosure by keyed techniques. The corresponding operating mechanisms are marked in the catalog with .

Contacts for every application

- **Snap-action contacts:** NC and NO contacts switch simultaneously – regardless of the actuating speed ($v_{\min} = 0.01$ m/s) and contact erosion.
- **Slow-action contacts:** Difference in travel between "NC contact opens" and "NO contact closes"; the switching speed is the same as or proportional to the actuating speed ($v_{\min} = 0.4$ m/s).
- **Slow-action contacts with make-before-break:** e.g. suitable for adding a second function to a sequence control.

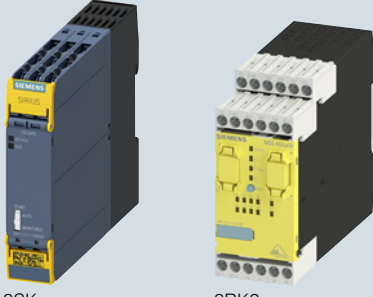

Operating mechanisms for every applicationStandard, rounded and roller plungers

- Operation in direction of the plunger axis or in case of roller plunger with bar at right angles to the plunger axis.
- The roller plunger is recommended for lateral actuation and relatively long overtravel.

Roller levers and angular roller levers

- For actuators made of finely ground steel in the form of cams, straight-edges (approach angle 30°) or cam disks.

Monitoring with fail-safe evaluation units from the 3SK and 3RK3 series

Safe evaluation units	Maximum achievable safety level according to type of switch				
	Compact	Standard	Hinge	Separate actuator	Tumbler
 <p>3SK 3RK3</p>	 <p>3SE54</p>	 <p>3SE51 / 3SE52</p>	 <p>3SE51 / 3SE52</p>	 <p>3SE51 / 3SE52</p>	 <p>3SE53</p>
Use of only one position switch/safety switch					
Monitoring with 1 contact: 1 x NC contact	SIL 1 / PL c				
Monitoring with 2 contacts: 2 x NC contact or 1 x NC contact + 1 x NO contact	SIL 1 / PL c	SIL 2 / PL d			
Use of a second position switch/safety switch					
Standard switch	3SE51 / 3SE52				
Safety switch / hinge switch	3SE51 / 3SE52				
Safety switch with separate actuator	3SE51 / 3SE52				
Safety switches with tumbler	3SE53		SIL 3 / PL e		

Note:

Taking account of certain fault exclusions (e.g. actuator breakage), use of just one hinge switch or a switch with separate actuator with or without tumbler up to SIL 2 or PL d is possible as described in the table.

Since the machine manufacturer must provide proof of fault exclusion, the component manufacturer is unable to carry out a definitive assessment of the measures taken.

Spring rod

- Can be used for undefined actuations and changing starting conditions
- Starting from any direction is possible

Twist levers and rod actuators

- For a high starting speed ($v = 1.5$ m/s)
- Variety of starting options
- Insensitive to oil, grinding dust and coarse-grained material
- Adjustment of the lever in increments of 10°
- Can be adjusted with left or right switching

Fork lever

- Switchable in two directions
- Latching actuator
- For reciprocating movements

SIRIUS 3SE5 Mechanical Position Switches

3SE5, Metal Enclosures

Compact design

Overview

Compact design in width 30 mm

Particularly in harsh environments or on equipment with limited space, the small 3SE54 position switches in compact design with a depth of 16 mm and a weight of only 80 g (without cable) are ideal. Above all the versions with molded cable can be mounted in the most confined spaces.

3SE54 compact position switches are available in two different widths as complete units:

- The 3SE5413 series complies with the EU standard and features a 30 mm wide enclosure with drilled holes at a distance of 20 mm.
- The 3SE5423 series meets the requirements of the US market and features a 40-mm-wide enclosure with drilled holes at a spacing of 25 mm.

Both the enclosure and the actuator head are made of metal and comply with the high IP67 degree of protection. The following actuators are available:

- Rounded plungers
- Rounded plungers with central fixing
- Rounded plungers with external seal
- Roller plungers
- Roller plungers with central fixing
- Twist levers

The contact block is designed with snap-action contacts 1 NO + 1 NC. The NC contact complies with the requirements for positive opening acc. to IEC 60947-5-1.

Use in safety circuits up to Category 4 according to EN ISO 13849-1.

Connection:

- With molded cable, 2 m or 5 m long
- With M12 connector socket

Benefits

- Very compact yet with the same rating as the 3SE51 standard switches, for notable space savings in confined installation conditions
- Various actuator versions available
- Roller plungers can be rotated through 90°
- Twist levers, can be rotated through 180°; twist lever can be adjusted in 15° increments
- Time is saved when mounting the fully assembled unit
- With metal enclosure of degree of protection IP67, ideal for use in rough industrial environments
- Insensitive to electromagnetic interference

AS-Interface solutions

Pushbuttons and indicator lights of the SIRIUS ACT series can be connected to the AS-Interface communication system quickly and easily with the help of various solutions.

For AS-Interface solutions, see [Catalog IK PI "Industrial Communication SIMATIC NET"](#).

AS-Interface EMERGENCY STOP according to ISO 13850

Using special modules, EMERGENCY STOP devices according to ISO 13850 can be directly connected through the standard AS-Interface with safety-related communication (see www.siemens.com/ic10, Chapter 13).

AS-Interface enclosures

Enclosures with standard fittings are listed in this catalog. For customized enclosures, use the SIRIUS ACT Configurator to select the elements for equipping (see page 2/315).

PROFINET solutions

SIRIUS ACT devices will be equipped in future with a direct communication interface to PROFINET and PROFIsafe.

RFID authentication solutions

Groups of employees or individuals can be authenticated by means of the ID key-operated switch. Color-coded keys for easy distinction between users and flexible in application thanks to four function stages.

Overview

SIRIUS ACT pushbuttons and indicator lights

SIRIUS ACT – commanding and signaling

SIRIUS ACT is a modular system of pushbuttons and indicator lights for front plate mounting and rear-mounted electrical modules.

Extensive portfolio

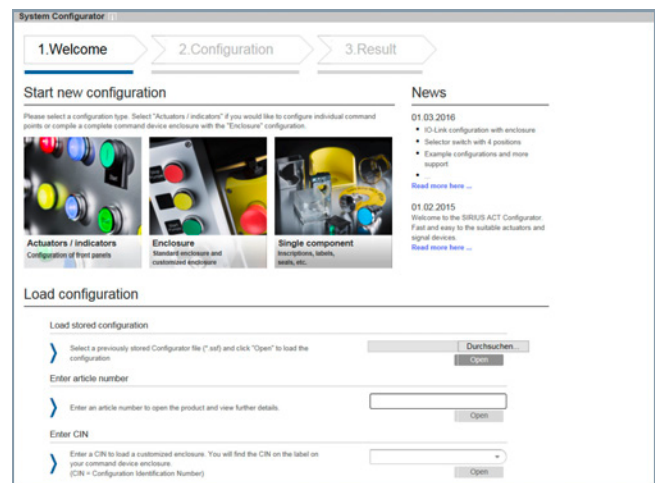

- Customized variants, e.g. special tumbler arrangements, labeling, equipped enclosures
- Communication-enabled thanks to direct interfacing to AS-Interface, IO-Link or PROFINET

Diverse possible applications

- National and international approvals
- Many trade approvals
- Short delivery times thanks to global availability

Standards

- IEC 60947-1, EN 60947-1
- IEC 60947-5-1, EN 60947-5-1
- IEC 60947-5-5, EN 60947-5-5 for EMERGENCY STOP devices

Configurator

- Fast, simple selection by intuitive navigation through clearly-organized menus using drag & drop
- Image preview of selected components
- Inscription of pushbuttons and labeling plates using the interactive inscription tool
- Once created, a configuration can be ordered as often as required using the customer-specific article number and the CIN (Configuration Identification Number)
- Everything at a glance: Product data sheets, certificates, dimensional drawings, list prices, inscription tool

SIRIUS ACT Pushbuttons and Indicator Lights

General data

Benefits

Design

SIRIUS ACT is available in four design lines.

Ruggedness

- Degree of protection IP66, IP67, IP69 (IP69K)

IP66

6 = Protection against the ingress of dust

6 = Protection against powerful splashwater

IP67

6 = Protection against the ingress of dust

7 = Protection against temporary immersion

IP69 (IP69K)

6 = Protection against the ingress of dust

9/9K = Protection against water in high-pressure cleaning (approx. 80 bar) and high water jet temperatures (approx. 80°C)

- Service life of 100 000 hours thanks to use of LEDs
- Media resistance (chemicals) thanks to solid stainless steel and high-grade plastics
- Mechanical endurance of 10×10^6 switching cycles
- Suitable for use in extreme environments
- Reliable, friction-locked fixing with just one screw
- Design stability according to use
- Simple geometry for mounting holes

Communication

- Direct connection of the enclosure to AS-Interface or IO-Link
- Direct connection in the control cabinet to PROFINET, IO-Link or AS-Interface
- Can be integrated easily via the TIA Portal

Easy handling

- Self-holding function of the actuator when mounting
- Twist prevention integrated into patented holder design
- Stackable contact modules
- Self-explanatory and fast installation using one hand
- Components can be mounted with holder removed
- No special tools required, simple size 2 screwdriver (cross-tip ISO 87641PZD1, flat-head ISO 2380-1 A/B 1x4.5) is sufficient

Mounting dimensions**Versions**

SIRIUS ACT is a modular system of pushbuttons and indicator lights with which customized variants can be configured flexibly.

One command point comprises:

- An actuating or signaling element in front of the control panel
- A holder for securing behind the control panel
- Up to six contact modules and/or one LED module (mounted onto the holder), single-pole contacts can be stacked
- A comprehensive range of accessories for inscription/markings

Compact units

Signaling devices, sensor switches, and pushbuttons with extended stroke are available as compact units. The electronic circuitry is already integrated in these devices, i.e. it is not necessary to snap on a contact or LED module.

	Minimum clearance		
	a	b	c
	mm	mm	mm
22 mm, plastic with metal front ring, matte for front plate thickness 1 ... 6 mm			
3-slot holder	30	40	22.3 ^{+0.4}
4-slot holder	40	40	22.3 ^{+0.4}
30 mm, metal, matte for front plate thickness 1 ... 4 mm			
3-slot holder	40	45	30.5 ^{+0.5}

Application

Environmental conditions

The pushbuttons and indicator lights are climate-proof (KTW 24) and suitable for standard industrial applications and operation in marine applications.

Safety EMERGENCY STOP pushbuttons according to ISO 13850

For controls according to IEC 60204-1 or EN 60204-1, the SIRIUS ACT mushroom pushbuttons are suitable for use as safety EMERGENCY STOP pushbuttons.

Safety circuits

IEC 60947-5-1 and EN 60947-5-1 require positive opening. This means that for the purpose of personal safety, the reliable opening of NC contacts in all safety circuits is expressly prescribed for the electrical equipment of machines and is designated according to IEC 60947-5-1 with the symbol (⊖).

Category 4 according to EN ISO 13849-1 can be attained with the EMERGENCY STOP mushroom pushbuttons if the corresponding fail-safe evaluation units are selected and correctly installed, e.g. the 3SK11 safety relays or the 3RK3 Modular Safety System (see www.siemens.com/ic10, Chapter 11) or matching units from the ASIsafe, SIMATIC or SINUMERIK product ranges.

The SIRIUS ACT pushbuttons and indicator lights can be connected to the AS-Interface communication system quickly and safely.

The following solutions are available:

- AS-Interface modules
- AS-Interface module in safety-related version for EMERGENCY STOP mushroom pushbutton
- Ready-fitted AS-Interface enclosures with 1 to 6 command points

IO-Link

The SIRIUS ACT pushbuttons and indicator lights can be connected to IO-Link quickly and safely. The connection is made via a special IO-Link-module.

SIRIUS ACT Pushbuttons and Indicator Lights

Actuators and Indicators, Customized Designs

Special locks

Options

Special locks for key-operated switches

The plastic and metal key-operated switches of type RONIS, BKS, CES and IKON can be optionally ordered with additional locks.

In this case "**-Z**", the order code "**Y01**" and the required lock number must be added to the Article No. of the relevant key-operated switch for standard locking.

Order code	Y01
Standard delivery time	25 working days
Ordering example	3SU1000-5BF01-0AA0-Z Y01 Z = SSG18

Ordering notes

- The order code "**Y01**" must be quoted in accordance with the above table. Automated processing of the order with a defined delivery time can be guaranteed only for correctly submitted orders.
- For applications in which access security is important and several lock numbers are used, we recommend the use of BKS or CES key-operated switches.
- Special locks for VW (E1, E2, ...) will be delivered without keys, all others with 2 keys.
- With RONIS, the special locks SB31, 421 and 455 are possible.

Master and master-pass key systems

The following key systems can be supplied with BKS, CES or IKON key-operated switches:

- Central lock systems
- Master key systems
- Central master key systems
- Master-pass key systems

When placing an order you must supplement the Article No. of the matching key-operated switches with "**-Z**" and quote the order code "**Y03**".

Delivery time on request.

Example of master-pass key system

Options

Inscription of actuating and signaling elements

Actuating and signaling elements of plastic as well as metal can be optionally inscribed with a laser.

Example of laser inscription

The actuators of the pushbuttons, illuminated pushbuttons, twin pushbuttons, mushroom pushbuttons, illuminated mushroom pushbuttons, EMERGENCY STOP mushroom pushbuttons (without lock), the lenses of the indicator lights, and the acoustic signaling devices can all be inscribed.

Version

Text inscriptions have centered alignment and a font height of 4 mm as standard.

The typeface used is Arial. Other letter heights and typefaces are possible, but must be specified when ordering.

The maximum possible number of characters per line is:

- 10 characters for one line of text
- 8 characters for 2 lines of text
- 6 characters for 3 lines of text, but 10 characters in the middle line.

Note:

Selected pushbuttons and twin pushbuttons can be supplied as standard with inscribed letters or symbols.

Selector switches, key-operated switches and toggle switches can be inscribed on the front ring only if they are made of plastic (only one text line and the supplement Y19).

Assignment of the positions on the actuator

Ordering notes

To order, the inscribed actuating and signaling elements can be selected via the SIRIUS ACT Configurator. An electronic order form is then generated.

For configurator, see

- www.siemens.com/sirius-act/configurator
- Electronic Catalog CA 01 on DVD or
- Industry Mall: www.siemens.com/industrymall

When ordering, add **-Z** and an order code to the Article No. of the actuator or the indicator light:

- **Y10:** Text line in upper/lower case, all lines begin with upper case letters (e.g. Lift / Off)
- **Y11:** Text in upper case (e.g. LIFT)
- **Y12:** Text in lower case (e.g. lift / off / lower)
- **Y15:** Text in upper/lower case, all words begin with upper case letters (e.g. On / Off)
- **Y13:** Symbol with number according to ISO 7000 or IEC 60417
- **Y19:** Inscription of choice, text or symbol, can only be ordered via SIRIUS ACT Configurator with a Configuration Identification Number (CIN)

When ordering, specify the required inscription in plain text without spaces, in addition to the Article No. and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language. In the case of symbols with number, quote the corresponding standard (see ordering example 1).

In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. Z1=Lift, Z2=Lower. For long words you can also specify the end-of-line division.

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417 (see ordering examples 2 and 3).

The SIRIUS ACT Configurator must be used to select special inscriptions and symbols (order code Y19). In this case a CIN (Configuration Identification Number) is generated for placement of future orders. It is then possible to place an order directly using the CIN and the SIRIUS ACT Configurator (Mall shopping cart) or via the standard ordering channels.

Ordering example 1

A round pushbutton with the inscription Reset is required:

3SU1030-0AB20-0AA0-Z

Y10

Z=Reset (English)

Ordering example 2

A square pushbutton inscribed with symbol No. 5389 according to IEC 60417 is required:

3SU1030-0AB20-0AA0-Z

Y13

Z=IEC5389

Ordering example 3

A selector switch with 2 switch positions and multi-line inscription on the front ring is required:

3SU1002-2BF10-0AA0-Z

Z8=0

Z2=1

SIRIUS ACT Pushbuttons and Indicator Lights

Holders

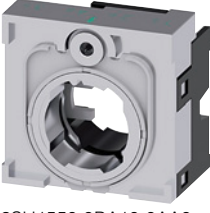

Holders without module/holders with module

Overview

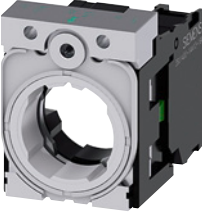

Holders made of plastic can only be attached to actuators and indicators made of plastic (3SU100) or plastic with metal front ring (3SU103).

Metal holders can be attached to all versions of actuators and indicators. Metal holders are automatically grounded by their fastening screw, but a grounding stud can also be fitted.

SIRIUS ACT Pushbuttons and Indicator Lights

Modules for Actuators and Indicators

Contact modules

Overview

Contact modules and LED modules

The contact modules are fitted with slow-action contacts (NO contacts or NC contacts). These ensure a high switching reliability even with small voltages and currents, such as 5 V/1 mA. They are suitable for use in electronic systems as well as conventional controls. The contact pieces of the NC contacts are positively driven.

Only LED modules with permanently integrated LEDs are available for illumination.

Contact modules and LED modules bear terminal designations acc. to EN 50013

Mounting the modules

With SIRIUS ACT, the modules are mounted on the holder without any further accessories. Holders in plastic or metal versions are available for mounting three modules.

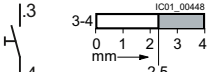

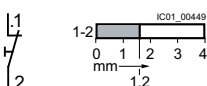

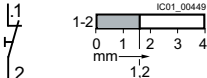

Connection methods

The modules are available with:

- Screw terminals
- Spring-type terminals or
- Solder pin connection (0.8 mm × 0.8 mm solder pins) for assembly on printed circuit boards

Overview

Design

Enclosures with standard fittings

Enclosed SIRIUS ACT pushbuttons and indicator lights are used as hand-operated control devices for separately allocated control units and cabinets. The devices are suitable for use in any climate and all have IP66, IP67, IP69 (IP69K) degree of protection, including those with cable glands.

Standards

IEC 60947-5-1 or EN 60947-5-1

Versions

The enclosed pushbuttons and indicator lights are available with conventional controls as well as for connection to AS-Interface. The following versions are available:

- Empty enclosures with 1 to 6 command points (the installed components must be ordered separately; modules for floor mounting or 1-pole contact and LED modules can be used)
- Enclosures with standard fittings with 1 to 3 command points, e.g. EMERGENCY STOP enclosure with EMERGENCY STOP mushroom pushbutton
- Enclosures with customized fittings with 1 to 6 command points
- Enclosure for 4-position selector switches, coordinate switches, ID key-operated switches and sensor switches

Color of the enclosures

Top:

- Gray, RAL 7035
- Yellow, RAL 1004 for EMERGENCY STOP

Base:

- Black, RAL 9005

Enclosures with standard fittings

Pushbuttons and indicator lights in the enclosure

Customized enclosures

The fittings and labeling of the command point can be chosen using the configurator on the Internet.

Application

The enclosures are climate-proof (KTW 24) according to EN ISO 6270-2 and suitable for stationary use, and for use in marine applications.

Overview

With AS-Interface enclosures, distributed SIRIUS ACT pushbuttons and indicator lights can be quickly connected to the AS-Interface communication system. Using suitable components you can make your own enclosures with integrated AS-Interface or flexibly modify existing enclosures.

Enclosures for AS-Interface

Enclosures

Color of enclosure top:

- Gray, RAL 7035
- Yellow, RAL 1004 for EMERGENCY-STOP

Color of enclosure base:

- Black, RAL 9005

Equipping with AS-Interface slaves

The following slaves are available for connecting the command points:

- Slave in A/B technology with 4 digital inputs and 3 digital outputs (4 DI/3 DQ)
- Slave with 4 digital inputs and 4 digital outputs (4 DI/4 DQ)
- F slave with 2 safe inputs for EMERGENCY STOP mushroom pushbutton (2 F-DI), also with integrated red LED for the illuminated EMERGENCY STOP mushroom pushbutton.

The following table shows the maximum number of slaves possible:

Number of command points	Number of slaves for enclosures without EMERGENCY STOP	Number of slaves for enclosures with EMERGENCY STOP
1	--	1 x F slave 2 F-DI
2	1 x slave 4 DI/4 DQ or 4 DI/3 DQ	--
3	1 x slave 4 DI/4 DQ or 4 DI/3 DQ	1 x slave 4 DI/4 DQ or 4 DI/3 DQ + 1 x F slave
4	2 x slave 4 DI/4 DQ or 4 DI/3 DQ	2 x slave 4 DI/4 DQ or 4 DI/3 DQ + 1 x F slave
6	2 x slave 4 DI/4 DQ or 4 DI/3 DQ	2 x slave 4 DI/4 DQ or 4 DI/3 DQ + 1 x F slave

Connection

One set of links is required in each case to connect a slave to contact modules, LED modules, and the connection element.

The connection elements are mounted in the front-end cable glands and are used to connect the AS-Interface or bring unused inputs or outputs out of the enclosure.

For connection to AS-Interface, the following options are available:

- Terminal for shaped AS-Interface cable. The cable is contacted by the insulation piercing method and routed past the enclosure on the outside (possible only with plastic enclosure).
- Cable gland for the shaped AS-Interface cable or round cable. The cable is routed into the enclosure (preferable for metal enclosure).
- Connection using M12 plug.

If less than all inputs/outputs of the installed slaves in an enclosure are used for connecting the command devices, free inputs and outputs can be routed on request to the outside through an M12 socket on the top or bottom side of the enclosure.

To supply inputs with power, the S+ connection of the slave must be assigned to the socket, for outputs the OUT- connection must be assigned. Addressing is performed using the AS-Interface connections or the integrated addressing socket. An external power supply is not required.

Enclosures with standard fittings

Enclosures with standard fittings are available with:

- 1 to 3 command points
- Operational voltage through AS-Interface (approx. 30 V)
- Vertical mounting type
- Plastic enclosure with plastic actuators and indicators, metal enclosure with metal actuators and indicators

The enclosures without EMERGENCY STOP each have one module with 4I/3O; the enclosures with EMERGENCY STOP mushroom pushbuttons have a safe AS-Interface slave integrated in the enclosure. Enclosures with EMERGENCY STOP mushroom pushbuttons are fitted with two NC contact modules, which are wired to the safe F slave.

The contact modules and LED modules (with spring-type terminals) of the command devices and the AS-Interface slaves are mounted in the base of the enclosure and connected using cables. The plastic enclosures are designed with a connection for the AS-Interface flat cable (the cable is run along the outside of the enclosure). With metal enclosures, the AS-Interface cable is run inside the enclosure.

The enclosures with EMERGENCY STOP mushroom pushbuttons are also available with an M12 connector.

Customized enclosures (selection by configurator)

To order customized 3SU18 AS-Interface enclosures with pushbuttons and indicator lights, the configurator must be used to select the fittings. An electronic order form will be generated for the options.

For the configurator, see www.siemens.com/sirius-act/configurator.

SIRIUS ACT Pushbuttons and Indicator Lights

Accessories

Labels

Insert labels

Overview

Labels can be inserted for identification purposes in pushbuttons (clear) and in illuminated pushbuttons with a flat button. These insert labels are made of transparent plastic with black inscription; they can be fitted in any 90° angle.

Inscription

The inscription is in upper/lower case, all words begin with upper case letters. Graphic symbols, including those not listed in the catalog, are according to ISO 7000 or IEC 60417.

The insert labels without inscription are suitable for user marking with permanent pen.

For customized inscriptions, see "Options", page 2/319.

Selection and ordering data

10 **3SU1900-0AB71-0AZ0** 1 1 unit 41J 0.042

Options

Customized inscriptions

The labels can be inscribed with text and symbols not listed in the ordering data.

Text inscriptions have centered alignment and a font height of 4 mm as standard (for a single line of text) or 3 mm (for two or three lines of text).

The typeface used is Arial. Other letter heights and typefaces are possible, but must be specified when ordering.

For round insert labels, the maximum possible number of characters per line is:

- 10 characters for one line of text
- 8 characters for two lines of text
- 6 characters for three lines of text, but 10 characters in the middle line.

Examples for customized inscription

Two-line inscription in upper/lower case lettering (Q0Y)

Single-line inscription in upper case lettering (Q1Y)

Three-line inscription in lower case letters (Q2Y)

Symbol number 5011 according to IEC 60417 (Q3Y)

Any symbol according to order form supplement (Q9Y)

Ordering notes

Append the following order codes to the Article No.:

- **Q0Y:** Text line(s) in upper/lower case, all lines begin with upper case (e.g. Lift / Off)
- **Q1Y:** Text line(s) in upper case (e.g. LIFT)
- **Q2Y:** Text line(s) in lower case (e.g. lift / off / lower)
- **Q5Y:** Text line(s) in upper/lower case, all words begin with upper case letters (e.g. On Off)
- **Q3Y:** Symbol with number according to ISO 7000 or IEC 60417
- **Q9Y:** Inscription of choice, text or symbol, can only be ordered via SIRIUS ACT Configurator with a Configuration Identification Number (CIN)

When ordering, specify the required inscription in plain text without spaces, in addition to the Article No. and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language. In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. Z1=Lift, Z2=Lower. For long words you can also specify the end-of-line division (hyphenation), see [ordering example 1](#).

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417, see [ordering examples 2 and 3](#).

The SIRIUS ACT Configurator must be used to select special inscriptions and symbols (order code Q9Y). In this case a CIN (Configuration Identification Number) is generated for placement of future orders. It is then possible to place an order directly using the CIN and the SIRIUS ACT Configurator (Mall shopping cart) or via the standard ordering channels.

Standard ordering channels:

- Configurator: www.siemens.com/sirius-act/configurator
- Electronic Catalog CA 01 on DVD
- Industry Mall: www.siemens.com/industrymall

Overview

Label holders of black plastic, and labeling plates (black with white print or silver-colored with black print) for sticking or snapping in place, are available for labeling. They are not suitable for EMERGENCY STOP buttons. Note mounting dimensions!

The label holders cannot be used in conjunction with protective caps, protective collars and locking devices.

Inscription

The inscription is in upper/lower case, all words begin with upper case letters. Graphic symbols, including those not listed in the catalog, are according to ISO 7000 or IEC 60417.

For customized inscriptions, see "Options", page 2/323.

Labeling plates for sticking/snapping in place

The labels are available in three sizes:

- 12.5 mm × 27 mm
- 17.5 mm × 27 mm
- 27 mm × 27 mm

For mounting the labeling plates, you can choose between label holders for stick-on or snap-on mounting.

Customized inscriptions

The labels can be inscribed with text and symbols not listed in the ordering data.

Text inscriptions have centered alignment and the font heights specified below as standard:

- Label size 12.5 mm × 27 mm, max. 3 lines:
Letter height 4 mm (1-line), 3.5 mm (2-line) or 2.5 mm (3-line)
- Label size 17.5 mm × 27 mm, max. 3 lines:
Letter height 4 mm (1- to 2-line) or 3 mm (3-line)
- Label size 27 mm × 27 mm, max. 5 lines:
Letter height 4 mm (1- to 5-line)

Up to 11 characters per line are possible. The typeface used is Arial. Other letter heights and typefaces are possible, but must be specified when ordering.

Examples for customized inscription

Two-line inscription in upper/lower case lettering (Q0Y)

Single-line inscription in upper case lettering (Q1Y)

Three-line inscription in lower case letters (Q2Y)

Symbol number 5011 according to IEC 60417 (Q3Y)

Any symbol according to order form supplement (Q9Y)

Ordering notes

Append the following order codes to the Article No.:

- **Q0Y:** Text line(s) in upper/lower case, all lines begin with upper case (e.g. Lift / Off)
- **Q1Y:** Text line(s) in upper case (e.g. LIFT)
- **Q2Y:** Text line(s) in lower case (e.g. lift / off / lower)
- **Q5Y:** Text line(s) in upper/lower case, all words begin with upper case letters (e.g. On Off)
- **Q3Y:** Symbol with number according to ISO 7000 or IEC 60417
- **Q9Y:** Inscription of choice, text or symbol, can only be ordered via SIRIUS ACT Configurator with a Configuration Identification Number (CIN)

When ordering, specify the required inscription in plain text without spaces, in addition to the Article No. and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language.

In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. Z1=Lift, Z2=Lower.

For long words you can also specify the end-of-line division (hyphenation), see [ordering example 1](#).

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417, (see [ordering examples 2 and 3](#)).

The SIRIUS ACT Configurator must be used to select special inscriptions and symbols (order code Q9Y). In this case a CIN (Configuration Identification Number) is generated for placement of future orders. Labels

Labels for laser printers

Overview

Label inscriptions

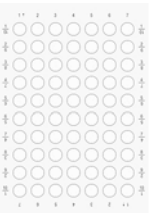

Using the *Label Designer* software, which can be downloaded from the Internet, and the labeling plates for laser inscription you can create your own customized labels with a standard laser printer. The self-adhesive or snap-on labels can be stuck or snapped onto the corresponding label holders. Round labels are provided for inserting in illuminated pushbuttons and switches.

The labels are suitable for inscription with one to three lines of text or symbols.

For applications with more exacting requirements we recommend factory-printed labeling plates and insert labels (laser-printed or engraved depending on the type).

For *Label Designer* software, see www.siemens.com/sirius-label-designer.

SIRIUS ACT Pushbuttons and Indicator Lights

Accessories

Labels

Other labels

Options

Customized inscriptions

The labels can be inscribed with text and symbols not listed in the ordering data.

The EMERGENCY STOP backing plates can be divided into as many as 4 radial segments. Each segment can be custom-labeled.

Example: 4 radial segments for customized inscription

Ordering notes

Append the following order codes to the Article No.:

- **Q0Y:** Text line(s) in upper/lower case, all lines begin with upper case letters (e.g. Text)
- **Q1Y:** Text line(s) in upper case (e.g. TEXT)
- **Q2Y:** Text line(s) in lower case (e.g. text)
- **Q5Y:** Text line(s) in upper/lower case, all words begin with upper case letters (e.g. Text / Text)
- **Q9Y:** Inscription of choice, text or symbol, can only be ordered via SIRIUS ACT Configurator can be ordered with a Configuration Identification Number (CIN)

When ordering, specify the required inscription in plain text without spaces, in addition to the Article No. and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language.

In the case of customer-specific labeling with as many as 4 radial segments, the text must be assigned to the respective radial segment (Z1-Z4), e.g. Z1=Text 1, Z2=Text 2.

For long words you can also specify the end-of-line division (see ordering examples 1 and 2)

The SIRIUS ACT Configurator must be used to select special inscriptions and symbols (order code Q9Y). In this case a CIN (Configuration Identification Number) is generated for placement of future orders. It is then possible to place an order directly using the CIN and the SIRIUS ACT Configurator (Mall shopping cart) or via the standard ordering channels.

Standard ordering channels:

- Configurator: www.siemens.com/sirius-act/configurator
- Electronic Catalog CA 01 on DVD
- Industry Mall: www.siemens.com/industrymall

Ordering example 1

A label with two radial segments is required:

3SU1900-0BB31-0AZ0

Q1Y
Z1=Text 1
Z2=Text 2

Ordering example 2

A label with four radial segments is required:

3SU1900-0BB31-0AZ0

Q1Y
Z1=Text 1
Z2=Text 2
Z3=Text 3
Z4=Text 4

Overview

- Protection and access protection are for actuators and indicators with diameter 22 mm.
- The protective collars cannot be used in conjunction with label holders or single frames.

SIPLUS RAIL and SIDOOR

SIPLUS S7-1200 RAIL

SIPLUS extreme RAIL standard CPUs

SIPLUS S7-1200 CPU 1212C RAIL

Overview

- The superior compact solution
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- With 14 integral input/outputs
- Expandable by:
 - 1 signal board (SB) or communication board (CB)
 - 2 signal modules (SM)
 - Max. 3 communication modules (CM)

Technical specifications

Article number	6AG2212-1AE40-1XB0 SIPLUS S7-1200 CPU 1212C DC/DC/DC RAIL
General information	
Product type designation	CPU 1212C DC/DC/DC
Supply voltage	
Rated value (DC)	
• 24 V DC	Yes
Encoder supply	
24 V encoder supply	
• 24 V	Permissible range: 20.4V to 28.8V
Power loss	
Power loss, typ.	9 W
Memory	
Work memory	
• integrated	50 kbyte
Load memory	
• integrated	1 Mbyte
• Plug-in (SIMATIC Memory Card), max.	2 Gbyte; with SIMATIC memory card
Backup	
• without battery	Yes
CPU processing times	
for bit operations, typ.	0.085 µs; / Operation
for word operations, typ.	1.7 µs; / Operation
for floating point arithmetic, typ.	2.3 µs; / Operation
Data areas and their retentivity	
Flag	
• Number, max.	4 kbyte; Size of bit memory address area
Address area	
I/O address area	
• Inputs	1 024 byte
• Outputs	1 024 byte
Process image	
• Inputs, adjustable	1 kbyte
• Outputs, adjustable	1 kbyte
Time of day	
Clock	
• Hardware clock (real-time)	Yes

Article number	6AG2212-1AE40-1XB0 SIPLUS S7-1200 CPU 1212C DC/DC/DC RAIL
Digital inputs	
Number of digital inputs	8; Integrated
• of which inputs usable for technological functions	6; HSC (High Speed Counting)
Digital outputs	
Number of digital outputs	6
• of which high-speed outputs	4; 100 kHz Pulse Train Output
Analog inputs	
Number of analog inputs	2
Input ranges	
• Voltage	Yes
Analog outputs	
Number of analog outputs	0
1. Interface	
Interface type	PROFINET
Physics	Ethernet
Functionality	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• Open IE communication	Yes
• Web server	Yes
Protocols	
Open IE communication	
• TCP/IP	Yes
• ISO-on-TCP (RFC1006)	Yes
• UDP	Yes
Communication functions	
S7 communication	
• supported	Yes
Web server	
• supported	Yes
Number of connections	
• overall	16; dynamically

SIPLUS RAIL and SIDOOR

SIPLUS S7-1200 RAIL

SIPLUS extreme RAIL standard CPUs

SIPLUS S7-1200 CPU 1212C RAIL

Article number	6AG2212-1AE40-1XB0 SIPLUS S7-1200 CPU 1212C DC/DC/DC RAIL
Integrated Functions	
Number of counters	4
Counting frequency (counter) max.	100 kHz
Frequency measurement	Yes
controlled positioning	Yes
Number of position-controlled positioning axes, max.	8
Number of positioning axes via pulse-direction interface	4; With integrated DO
PID controller	Yes
Number of alarm inputs	4
Number of pulse outputs	4
Limit frequency (pulse)	100 kHz
Isolation	
Isolation tested with	According to EN 50155 (routine test)
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class T1, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes
Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *

Article number	6AG2212-1AE40-1XB0 SIPLUS S7-1200 CPU 1212C DC/DC/DC RAIL
Use on land craft, rail vehicles and special-purpose vehicles	
- to biologically active substances according to EN 60721-3-5	Yes; Class 5B2 mold, fungus and dry rot spores (with the exception of fauna); Class 5B3 on request
- to chemically active substances according to EN 60721-3-5	Yes; Class 5C3 (RH < 75 %) incl. salt spray acc. to EN 50155 (ST2); *
- to mechanically active substances according to EN 60721-3-5	Yes; Class 5S3 incl. sand, dust; *
from supply voltage 1L+	
- Note regarding classification of environmental conditions acc. to EN 60721	* The supplied plug covers must remain in place over the unused interfaces during operation!
Configuration	
Programming	
Programming language	
- LAD	Yes
- FBD	Yes
- SCL	Yes
Dimensions	
Width	90 mm
Height	100 mm
Depth	75 mm
Weights	
Weight, approx.	370 g
Other

Article No.

SIPLUS S7-1200 CPU 1212C RAIL

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

Integrated program/data memory 75 KB,
load memory 1 MB;
Supply voltage 24 V DC;
Boolean execution times 0.1 µs per operation;
8 digital inputs, 6 digital outputs, 2 analog inputs;
Expandable by up to 3 communication modules, 2 signal modules, and 1 signal board/communication board;
Digital inputs can be used as HSC at 100 kHz, 24 V DC digital outputs can be used as pulse outputs (PTO) or pulse-width modulated outputs (PWM) at 100 kHz

- For areas with extreme exposure to environmental substances (conformal coating); ambient temperature -25 ... +70 °C

Technical specifications

Article number	6AG2221-1BF32-1XB0 SIPLUS S7-1200 SM 1221 8DI RAIL
General information	
Product type designation	SM 1221, DI 8x24 V DC
Supply voltage	
Rated value (DC)	
• 24 V DC	Yes
Input current	
from backplane bus 5 V DC, max.	105 mA
Digital inputs	
• from load voltage L+ (without load), max.	4 mA; per channel
Output voltage	
Power supply to the transmitters	
• present	Yes
Power loss	
Power loss, typ.	1.5 W
Digital inputs	
Number of digital inputs	8
• in groups of	2
Input characteristic curve in accordance with IEC 61131, type 1	Yes
Number of simultaneously controllable inputs	
all mounting positions	
- up to 40 °C, max.	8
horizontal installation	
- up to 40 °C, max.	8
- up to 50 °C, max.	8
vertical installation	
- up to 40 °C, max.	8
Input voltage	
• Type of input voltage	DC
• Rated value (DC)	24 V
• for signal "0"	5 V DC at 1 mA
• for signal "1"	15 V DC at 2.5 mA
Input current	
• for signal "0", max. (permissible quiescent current)	1 mA
• for signal "1", min.	2.5 mA
• for signal "1", typ.	4 mA

Article number	6AG2221-1BF32-1XB0 SIPLUS S7-1200 SM 1221 8DI RAIL
Input delay (for rated value of input voltage)	
for standard inputs	
- parameterizable	Yes; 0.2 ms, 0.4 ms, 0.8 ms, 1.6 ms, 3.2 ms, 6.4 ms and 12.8 ms, selectable in groups of four
for interrupt inputs	
- parameterizable	Yes
Cable length	
• shielded, max.	500 m
• unshielded, max.	300 m
Interrupts/diagnostics/status information	
Alarms	Yes
Diagnostic functions	Yes
Alarms	
• Diagnostic alarm	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
Diagnostics indication LED	
• for status of the inputs	Yes
• for maintenance	Yes
Potential separation	
Potential separation digital inputs	
• between the channels, in groups of	2
Isolation	
Isolation tested with	According to EN 50155 (routine test)
Degree and class of protection	
Degree of protection acc. to EN 60529	
• IP20	Yes
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC

Article number	6AG2222-1BF32-1XB0 SIPLUS S7-1200 SM 1222 8DQ RAIL	6AG2222-1HF32-1XB0 SIPLUS S7-1200 SM 1222 8DQ RLY RAIL
General information		
Product type designation	SM 1222, DQ 8x24 V DC/0.5 A	SM 1222, DQ 8x relay/2 A
Input current		
from backplane bus 5 V DC, max.	120 mA	120 mA
Digital outputs		
• from load voltage L+, max.		11 mA/relay coil
Power loss		
Power loss, typ.	1.5 W	4.5 W
Digital outputs		
Number of digital outputs	8	8
• in groups of	1	2
Short-circuit protection	No; to be provided externally	No; to be provided externally
Limitation of inductive shutdown voltage to	typ. (L+) -48 V	
Switching capacity of the outputs		
• with resistive load, max.	0.5 A	2 A
• on lamp load, max.	5 W	30 W with DC, 200 W with AC
Output voltage		
• Rated value (DC)	24 V	5 V DC to 30 V DC
• Rated value (AC)		5 V AC to 250 V AC
• for signal "0", max.	0.1 V; with 10 kOhm load	
• for signal "1", min.	20 V DC	
Output current		
• for signal "1" rated value	0.5 A	2 A
• for signal "0" residual current, max.	10 µA	
Output delay with resistive load		
• "0" to "1", max.	50 µs	10 ms
• "1" to "0", max.	200 µs	10 ms
Total current of the outputs (per group)		
horizontal installation		
- up to 50 °C, max.	4 A; Current per mass	10 A; Current per mass
Relay outputs		
• Number of relay outputs		8
• Rated supply voltage of relay coil L+ (DC)		24 V
• Number of operating cycles, max.		mechanically 10 million, at rated load voltage 100 000
Switching capacity of contacts		
- with inductive load, max.	0.5 A	2 A
- on lamp load, max.	5 W	30 W with DC, 200 W with AC
- with resistive load, max.	0.5 A	2 A

Ordering data

SIPLUS signal module SM 1222 RAIL digital output module

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

8 outputs, 24 V DC; 0.5 A, 5 W, isolated

- For areas subject to exceptional medial exposure (conformal coating); ambient temperature range -25 ... +70 °C

Article No.

6AG2222-1BF32-1XB0

Article No.

6AG2222-1HF32-1XB0

8 outputs, 5 ... 30 V DC / 5 ... 250 V AC, relay 2 A, 30 W DC / 200 W AC

For areas subject to exceptional medial exposure (conformal coating); ambient temperature -25 ... +60 °C

Overview

- Digital inputs and outputs as supplement to the integral I/O of the CPUs
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- For flexible adaptation of the controller to the corresponding task
- For subsequent expansion of the system with additional inputs and outputs

SIPLUS SB 1223 RAIL digital input/output signal board

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

2 inputs, 24 V DC, IEC type 1 current sinking;
2 transistor outputs 24 V DC, 0.5 A, 5 W;
can be used as HSC at up to 30 kHz

• For areas with extreme exposure to environmental substances (conformal coating); ambient temperature -25 ... +70 °C

6AG2223-0BD30-1XB0

Overview

- For the convenient recording of temperatures with great accuracy
- Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- 4 inputs
- Most popular resistance temperature detectors can be used
- Can easily be retrofitted to existing plant

Technical specifications

Article number	6AG2231-5PD32-1XB0 SIPLUS S7-1200 SM 1231 RTD RAIL
General information	
Product type designation	SM 1231 RTD 4x16bit
Supply voltage	
Rated value (DC)	
• 24 V DC	Yes
Input current	
Current consumption, typ.	40 mA
from backplane bus 5 V DC, typ.	80 mA
Power loss	
Power loss, typ.	1.5 W
Analog inputs	
Number of analog inputs	4; Resistance thermometer
permissible input voltage for current input (destruction limit), max.	± 35 V
Technical unit for temperature measurement adjustable	Degrees Celsius/degrees Fahrenheit
Input ranges	
• Voltage	No
• Current	No
• Thermocouple	No
• Resistance thermometer	Yes; Resistance-type transmitter: Pt10, Pt50, Pt100, Pt200, Pt500, Pt1000, Ni100, Ni120, Ni200, Ni500, Ni1000, Cu10, Cu50, Cu100, LG-Ni1000
• Resistance	Yes; 150 Ω, 300 Ω, 600 Ω
Input ranges (rated values), resistance thermometer	
• Cu 10	Yes
• Ni 100	Yes
• Ni 1000	Yes
• LG-Ni 1000	Yes
• Ni 120	Yes
• Ni 200	Yes
• Ni 500	Yes
• Pt 100	Yes
• Pt 1000	Yes
• Pt 200	Yes
• Pt 500	Yes
Input ranges (rated values), resistors	
• 0 to 150 ohms	Yes
• 0 to 300 ohms	Yes
• 0 to 600 ohms	Yes
Thermocouple (TC)	
Temperature compensation	
- parameterizable	No

Article number	6AG2231-5PD32-1XB0 SIPLUS S7-1200 SM 1231 RTD RAIL
Errors/accuracies	
Temperature error (relative to input range), (+/-)	25 °C ±0.1%, to 55 °C ±0.2% total measurement range
Repeat accuracy in steady state at 25 °C (relative to output range), (+/-)	0.05 %
Interrupts/diagnostics/status information	
Alarms	Yes
Diagnostic functions	Yes; Can be read out
Alarms	
• Diagnostic alarm	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
Degree and class of protection	
Degree of protection acc. to EN 60529

4 analog inputs, ±10 V, ±5 V, ±2.5 V, or 0 ... 20 mA, 12 bits + sign;
2 analog outputs, ±10 V with 14 bits or 0 ... 20 mA with 13 bits

6AG2234-4HE32-1XB1

Overview

- For fast, high-performance serial data exchange via point-to-point connection
- Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- Implemented protocols: ASCII, USS drive protocol, Modbus RTU
- Additional protocols can be loaded later
- Simple parameterization with STEP 7 Basic
- Can be plugged directly into the CPU

Product type designation	CB 1241 RS485	Diagnostic functions	Yes
Input current		Isolation	
from backplane bus 5 V DC, typ.	50 mA	Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Power loss		Degree and class of protection	
Power loss, typ.	1.5 W	Degree of protection acc. to EN 60529	
Interfaces		• IP20	Yes
Point-to-point		Standards, approvals, certificates	
• Cable length, max.	1 000 m	CE mark	Yes
Integrated protocol driver		Railway application	
- Freeport	Yes	• EN 50121-3-2	Yes; EMC for rail vehicles
- ASCII	Yes; Available as library function	• EN 50121-4	Yes; EMC for signal and telecommunications systems
- Modbus	Yes	• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
- Modbus RTU master	Yes	• EN 50125-1	Yes; Rail vehicles - see ambient conditions
- MODBUS RTU slave	Yes	• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
- USS	Yes; Available as library function	• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
Protocols		• EN 50155	Yes; Rail vehicles - temperature class T1, horizontal mounting position, salt spray Class ST2
Integrated protocols		• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
Freeport		• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
- Telegram length, max.	1 kbyte	Ambient conditions	
- Bits per character	7 or 8	Free fall	
- Number of stop bits	1 (Standard), 2	• Fall height, max.	0.3 m; five times, in product package
- Parity	No parity (standard); even, uneven, mark (parity bit always 1); space (parity bit always 0)	Ambient temperature during operation	
3964 (R)		• min.	-25 °C; = Tmin
- Telegram length, max.	1 kbyte	• max.	60 °C; = Tmax; +70 °C for 10 min (T1 acc. to EN 50155)
- Bits per character	7 or 8	Altitude during operation relating to sea level	
- Number of stop bits	1 (Standard), 2	• Installation altitude above sea level, max.	2 000 m
- Parity	No parity (standard); even, uneven, mark (parity bit always 1); space (parity bit always 0)	• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Modbus RTU master			
- Address area	1 through 49 999 (Standard Modbus addressing)		
- Number of slaves, max.	247; slave numbers 1 through 247, per MODBUS network segment maximum 32 devices, additional repeaters needed to expand the network to maximum configuration		
MODBUS RTU slave			
- Address area	1 through 49 999 (Standard Modbus addressing)

SIPLUS S7-1200 RAIL

SIPLUS extreme RAIL communication

SIPLUS S7-1200 CM 1242-5 RAIL, SIPLUS S7-1200 CM 1243-5 RAIL

Overview SIPLUS S7-1200 CM 1242-5 RAIL

DP-M	DP-S	FMS	PG/OP	S7
	●			

The SIPLUS S7-1200 CM 1242-5 RAIL communication module is used to connect a SIPLUS extreme RAIL S7-1200 to PROFIBUS as a DP slave and has the following characteristics:

- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- PROFIBUS DPV1 slave in accordance with IEC 61158
- Module replacement without PG supported
- Power is supplied via the backplane bus so that no extra cabling is required
- Support of all standard baud rates from 9.6 Kbps to 12 Mbps
- Compact industry-standard enclosure in S7-1200 design for mounting on a DIN rail
- Fast commissioning thanks to easy configuration using STEP 7 without additional programming overhead

The SIPLUS S7-1200 CM 1242-5 RAIL is intended for use in rail traffic. Low-cost PROFIBUS-based automation solutions can be created on the basis of the S7-1200.

Overview SIPLUS S7-1200 CM 1243-5 RAIL

DP-M	DP-S	FMS	PG/OP	S7
●			●	●

The SIPLUS S7-1200 CM 1243-5 RAIL communication module is used to connect a SIPLUS extreme RAIL S7-1200 to PROFIBUS as a DP master and has the following characteristics:

- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- PROFIBUS DPV1 master in accordance with IEC 61158
- Support of up to 16 PROFIBUS DP slaves
- Communication with other S7 controllers based on S7 communication
- Allows the connection of programming devices and operator panels with a PROFIBUS interface to the S7-1200
- Module replacement without PG supported
- Support of all standard baud rates from 9.6 Kbps to 12 Mbps
- Compact industry-standard enclosure in S7-1200 design for mounting on a DIN rail
- Fast commissioning thanks to easy configuration using STEP 7 without additional programming overhead

The SIPLUS S7-1200 CM 1243-5 RAIL is intended for use in rail traffic. Low-cost PROFIBUS-based automation solutions can be created on the basis of the S7-1200 for optimal production.

SIPLUS extreme RAIL standard CPUs

SIPLUS S7-1500 CPU 1511-1 PN RAIL**Overview**

- Entry-level CPU in the SIPLUS extreme RAIL S7-1500 controller product range
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- Suitable for applications with medium requirements for program scope and processing speed
- PROFINET IO IRT interface with 2-port switch
- PROFINET IO Controller for operating distributed I/O on PROFINET
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device under a SIMATIC or non-Siemens PROFINET IO Controller
- Isochronous mode
- SIMATIC memory card required for operation of the CPU

SIPLUS S7-1500 RAIL

SIPLUS extreme RAIL standard CPUs

SIPLUS S7-1500 CPU 1516-3 PN/DP RAIL**Overview**

- The CPU with large program and data memory in the SIPLUS extreme RAIL S7-1500 controller product range for applications with high program scope requirements
- Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- High processing speed for binary and floating-point arithmetic
- PROFINET IO IRT interface with 2-port switch
- Additional PROFINET interface with separate IP address
- PROFINET IO Controller for operating distributed I/O on PROFINET
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device under a SIMATIC or non-Siemens PROFINET IO Controller
- PROFIBUS DP master interface
- Isochronous mode on PROFIBUS and PROFINET
- SIMATIC memory card required for operation of the CPU

- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
Update time for IRT	
- for send cycle of 250 µs	250 µs to 4 ms; Note: In the case of IRT with isochronous mode, the minimum update time of 500 µs of the isochronous OB is decisive
- for send cycle of 500 µs	500 µs to 8 ms
- for send cycle of 1 ms	1 ms to 16 ms
- for send cycle of 2 ms	2 ms to 32 ms
- for send cycle of 4 ms	4 ms to 64 ms
- With IRT and parameterization of "odd" send cycles	Update time = set "odd" send clock (any multiple of 125 µs: 375 µs, 625 µs ... 3 875 µs)
Update time for RT	
- for send cycle of 250 µs	250 µs to 128 ms
- for send cycle of 500 µs	500 µs to 256 ms
- for send cycle of 1 ms	1 ms to 512 ms
- for send cycle of 2 ms	2 ms to 512 ms
- for send cycle of 4 ms	4 ms to 512 ms
PROFINET IO Device	
Services	
- PG/OP communication	Yes
- S7 routing	Yes
- Isochronous mode	No
- Open IE communication	Yes
- IRT	Yes
- MRP	Yes
- MRPD	Yes; Requirement: IRT
- PROFlenergy	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
2. Interface	
Interface types	
• Number of ports	1
• integrated switch	No
• RJ 45 (Ethernet)	Yes; X2
Functionality	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes
• Media redundancy	No
PROFINET IO Controller	
Services	
- PG/OP communication	Yes
- S7 routing	Yes
- Isochronous mode	No
- Open IE communication	Yes
- IRT	No
- MRP	No
- PROFlenergy	Yes
- Prioritized startup	No

Article number	6AG2516-3AN01-4AB0 SIPLUS S7-1500 CPU 1516-3 PN/DP TX RAIL
Services	
- Number of connectable IO Devices, max.	32; In total, up to 1 000 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Number of connectable IO Devices for RT, max.	32
- of which in line, max.	32
- Number of IO Devices that can be simultaneously activated/deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
Update time for RT	
- for send cycle of 1 ms	1 ms to 512 ms
PROFINET IO Device	
Services	
- PG/OP communication	Yes
- S7 routing	Yes
- Isochronous mode	No
- Open IE communication	Yes
- IRT	No
- MRP	No
- MRPD	No
- PROFlenergy	Yes
- Prioritized startup	No
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
3. Interface	
Interface types	
• Number of ports	1
• RS 485	Yes
Functionality	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	No
• SIMATIC communication	Yes
Protocols	
Number of connections	
• Number of connections, max.	256; via integrated interfaces of the CPU and connected CPs / CMs
PROFIBUS DP master	
Services	
- Number of DP slaves	125; In total, up to 1 000 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
OPC UA	
• OPC UA Server	Yes; for data access
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	Yes; With minimum OB 6x cycle of 375 µs

SIPLUS RAIL and SIDOOR

SIPLUS S7-1500 RAIL

SIPLUS extreme RAIL standard CPUs

SIPLUS S7-1500 CPU 1516-3 PN/DP RAIL

Article number	6AG2516-3AN01-4AB0 SIPLUS S7-1500 CPU 1516-3 PN/DP TX RAIL
Supported technology objects	
Motion Control	Yes; Note: The number of axes affects the cycle time of the PLC program; selection guide via the TIA Selection Tool or SIZER
• Number of available Motion Control resources for technology objects (except cam disks)	4 800
• Required Motion Control resources	
- per speed-controlled axis	80; per axis
- per positioning axis	160; per axis
- per synchronous axis	160; per axis
- per external encoder	80; per external encoder
- per output cam	20; per cam
- per cam track	160; per cam track
- per probe	40; per probe
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class Tx, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-40 °C; = Tmin
• horizontal installation, max.	70 °C; = Tmax; +85 °C for 10 min (Tx acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)

Selection and ordering data

SIPLUS S7-1500

CPU 1516-3 PN/DP TX RAIL

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

Without display;
 1 MB RAM for program,
 5 MB for data,
 PROFINET IO IRT interface,
 PROFINET/PROFIBUS interface;
 SIMATIC Memory Card required

For areas with extreme exposure to environmental substances (conformal coating);
 ambient temperature -40 ... +70 °C
 (+85 °C for 10 min.)

SIPLUS extreme RAIL digital modules

SIPLUS extreme RAIL digital input modules**Overview**

- 16-channel digital input module
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- For flexible adaptation of the controller to the corresponding task
- For subsequent expansion of the system with additional inputs

Technical specifications

Article number	6AG2521-1BH00-4AB0 SIPLUS S7-1500 DI 16x24VDC HF TX RAIL
General information	
Product type designation	DI 16x24VDC HF
Product function	
• I&M data	Yes; I&M0 to I&M3
Operating mode	
• DI	Yes
• Counter	Yes
• MSI	Yes
Supply voltage	
Type of supply voltage	DC
Rated value (DC)	24 V
Reverse polarity protection	Yes
Digital inputs	
Number of digital inputs	16
Digital inputs, parameterizable	Yes
Source/sink input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Digital input functions, parameterizable	
• Gate start/stop	Yes
• Freely usable digital input	Yes
• Counter	
- Number, max.	2
- Counting frequency, max.	1 kHz
- Counting width	32 bit
- Counting direction up/down	Up
Input voltage	
• Type of input voltage	DC
• Rated value (DC)	24 V
• for signal "0"	-30 to +5V
• for signal "1"	+11 to +30V
Input current	
• for signal "1", typ.	2.5 mA
Input delay (for rated value of input voltage)	
for standard inputs	
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 1.6 / 3.2 / 12.8 / 20 ms

Article number	6AG2521-1BH00-4AB0 SIPLUS S7-1500 DI 16x24VDC HF TX RAIL
for interrupt inputs	
- parameterizable	Yes
for counter/technological functions	
- parameterizable	Yes
Cable length	
• shielded, max.	1 000 m
• unshielded, max.	600 m
Encoder	
Connectable encoders	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	Yes
Filtering and processing time (TCI), min.	80 µs; At 50 µs filter time
Bus cycle time (TDP), min.	250 µs
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Alarms	
• Diagnostic alarm	Yes
• Hardware interrupt	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
• Wire-break	Yes; to I < 350 µA
• Short-circuit	No
• Fuse blown	No
Diagnostics indication LED	
• RUN LED	Yes; Green LED
• ERROR LED	Yes; Red LED
• Monitoring of the supply voltage (PWR-LED)	Yes; Green LED
• Channel status display	Yes; Green LED
• for channel diagnostics	Yes; Red LED
• for module diagnostics	Yes; Red LED

	SIPLUS S7-1500 DQ 16x24VDC HF TX RAIL	SIPLUS S7-1500 DQ 8x230VAC ST 5A T1 RAIL
General information		
Product type designation	DQ 16x24VDC/0.5A HF	DQ 8x230 V AC/5 A ST (relay)
Product function		
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
Operating mode		
• MSO	Yes	
Supply voltage		
Type of supply voltage	DC	DC
Rated value (DC)	24 V	24 V
Reverse polarity protection	Yes; through internal protection with 7 A per group	
Digital outputs		
Type of digital output	Transistor	Relays
Number of digital outputs	16	8
Current-sourcing	Yes	
Digital outputs, parameterizable	Yes	Yes
Short-circuit protection	Yes; Clocked electronically	
Open-circuit detection	Yes	
Limitation of inductive shutdown voltage to	L+ (-53 V)	
Controlling a digital input	Yes	possible
Switching capacity of the outputs		
• with resistive load, max.	0.5 A	
• on lamp load, max.	5 W	1 500 W; 10 000 operating cycles
• Low energy/fluorescent lamps with electronic control gear		10x 58 W (25 000 operating cycles)
• Fluorescent tubes, conventionally compensated		1x 58 W (25 000 operating cycles)
• Fluorescent tubes, uncompensated		10x 58 W (25 000 operating cycles)
Load resistance range		
• lower limit	48 Ω	
• upper limit	12 kΩ	
Output voltage		
• Type of output voltage	DC	
• for signal "1", min.	L+ (-0.8 V)	
Output current		
• for signal "1" rated value	0.5 A	5 A
• for signal "0" residual current, max.	0.5 mA	0 A
Output delay with resistive load		
• "0" to "1", max.	100 μs	
• "1" to "0", max.	100 μs; at rated load	

SIPLUS RAIL and SIDOOR

SIPLUS S7-1500 RAIL

Parallel switching of two outputs		
• for logic links	Yes	Yes
• for uprating	Yes	No
• for redundant control of a load	Yes	Yes
Switching frequency		
• with resistive load, max.	100 Hz	2 Hz
• with inductive load, max.	0.5 Hz; According to IEC 60947-5-1, DC-13	0.5 Hz
• on lamp load, max.	10 Hz	2 Hz
Total current of the outputs		
• Current per channel, max.	0.5 A; see additional description in the manual	8 A; see additional description in the manual
• Current per group, max.	4 A; see additional description in the manual	8 A; see additional description in the manual
• Current per module, max.	8 A; see additional description in the manual	64 A; see additional description in the manual
Relay outputs		
• Number of relay outputs		8
• Rated supply voltage of relay coil L+ (DC)		24 V
• Current consumption of relays (coil current of all relays), max.		80 mA
• external protection for relay outputs		With miniature circuit breaker with characteristic B for: cos φ 1.0: 600 A cos φ 0.5 ... 0.7: 900 A with 8 A Diazed fuse: 1000 A
• Contact connection (internal)		No
• Size of motor starters according to NEMA, max.		5
• Number of operating cycles, max.		4 000 000; see additional description in the manual
• Relay approved acc. to UL 508		Yes; 250 V AC/5 A g.p.; 120 V AC TV-4 tungsten; A300, R300
Switching capacity of contacts		
- with inductive load, max.		see additional description in the manual
- with resistive load, max.		see additional description in the manual
Cable length		
• shielded, max.	1 000 m	1 000 m
• unshielded, max.	600 m	600 m
Isochronous mode		
Isochronous operation (application synchronized up to terminal)	Yes	No
Execution and activation time (TCO), min.	70 μs	
Bus cycle time (TDP), min.	250 μs	
Interrupts/diagnostics/status information		
Diagnostics function	Yes	Yes
Substitute values connectable	Yes	Yes
Alarms		
• Diagnostic alarm	Yes	Yes
Diagnostic messages		
• Monitoring the supply voltage	Yes	Yes
• Wire-break	Yes	No
• Short-circuit	Yes	No
• Fuse blown	No	
Diagnostics indication LED		
• RUN LED	Yes; Green LED	Yes; Green LED
• ERROR LED	Yes; Red LED	Yes; Red LED
• Monitoring of the supply voltage (PWR-LED)	Yes; Green LED	Yes; Green LED
• Channel status display	Yes; Green LED	Yes; Green LED
• for channel diagnostics	Yes; Red LED	No
• for module diagnostics	Yes; Red LED	Yes; Red LED
Potential separation		
Potential separation channels		
• between the channels and backplane bus	Yes	Yes

Article No.

SIPLUS extreme SM 522 RAIL digital output modules

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

SIPLUS S7-1500 DQ 16x24 V DC HF TX RAIL

16 outputs, 24 V DC; 0.5 A, isolated;
for areas with extreme exposure to environmental substances (conformal coating);
ambient temperature -40 ... +70 °C (+85 °C for 10 min.)

SIPLUS S7-1500 DQ 8x230VAC ST 5A T1 RAIL

8 relay outputs, 230 V AC; 5 A;
for areas with extreme exposure to environmental substances (conformal coating);
ambient temperature -25 ... +55 °C (+70 °C for 10 min.)

SIPLUS extreme RAIL analog modules

SIPLUS extreme RAIL analog input modules**Overview**

- 8-channel analog input modules
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- Optionally with extremely short conversion times
- For the connection of analog sensors without additional amplifiers
- Even solves more complex automation tasks

Technical specifications

Article number	6AG2531-7NF10-4AB0 SIPLUS S7-1500 AI 8xU/I HS TX RAIL	6AG2531-7KF00-4AB0 SIPLUS S7-1500 AI 8xU/I/RTD/TC TX RAIL
General information		
Product type designation	AI 8xU/I HS	AI 8xU/I/RTD/TC ST
Product function		
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
• Measuring range scalable	No	No
• Scalable measured values	No	No
• Adjustment of measuring range	No	No
Operating mode		
• Oversampling	Yes	No
• MSI	Yes	Yes
CiR – Configuration in RUN		
Reparameterization possible in RUN	Yes	Yes
Calibration possible in RUN	Yes	Yes
Supply voltage		
Type of supply voltage	DC	DC
Rated value (DC)	24 V	24 V
Reverse polarity protection	Yes	Yes
Analog inputs		
Number of analog inputs	8; > +60 °C max. 4x ±20 mA or 4x ±10 V permissible	8; > +60 °C max. 2x ±20 mA or 4x ±10 V or 4x RTD permissible
• For current measurement	8	8
• For voltage measurement	8	8
• For resistance/resistance thermometer measurement		4
• For thermocouple measurement		8
permissible input voltage for voltage input (destruction limit), max.	28.8 V	28.8 V
permissible input current for current input (destruction limit), max.	40 mA	40 mA
Technical unit for temperature measurement adjustable		Yes; °C/°F/K
Input ranges (rated values), voltages		
• 0 to +5 V	No	No
• 0 to +10 V	No	No
• 1 V to 5 V	Yes	Yes
• -1 V to +1 V		Yes
• -10 V to +10 V	Yes	Yes
• -2.5 V to +2.5 V	No	Yes
• -25 mV to +25 mV	No	No
• -250 mV to +250 mV	No	Yes

Input ranges (rated values), voltages		
• -5 V to +5 V	Yes	Yes
• -50 mV to +50 mV	No	Yes
• -500 mV to +500 mV	No	Yes
• -80 mV to +80 mV	No	Yes
Input ranges (rated values), currents		
• 0 to 20 mA	Yes	Yes
• -20 mA to +20 mA	Yes	Yes
• 4 mA to 20 mA	Yes	Yes
Input ranges (rated values), thermocouples		
• Type B	No	Yes
• Type C	No	No
• Type E	No	Yes
• Type J	No	Yes
• Type K	No	Yes
• Type L	No	No
• Type N	No	Yes
• Type R	No	Yes
• Type S	No	Yes
• Type T	No	Yes
• Type TXK/TXK(L) to GOST	No	No
Input ranges (rated values), resistance thermometer		
• Cu 10	No	No
• Cu 10 according to GOST	No	No
• Cu 50	No	No
• Cu 50 according to GOST	No	No
• Cu 100	No	No
• Cu 100 according to GOST	No	No
• Ni 10	No	No
• Ni 10 according to GOST	No	No
• Ni 100	No	Yes; Standard/climate
• Ni 100 according to GOST	No	No
• Ni 1000	No	Yes; Standard/climate
• Ni 1000 according to GOST	No	No
• LG-Ni 1000	No	Yes; Standard/climate
• Ni 120	No	No
• Ni 120 according to GOST	No	No
• Ni 200	No	No
• Ni 200 according to GOST	No	No
• Ni 500	No	No
• Ni 500 according to GOST	No	No
• Pt 10	No	No
• Pt 10 according to GOST	No	No
• Pt 50	No	No
• Pt 50 according to GOST	No	No
• Pt 100	No	Yes; Standard/climate
• Pt 100 according to GOST	No	No
• Pt 1000	No	Yes; Standard/climate
• Pt 1000 according to GOST	No	No
• Pt 200	No	Yes; Standard/climate
• Pt 200 according to GOST	No	No
• Pt 500	No	Yes; Standard/climate
• Pt 500 according to GOST	No	No

Input ranges (rated values), resistors		
• 0 to 150 ohms	No	Yes
• 0 to 300 ohms	No	Yes
• 0 to 600 ohms	No	Yes
• 0 to 3000 ohms	No	No
• 0 to 6000 ohms	No	Yes
• PTC	No	Yes
Thermocouple (TC)		
Temperature compensation		
- parameterizable		Yes
Cable length		
• shielded, max.	800 m	800 m; for U/I, 200 m for R/RTD, 50 m for TC
Analog value generation for the inputs		
Integration and conversion time/ resolution per channel		
• Resolution with overrange (bit including sign), max.	16 bit	16 bit
• Integration time, parameterizable		Yes
• Integration time (ms)		2,5 / 16,67 / 20 / 100 ms
• Basic conversion time, including integration time (ms)		9 / 23 / 27 / 107 ms
- additional conversion time for wire-break monitoring		9 ms (to be considered in R/RTD/TC measurement)
- additional conversion time for resistance measurement		150 ohm, 300 ohm, 600 ohm, Pt100, Pt200, Ni100: 2 ms, 6000 ohm, Pt500, Pt1000, Ni1000, LG-Ni1000, PTC: 4 ms
• Interference voltage suppression for interference frequency f1 in Hz		400 / 60 / 50 / 10 Hz
• Basic execution time of the module (all channels released)	62.5 µs; independent of number of activated channels	
Smoothing of measured values		
• parameterizable	Yes	Yes
Encoder		
Connection of signal encoders		
• for voltage measurement	Yes	Yes
• for current measurement as 2-wire transducer	Yes	Yes
- Burden of 2-wire transmitter, max.	820 Ω	820 Ω
• for current measurement as 4-wire transducer	Yes	Yes
• for resistance measurement with two-wire connection	No	Yes; Only for PTC
• for resistance measurement with three-wire connection	No	Yes; All measuring ranges except PTC; internal compensation of the cable resistances
• for resistance measurement with four-wire connection	No	Yes; All measuring ranges except PTC
Errors/accuracies		
Basic error limit (operational limit at 25 °C)		
• Voltage, relative to input range, (+/-)	0.2 %	0.1 %
• Current, relative to input range, (+/-)	0.2 %	0.1 %
• Resistance, relative to input range, (+/-)		0.1 %
• Resistance thermometer, relative to input range, (+/-)		Ptxxx standard: ±0.7 K, Ptxxx climate: ±0.2 K, Nixxx standard: ±0.3 K, Nixxx climate: ±0.15 K
• Thermocouple, relative to input range, (+/-)		Type B: > 600 °C ±1.7 K, type E: > -200 °C ±0.7 K, type J: > -210 °C ±0.8 K, type K: > -200 °C ±1.2 K, type N: > -200 °C ±1.2 K, type R: > 0 °C ±1.9 K, type S: > 0 °C ±1.9 K, type T: > -200 °C ±0.8 K

Interference voltage suppression for $f = n \times (f1 \pm 1 \%)$, f1 = interference frequency		40 dB
• Series mode interference (peak value of interference < rated value of input range), min.		
• Common mode voltage, max.	10 V	10 V
• Common mode interference, min.	50 dB at 400 Hz; 60 dB at 60 / 50 / 10 Hz	60 dB
Isochronous mode		
Isochronous operation (application synchronized up to terminal)	Yes	No
Filtering and processing time (TCI), min.	80 μ s	
Bus cycle time (TDP), min.	250 μ s	
Interrupts/diagnostics/ status information		
Diagnostics function	Yes	Yes
Alarms		
• Diagnostic alarm	Yes	Yes
• Limit value alarm	Yes; two upper and two lower limit values in each case	Yes; two upper and two lower limit values in each case
Diagnostic messages		
• Monitoring the supply voltage	Yes	Yes
• Wire-break	Yes; only for 1 ... 5 V and 4 ... 20 mA	Yes; Only for 1 to 5 V, 4 to 20 mA, TC, R, and RTD
• Overflow/underflow	Yes	Yes
Diagnostics indication LED		
• RUN LED	Yes; Green LED	Yes; Green LED
• ERROR LED	Yes; Red LED	Yes; Red LED
• Monitoring of the supply voltage (PWR-LED)	Yes; Green LED	Yes; Green LED
• Channel status display	Yes; Green LED	Yes; Green LED
• for channel diagnostics	Yes; Red LED	Yes; Red LED
• for module diagnostics	Yes; Red LED	Yes; Red LED
Potential separation		
Potential separation channels		
• between the channels and backplane bus	Yes	Yes
Isolation		
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates		
Railway application		
• EN 50121-3-2	Yes; EMC for rail vehicles	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems	Yes; EMC for signal and telecommunications systems

Overview

- 4-channel analog output module
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- Optionally with extremely short conversion times
- For connecting analog actuators without additional amplifiers
- Even solves more complex automation tasks

Technical specifications

Article number	6AG2532-5HD00-4AB0 SIPLUS S7-1500 AQ 4xU/I ST TX RAIL
General information	
Product type designation	AQ 4xU/I ST
Product function	
• I&M data	Yes; I&M0 to I&M3
• Output range scalable	No
Operating mode	
• Oversampling	No
• MSO	Yes
CiR – Configuration in RUN	
Reparameterization possible in RUN	Yes
Calibration possible in RUN	Yes
Supply voltage	
Type of supply voltage	DC
Rated value (DC)	24 V
Reverse polarity protection	Yes
Analog outputs	
Number of analog outputs	4; > +60 °C max. 4x ±10 V permissible
Cycle time (all channels), min.	3.2 ms; independent of number of activated channels
Output ranges, voltage	
• 0 to 10 V	Yes
• 1 V to 5 V	Yes
• -5 V to +5 V	No
• -10 V to +10 V	Yes
Output ranges, current	
• 0 to 20 mA	Yes
• -20 mA to +20 mA	Yes
• 4 mA to 20 mA	Yes
Connection of actuators	
• for voltage output two-wire connection	Yes
• for voltage output four-wire connection	Yes
• for current output two-wire connection	Yes

Article number	6AG2532-5HD00-4AB0 SIPLUS S7-1500 AQ 4xU/I ST TX RAIL
Load impedance (in rated range of output)	
• with voltage outputs, min.	1 kΩ; 0.5 kΩ at 1 to 5 V
• with voltage outputs, capacitive load, max.	1 μF
• with current outputs, max.	750 Ω
• with current outputs, inductive load, max.	10 mH
Cable length	
• shielded, max.	800 m; for current, 200 m for voltage
Analog value generation for the outputs	
Integration and conversion time/resolution per channel	
• Resolution with overrange (bit including sign), max.	16 bit
• Conversion time (per channel)	0.5 ms
Settling time	
• for resistive load	1.5 ms
• for capacitive load	2.5 ms
• for inductive load	2.5 ms
Errors/accuracies	
Basic error limit (operational limit at 25 °C)	
• Voltage, relative to output range, (+/-)	0.2 %
• Current, relative to output range, (+/-)	0.2 %
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	No
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Substitute values connectable	Yes
Alarms	
• Diagnostic alarm	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
• Wire-break	Yes; Only for output type "current"
• Short-circuit	Yes; Only for output type "voltage"
• Overflow/underflow	Yes

Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
Use on land craft, rail vehicles and special-purpose vehicles	
- to biologically active substances according to EN 60721-3-5	Yes; Class 5B2 mold, fungus and dry rot spores (with the exception of fauna); Class 5B3 on request
- to chemically active substances according to EN 60721-3-5	Yes; Class 5C3 (RH < 75 %) incl. salt spray acc. to EN 50155 (ST2); *
- to mechanically active substances according to EN 60721-3-5	Yes; Class 5S3 incl. sand, dust; *
from supply voltage 1L+	
- Note regarding classification of environmental conditions acc. to EN 60721	* The supplied plug covers must remain in place over the unused interfaces during operation!
Decentralized operation	
Prioritized startup	No
Dimensions	
Width	35 mm
Height	147 mm
Depth	129 mm
Weights	
Weight, approx.	310 g

Ordering data**Article No.****Article No.****SIPLUS extreme RAIL SM 532 analog output modules**

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

SIPLUS S7-1500 AQ 4xU/I ST TX RAIL

4 analog outputs, ±10 V, 1 ... 5 V, 0 ... 10 V or ±20 mA, 0/4 ... 20 mA, 16-bit; for areas with extreme exposure to environmental substances (conformal coating); ambient temperature -40 ... +70 °C (+85 °C for 10 min.)

6AG2532-5HD00-4AB0

Overview

- Module for serial communication connections
- Approved in accordance with EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- Physical transmission media:
 - RS 232C, max. 115.2 Kbps
- Protocols supported
 - Freeport: User-parameterizable frame format for universal communication
 - 3964(R) for improved transmission reliability
 - Modbus RTU Master
 - Modbus RTU Slave
 - USS, implemented through instructions

Technical specifications

Article number	6AG2541-1AD00-4AB0
	SIPLUS S7-1500 CM PtP RS232 HF TX RAIL
General information	
Product type designation	CM PtP RS232 HF
Product function	
• I&M data	Yes; I&M 0
Installation type/mounting	
Rail mounting	Yes; S7-1500 mounting rail
Supply voltage	
Type of supply voltage	system power supply
Input current	
Current consumption (rated value)	35 mA; From the backplane bus
Power	
Power available from the backplane bus	0.65 W
Power loss	
Power loss, typ.	0.6 W
Interface types	
RS 232	
• Transmission rate, max.	115.2 kbit/s
• Cable length, max.	15 m
• RS 232 auxiliary signals	RTS, CTS, DTR, DSR, RI, DCD
Protocols	
Integrated protocols	
Freeport	
- Telegram length, max.	4 kbyte
- Bits per character	7 or 8
- Number of stop bits	1 or 2 bit
- Parity	None, even, odd, always 1, always 0, any
3964 (R)	
- Telegram length, max.	4 kbyte
- Bits per character	7 or 8
- Number of stop bits	1 or 2 bit
- Parity	None, even, odd, always 1, always 0, any
Modbus RTU master	
- Address area	1 to 247, extended 1 to 65535
- Number of slaves, max.	1
MODBUS RTU slave	
- Address area	1 to 247, extended 1 to 65535

Article number	6AG2541-1AD00-4AB0
	SIPLUS S7-1500 CM PtP RS232 HF TX RAIL
Telegram buffer	
• Buffer memory for telegrams	8 kbyte
• Number of telegrams which can be buffered	255
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Alarms	
• Diagnostic alarm	Yes
• Hardware interrupt	No
Diagnostic messages	
• Wire-break	Yes
Diagnostics indication LED	
• RUN LED	Yes; Green LED
• ERROR LED	Yes; Red LED
• Receive RxD	Yes; yellow LED
• Transmit TxD	Yes; yellow LED
Potential separation	
between backplane bus and interface	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)

SIPLUS S7-1500 RAIL

SIPLUS extreme RAIL communication

SIPLUS CM PtP

Article number	6AG2541-1AD00-4AB0 SIPLUS S7-1500 CM PtP RS232 HF TX RAIL
Railway application	
• EN 50155	Yes; Rail vehicles - temperature class Tx, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-40 °C; = Tmin
• horizontal installation, max.	70 °C; = Tmax; +85 °C for 10 min (Tx acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes
Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
Use on land craft, rail vehicles and special-purpose vehicles	
- to biologically active substances according to EN 60721-3-5	Yes; Class 5B2 mold, fungus and dry rot spores (with the exception of fauna); Class 5B3 on request
- to chemically active substances according to EN 60721-3-5	Yes; Class 5C3 (RH < 75 %) incl. salt spray acc. to EN 50155 (ST2); *
- to mechanically active substances according to EN 60721-3-5	Yes; Class 5S3 incl. sand, dust; *
from supply voltage 1L+	
- Note regarding classification of environmental conditions acc. to EN 60721	* The supplied plug covers must remain in place over the unused interfaces during operation!

Article number	6AG2541-1AD00-4AB0 SIPLUS S7-1500 CM PtP RS232 HF TX RAIL
Decentralized operation	
to SIMATIC S7-300	Yes
to SIMATIC S7-400	Yes
to SIMATIC S7-1500	Yes
to standard PROFINET controller	Yes
Fast Startup supported	Yes
Dimensions	
Width	35 mm
Height	147 mm
Depth	127 mm
Weights	
Weight, approx.	0.22 kg

SIPLUS S7-1500CM PtP RS 232 HF T1 RAIL communications module

Approved in accordance with EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

High Feature communications module with 1 RS 232 interface, and Freeport, 3964(R), USS and Modbus RTU protocols, 9-pin D-sub connector, max. 115.2 Kbps; for areas with extreme exposure to environmental substances (conformal coating); ambient temperature -40 ... +70 °C (+85 °C for 10 min.)

Article No.

6AG2541-1AD00-4AB0

Overview

- SIPLUS ET 200SP CPU 1510SP F-1 PN T1 RAIL for SIPLUS extreme RAIL ET 200SP based on S7-1500 CPU 1511F-1 PN
- Approved in accordance with EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- For high-performance control solutions using ET 200SP
- Increase in availability of systems and machines
- Supports PROFiSafe in centralized and distributed configurations
- PROFINET IO controller for up to 64 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or third-party PROFINET IO controller
- PROFINET shared I-device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- Configuration control (option handling)
- Integrated motion control functions for controlling speed-controlled and positioning axes, support for external encoders

Technical specifications

Article number	6AG2510-1SJ01-1AB0
	SIPLUS ET 200SP CPU 1510 F-1 PN RAIL
General information	
Product type designation	CPU 1510SP F-1 PN
Supply voltage	
Type of supply voltage	24 V DC
Memory	
Work memory	
• integrated (for program)	150 kbyte
• integrated (for data)	750 kbyte
Load memory	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
CPU processing times	
for bit operations, typ.	72 ns
for word operations, typ.	86 ns
for fixed point arithmetic, typ.	115 ns
for floating point arithmetic, typ.	461 ns
Counters, timers and their retentivity	
S7 counter	
• Number	2 048
IEC counter	
• Number	Any (only limited by the main memory)
S7 times	
• Number	2 048
IEC timer	
• Number	Any (only limited by the main memory)
Data areas and their retentivity	
Flag	
• Number, max.	16 kbyte

Article number	6AG2510-1SJ01-1AB0
	SIPLUS ET 200SP CPU 1510 F-1 PN RAIL
Address area	
I/O address area	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
Address space per module	
• Address space per module, max.	32 byte; For input and output data respectively
Address space per station	
• Address space per station, max.	1 280 byte; for central inputs and outputs; depending on configuration
Time of day	
Clock	
• Type	Hardware clock
1. Interface	
Interface types	
• Number of ports	3
• integrated switch	Yes
• RJ 45 (Ethernet)	1. integr. + 2. via BusAdapter BA 2x RJ45
Functionality	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes
• Media redundancy	Yes
2. Interface	
Interface types	
• Number of ports	1
• RS 485	Yes; Via CM DP module

SIPLUS CPU 1510SP F-1 PN T1 RAIL

Article number	6AG2510-1SJ01-1AB0 SIPLUS ET 200SP CPU 1510 F-1 PN RAIL
Functionality	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
Protocols	
Number of connections	
• Number of connections, max.	64
PROFINET IO Controller	
Services	
- Number of connectable IO Devices, max.	64; In total, up to 189 distributed I/O devices can be connected via PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	64
PROFIBUS DP master	
Services	
- Number of DP slaves	125
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	Yes; For PROFINET only
Supported technology objects	
Motion Control	Yes
• Speed-controlled axis	
- Number of speed-controlled axes, max.	6; Max. number of speed-controlled axes (requirement: there must be no other motion technology objects created)
• Positioning axis	
- Number of positioning axes, max.	6; Max. number of positioning axes (requirement: there must be no other motion technology objects created)
• Synchronized axes (relative gear synchronization)	
- Number of axes, max.	3; Max. number of synchronous axes (requirement: there must be no other motion technology objects created)
• External encoders	
- Number of external encoders, max.	6; Max. number of external encoders (requirement: there must be no other motion technology objects created)
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)

Article number	6AG2510-1SJ01-1AB0 SIPLUS ET 200SP CPU 1510 F-1 PN RAIL
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC

• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class T1, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Highest safety class achievable in safety mode	
• SIL in accordance with EN 50126, 50128, 50129	SIL 2; a higher safety integrity level is possible if tested and approved for the specific application under consideration of all local regulations.
Probability of failure (for service life of 20 years and repair time of 100 hours)	
- Low demand mode: PFDavg in accordance with SIL3	< 2.00E-05
- High demand/continuous mode: PFH in accordance with SIL3	< 1.00E-09 1/h
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-25 °C; = Tmin
• horizontal installation, max.	60 °C; = Tmax; +70 °C for 10 min (T1 acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes

SIPLUS extreme RAIL fail-safe CPUs

SIPLUS CPU 1512SP F-1 PN T1 RAIL

Overview

- SIPLUS ET 200SP CPU 1512SP F-1 PN T1 RAIL for SIPLUS extreme RAIL ET 200SP based on S7-1500 CPU 1513F-1 PN
- Approved in accordance with EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- For applications with average requirements regarding the program scope and processing speed, for distributed setup via PROFINET IO or PROFIBUS DP
- Increase in availability of systems and machines
- Supports PROFIsafe in centralized and distributed configurations
- PROFINET IO controller for up to 128 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or third-party PROFINET IO controller
- PROFINET shared I-device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- Configuration control (option handling)
- Integrated motion control functions for controlling speed-controlled and positioning axes, support for external encoders

SIPLUS ET 200SP CPU 1512SP F-1 PN T1 RAIL

6AG2512-1SK01-1AB0

Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

Work memory 300 KB for program, 1 MB for data, PROFINET IO IRT interface; SIMATIC Memory Card required; for areas with extreme exposure to environmental substances (conformal coating); ambient temperature -25 ... +60 °C (+70 °C for 10 min.)

Accessories

SIPLUS extreme RAIL BusAdapter

SIPLUS ET 200SP BA 2XRJ45 TX RAIL

6AG2193-6AR00-4AA0

For PROFINET interface modules in Standard function class or above; max. cable length 50 m; for areas with extreme exposure to environmental substances (conformal coating); ambient temperature -40 ... +70 °C (+85 °C for 10 min.)

SIPLUS ET 200SP BA 2XFC TX RAIL

6AG2193-6AF00-4AA0

For PROFINET interface modules in Standard function class or above; for increased vibration and EMC load rating; max. cable length 50 m; for areas with extreme exposure to environmental substances (conformal coating); ambient temperature -40 ... +70 °C (+85 °C for 10 min.)

Overview

Thanks to their wide scope of functions, the interface modules of the scalable SIPLUS extreme RAIL ET 200SP I/O system, even in their basic versions, cover a wide range of applications. The basic functions of the interface modules include:

- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- Short data update times of typically 1 ms
- Single Hot Swap (withdrawing and insertion of an I/O module during operation without impairing the communication with the remaining modules)
- Operation with gaps (empty BaseUnits)
- Complete diagnostic support, extending to channel-by-channel diagnostics
- Configuration control / option handling (adaptation of the actual configuration via user software)
- Device replacement without PG I&M data 0 to 3 (electronic rating plate with non-volatile storage of plant data)
- Firmware update
- Pluggable 24 V DC supply connection
- Network / power failure bridging time of 5 ms
- Labeling option via optional labeling strips and equipment labeling plates

When using PROFINET interface modules, the following basic functions are also included:

- Media redundancy (MRP) integrated 2-port switch
- Freely selectable connection method via SIMATIC BusAdapter
- Reset button for simple return to factory settings without the need for programming device
- Replacement without programming device even in case of non-topological configuration with subsequent automatic launching
- Automatic synchronization of the backplane bus to the PROFINET cycle to minimize the response time fluctuations (jitter)

SIPLUS ET 200SP IM 155-6PN ST (BA) TX RAIL with PROFINET interface

- Max. 32 I/O modules, also PROFIsafe modules, with complete diagnostic support
- Expansion option with max. 16 modules from the ET 200AL series using the BU-Send BaseUnit and the BA-Send BusAdapter
- Max. 256 bytes in each case for input and output data per module and max. 512 bytes per station (depending on configuration)
- Data update time: typ. 1 ms
- Choice of connection type of the PROFINET by means of SIMATIC BusAdapter (BusAdapter for copper cables only)
- Two types of delivery:
 - As package with SIPLUS ET 200SP IM 155-6PN ST BA TX RAIL, with pre-assembled BA 2xRJ45 BusAdapter, including server module
 - As package with SIPLUS ET 200SP IM 155-6PN ST TX RAIL, without BusAdapter, including server module

SIPLUS ET 200SP IM 155-6PN HF T1 RAIL with PROFINET interface

- Max. 64 I/O modules, also PROFIsafe modules, with complete diagnostic support
- Expansion option with max. 16 modules from the ET 200AL series using the BU-Send BaseUnit and the BA-Send BusAdapter
- Max. 288 bytes in each case for input and output data per module and max. 1440 bytes per station (depending on configuration)
- Fast data refresh time: isochronous mode from 250 μ s
- S2 system redundancy
- Choice of connection type and physical connection of the PROFINET by means of SIMATIC BusAdapter. All BusAdapters with a connection for copper and/or fiber-optic cables can be used; BusAdapter must be ordered separately
- Package inclusive of server module

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL digital inputs**Overview**

- 4, 8 and 16-channel digital input (DI) modules
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

For different requirements, the digital input modules offer:

- Function classes Standard and High Feature
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Individual system-integrated load group formation with self-assembling voltage distribution bars (a separate power module is no longer required for ET 200SP)
- Connection option of sensors compliant with IEC 61131 Type 1, 2 or 3 (module-dependent) for rated voltages of up to 24 V DC or 230 V AC
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Optional accessories
 - Labeling strips (film or card)
 - Reference identification label
 - Color-coded label with module-specific CC Code
 - Shielding terminal

A quick and clear comparison of the functions of the different DI modules is offered by the TIA Selection Tool.

Supply voltage			
Type of supply voltage	DC	24 V DC	100 - 240 V AC
Rated value (DC)	24 V	24 V	
Rated value (AC)			230 V
Reverse polarity protection	Yes	Yes	No
Encoder supply			
Number of outputs		8	4
Short-circuit protection	No	Yes	No; when using BU type B1, a fuse with 10 A tripping current must be provided
Output current			
• up to 60 °C, max.			10 A
24 V encoder supply			
• 24 V	No	No	No
• Short-circuit protection	No	No	No
Digital inputs			
Number of digital inputs	16; > +60 °C, number of simultaneously controllable inputs max. 4	8; > +60 °C number of simultaneously controllable inputs max. 4 (no adjacent points)	4
Digital inputs, parameterizable		Yes	
Source/sink input	P-reading		No
Input characteristic curve in accordance with IEC 61131, type 1	Yes		
Input characteristic curve in accordance with IEC 61131, type 2	No		
Input characteristic curve in accordance with IEC 61131, type 3	Yes		Yes
Pulse extension	No	Yes; 0.5 s, 1 s, 2 s	No
Edge evaluation		Yes; rising edge, falling edge, edge change	
Signal change flutter		Yes; 2 to 32 signal changes	
Flutter observation window		Yes; 0.5 s, 1 s to 100 s in 1-s steps	
Input voltage			
• Type of input voltage	DC	DC	120/230 V AC (47 Hz to 63 Hz)
• Rated value (DC)	24 V	8.2 V	
• Rated value (AC)			230 V
• for signal *0*	-30 to +5V		0V AC to 40V AC
• for signal *1*	+11 to +30V		74 V AC to 264 V AC
Input current			
• for signal *1*, typ.	2.5 mA		10.8 mA
for 10 k switched contact			
- for signal *0*		0.35 to 1.2 mA	
- for signal *1*		2.1 to 7 mA	
for unswitched contact			
- for signal *0*, max. (permissible quiescent current)		0.5 mA	
- for signal *1*		typ. 8 mA	
for NAMUR encoders			
- for signal *0*		0.35 to 1.2 mA	
- for signal *1*		2.1 to 7 mA	
Input delay (for rated value of input voltage)			
• tolerated changeover time for changeover contacts		300 ms	
for standard inputs			
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms (in each case + delay of 30 to 500 µs, depending on line length)	No	No
for interrupt inputs			
- parameterizable	No

6AG2193-6BP20-4BB1

Overview

- 4, 8 and 16-channel digital output (DQ) modules
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

For different requirements, the digital output modules offer:

- Function classes Basic and High Feature
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Individual system-integrated load group formation with self-assembling voltage distribution bars (a separate power module is no longer required for ET 200SP)
- Option of connecting actuators with rated load voltages of up to 120 V DC or 230 V AC and load currents of up to 5 A (depending on module)
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Optional accessories
 - Labeling strips (film or card)
 - Reference identification label
 - Color-coded label with module-specific CC Code
 - Shielding terminal

A quick and clear comparison of the functions of the different DQ modules is offered by the TIA Selection Tool.

Overview of digital output modules

Digital output	PU	Article No.	CC code	BU type
DQ 16 x 24 V DC/0.5 A ST	1	6AG2132-6BH00-4BA0	CC00	A0
DQ 8 x 24 V DC/0.5 A HF	1	6AG2132-6BF00-4CA0	CC02	A0
DQ 4 x 24 V DC/2 A ST	1	6AG2132-6BD20-4BA0	CC02	A0

Overview of BaseUnits

BaseUnit	PU	Article No.	CC codes for process terminals	CC codes for AUX terminals
BU type A0 • New load group (light) • 16 process terminals • With 10 AUX terminals	1	6AG2193-6BP20-4DA0	CC01 to CC05	CC71 to CC73
BU type A0 • New load group (light) • 16 process terminals • Without AUX terminals	1	6AG2193-6BP00-4DA0	CC01 to CC05	--
BU type A0 • Forwarding of load group (dark) • 16 process terminals • With 10 AUX terminals	1	6AG2193-6BP20-4BA0	CC01 to CC05	CC71 to CC73
BU type A0 • Forwarding of load group (dark) • 16 process terminals • Without AUX terminals	1	6AG2193-6BP00-4BA0	CC01 to CC05	--

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL analog inputs

Overview

- 2, 4 and 8-channel analog input (AI) modules
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

For different requirements, the analog output modules offer:

- Function classes Basic and High Feature
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Individual system-integrated load group formation with self-assembling voltage distribution bars (a separate power module is no longer required for ET 200SP)
- Option of connecting current, voltage and resistance sensors, as well as thermocouples
- Energy Meter for recording up to 200 electrical variables
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
 - Scalable measuring range (adaptation of measuring range, increase of the 16-bit resolution by adapting the measuring range to a limited section)
- Optional accessories
 - Labeling strips (film or card)
 - Reference identification label
 - Color-coded label with module-specific CC Code
 - Shielding terminal

A quick and clear comparison of the functions of the AI modules is offered by the TIA Selection Tool.

Overview of analog input modules

Analog input	PU	Article No.	CC code	BU type
AI 4 x 1 2-/4-wire ST	1	6AG2134-6GD00-4BA1	CC03	A0, A1
AI 4 x U/I 2-wire ST	1	6AG2134-6HD00-4BA1	CC03	A0, A1
AI 2 x U/I 2-/4-wire HF	1	6AG2134-6HB00-1CA1	CC05	A0, A1
AI 8 x RTD/TC 2-wire HF	1	6AG2134-6JF00-1CA1	CC00	A0, A1
AI Energy Meter ST	1	6AG2134-6PA00-4BD0	CC00	D0
AI Energy Meter 480 V AC ST	1	6AG2134-6PA20-4BD0	CC00	D0

Overview of BaseUnits

BaseUnit	PU	Article No.	CC codes for process terminals	CC codes for AUX terminals
BU type A0 • New load group (light) • 16 process terminals • With 10 AUX terminals	1	6AG2193-6BP20-4DA0	CC01 to CC05	CC71 to CC73
BU type A0 • New load group (light) • 16 process terminals • Without AUX terminals	1	6AG2193-6BP00-4DA0	CC01 to CC05	--
BU type A0 • Forwarding of load group (dark) • 16 process terminals • With 10 AUX terminals	1	6AG2193-6BP20-4BA0	CC01 to CC05	CC71 to CC73
BU type A0 • Forwarding of load group (dark) • 16 process terminals • Without AUX terminals	1	6AG2193-6BP00-4BA0	CC01 to CC05	--
BU type D0 • Forwarding of load group (dark) • 12 process terminals • Without AUX terminals	1	6AG2193-6BP00-4BD0	--	--

• MSI	No	No	Yes	No
Supply voltage				
Rated value (DC)	24 V	24 V	24 V	24 V
Reverse polarity protection	Yes	Yes	Yes	Yes
Analog inputs				
Number of analog inputs	4; > 60 °C max. 1x ±20 mA permissible	4; > 60 °C max. 1x ±20 mA or 4x ±10 V permissible	2; Differential inputs	8
permissible input voltage for voltage input (destruction limit), max.		30 V	30 V	30 V
permissible input current for current input (destruction limit), max.	50 mA	50 mA	50 mA	
Constant measurement current for resistance-type transmitter, typ.				2 mA
Cycle time (all channels), min.	Sum of the basic conversion times and additional processing times (depending on the parameterization of the active channels)	Sum of the basic conversion times and additional processing times (depending on the parameterization of the active channels)		Sum of the basic conversion times and additional processing times (depending on the parameterization of the active channels)
Technical unit for temperature measurement adjustable				Yes; °C/°F/K
Analog input with oversampling			No	
Standardization of measured values			Yes	
Input ranges (rated values), voltages				
• 0 to +10 V		Yes; 15 bit	Yes; 15 bit	
• 1 V to 5 V		Yes; 15 bit	Yes; 15 bit	
• -1 V to +1 V				Yes; 16 bit incl. sign
• -10 V to +10 V		Yes; 16 bit incl. sign	Yes; 16 bit incl. sign	
• -250 mV to +250 mV				Yes; 16 bit incl. sign
• -5 V to +5 V		Yes; 16 bit incl. sign	Yes; 16 bit incl. sign	
• -50 mV to +50 mV				Yes; 16 bit incl. sign
• -80 mV to +80 mV				Yes; 16 bit incl. sign
Input ranges (rated values), currents				
• 0 to 20 mA	Yes	Yes; 15 bit	Yes; 15 bit	
• -20 mA to +20 mA	Yes		Yes; 16 bit incl. sign	
• 4 mA to 20 mA	Yes	Yes; 15 bit	Yes; 15 bit	
Input ranges (rated values), thermocouples				
• Type B				Yes; 16 bit incl. sign
• Type C				Yes; 16 bit incl. sign
• Type E				Yes; 16 bit incl. sign
• Type J				Yes; 16 bit incl. sign
• Type K				Yes; 16 bit incl. sign
• Type L				Yes; 16 bit incl. sign
• Type N				Yes; 16 bit incl. sign
• Type R				Yes; 16 bit incl. sign
• Type S				Yes; 16 bit incl. sign
• Type T				Yes; 16 bit incl. sign
• Type U				Yes; 16 bit incl. sign
• Type TXK/TXK(L) to GOST				Yes; 16 bit incl. sign

Article number	6AG2134-6PA00-4BD0 SIPLUS ET 200SP AI ENERGY METER TX RAIL	6AG2134-6PA20-4BD0 SIPLUS ET 200SP AI EMETER 480VAC TX RAIL
General information		
Product type designation	AI energy meter 400VAC ST	ET 200SP, AI Energy Meter 480 V AC ST, PU 1
Product function		
• Voltage measurement	Yes	Yes
- with voltage transformer	No	Yes
• Current measurement	Yes	Yes
- without current transformer	No	No
- with current transformer	Yes	Yes
• Energy measurement	Yes	Yes
• Frequency measurement	Yes	Yes
• Power measurement	Yes	Yes
• Active power measurement	Yes	Yes
• Reactive power measurement	Yes	Yes
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
• Isochronous mode	No	No
Operating mode		
• cyclic measurement	Yes	Yes
• acyclic measurement	Yes	Yes
• Acyclic measured value access	Yes	Yes
• Fixed measured value sets	Yes	Yes
• Freely definable measured value sets	No	Yes
Installation type/mounting		
Mounting position	Horizontal	Any
Supply voltage		
Design of the power supply	Supply via voltage measurement channel L1	Supply via voltage measurement channel L1
Type of supply voltage	100 - 240 V AC	AC 100 - 277 V
Line frequency		
• permissible range, lower limit	47 Hz	47 Hz
• permissible range, upper limit	63 Hz	63 Hz
Analog inputs		
Cycle time (all channels), typ.	50 ms; Time for consistent update of all measured and calculated values (cyclic und acyclic data)	50 ms; Time for consistent update of all measured and calculated values (cyclic und acyclic data)

Interrupts/diagnostics/status information		
Alarms		
• Diagnostic alarm	Yes	Yes
• Limit value alarm	No	Yes
• Hardware interrupt	No	Yes; Monitoring of up to 16 freely selectable process values (exceeding or undershooting of value)
Diagnostics indication LED		
• Monitoring of the supply voltage (PWR-LED)	Yes	Yes
• Channel status display	Yes; Green LED	Yes; Green LED
• for channel diagnostics	Yes; red Fn LED	Yes; red Fn LED
• for module diagnostics	Yes; green/red DIAG LED	Yes; green/red DIAG LED
Integrated Functions		
Measuring functions		
• Measuring procedure for voltage measurement	TRMS	TRMS
• Measuring procedure for current measurement	TRMS	TRMS
• Type of measured value acquisition	seamless	seamless
• Curve shape of voltage	Sinusoidal or distorted	Sinusoidal or distorted
• Buffering of measured variables	No	Yes
• Parameter length	38 byte	74 byte
• Bandwidth of measured value acquisition	2 kHz; Harmonics: 39 / 50 Hz, 32 / 60 Hz	2 kHz; Harmonics: 39 / 50 Hz, 32 / 60 Hz
Measuring range		
- Frequency measurement, min.	45 Hz	45 Hz
- Frequency measurement, max.	65 Hz	65 Hz
Measuring inputs for voltage		
- Measurable line voltage between phase and neutral conductor	230 V	277 V
- Measurable line voltage between the line conductors	400 V	480 V
- Measurable line voltage between phase and neutral conductor, min.	90 V	90 V
- Measurable line voltage between phase and neutral conductor, max.	264 V	293 V
- Measurable line voltage between the line conductors, min.	155 V	155 V
- Measurable line voltage between the line conductors, max.	460 V	508 V
- Measurement category for voltage measurement in accordance with IEC 61010-2-030	CAT II; CAT III in case of guaranteed protection level of 1.5 kV	CAT II; CAT III in case of guaranteed protection level of 1.5 kV
- Internal resistance line conductor and neutral conductor	3.4 MΩ	3.4 MΩ
- Power consumption per phase	20 mW	20 mW
- Impulse voltage resistance 1,2/50μs	1 kV	1 kV
Measuring inputs for current		
- measurable relative current (AC), min.	5 %; Relative to the secondary rated current; 1 A, 5 A	1 %; Relative to the secondary rated current 5 A
- measurable relative current (AC), max.	100 %; Relative to the secondary rated current; 1 A, 5 A	100 %; Relative to the secondary rated current 5 A
- Continuous current with AC, maximum permissible	5 A; at > +60 °C max. permissible current 1 A per phase	5 A; at > +60 °C max. permissible current 1 A per phase
- Apparent power consumption per phase for measuring range 5 A	0.6 V·A	0.6 V·A
- Rated value short-time withstand current restricted to 1 s	100 A	100 A

Measuring inputs for current		
- Input resistance measuring range 0 to 5 A	25 mΩ	25 mΩ; At the terminal
- Zero point suppression	Parameterizable: 20 ... 250 mA, default 50 mA	Parameterizable: 2 ... 250 mA, default 50 mA
- Surge strength	10 A; for 1 minute	10 A; for 1 minute
Accuracy class according to IEC 61557-12		
- Measured variable voltage	0.5	0,2
- Measured variable current	0.5	0,2
- Measured variable apparent power	1	0.5
- Measured variable active power	1	0.5
- Measured variable reactive power	1	1
- Measured variable power factor	0.5	0.5
- Measured variable active energy	1	0.5
- Measured variable reactive energy	2	1
- Measured variable neutral current		0.5; calculated
- Measured variable phase angle	±1 °; not covered by IEC 61557-12	±1 °; not covered by IEC 61557-12
- Measured variable frequency	0.05	0.05
Potential separation		
Potential separation channels		
• between the channels and backplane bus	Yes; 3 700V AC (type test) CAT III	Yes; 3 700V AC (type test) CAT III
Isolation		
Isolation tested with	2 300 V AC for 1 minute (type test) and according to EN 50155 (routine test)	2 300 V AC for 1 minute (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates		
Railway application		
• EN 50121-3-2	Yes; EMC for rail vehicles	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC	Yes; Railway applications - overvoltage category OV3; pollution degree PD2; UNm = 277/480 V AC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class Tx, horizontal mounting position, salt spray Class ST2	Yes; Rail vehicles - temperature class Tx, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request	Yes; Rail vehicles - verification on request
Ambient conditions		
Ambient temperature during operation		
• horizontal installation, min.	-40 °C; = Tmin	-40 °C; = Tmin
• horizontal installation, max.	70 °C; = Tmax; +85 °C for 10 min (Tx acc. to EN 50155)	70 °C; = Tmax; +85 °C for 10 min (Tx acc. to EN 50155)
Altitude during operation relating to sea level		
• Installation altitude above sea level, max.	2 000 m	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity		
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL analog outputs**Overview**

- 4-channel analog output (AQ) modules
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

For different requirements, the analog output modules offer:

- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Individual system-integrated load group formation with self-assembling voltage distribution bars (a separate power module is no longer required for ET 200SP)
- Option for connecting current and voltage actuators
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Optional accessories
 - Labeling strips (film or card)
 - Reference identification label
 - Color-coded label with module-specific CC Code
 - Shielding terminal

A quick and clear comparison of the functions of the AQ modules is offered by the TIA Selection Tool.

[Overview of analog output modules](#)

Analog output	PU	Article No.	CC code	BU type
AQ 4 x U/I ST	1	6AG2135-6HD00-4BA1	CC00	A0, A1

Overview of BaseUnits

BaseUnit	PU	Article No.	CC codes for process terminals	CC codes for AUX terminals
BU type A0 • New load group (light) • 16 process terminals • With 10 AUX terminals	1	6AG2193-6BP20-4DA0	CC01 to CC05	CC71 to CC73
BU type A0 • New load group (light) • 16 process terminals • Without AUX terminals	1	6AG2193-6BP00-4DA0	CC01 to CC05	--
BU type A0 • Forwarding of load group (dark) • 16 process terminals • With 10 AUX terminals	1	6AG2193-6BP20-4BA0	CC01 to CC05	CC71 to CC73
BU type A0 • Forwarding of load group (dark) • 16 process terminals • Without AUX terminals	1	6AG2193-6BP00-4BA0	CC01 to CC05	--

Technical specifications

Article number	6AG2135-6HD00-4BA1 SIPLUS ET 200SP AQ 4XU/I ST TX RAIL
General information	
Product type designation	AQ 4xU/I ST
Product function	
• I&M data	Yes; I&M0 to I&M3
• Output range scalable	No
Operating mode	
• Oversampling	No
• MSO	No
Supply voltage	
Rated value (DC)	24 V
Reverse polarity protection	Yes

Article number	6AG2135-6HD00-4BA1 SIPLUS ET 200SP AQ 4XU/I ST TX RAIL
Analog outputs	
Number of analog outputs	4; > +60 °C max. 2x ±10 V permissible
Cycle time (all channels), min.	5 ms
Analog output with oversampling	No
Output ranges, voltage	
• 0 to 10 V	Yes; 15 bit
• 1 V to 5 V	Yes; 13 bit
• -5 V to +5 V	Yes; 15 bit incl. sign
• -10 V to +10 V	Yes; 16 bit incl. sign

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL analog outputs

Article number	6AG2135-6HD00-4BA1 SIPLUS ET 200SP AQ 4XU/I ST TX RAIL
Output ranges, current	
• 0 to 20 mA	Yes; 15 bit
• -20 mA to +20 mA	Yes; 16 bit incl. sign
• 4 mA to 20 mA	Yes; 14 bit
Connection of actuators	
• for voltage output two-wire connection	Yes
• for voltage output four-wire connection	Yes
• for current output two-wire connection	Yes
Load impedance (in rated range of output)	
• with voltage outputs, min.	2 kΩ
• with voltage outputs, capacitive load, max.	1 μF
• with current outputs, max.	500 Ω
• with current outputs, inductive load, max.	1 mH
Cable length	
• shielded, max.	1 000 m; 200 m for voltage output
Analog value generation for the outputs	
Integration and conversion time/resolution per channel	
• Resolution with overrange (bit including sign), max.	16 bit
Settling time	
• for resistive load	0.1 ms
• for capacitive load	1 ms
• for inductive load	0.5 ms
Errors/accuracies	
Basic error limit (operational limit at 25 °C)	
• Voltage, relative to output range, (+/-)	0.3 %
• Current, relative to output range, (+/-)	0.3 %
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	No
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Substitute values connectable	Yes
Alarms	
• Diagnostic alarm	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
• Short-circuit	Yes
• Group error	Yes
• Overflow/underflow	Yes
Diagnostics indication LED	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; Green LED
• for channel diagnostics	No
• for module diagnostics	Yes; green/red DIAG LED

Article number	6AG2135-6HD00-4BA1 SIPLUS ET 200SP AQ 4XU/I ST TX RAIL
Potential separation	
Potential separation channels	
• between the channels and backplane bus	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class Tx, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-40 °C; = Tmin
• horizontal installation, max.	70 °C; = Tmax; +85 °C for 10 min (Tx acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes

6AG2193-6BP20-4BA0

Overview

Technical properties

- Counter module for ET 200SP
- Interfaces:
 - 24 V encoder signals A, B and N from P, M or push-pull-switching encoders and sensors
 - 24 V encoder supply output, short-circuit proof
 - 3 digital inputs for controlling the count operation, for saving or for setting the count value
 - 2 digital outputs for fast reactions regardless of the counter status or measured value

- Counting frequency 200 kHz (800 kHz with quadruple evaluation)
- Counting range: +/- 31 bits
- Measurement function
- Parameterizable hardware interrupts
- Parameterizable input filters for suppressing interferences at sensor and digital inputs

Supported types of encoders/signals

- 24 V incremental encoder with and without signal N
- 24 V pulse encoder with direction signal
- 24 V pulse encoder without direction signal
- 24 V pulse encoder for pulse up and down respectively

Supported system functions

- Isochronous mode
- Firmware update
- Identification data I&M

Technical specifications

Article number	6AG2138-6AA00-1BA0
	SIPLUS ET 200SP TM COUNT 1X24V T1 RAIL
General information	
Product type designation	TM Count 1x24V
Product function	
• I&M data	Yes; I&M0 to I&M3
Supply voltage	
Load voltage L+	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes
Encoder supply	
Number of outputs	1
24 V encoder supply	
• 24 V	Yes; L+ (-0.8 V)
• Short-circuit protection	Yes
• Output current, max.	300 mA
Digital inputs	
Number of digital inputs	3
Digital inputs, parameterizable	Yes
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Digital input functions, parameterizable	
• Gate start/stop	Yes
• Capture	Yes
• Synchronization	Yes
• Freely usable digital input	Yes
Input voltage	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5V
• for signal "1"	+11 to +30V
• permissible voltage at input, min.	-30 V
• permissible voltage at input, max.	30 V

Article number	6AG2138-6AA00-1BA0
	SIPLUS ET 200SP TM COUNT 1X24V T1 RAIL
Input current	
• for signal "1", typ.	2.5 mA
Input delay (for rated value of input voltage)	
for standard inputs	
- parameterizable	Yes; none / 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
- at "0" to "1", min.	6 µs; for parameterization "none"
- at "1" to "0", min.	6 µs; for parameterization "none"
for counter/technological functions	
- parameterizable	Yes
Cable length	
• shielded, max.	1 000 m
• unshielded, max.	600 m
Digital outputs	
Type of digital output	Transistor
Number of digital outputs	2
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes; electronic/thermal
Limitation of inductive shutdown voltage to	L+ (-33 V)
Controlling a digital input	Yes
Digital output functions, parameterizable	
• Switching tripped by comparison values	Yes
• Freely usable digital output	Yes
Switching capacity of the outputs	
• with resistive load, max.	0.5 A; Per digital output
• on lamp load, max.	5 W

SIPLUS extreme RAIL technology modules > SIPLUS extreme RAIL TM COUNT 1X24 V T1 counter module

Article number	6AG2138-6AA00-1BA0 SIPLUS ET 200SP TM COUNT 1X24V T1 RAIL
Load resistance range	
• lower limit	48 Ω
• upper limit	12 kΩ
Output voltage	
• for signal "1", min.	23.2 V; L+ (-0.8 V)
Output current	
• for signal "1" rated value	0.5 A; Per digital output
• for signal "0" residual current, max.	0.5 mA
Output delay with resistive load	
• "0" to "1", max.	50 μs
• "1" to "0", max.	50 μs
Switching frequency	
• with resistive load, max.	10 kHz
• with inductive load, max.	0.5 Hz; Acc. to IEC 60947-5-1, DC-13; observe derating curve
• on lamp load, max.	10 Hz
Total current of the outputs	
• Current per module, max.	1 A
Cable length	
• shielded, max.	1 000 m
• unshielded, max.	600 m
Encoder	
Connectable encoders	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
Encoder signals, incremental encoder (asymmetrical)	
• Input voltage	24 V
• Input frequency, max.	200 kHz
• Counting frequency, max.	800 kHz; with quadruple evaluation
• Cable length, shielded, max.	600 m; depending on input frequency, encoder and cable quality; max. 50 m at 200 kHz
• Signal filter, parameterizable	Yes
• Incremental encoder with A/B tracks, 90° phase offset	Yes
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes
• Pulse encoder	Yes
• Pulse encoder with direction	Yes
• Pulse encoder with one impulse signal per count direction	Yes
Encoder signal 24 V	
- permissible voltage at input, min.	-30 V
- permissible voltage at input, max.	30 V
Interface types	
• Source/sink input	Yes
• Input characteristic curve in accordance with IEC 61131, type 3	Yes
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	Yes

Article number	6AG2138-6AA00-1BA0 SIPLUS ET 200SP TM COUNT 1X24V T1 RAIL
Interrupts/diagnostics/status information	
Substitute values connectable	Yes; Parameterizable
Alarms	
• Diagnostic alarm	Yes
• Hardware interrupt	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
• Short-circuit	Yes
• A/B transition error at incremental encoder	Yes
• Group error	Yes
Diagnostics indication LED	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• for module diagnostics	Yes; green/red DIAG LED
• Status indicator backward counting (green)	Yes
• Status indicator forward counting (green)	Yes
Integrated Functions	
Number of counters	1
Counting frequency (counter) max.	800 kHz; with quadruple evaluation
Counting functions	
• Can be used with TO High_Speed_Counter	Yes
• Continuous counting	Yes
• Counter response parameterizable	Yes
• Hardware gate via digital input	Yes
• Software gate	Yes
• Event-controlled stop	Yes
• Synchronization via digital input	Yes
• Counting range, parameterizable	Yes
Comparator	
- Number of comparators	2
- Direction dependency	Yes
- Can be changed from user program	Yes
Position detection	
• Incremental acquisition	Yes
• Suitable for S7-1500 Motion Control	Yes
Measuring functions	
• Measuring time, parameterizable	Yes
• Dynamic measurement period adjustment	Yes
• Number of thresholds, parameterizable	2
Measuring range	
- Frequency measurement, min.	0.04 Hz
- Frequency measurement, max.	800 kHz
- Cycle duration measurement, min.	1.25 μs
- Cycle duration measurement, max.	25 s
Accuracy	
- Frequency measurement	100 ppm; depending on measuring interval and signal evaluation
- Cycle duration measurement	100 ppm; depending on measuring interval and signal evaluation
- Velocity measurement	100 ppm; depending on measuring interval and signal evaluation

Overview

- 2-channel pulse output module for SIPLUS ET 200SP
- Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic
- Operating modes:
 - Single pulse with defined length
 - Pulse chain with defined number of pulses
 - Pulse width modulation (with flexible ON period, optional current control and dither function)
 - PWM signal for controlling a DC motor
 - On and OFF delay; rising and falling edge can be delayed separately to the microsecond
 - Frequency output with defined output frequency

- Hardware:
 - 2 24V channels, 2A output current can be switched in parallel to boost performance to 4A of output current
 - Switching frequencies to 10 kHz; at reduced output current to 0.1 A up to 100 kHz
 - Push/pull output driver for especially steep edges at the outputs
 - Polarity change in DC motor operation for direction reversal
 - 1 high-speed 24 V digital input per channel with parameterizable input delay from 4 μ s
- Channel functions:
 - HW enable; Start of signal output with the onboard digital input
 - Parameterizable ON delay; for precise deceleration between the HW enable and the start of output
 - Current measurement in the operating modes pulse-width modulation and pulse chain; enables control of the output current mean value over a period. Temperature influences can thus be balanced to the resistance of the actuator.
 - Cyclic control of the respective main setpoint from the PLC in every operating mode; other values can be modified flexibly from the user program.
- Supported system functions:
 - Isochronous mode; enables precision-timed connection of the setpoint output to a higher-level controller
 - Firmware update
 - Identification data I&M

Technical specifications

Article number	6AG2138-6DB00-1BB1
	SIPLUS ET 200SP TM PULSE 2x24V T1 RAIL
General information	
Product type designation	TM Pulse 2x24 V
Product function	
• I&M data	Yes; I&M 0
• Isochronous mode	Yes
Supply voltage	
Load voltage L+	
• Rated value (DC)	24 V
• Short-circuit protection	Yes
• Reverse polarity protection	Yes; against destruction
Encoder supply	
Number of outputs	2; A common 24V encoder supply for both channels
24 V encoder supply	
• 24 V	Yes; L+ (-0.8 V)
• Short-circuit protection	Yes; per module, electronic
• Output current, max.	300 mA
Digital inputs	
Number of digital inputs	2; 1 per channel
Digital inputs, parameterizable	Yes
Input characteristic curve in accordance with IEC 61131, type 3	Yes
Digital input functions, parameterizable	
• Freely usable digital input	Yes
• HW enable for digital output	Yes

Article number	6AG2138-6DB00-1BB1
	SIPLUS ET 200SP TM PULSE 2x24V T1 RAIL
Input voltage	
• Type of input voltage	DC
• Rated value (DC)	24 V
• for signal "0"	-30 to +5V
• for signal "1"	+11 to +30V
• permissible voltage at input, min.	-30 V
• permissible voltage at input, max.	30 V
Input current	
• for signal "1", typ.	2.5 mA
Input delay (for rated value of input voltage)	
for standard inputs	
- parameterizable	Yes; none / 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
- at "0" to "1", min.	4 μ s; for parameterization "none"
- at "1" to "0", min.	4 μ s; for parameterization "none"
Digital outputs	
Type of digital output	P- and M-switching
Number of digital outputs	2; 1 per channel
Current-sinking	Yes
Current-sourcing	Yes
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes; electronic/thermal
Limitation of inductive shutdown voltage to	-0.8 V
Controlling a digital input	Yes

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL technology modules > SIPLUS ET 200SP TM Pulse 2x24 V T1 RAIL pulse output module

Article number	6AG2138-6DB00-1BB1 SIPLUS ET 200SP TM PULSE 2x24V T1 RAIL
Digital output functions, parameterizable	
• Freely usable digital output	Yes
• PWM output	Yes
- Number, max.	2; 1 per channel
- Cycle duration, parameterizable	Yes; Max. 85 s
• Connection of a proportional valve	Yes
• Dithering	Yes
• Current measurement	Yes
• Current control	Yes
• Connection of a DC motor	Yes
• ON-delay	Yes
• OFF-delay	Yes
• Frequency output	Yes
• Pulse train	Yes
• Pulse output	Yes
Switching capacity of the outputs	
• with resistive load, max.	2 A
• on lamp load, max.	10 W; 1 W with High Speed output
Load resistance range	
• lower limit	12 Ω; 240 ohm with High Speed output
• upper limit	12 kΩ
Output voltage	
• Type of output voltage	DC
• for signal "0", max.	1 V
• for signal "1", min.	23.2 V; L+ (-0.8 V)
Output current	
• for signal "1" rated value	2 A; 0.1 A with High Speed output, observe derating
Output delay with resistive load	
• "0" to "1", typ.	0 μs; With High Speed output, 4.5 μs with Standard output
• "0" to "1", max.	0.8 μs; With High Speed output, 9 μs with Standard output
• "1" to "0", typ.	0 μs; With High Speed output, 4.5 μs with Standard output
• "1" to "0", max.	0.8 μs; With High Speed output, 9 μs with Standard output
Parallel switching of two outputs	
• for uprating	Yes
Switching frequency	
• with resistive load, max.	100 kHz; With High Speed output, 10 kHz with standard output
• with inductive load, max.	100 kHz; With High Speed output, 10 kHz with standard output
• on lamp load, max.	10 Hz
Total current of the outputs	
• Current per channel, max.	2 A
• Current per group, max.	4 A
• Current per module, max.	4 A
Isochronous mode	
Isochronous operation (application synchronized up to terminal)	Yes
Bus cycle time (TDP), min.	250 μs; with 1 channel configuration, 375 μs with 2 channel configuration

Article number	6AG2138-6DB00-1BB1 SIPLUS ET 200SP TM PULSE 2x24V T1 RAIL
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Substitute values connectable	Yes; Parameterizable
Alarms	
• Diagnostic alarm	Yes
Diagnostic messages	
• Monitoring the supply voltage	Yes
• Short-circuit	Yes
Diagnostics indication LED	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes
• for module diagnostics	Yes; green/red DIAG LED
Potential separation	
Potential separation channels	
• between the channels	No
• between the channels and backplane bus	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class T1, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-40 °C; = Tmin; Startup @ -25 °C
• horizontal installation, max.	60 °C; = Tmax; +70 °C for 10 min (T1 acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)

Selection and ordering data

SIPLUS ET 200SP TM Pulse 2x24 V T1 RAIL pulse output module	6AG2138-6DB00-1BB1
Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic	
PWM and pulse output, 2 channels 2 A for proportional valves and DC motors; For areas with extreme exposure to environmental substances (conformal coating); ambient temperature -25 ... +55 °C (+70 °C for 10 min.)	
Accessories	
Suitable SIPLUS extreme RAIL BaseUnits, type B1	
SIPLUS ET 200SP BU20-P12+A0+4B TX RAIL	6AG2193-6BP20-4BB1
Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic	
BU type B1; BaseUnit (dark) with 12 process terminals to the module; for continuing the load group; 1 unit	

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL communication > SIPLUS extreme RAIL CM PtP T1 serial interface**Overview**

- CM PtP communication module; module for serial communication connections with RS232 and RS422 interfaces. RS485 for the Freepoint, 3964(R), Modbus RTU, and USS protocols, max. 115.2 kbit/s, 2 KB frame length, 4 KB receive buffer.

- Protocols supported
 - Freepoint: User-parameterizable frame format for universal communication
 - 3964(R) for improved transmission reliability
 - Modbus RTU master (requires instructions in SIMATIC S7)
 - Modbus RTU slave (requires instructions in SIMATIC S7)
 - USS, implemented through instructions
- Interface properties
 - RS232 with auxiliary signals
 - RS422 for full-duplex connections
 - RS485 for half-duplex and multi-point connections
 - Transmission rates from 300 to 115200 bit/s
- Can be plugged into Type A0 BaseUnits (BU) with automatic coding
- LED display for errors, operation, and supply voltage
- Communication display for sending and receiving
- Clear labeling on front of module
 - Plain text identification of the module type and function class
 - 2D matrix code (order and serial number)
 - Connection diagram
 - Color coding of the CM module type: Silver
 - Hardware and firmware version
 - Complete Article No.
- Optional labeling accessories
 - Labeling strips
 - Reference identification label
- Optional system-integrated shield connection

Technical specifications

Article number	6AG2137-6AA00-1BA0 SIPLUS ET 200SP CM PTP T1 RAIL
General information	
Product type designation	CM PtP
Product function	
• I&M data	Yes; I&M0 to I&M3
Supply voltage	
Rated value (DC)	24 V
Reverse polarity protection	Yes
1. Interface	
Interface types	
• RS 485	Yes
• RS 422	Yes
• RS 232	Yes
RS 232	
• Transmission rate, max.	115.2 kbit/s
• Cable length, max.	15 m
• RS 232 auxiliary signals	RTS, CTS, DTR, DSR, RI, DCD
RS 485	
• Transmission rate, max.	115.2 kbit/s
• Cable length, max.	1 200 m
RS 422	
• Transmission rate, max.	115.2 kbit/s
• Cable length, max.	1 200 m
• 4-wire full duplex connection	Yes
• 4-wire multipoint connection	Yes
Integrated protocols	
Freepoint	
- Telegram length, max.	2 kbyte
- Bits per character	7 or 8
- Number of stop bits	1 or 2 bit
- Parity	None, even, odd, always 1, always 0, any

Article number	6AG2137-6AA00-1BA0 SIPLUS ET 200SP CM PTP T1 RAIL
3964 (R)	
- Telegram length, max.	2 kbyte
- Bits per character	7 or 8
- Number of stop bits	1 or 2 bit
- Parity	None, even, odd, always 1, always 0, any
Modbus RTU master	
- Address area	1 to 247, extended 1 to 65535
- Number of slaves, max.	32
MODBUS RTU slave	
- Address area	1 to 247, extended 1 to 65535
Telegram buffer	
• Buffer memory for telegrams	4 kbyte
• Number of telegrams which can be buffered	255
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Alarms	
• Diagnostic alarm	Yes
• Hardware interrupt	No
Diagnostic messages	
• Wire-break	Yes
Diagnostics indication LED	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• for module diagnostics	Yes; green/red DIAG LED
• Receive RxD	Yes; Green LED
• Transmit TxD	Yes; Green LED
Potential separation	
between backplane bus and interface	Yes

Overview

- SIPLUS ET 200SP CM 4XIO-LINK ST T1 RAIL communication module:
Serial communication module for connecting up to 4 IO-Link devices in accordance with IO-Link specification V1.0 and V1.1. The IO-Link parameters are configured using the Port Configuration Tool (PCT), version V3.0 and higher.
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- Time-based IO
Time-based IO ensures that signals are output with a precisely defined response time. By combining inputs and outputs, for example, passing products can be accurately measured or fluids dosed in precise quantities.
- Supported data transfer rates
 - COM1 (4.8 kbps)
 - COM2 (38.4 kbps)
 - COM3 (230.4 kbps)

- Expansion limits
 - Length of cable: Max. 20 m
 - Max. 32 bytes of input and output data per port
 - Max. 144 bytes of input data and 128 bytes of output data per module
- Supported ET 200SP system functions
 - Replacement without PG with automatic backup without the engineering tool of the IO Link Device Parameter (V1.1 devices only) and the IO-Link master parameters by means of redundant saving of parameters on the e-coding element
 - Re-parameterization during operation
 - Identification data I&M
 - Firmware update
 - PROFlenergy
- Can be plugged into Type A0 BaseUnits (BU) with automatic e-coding
- LED indicators
 - DIAG: Operating state indicator (green/red) of the module
 - C1..C4: Port status indicator (green) for Port 1, 2, 3 and 4
 - Q1..Q4: Channel status indicator (green) for Port 1, 2, 3 and 4
 - F1..F4: Port fault indicator (red) for Port 1, 2, 3 and 4
 - PWR: Supply voltage indicator (green)
- Clear labeling on front of module
 - Plain text identification of the module type and function class
 - 2D matrix code (order and serial number)
 - Connection diagram
 - Color-coding of the module class CM: Silver
 - Hardware and firmware version
 - Complete Article No.
- Optional accessories
 - Labeling strips
 - Reference identification label
 - Color-coding plate with color code CC04
- Optional system-integrated shield connection

Article number	6AG2137-6BD00-1BA0 SIPLUS ET 200SP CM 4XIO-LINK ST T1 RAIL
General information	
Product type designation	CM 4 x IO-Link ST
Product function	
• I&M data	Yes
Supply voltage	
Rated value (DC)	24 V
Reverse polarity protection	Yes
Encoder supply	
Number of outputs	4
Output current	
• Rated value	200 mA
IO-Link	
Number of ports	4
• of which simultaneously controllable	4
IO-Link protocol 1.0	Yes
IO-Link protocol 1.1	Yes
Transmission rate	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230.4 kBaud (COM3)
Cycle time, min.	2 ms; dynamic, depending on user data length
Size of process data, input per port	32 byte; max.
Size of process data, input per module	32 byte; max.
Size of process data, output per port	32 byte; max.
Size of process data, output per module	32 byte; max.
Memory size for device parameter	2 kbyte; for each port
Cable length unshielded, max.	20 m; max.
Operating modes	
• IO-Link	Yes
• DI	Yes
• DQ	Yes; max. 100 mA
Time Based IO	
- TIO IO-Link IN	Yes
- TIO IO-Link OUT	Yes
- TIO IO-Link IN/OUT	Yes
- TIO Jitter	36 µs; typically ±
Connection of IO-Link devices	
• Port type A	Yes
• Port type B	Yes; 24 V DC via external terminal
Isochronous mode	
Equidistance	Yes
Interrupts/diagnostics/status information	
Diagnostics function	Yes
Alarms	
• Diagnostic alarm	Yes; The port diagnosis is available in the IO-Link mode only.
Diagnostic messages	
• Monitoring the supply voltage	Yes
Diagnostics indication LED	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; one green LED for channel status Qn (SIO mode) and port status Cn (IO-Link mode) per channel
• for channel diagnostics	Yes; red Fn LED
• for module diagnostics	Yes; green/red DIAG LED

Article number	6AG2137-6BD00-1BA0 SIPLUS ET 200SP CM 4XIO-LINK ST T1 RAIL
Potential separation	
Potential separation channels	
• between the channels	No
• between the channels and backplane bus	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates	
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class T1, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-40 °C; = Tmin; Startup @ -25 °C
• horizontal installation, max.	60 °C; = Tmax; +70 °C for 10 min (T1 acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL I/O modules

SIPLUS extreme RAIL failsafe I/O modules > SIPLUS extreme RAIL digital F input modules

Overview

Digital fail-safe input module:
SIPLUS ET 200SP F-DI 4/8X24VDC RAIL for BU type A0,
color code CC01

Other properties:

- 8-channel digital fail-safe input module for SIPLUS extreme ET 200SP RAIL
- Approved in accordance with railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

- For fail-safe reading of sensor information (1 or 2 channels)
- Provides integral discrepancy evaluation for 2-out-of-2 signals
- 8 internal sensor supplies (incl. test function) onboard
- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Can be plugged into type A0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
 - Plain text identification of the module type and function class
 - 2D matrix code (order and serial number)
 - Connection diagram
 - Color coding of the DI module type: White
 - Hardware and firmware version
 - CC color code for module-specific color coding of the potentials at the terminals of the BU
 - Complete Article No.
- Optional labeling accessories
 - Labeling strips
 - Reference identification label
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. They can be used with all fail-safe SIMATIC S7 CPUs

Technical specifications

Article number	6AG2136-6BA00-1CA0 SIPLUS ET 200SP F-DI 4/8X24VDC RAIL
General information	
Product type designation	F-DI 8x24VDC HF
Product function	
• I&M data	Yes; I&M0 to I&M3
Supply voltage	
Type of supply voltage	24 V DC
Rated value (DC)	24 V
Reverse polarity protection	Yes
Encoder supply	
Number of outputs	8
Short-circuit protection	Yes; Electronic (response threshold 0.7 A to 1.8 A)
Output current	
• up to 60 °C, max.	0.3 A
24 V encoder supply	
• 24 V	Yes; min. L+ (-1.5 V)
• Short-circuit protection	Yes
• Output current, max.	800 mA; Total current of all encoders
Digital inputs	
Number of digital inputs	8
Source/sink input	Yes; P-reading
Input characteristic curve in accordance with IEC 61131, type 1	Yes
Input voltage	
• Type of input voltage	DC
• Rated value (DC)	24 V
• for signal "0"	-30 to +5V
• for signal "1"	+15 to +30V

Article number	6AG2136-6BA00-1CA0 SIPLUS ET 200SP F-DI 4/8X24VDC RAIL
Input current	
• for signal "1", typ.	3.7 mA
Input delay (for rated value of input voltage)	
for standard inputs	
- parameterizable	Yes
for counter/technological functions	
- parameterizable	No
Cable length	
• shielded, max.	1 000 m
• unshielded, max.	500 m
Interrupts/diagnostics/status information	
Diagnostics function	Yes, "Alarms/diagnostic messages" section in the manual
Alarms	
• Diagnostic alarm	Yes
• Hardware interrupt	No
Diagnostics indication LED	
• RUN LED	Yes; Green LED
• ERROR LED	Yes; Red LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; Green LED
• for channel diagnostics	Yes; Red LED
• for module diagnostics	Yes; green/red DIAG LED

Potential separation	
Potential separation channels	
• between the channels and backplane bus	Yes
Isolation	
Isolation tested with	707 V DC (type test) and according to EN 50155 (routine test)
Standards, approvals, certificates	
Suitable for safety functions	Yes
Railway application	
• EN 50121-3-2	Yes; EMC for rail vehicles
• EN 50121-4	Yes; EMC for signal and telecommunications systems
• EN 50124-1	Yes; Railway applications - overvoltage category OV2; pollution degree PD2; rated surge voltage UNi = 0.5 kV; UNm = 24 V DC
• EN 50125-1	Yes; Rail vehicles - see ambient conditions
• EN 50125-2	Yes; Stationary electrical equipment - see ambient conditions
• EN 50125-3	Yes; Signal and telecommunications systems - see ambient conditions; vibrations and shocks: Application point outside of tracks (1 m to 3 m away from track)
• EN 50155	Yes; Rail vehicles - temperature class T1, horizontal mounting position, salt spray Class ST2
• EN 61373	Yes; Rail vehicles - vibrations and shocks: Category 1 Class A/B
• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Highest safety class achievable in safety mode	
• Performance level according to ISO 13849-1	PLe
• SIL acc. to IEC 61508	SIL 3
• SIL in accordance with EN 50126, 50128, 50129	SIL 2; a higher safety integrity level is possible if tested and approved for the specific application under consideration of all local regulations.
Probability of failure (for service life of 20 years and repair time of 100 hours)	
- Low demand mode: PFDavg in accordance with SIL3	< 2.00E-05 1/h
- High demand/continuous mode: PFH in accordance with SIL3	< 1.00E-09 1/h

Article number	6AG2136-6BA00-1CA0 SIPLUS ET 200SP F-DI 4/8X24VDC RAIL
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-25 °C; = Tmin
• horizontal installation, max.	60 °C; = Tmax; +70 °C for 10 min (T1 acc. to EN 50155)
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes
Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
Use on land craft, rail vehicles and special-purpose vehicles	
- to biologically active substances according to EN 60721-3-5	Yes; Class 5B2 mold, fungus and dry rot spores (with the exception of fauna); Class 5B3 on request
- to chemically active substances according to EN 60721-3-5	Yes; Class 5C3 (RH < 75 %) incl. salt spray acc. to EN 50155 (ST2); *
- to mechanically active substances according to EN 60721-3-5	Yes; Class 5S3 incl. sand, dust; *
from supply voltage 1L+	
- Note regarding classification of environmental conditions acc. to EN 60721	* The supplied plug covers must remain in place over the unused interfaces during operation!
Dimensions

Overview

Digital fail-safe output module:
SIPLUS ET 200SP F-DQ 4x24VDC High Feature RAIL,
BU type A0, color code CC01

Other properties:

- 4-channel digital fail-safe output module for SIPLUS extreme ET 200SP RAIL
- Approved in accordance with EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

- Fail-safe 2-channel activation (sink/source output) by actuators
- Actuators can be controlled up to 2 A
- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Can be plugged into type A0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
 - Plain text identification of the module type and function class
 - 2D matrix code (order and serial number)
 - Connection diagram
 - Color coding of the DI module type: White
 - Hardware and firmware version
 - CC color code for module-specific color coding of the potentials at the terminals of the BU
 - Complete Article No.
- Optional labeling accessories
 - Labeling strips
 - Reference identification label
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations
- They can be used with all fail-safe SIMATIC S7 CPUs

Technical specifications

Article number	6AG2136-6DB00-1CA0 SIPLUS ET 200SP F-DQ 4X24VDC/2A PM RAIL
General information	
Product type designation	F-DQ 4x24VDC HF
Product function	
• I&M data	Yes; I&M0 to I&M3
Supply voltage	
Type of supply voltage	24 V DC
Rated value (DC)	24 V
Reverse polarity protection	Yes
Digital outputs	
Number of digital outputs	4
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes
Open-circuit detection	Yes
Overload protection	Yes
Limitation of inductive shutdown voltage to	typ. 2*47V
Switching capacity of the outputs	
• with resistive load, max.	2 A
• on lamp load, max.	10 W
Load resistance range	
• lower limit	12 Ω
• upper limit	2 000 Ω
Output voltage	
• Type of output voltage	DC
• for signal "1", min.	24 V; L+ (-0.5 V)
Output current	
• for signal "1" rated value	2 A
• for signal "0" residual current, max.	0.5 mA

Article number	6AG2136-6DB00-1CA0 SIPLUS ET 200SP F-DQ 4X24VDC/2A PM RAIL
Switching frequency	
• with resistive load, max.	30 Hz; Symmetrical
• with inductive load, max.	0.1 Hz; according to IEC 60947-5-1, DC-13, symmetrical
• on lamp load, max.	10 Hz; Symmetrical
Total current of the outputs	
• Current per channel, max.	2 A; Note derating data in the manual
• Current per module, max.	6 A; Note derating data in the manual
Cable length	
• shielded, max.	1 000 m
• unshielded, max.	500 m
Interrupts/diagnostics/status information	
Diagnostics function	Yes, "Alarms/diagnostic messages" section in the manual
Substitute values connectable	No
Alarms	
• Diagnostic alarm	Yes
Diagnostics indication LED	
• RUN LED	Yes; Green LED
• ERROR LED	Yes; Red LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; Green LED
• for channel diagnostics	Yes; Red LED
• for module diagnostics	Yes; green/red DIAG LED

SIPLUS RAIL and SIDOOR

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL BaseUnits

Overview

With the BaseUnits (BUs), the SIPLUS extreme RAIL ET 200SP offers a rugged and service-friendly design with permanent wiring:

- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- No tools needed for one-handed wiring using push-in terminals
- Actuation of the spring NC contacts with a standard screwdriver, with a blade width up to 3.5 mm
- Outstanding access due to arrangement of measuring tap, spring NC contacts and cable entry in columns, while at the same time reducing the space required by 64%
- Fault-proof color coding of the spring NC contacts for better orientation in the terminal panel
- Replacement of I/O modules during operation without affecting the wiring
- Operation with module gaps (gaps without I/O module)
- Automatic coding of the I/O modules prevents destruction of the electronics if a module is accidentally inserted in the wrong slot during replacement
- High EMC interference immunity:
 - Self-assembling shielded backplane bus
 - multi-layer conductor plate with shield levels for interference-free signal transmission from the terminal to the I/O module,
 - System-integrated, space-saving shield connection for quick installation
- Self-assembling potential groups without external wiring or jumpers
- Replaceable terminal box
- Side-by-side latching of the BUs for high mechanical and EMC loads
- Optional module-specific color identification of the terminals according to the color code CC
- Optional equipment marking using slide-in equipment labeling plates

SIPLUS ET 200SP RAIL

SIPLUS extreme RAIL BusAdapter

Overview

BusAdapters (BA) are available for the SIPLUS extreme RAIL ET 200SP:

- SIPLUS extreme RAIL BusAdapter for the free selection of the connection system (pluggable or direct connection) of PROFINET to devices with a SIPLUS extreme RAIL BusAdapter interface. Another benefit of the SIPLUS extreme RAIL BusAdapter: only the adapter needs to be replaced for subsequent conversion to the rugged FastConnect technology or to repair defective RJ45 sockets.

SIPLUS ET 200MP RAIL

SIPLUS extreme RAIL interface modules

SIPLUS ET 200MP IM 155-5 PN ST TX RAIL**Overview**

- Interface modules for linking the ET 200MP to PROFINET
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- They handle data exchange with the PROFINET IO Controller in the PLC
- Integrated 2-port switch for line topology
- Max. 30 I/O modules
- Shortest bus cycle 250 µs

- Linking to the isochronous task of the CPU
- Prioritized fast startup (FSU) with 500 ms (max. 12 I/O modules)
- Media Redundancy Protocol (MRP)
- Shared device on up to 2 I/O controllers (when configuring using GSD file; depends on the respective configuration tool)
- Omission of SIMATIC memory card (SMC); IM replacement without PG using LLDP
- Operation of F-modules and PROFI-safe

As of firmware version 2.0.0, the SIPLUS ET 200MP interface module IM 155-5 PN ST TX RAIL offers the following new functions:

- Submodule-granular shared device with up to two IO controllers
- Configuration control (option handling)
- Module shared input and module shared output (MSI/MSO), i.e. the inputs or outputs of a module can be made available simultaneously to up to two IO controllers

SIPLUS ET 200MP interface module IM155-5 PN HF T1 RAIL features the following additional functions:

- Shared device on up to 4 IO controllers
- Module internal shared input and module shared output (MSI/MSO) on up to four IO controllers
- Operation on a high-availability SIMATIC S7-400H
- Support for the MRPD function (media redundancy with planned duplication)

SIPLUS extreme RAIL gateways

SIPLUS NET PN/PN Coupler T1 RAIL

Overview

- Maximum data exchange of 256-bytes input data and 256-bytes output data between two PROFINET networks
- Maximum of 16 input/output ranges for the exchange of data
- Electrical isolation between the two PROFINET IO subnets
- Redundant power supply
- Supported Ethernet services
 - ping
 - arp
 - Network diagnostics (SNMP/MIB-2)
- Diagnostic interrupts
- ReturnOfSubmodule interrupts

Technical specifications

Article number	6AG2158-3AD01-1XA0 SIPLUS NET PN/PN COUPLER T1 RAIL
Installation type/mounting	
Mounting	Mounting rail 7.5 mm and 15 mm
Supply voltage	
Rated value (DC)	24 V
permissible range, lower limit (DC)	20.4 V
permissible range, upper limit (DC)	28.8 V
Reverse polarity protection	Yes
Mains buffering	
• Mains/voltage failure stored energy time	20 ms
Input current	
from supply voltage 1L+, max.	400 mA
Power loss	
Power loss, typ.	6 W
Interfaces	
PROFINET IO	
• automatic detection of transmission rate	Yes
• Transmission rate, max.	100 Mbit/s
• Number of RJ45 ports	4; 2 for each side
Protocols	
Supports protocol for PROFINET IO	Yes
Protocols (Ethernet)	
• SNMP	Yes
• ping	Yes
• ARP	Yes

SIPLUS extreme RAIL gateways

SIPLUS PN/CAN LINK TX RAIL

Overview

- For data exchange between PROFINET and CAN Bus 2.0A/B or CANopen Manager or Slave (according to CiA 301 & 302)
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- CANopen features:
 - Node / lifeguarding
 - Heartbeat
 - SYNC (producer / consumer)
- Integrated in TIA via HSP, TIA Portal V14 or higher
- PROFINET switch and 9-pin D-sub plug integrated for CAN
- Up to 126 CAN nodes
- 512 receiver/transmitter PDOs
- Electrical isolation between the two networks
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

Technical specifications

Article number	6AG2620-0AA00-4AA0 SIPLUS PN/CAN LINK TX RAIL
General information	
Product type designation	PN/CAN LINK
Firmware version	
• FW update possible	Yes
Vendor identification (VendorID)	ID 09 00 00 53h acc. to CiA
Installation type/mounting	
Mounting	DIN rail, wall mounting, portrait mounting
Mounting position	Any
Recommended mounting position	Horizontal
Supply voltage	
Type of supply voltage	24 V DC
Rated value (DC)	24 V
permissible range, lower limit (DC)	20.4 V
permissible range, upper limit (DC)	28.8 V
Reverse polarity protection	Yes
Overvoltage protection	Yes
Short-circuit protection	Yes
Mains buffering	
• Mains/voltage failure stored energy time	10 ms
Input current	
Current consumption (rated value)	0.09 A
Current consumption, max.	0.11 A
Power loss	
Power loss, typ.	2.2 W
Interfaces	
Interfaces/bus type	2x Ethernet (RJ45), 1x Sub-D (9-pin)
Supports protocol for PROFINET IO	
• automatic detection of transmission rate	No
• Transmission rate, max.	100 Mbit/s
• Number of RJ45 ports	2
• Number of FC (FastConnect) connections	2
PROFINET functions	
• Assignment of the IP address, supported	Yes
• Assignment of the device name, supported	Yes

Article number	6AG2620-0AA00-4AA0 SIPLUS PN/CAN LINK TX RAIL
CAN	
• CAN operating modes	CAN Standard CAN 2.0A/B; CANopen Manager / Slave acc. to CiA
• Specification acc. to CiA	CiA 301 & CiA 302
• Transmission rate, min.	50 kbit/s
• Transmission rate, max.	1 000 kbit/s
• Number of slaves, max.	126
• Number of SDOs in parallel	16; Parallel
• Number of PDOs	512; Send / receive
Services	
- Node/life-guarding	Yes
- Heartbeat	Yes
- SYNC	Yes
1. Interface	
Interface type	CAN according to CiA 303-1
Physics	9-pin sub D socket
Isolated	Yes; 500 V AC or 707 V DC
Interface types	
• Number of ports	1
2. Interface	
Interface type	PROFINET
Physics	Ethernet, 2-port switch, 2*RJ45
Isolated	Yes; 1 500 V AC or 2 250 V DC
Interface types	
• Number of ports	2
• integrated switch	Yes
Protocols	
• PROFINET IO Device	Yes
Interrupts/diagnostics/status information	
Status indicator	Yes
Alarms	Yes
Diagnostic functions	Yes
Diagnostics indication LED	
• RUN LED	Yes
• ERROR LED	Yes
• MAINT LED	Yes
• LINK LED	Yes
• RX/TX LED	Yes

• Fire protection acc. to EN 45545-2	Yes; Rail vehicles - verification on request
Ambient conditions	
Ambient temperature during operation	
• horizontal installation, min.	-40 °C; = Tmin
• horizontal installation, max.	70 °C; = Tmax; +85 °C for 10 min (Tx acc. to EN 50155)
Ambient temperature during storage/transportation	
• min.	-40 °C
• max.	85 °C
Altitude during operation relating to sea level	
• Installation altitude above sea level, max.	2 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 140 hPa ... 795 hPa (-1 000 m ... +2 000 m)

Article number	6AG2620-0AA00-4AA0 SIPLUS PN/CAN LINK TX RAIL
Relative humidity	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; incl. condensation / frost permitted (no commissioning under condensation conditions)
Resistance	
Coolants and lubricants	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
Use in stationary industrial systems	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust; *
Use on land craft, rail vehicles and special-purpose vehicles	
- to biologically active substances according to EN 60721-3-5	Yes; Class 5B2 mold, fungus and dry rot spores (with the exception of fauna); Class 5B3 on request
- to chemically active substances according to EN 60721-3-5	Yes; Class 5C3 (RH < 75 %) incl. salt spray acc. to EN 50155 (ST2); *
- to mechanically active substances according to EN 60721-3-5	Yes; Class 5S3 incl. sand, dust; *
Remark	
- Note regarding classification of environmental conditions acc. to EN 60721	* The supplied plug covers must remain in place over the unused interfaces during operation!

SIPLUS PN/CAN LINK TX RAIL

6AG2620-0AA00-4AA0

Approved in accordance with the EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 railway standards for use in rail traffic

PROFINET network transition according to CAN Bus 2.0A/B, CANopen Manager according to CiA301/302, CANopen Slave according to CiA301/302; IP20

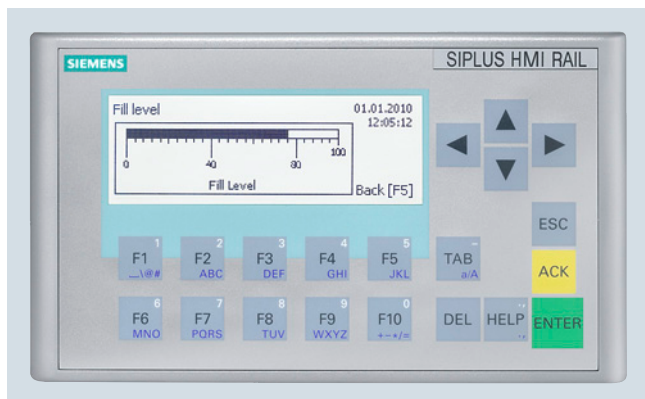

Ambient temperature -40 ... +70 °C (+85 °C for 10 min.)

SIPLUS RAIL and SIDOOR

SIPLUS extreme RAIL operator control and monitoring devices

SIPLUS extreme RAIL Basic Panels (1st Generation)

Overview

- Basic Panel 3.6 inches for operating and monitoring compact machines and systems
- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- Clear process representation through the use of full-graphic displays
- Intuitive operation via touch and tactile function keys
- Equipped with all the necessary basic functions such as reporting, recipe management, curve representation, vector graphics, and language selection
- Easy connection to the controller via integrated Ethernet interface

Technical specifications

Article number	6AG2647-0AH11-1AX0 SIPLUS HMI KP300 BASIC MONO 3,6" T1 RAIL
General information	
Product type designation	KP300 Basic mono PN
Display	
Design of display	FSTN
Screen diagonal	3.6 in
Number of colors	4; Backlit display only (white, red, green, yellow)
Resolution (pixels)	
• Horizontal image resolution	240 Pixel
• Vertical image resolution	80 Pixel
Backlighting	
• MTBF backlighting (at 25 °C)	50 000 h
• Backlight dimmable	No
Keyboard fonts	
• Function keys - Number of function keys	10
Touch operation	
• Design as touch screen	No
Installation type/mounting	
Mounting in portrait format possible	No
Supply voltage	
Type of supply voltage	DC
Rated value (DC)	24 V
Memory	
Memory available for user data	1 Mbyte
Type of output	
Acoustics	
• Buzzer	No
Time of day	
Clock

**SIPLUS HMI
KP300 Basic mono PN T1 RAIL**

Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic

Key operation; 3" FSTN LCD display, black and white, PROFINET interface

For areas with extreme exposure to environmental substances (conformal coating); ambient temperature -25 ... +55 °C (+70 °C for 10 min.)

Article No.**6AG2647-0AH11-1AX0**

Overview**SIPLUS HMI Comfort Panels Outdoor RAIL**

Special HMI Panels have been developed which are designed to withstand outdoor environments.

It's not only extreme temperatures which call for robust hardware. Direct sunlight, too, must not be allowed to impair display readability and the panel front must be protected from UV radiation. The specially-bonded Outdoor fronts and the rugged hardware of the Outdoor Panels make the SIMATIC HMI Comfort Panels Outdoor a reliable partner in this environment.

- Approved in accordance with the railway standards EN 50155, EN 15121, EN 50124, EN 50125 and EN 45545 for use in rail traffic
- For outdoor operation without additional measures
- 7" and 15" daylight-readable display, widescreen
- Automatic, central or manual dimming of the backlight, with integrated sensor

- Panel front 100% UV protected
- Front resistant to salt mist
- Front IP66 and Nema4 x (indoor/outdoor)
- Extended operating temperature range: from -30 °C to +60 °C at 3 000 m installation altitude
- TIA Portal central engineering tool (WinCC V13 SP1&HSP or higher)
- Comfort Panel functionality and performance

Notice:

The 7" Comfort Panel corresponds to a 7" Comfort Panel Standard, the 15" Comfort Panel Outdoor corresponds to a 12" Comfort Panel Standard in respect of performance, functionality and quantity structure.

Overview

The design and functionality of the SIMATIC PS 305 and 307 single-phase load power supplies (system and load current supply) with automatic range switchover of the input voltage are an optimal match for the SIMATIC S7-300 PLC. By means of the connecting comb that is supplied with the system and load current supply, the supply to the CPU is quickly established. It is also possible to provide a 24 V supply to other S7-300 system components, input/output circuits of the input/output modules and, if necessary, the sensors and actuators. Comprehensive certifications, such as UL, ATEX or GL facilitate universal use (does not apply to outdoor use).

Note

SIPLUS extreme products are based on Siemens standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme specific information was added.

Overview

SIDOOR ATE530S/531S wiring diagram

The SIDOOR ATE53xS door drive is an "intelligent" door drive which can be used for safety-oriented operation of platform screen doors (PSD) according to individual requirements. Siemens has once again shown just how easy integration can be with the innovative SIDOOR ATE53xS platform screen door drive in conjunction with SIDOOR MED280 or MEG251 motors. The PROFINET module integrated in the SIDOOR ATE53xS enables standardized, certified connection to PROFINET IO systems.

- Use of standard automation components
- Full integration into TIA Portal and STEP 7 thanks to PROFINET connection
- Parameter assignment and monitoring of door control parameters via the PROFINET interface (function blocks available as example applications in SIOS).
- Application example:
Synchronization of two-panel and independent platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal
<https://support.industry.siemens.com/cs/de/en/view/109480495>

- Application example:
Safety-oriented automation of platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal
<https://support.industry.siemens.com/cs/de/en/view/109477186>
- Read-in of two safe signals (two-channel, antivalent)
- High level of system safety thanks to safe torque off (e.g. self-release in the event of a fault)
- Firmware update for all SIDOOR controllers on an entire platform possible centrally via TCP/IP
- SIL 2 according to IEC 62061

SIDOOR automatic door controls
for railway applications

Controller > Control unit for gap filler

Overview

The SIDOOR ATE530G drive control is designed for controlling gap fillers between external train doors and the platform edge. The gap filler facilitates easy access for passengers. The innovative SIDOOR ATE530G drive solution enables operation of a gap filler with adjustable speed, acceleration and motor currents. Depending on the application, a project-specific motor is used. In this case the firmware of the controller might be adapted to the specific project.

The SIDOOR ATE530G is activated by digital signals from a higher-level door control, and reports information about its current state via digital signals back to the door control.

The following drive functions are supported:

- System start-up after power failure
- "Extend", "Retract" command
- Gap filler is moved by a travel curve profile
- Obstruction detection
- Ice-breaker function
Icing can be shifted broken by repeated extension and retraction of the gap filler with increased force.
- Reversing at the platform edge

The SIDOOR ATE530G control unit fulfills Basic Integrity in accordance with EN 50657:2017

SIDOOR ATD400T interior railway door drive

The SIDOOR ATD400T interior railway door drive is an "intelligent" door drive which enables gangway doors to be opened and closed at adjustable speeds and accelerations.

- Relay module design
- For dynamic door weights up to 180 kg
- Automatic door weight detection
- Operating temperature -20 to +70 °C ¹⁾
- Flexible motor management (two different motor types), automatic detection
- Opening width 0.25 to 4 m
- Door can be operated with and without closing springs (60 to 80 N)
- With two identical door leaves, can be used up to a train inclination of 0 to 10%
- Forces and energies are limited in accordance with EN 14752
- EMC according to EN 50121-3-2
- Fulfills HL3 according to fire protection standard EN 45545-2 (Railway applications – Fire protection on rail vehicles)
- Vandal-proof

¹⁾ Note:

- Maximum output current at 24 V DC:
 - 0.4 A at ≤ 55 °C ambient temperature during operation
 - 0.1 A from 55 °C to 70 °C ambient temperature during operation, with restrictions at operating temperatures > 55 °C
- Maximum ambient temperature during operation:
 - 55 °C
 - 70 °C with restrictions at operating temperatures > 55 °C
- Restrictions at operating temperatures > 55 °C:
 - Use the 24 V output voltage only for operating the control inputs (max. 0.1 A)
 - Use a sufficiently large (at least 350 x 350 mm), unpainted, metal mounting plate
 - The maximum drive parameters are restricted to the default values
 - If temperature class T3 according to EN 50155 is used, the maximum air temperature of 85 °C must not be exceeded near the printed-circuit board

SIDOOR automatic door controls for railway applications

Additional units > SIDOOR Software kit, SIDOOR Service tool

Overview SIDOOR Software kit

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD

which includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support (SIOS Service & Support Portal). For information on the availability and acquisition of more firmware, please contact Technical Support.

SIDOOR Software Kit	6FB1105-0AT01-6SW0
----------------------------	---------------------------

Overview SIDOOR Service tool

The Service Tool can be used to input run commands, change run parameters and read out learned parameters, door states, input/output signals and service data.

The Service Tool is connected to the various controllers by the respective cable.

- SIDOOR AT12, SIDOOR AT40 and SIDOOR ATD400V elevator door drives
- SIDOOR ATD400K cold room gate drive, SIDOOR ATD4xxW machine tool door drives
- SIDOOR ATD400S and SIDOOR ATE250S platform screen door drives

You do not need to open the cover of the controller to do this.

Note:

If the Service Tool is in the "Quick adjustment" or "Total adjustment" menu, the run commands of the controller are blocked via the command inputs.

SIPLUS RAIL and SIDOOR

SIDOOR automatic door controls
for railway applications

Geared motors

Overview

SIDOOR motors are speed controlled, taking set force and speed limits into account. The gear outlet direction is defined as left or right when viewing the gear unit from the front. Force transmission is via a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with two door clutch holders. This enables it to drive both single-side and centrally opening doors.

SIDOOR geared motors are available in two technological versions.

- 1. DC technology in version
(area of application: interior railway doors)
 - DC geared motor
 - SIDOOR geared motors are a combination of gear unit, motor, and encoder. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The variable speed drive unit comprises a speed-controlled DC motor with non-self-locking gearing.
- 2. EC technology in version
(area of application: platform screen doors)
 - EC direct drive
 - SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor. The EC direct drive can be fitted in various mounting orientations, facilitating reduced inventory management and minimizing assets.
 - EC geared motors
 - EC geared motors are electronically commutated DC motors with non-self-locking gearing and are speed-controlled. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. Due to the brushless drive technology, EC geared motors are subject to less abrasion compared with DC geared motors and thus have a longer service life. On account of the brushless drive technology, no commutation noises come from this motor, so it generates less noise than the DC geared motors.

Motors for interior railway door drives (for controllers ATD400T)

The following DC geared motors **are available for interior railway door drives**. They should be selected according to the dynamic door weight.

- SIDOOR MDG180 geared motors, compliance with fire protection standard EN 45545-2 (max. door weight 180 kg)
 - SIDOOR MDG180 L EN 45545-2 (pinion left) 6FB1103-0AT16-4MB0
 - SIDOOR MDG180 R EN 45545-2 (pinion right) 6FB1103-0AT15-4MB0
- SIDOOR M3 geared motors (max. door weight 180 kg)
 - SIDOOR M3 L (pinion left) 6FB1103-0AT10-4MB0
 - SIDOOR M3 R (pinion right) 6FB1103-0AT11-4MB0

Motors for platform screen door drives (for controllers ATE530S, ATE531S)

EC technology:

- SIDOOR MEG251 geared motors (max. door weight 250 kg)
 - SIDOOR MEG251 L (pinion left), 6FB1203-5AT00-7MP0
 - SIDOOR MEG251 R (pinion right), 6FB1203-5AT01-7MP0

Direct drives**Overview**

SIDOOR MED280 direct drive

SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor with non-self-locking gearing.

Direct drives are designed for certain maximum dynamic door weights and can control both drive directions.

- SIDOOR MED280 direct drive for dynamic door weights up to 280 kg (6FB1203-0AT12-7DA0)

SIDOOR MED280 direct drive	6FB1203-0AT12-7DA0
Motor for door control	

Overview

A comprehensive range of accessories is available for the SIDOOR systems. This is necessary to ensure low-noise operation of the door by the controller.

Accessories for SIDOOR DC and EC geared motors

Rubber-metal anti-vibration mount

To ensure low-noise door operation, the SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors (door weights up to 250 kg)
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 DC geared motors (door weights up to 400 kg)

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0

Mounting bracket

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors for flexible accommodation of the rubber-bonded metal.
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit, this enables the toothed belt to be set to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

Door clutch holder

The door clutch holder 6FB1104-0AT01-0CP0 serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.

The STS toothed belt is redirected via this deflector unit.

Deflector unit 6FB1104-0AT03-0AS0

STS toothed belt

The door system is moved between the end positions of the door using the STS toothed belt 6FB1104-0AT0.-0AB0. Two different toothed belt lengths are available.

Toothed belt 6FB1104-0AT01-0AB0, length 4 m

Toothed belt 6FB1104-0AT02-0AB0, length 45 m

Accessories

Overview (continued)

Accessories for the SIDOOR MED280 EC direct drive, for the controller for the SIDOOR ATE530S/ATE531S platform screen door drive

Motor holder

- Motor holder 6FB1104-0AT03-0AD0 for accommodation of the SIDOOR MED280 direct drive.

SIDOOR motor holder

Mounting bracket

- For mounting the SIDOOR motor holder 6FB1104-0AT01-0AS0
Identical to the mounting bracket 6FB1104-0AT01-0AS0 for DC geared motors.

Mounting bracket for geared motor

- With tensioning device for mounting the deflector unit and setting the toothed belt to the required tension (large) 6FB1104-0AT05-0AS4

SIDOOR mounting bracket, large

- With tensioning device for mounting the deflector unit and setting the toothed belt to the required tension (small) 6FB1104-0AT05-0AS5

SIDOOR mounting bracket, small

Door clutch holder

- For attaching both ends of the toothed belt and connecting the respective door panel to the toothed belt, width 20 mm, 6FB1104-0AT05-0AS1

SIDOOR door clutch holder

Deflector unit

- For attaching the SIDOOR toothed belt and fixing to the door 6FB1104-0AT07-0AS0

SIDOOR deflector unit

STD toothed belt

- As a connection between the door system and the end positions of the door, toothed belt width 20 mm. Length 4 m, 6FB1104-0AT05-0AB0

SIDOOR toothed belt, small

- Toothed belt width 20 mm. Length 45 m 6FB1104-0AT06-0AB1

SIDOOR toothed belt, large

Miniature Circuit Breakers

5SY Miniature Circuit Breakers

Introduction

Overview

MCBs are used to protect systems and installations in buildings and for industrial applications.

Used in industrial applications and plant engineering, miniature circuit breakers can be supplemented with additional components, such as auxiliary switches, fault signal contacts,

shunt trips, undervoltage releases, remote controlled mechanisms, RC units, and arc fault detection devices.

The devices are approved for worldwide use according to IEC standards for power supply systems up to 250/440 V AC. 72 V DC per pole is permitted in DC systems.

Benefits

- Optional top or bottom infeed as the terminals are identical
- Clear and visible conductor connection in front of the rear busbar facilitates controls
- The conductor is easily inserted into the terminal thanks to the large and easily accessible wiring space

- Quick and easy manual removal of MCBs from the busbar assembly, for example if connections need to be changed
- Time-saving replacement of parts as busbars no longer need to be freed from adjacent devices

- Double terminal chambers permit accommodation of 2 wires of different cross-sections.

- The 5SY miniature circuit breakers are ideal for the quick and easy mounting of auxiliary switches and fault signal contacts. Captive metal brackets on the additional components ensure the quick and easy mounting of devices on the miniature circuit breakers without the need for tools.

¹⁾ MW (modular width) = 18 mm.

Miniature Circuit Breakers

Additional Components

Electrical components

Overview

The Siemens mounting concept supports the combination of all 5ST3 additional components with Siemens 5SY and 5SP miniature circuit breakers and with 5SU1 RCBOs.

Auxiliary switches (AS)

The auxiliary switch (AS) always signals the contact position of the miniature circuit breaker, regardless of whether the miniature circuit breaker was tripped manually or as the result of a fault. An additional version is also available for the switching of small currents and voltages for the control of programmable control systems (PLCs) acc. to EN 61131-2. The auxiliary switch with test button enables the testing of control circuits without the need to switch the miniature circuit breaker.

Fault signal contacts (FC)

The fault signal contact (FC) signals the automatic tripping of the miniature circuit breaker in the event of a fault, such as an overload or a short circuit. If the fault signal contact is activated, the contact position does not change if the miniature circuit breaker is tripped manually. Fault signal contacts with TEST and RESET buttons enable the testing of control circuits without the need to trip the miniature circuit breaker. The red RESET button integrated in the handle also indicates the automatic tripping of the MCB. The signal can be acknowledged manually using the RESET button.

Benefits

Can be universally retrofitted with all additional components

- The 5SY and 5SP miniature circuit breakers are ideal for the quick and easy mounting of auxiliary switches and fault signal contacts. Captive metal brackets on the additional components ensure the quick and easy mounting of devices on the miniature circuit breakers without the need for tools.

- Fault signal contacts with TEST and RESET button enable the simple testing of auxiliary circuits and, in the event of a fault, acknowledgement of the fault over the RESET button, without the need to switch the miniature circuit breakers.

Residual Current Protective Devices

5SV RCCBs

Overview

RCCBs are used in all systems up to 240/415 V AC. Devices of type AC trip in the event of sinusoidal AC residual currents, type A also trips in the event of pulsating DC residual currents.

In addition, RCCBs type F also detect residual currents with mixed frequencies up to 1 kHz.

RCCBs with a rated residual current of maximum 30 mA are used for personnel, material and fire protection, as well as for protection against direct contact. RCCBs with a rated residual current of 10 mA are primarily used in areas that represent an increased risk for personnel.

Since the introduction of DIN VDE 0100-410, all socket outlet current circuits up to 20 A must also be fitted with residual current protective devices with a rated residual current of max. 30 mA. This also applies to outdoor electrical circuits up to 32 A for the connection of portable equipment.

Devices with a rated residual current of maximum 300 mA are used as preventive fire protection in case of insulation faults. RCCBs with a rated residual current of 100 mA are primarily used in European countries outside Germany.

Benefits

- Instantaneous residual current operated circuit breakers with the N connection on the left or right-hand side enable simple bus mounting with standard pin busbars with miniature circuit breakers installed on the right-hand side.
- Instantaneous type A devices have a surge current withstand capability with current waveform 8/20 μ s of more than 1 kA, super resistant devices of more than 3 kA and selective devices of more than 5 kA. This ensures safe operation.
- SIGRES has an extremely long service life due to patented active condensation protection, and identical dimensions enable the quick and easy replacement of existing instantaneous RCCBs.
- Super resistant devices increase system availability, as unnecessary tripping is prevented in power supply systems with short-time glitches.
- Selective RCCBs increase system availability as a staggered tripping time enables the selective tripping of RCCBs connected in series in the event of a fault.
- Auxiliary switches, fault signal contacts, undervoltage releases and shunt trips are also available as additional components.
- By means of internal contacts, effective touch protection is provided when grasping and manually operating the latching slide.
- To facilitate entry of pin busbars with connection cables up to 35 mm², the devices are equipped with rectangular terminals for the accommodation of funnel-shaped cable entries.
- By means of standardized clearances of the terminals in modular width dimensions, the RCCBs and MCBs can be optionally connected to busbars on the top or on the bottom.

Technical specifications

Overview

RCBOs are a combination of an RCCB and a miniature circuit breaker in a compact design for personnel, fire and line protection. For personnel protection and fire protection, the residual current part of the type AC trips in the event of sinusoidal AC residual currents, type A also trips in the event of pulsating DC residual currents.

In addition, RCBOs type F also detect residual currents with mixed frequencies up to 1 kHz.

RCBOs with a rated residual current of maximum 30 mA are used for personnel, material and fire protection, as well as for protection against direct contact. RCBOs with a rated residual current of 10 mA are primarily used in areas that represent an increased risk for personnel and in the outdoor installations of residential buildings.

Devices with a rated residual current of maximum 300 mA are used as preventative fire protection in case of insulation faults.

The MCB part of the RCBO protects lines against overload and short circuits and is available in characteristics B and C.

Since DIN VDE 0100-410 came into effect in June 2007, all socket outlet current circuits up to 20 A must now also be fitted with residual current protective devices with a rated residual current of max. 30 mA. This also applies to outdoor electrical circuits up to 32 A for the connection of portable equipment.

In order to implement this protection, we recommend the use of RCBOs with 30 mA on a country-specific basis.

Assignment to each individual branch circuit helps prevent the undesired tripping of fault-free circuits induced by the accumulation of operation-related leakage currents or by transient current pulses during switching operations.

Additional components of the 5SY miniature circuit breakers can be mounted at the side and carry out additional functions.

For further details on additional components, [please refer to the chapter "Miniature Circuit Breakers"](#):

RCBOs comprise one part for fault-current detection and one part for overcurrent detection. They are equipped with a delayed overload/time-dependent thermal release (thermal bimetal) for low overcurrents and with an instantaneous electromagnetic release for higher overload and short-circuit currents.

The special contact materials used guarantee a long service life and offer a high degree of protection against contact welding.

Benefits

For all versions

- Clear and visible conductor connection in front of the rear busbar facilitates controls
- Large and easily accessible wiring space enables easy insertion of conductor in the terminals
- The surge current withstand capability of over 1 kA ensures safe and reliable operation
- All additional components for miniature circuit breakers can be retrofitted on the right-hand side

For all 10 kA versions up to 40 A

- Integrated movable terminal covers located at the cable entries ensure the terminals are fully insulated when the screws are tightened. The effective touch protection when grasping the device considerably exceeds the requirements of BGV A3.
- The RCBOs can be quickly and easily removed from the assembly by hand if connections need to be changed. Time-saving replacement of parts as busbars no longer need to be freed from adjacent miniature circuit breakers.

Fuse Systems

NEOZED Fuse Systems

Introduction

Overview

The MINIZED switch disconnectors are primarily used in switchboard assemblies and control engineering. They are approved for switching loads as well as for safe switching in the event of short circuits.

Technical specifications

		MINIZED switch disconnectors	
		D02	
		5SG71	
Standards		DIN VDE 0638; EN 60947-3 (VDE 0660-107) IEC/EN 60947-3	
Main switch characteristic, EN 60204-1		Yes	
Insulation characteristic EN 60664-1		Yes	
Rated voltage U_n	V AC	230/400, 240/415	
• 1P	V DC	65	
• 2P in series	V DC	130

1) For 2 A, 4 A, 6 A fuses.

Fuse Systems

LV HRC Fuse Systems

LV HRC fuse links

Overview

LV HRC fuse systems (NH type) are used for installation systems in non-residential, commercial and industrial buildings as well as in switchboard assemblies of power utilities. They therefore protect essential building parts and systems.

LV HRC fuse systems (NH type) are fuse systems designed for operation by experts. There are no constructional requirements for non-interchangeability of rated current and touch protection.

The components and auxiliary equipment are designed in such a way as to ensure the safe replacement of LV HRC fuse systems or isolation of systems.

LV HRC fuse links are available in the sizes 000, 00, 0, 1, 2, 3, 4 and 4a.

LV HRC fuse links are available in the following operational classes:

- gG for cable and line protection
- aM for short-circuit protection of switching devices in motor circuits
- gR or aR for protection of power semiconductors
- gS: The new gS operational class combines cable and line protection with semiconductor protection

LV HRC fuse links of size 000 can also be used in LV HRC fuse bases, fuse switch disconnectors, LV HRC fuse strips as well as LV HRC in-line fuse switch disconnectors of size 00.

The fuse links 300 A, 355 A and 425 A comply with the standard but do not have the VDE mark.

LV HRC components

Benefits

- In the standard series with front indicator, the front-mounted red indicator signals the tripping of a fuse.
- LV HRC fuse links are always equipped with silver-plated contact pins. This means that they are non-corroding and have less contact resistance. This ensures the long-term operational safety of the plant.

Overview

LV HRC signal detectors are used for remotely indicating that the LV HRC fuse links have been tripped.

The LV HRC signal detectors with signal detector link can be used to monitor LV HRC signal fuse links with non-insulated grip lugs of sizes 000 to 4 at 10 A or more.

The signal detector link is connected in parallel to the LV HRC fuse link. In the event of a fault, the LV HRC fuse links are released simultaneously with the LV HRC fuse detector link. A trip pin switches a floating microswitch.

Benefits

Uniform solution for all sizes

LV HRC signal detectors reliably indicate when a fuse has tripped. Tripped fuses are quickly located. This saves time and increases system availability.

Fuse Systems

LV HRC Fuse Systems

LV HRC fuse bases and accessories

Overview

Terminals for all applications

Flat terminals with screws are suitable for connecting busbars or cable lugs. They have a torsion-proof screw connection with shim, spring washer and nut. When tightening the nut, always ensure compliance with the specified torque due to the considerable leverage effect.

The double busbar terminal differs from the flat terminal in that it supports connection of two busbars, one on the top and one at the bottom of the flat terminal.

The modern box terminal ensures efficient and reliable connection to the conductors. They support connection of conductors with or without end sleeves.

With the flat terminal with nut, terminal lug of the nut is torsion-proof. When tightening the nut, the torque must be observed because of the considerable leverage effect.

Up to three conductors can be clamped to the terminal strip.

The plug-in terminal is equipped for connecting two conductors.

One conductor can be clamped to the saddle-type terminal.

Benefits

- The silver-plated Lyra contact provides a large contact area for the pin of the LV HRC fuse link. This improves heat transmission and lowers the temperature. It also minimizes ageing of the fuse link in the maximum load range, in particular when using SITOR semiconductor fuses.
- The large contact area also facilitates replacement of LV HRC fuse links.
- The spring washer tensioning the contact is mechanically galvanized. This will prevent hydrogen embrittlement. The contact is resistant to aging and there will be no dreaded annealing of contacts, which considerably improves operating safety.

Overview

SITOR semiconductor fuses protect power semiconductors from the effects of short circuits because the super quick-response disconnect characteristic is far quicker than with conventional LV HRC fuses. They protect high-quality devices and system components, such as converters with fuses in the input and the DC link, UPS systems and soft starters for motors.

Panel mounting requirements have given rise to various connection versions and designs.

The fuses with blade contacts comply with IEC 60269-2 and are suitable for installation in LV HRC fuse bases, in fuse switch disconnectors and switch disconnectors with fuses. They also include fuses with slotted blade contacts for screw fixing with 110 mm mounting dimension, whose sizes are according to IEC 60269-4.

Fuses with slotted blade contacts for screw fixing with 80 mm or 110 mm mounting dimension are often screwed directly onto busbars for optimum heat dissipation. Even better heat transmission is provided by the compact fuses with M10 or M12 female thread, which are also mounted directly onto busbars.

Bolt-on links with 80 mm mounting dimension are another panel-mounting version for direct busbar mounting.

The fuses for SITOR thyristor sets, railway rectifiers or electrolysis systems were developed specially for these applications.

The LV HRC fuse bases and fuse switching devices suitable for use with SITOR semiconductor fuses [can be found on pages 4/36ff.](#)

Fuse characteristics, configuration notes and the assignment of SITOR semiconductor fuses to the fuse bases and 3NP and 3KL fuse switching devices can be found in the Configuration Manual, "Fuse Systems" at: www.siemens.com/lowvoltage/manuals

The new size 3 type ranges have a round ceramic body instead of a square one. These series are characterized by small I^2t values with low power dissipation and high capability under alternating load. The dimensions and functional values correspond to the current standards IEC 60269-4/EN 60269-4.

Note:

The ordering data of the fuses are listed in ascending order of the rated voltage in the selection tables.

Benefits

- SITOR semiconductor fuses have a high varying load factor, which ensures a high level of operational safety and plant availability – even when subject to constant load change.
- The use of SITOR semiconductor fuses in LV HRC fuse bases or Siemens switch disconnectors has been tested with regard to heat dissipation and maximum current loading. This makes planning and dimensioning easier and prevents consequential damage.
- Our high standard of quality ensures good compliance with the characteristic curve and accuracy. This ensures long-term protection of devices.

Operational classes

Fuses are categorized according to function and operational classes. SITOR semiconductor fuses, LV HRC design, are available in the following operational classes:

- aR: For the short-circuit protection of power semiconductors (partial range protection)
- gR: For the protection of power semiconductors

Switch Disconnectors

3NP5 Fuse Switch Disconnectors up to 630 A

With fuse monitoring

Overview

3NP5 fuse switch disconnector range

3NP5 fuse switch disconnectors are controls for the occasional manual switching/isolating of loads and distribution boards. They are able to switch on, control and switch off the specified rated current (including a specific overload).

With the 3NP5 fuse switch disconnectors, all poles of downstream electric loads can be safely disconnected from the system under load.

Application

The 3NP5 fuse switch disconnectors are ideally suited for surface mounting and installation in distribution boards (e.g. ALPHA, SIKUS), meter cabinets (e.g. ALPHA 400-ZS), and molded-plastic distribution systems such as 8HP.

The ability to mount them on a range of different busbar systems allows their very diverse implementation in switchboard cabinet and control engineering.

The 3NP5 fuse switch disconnectors are ideal for operation in combination with other switching devices, for example in capacitor modules for reactive-power compensation.

In conjunction with semiconductor protection fuses (e.g. SITOR), these are used for the effective protection of frequency converters and soft starters.

The 3NP5 fuse switch disconnectors are suitable for use in any climate and comply with standards IEC 60947-1, IEC 60947-3 and DIN VDE 0660 Part 107.

In addition, the 3NP5 series of fuse switch disconnectors complies with the requirements of BS 5419 and is also approved for operation in marine applications.

All 3NP5 fuse switch disconnectors can be sealed as standard (or can be sealed through accessories).

• Busbars (usable busbar width)	mm	16 ... 22
Clamp terminals	mm ²	2.5 ... 50 ⁷⁾
Auxiliary switch 1 NO + 1 NC (accessories)		
• At 50 Hz/60 Hz to 400 V AC, rated operational current I_e at AC-12/AC-15 A	A	The same voltage potential must be applied to the NO and NC contacts 16/6
• Flat plug-in terminals (DIN 46244)		A 6.3 ... 0.8
Permissible mounting position		Vertical or horizontal (switching capacity may be reduced with horizontal installation)
Signaling contact for electronic fuse monitoring		
• Rated operational current I_e at 250 V, DC-13	A	2 NO + 1 NC 0.27
• Rated operational current I_e at 240 V, AC-15	A	1.5
• Thermal free-air rated current I_{th}	A	5

1) When observing degree of pollution 2 (instead of 3) operation is also possible up to $U_i = 1000$ V.

2) Rated making and breaking current according to IEC 60947-3:
Rated making current
 $I = 10 \times I_e$ (AC-23); $3 \times I_e$ (AC-22); $1.5 \times I_e$ (AC-21);
Rated breaking current
 $I_e = 8 \times I_e$ (AC-23); $3 \times I_e$ (AC-22); $1.5 \times I_e$ (AC-21).

3) When electronic fuse monitors are used, infeed must be from the top.

4) When using isolating blades. If using fuse links, please observe specifications of fuse manufacturer.

5) With busbar adapter.

6) Values are valid when using LV HRC fuse systems with characteristic gG. If using fuses for semiconductor protection, please refer to the assignment table, see [Catalog LV 10, chapter "Switch Disconnectors"](#)

7) When connecting one conductor.
For 2 conductors max. 1×50 mm² and 1×35 mm².

Overview

Remote control switches are used in residential and non-residential buildings, as well as the switchboard engineering sector. They trip in the event of "current inrushes", i.e. pulses, and then electromechanically save the switching position, even in the event of a power failure.

All the devices have the VDE mark and can also be equipped with an additional auxiliary switch. All devices have a switching position indication and are operated manually. The switching noise is particularly quiet and meets the requirements of residential buildings.

Benefits

- Remote control switches with central/group switching support convenient and high feature applications
- High functional reliability due to electromechanical design without fault-prone electronics
- The devices have no standby losses
- All devices have a switching position indication and are operated manually
- The remote control switches can be bus-mounted on 5TE9100 and 5TE9101 busbars; e.g.: bus mounting of the N conductor and/or infeed
- All the remote control switches can be fitted with an additional auxiliary switch

Central switching functions

Versions with central On/Off function allow the central switching of all connected remote control switches. This type of central switching can also be actuated using a time switch. All remote control switches can be switched to the ON or OFF switching state, regardless of their current switching state.

Contact sequences

1 – 2 – 1+2 – 0 or **1 – 0 – 2 – 0** means:

- 0: No contact closed
- 1: Only contact 1 closed
- 2: Only contact 2 closed
- 1+2: Contact 1 and contact 2 are closed

The contact positions are constantly changing with each pushbutton impulse.

Note:

Synchronous switching of the contacts cannot be guaranteed with parallel switching. Products with central/group switching must be used for the mutual control of several remote control switches.

Bus mounting

All 5TT41 remote control switches can be bus-mounted with each other.

Note:

For suitable busbars for the 5TT41 remote control switches, see [Catalog LV 10, chapter "Switching Devices"](#).

ALPHA FIX Terminal Blocks

8WH6 iPo Plug-In Terminals

General data

Overview

iPo connection method: Characterized by its simple and direct conductor connection, this series utilizes all the benefits of the 8WH system.

Easy bridging: The double bridge shaft supports the interconnection of any number of terminals using 2-pole jumpers. The 2-pole to 50-pole jumpers enable up to 50 terminals to be connected in a single step.

4

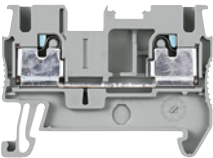

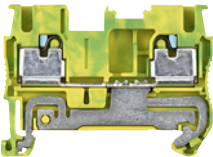

Super-light insertion: With an up to 50 % lower insertion force, the iPo connection method permits easy and direct insertion of rigid and flexible conductors with end sleeves with a cross-section of more than 0.34 mm^2 .

Pusher button function: The actuation button is used to open the spring to either release the conductor or to connect smaller cross-sections from 0.14 mm^2 . It can be operated by any tool.

Vacuum interrupters

4/3

3AH47 vacuum circuit breakers

Medium-Voltage Components

Vacuum interrupters

Overview

Vacuum switching technology is the preferred technology for medium-voltage applications worldwide, and is therefore state-of-the-art.

Our experience in developing and manufacturing these challenging products dates back over 40 years. The major part relates to the special requirements for railway applications.

Over this period, more than 5 million Siemens interrupters have been installed worldwide.

Close cooperation with our customers enables us to continuously innovate the products and to maintain our quality requirements at the highest possible level.

For this reason, we manufacture the contact material in-house and subject the individual components as well as the complete interrupters to intensive tests before delivery.

We therefore offer:

- High reliability
- Maximum switching capacity
- Leading technology
- Excellent technical support

Selection and ordering data

- Mechanical operating cycles 30 000
- Temperature range: -40 °C to 120 °C
- Optionally available siliconized
- Dimensions and further details on request

The vacuum interrupters are fully developed products which can be supplied with customized connection dimensions.

For further information, please contact:

Email: support.ic@siemens.com, or

Tel.: +49 (180) 524-8437

Overview

The 3AH47 vacuum circuit breakers are based on the successful 3AH vacuum circuit breaker series which has been well proven in practice in over 500 000 installations.

The 3AH47 vacuum circuit breaker can control up to 60 000 operating cycles depending on the version. With minimum maintenance work, such as greasing of operating mechanisms after 10 000 operating cycles and replacing the interrupters after 30 000 operating cycles, the reliability of these circuit breakers is maintained throughout the entire service life.

Surge Arresters for Railway Applications

5/2	Introduction
5/4	3EB4 surge arresters
5/7	3EB5 surge arresters

Surge Arresters for Railway Applications

Introduction

Overview

Siemens surge arresters for railway applications – particularly reliable, stable and safe overvoltage protection

Siemens has developed and manufactured medium and high-voltage surge arresters for standard and special applications since 1925. We have been producing surge arresters for railway systems for over 80 years. Continuous research and development, comprehensive know-how and worldwide experience give Siemens surge arresters a leading edge in overvoltage protection. Their uncompromising quality ensures a long service life and reliability in any application.

Siemens surge arresters are an indispensable aid to insulation coordination in electrical power supply systems.

Valuable equipment, such as traction units, is ideally protected against lightning and switching overvoltages.

Siemens surge arresters have been designed to meet the requirements of a wide range of common installation environments, from arctic cold to the heat of the desert and the dampness of tropical climates.

Definition of surge arresters

Surge arresters are used to protect electrical equipment, such as transformers, circuit breakers and bushings, against the effects of overvoltages caused by incoming surges. Such overvoltages can be caused by a direct or nearby lightning strike, electromagnetic discharges or switching operations in the power supply system as well as in devices. Some overvoltages are very high in energy. The current from the surge is diverted through the arrester, in most cases to ground. Effective overvoltage protection requires that different surge arrester types be used depending on the particular application.

Always the best solution for traction systems

Electrical power for traction systems is generally transmitted to traction substations of the (national) utility or the railway systems' own high-voltage network by high voltage transmission lines with rated voltages of 110 kV and above at frequencies of 16 2/3 Hz, 25 Hz, 50 Hz or 60 Hz. The voltage is then stepped down to the supply voltage of the traction system and converted into DC voltage where necessary. The high-voltage transmission lines, the traction substations, the catenary system and the traction units are exposed to lightning overvoltages that may result in huge damage to the insulation of the electrical equipment.

Siemens surge arresters for railway applications protect every part of a railway system, from railway substations through transmission lines, cable and catenary systems to rail vehicles for mass-transit, mainline and high-speed transportation up to 420 km/h. Siemens offers several surge arrester product families for AC and DC railway applications up to 45 kV:

- **3EB4** – silicone rubber surge arrester with composite hollow-core enclosure for use on traction units and for fixed installation in AC and DC systems.
- **3EB5** – silicone rubber surge arrester in a cage design for use on traction units and for fixed installation in AC and DC systems.

Siemens provides each of these types in several versions, making it possible to find the ideal surge arrester for any conceivable application and meet even specific demands, such as:

- high mechanical stability to withstand vibrations and high wind speeds,
- extremely reliable pressure relief behavior for use in areas requiring special protection,
- excellent pollution layer characteristics for use in coastal and desert regions or in areas with extreme air pollution.

All Siemens surge arresters feature a superior sealing system that reliably prevents moisture ingress to ensure the highest possible degree of overvoltage protection and decades of trouble-free service. Moreover, the choice of materials used in the production of Siemens surge arresters contributes to protection of the environment.

The best choice for every application

Whether it is high-speed, intercity trains between the major cities of the world, train shuttle services from train stations to airports that run every few minutes, or everyday mass transit, the requirements of rail transport vary from one extreme to the other.

Siemens supplies a complete portfolio of surge arresters that meets all the requirements for overvoltage protection of rail vehicles and rail electrification worldwide. Apart from the system voltage, the main criterion for the selection of the appropriate surge arrester is the type of application, which defines travel speed and resulting load.

The 3EB4 and 3EB5 surge arresters are highly suitable for every possible railway application, including:

- High-speed and intercity trains
- Mass transit and regional trains
- Urban public transport: Light rail vehicles, metros, trams, electric buses
- Locomotives
- Drive systems

And for every power supply system, such as:

- 12.5 kV, 25 Hz/60 Hz
- 15 kV, 16 2/3 Hz
- 25 kV, 50 Hz/60 Hz
- 750 V DC
- 1 500 V DC
- 3 000 V DC

Standards and tests – reliability you really can depend on

Siemens surge arresters have been designed and tested in compliance with the latest IEC 60099-4, IEEE C62.11 and GB 11032 standards. All type tests are performed by independent, PEHLA-certified laboratories; the test reports are available on request. Please contact your Siemens representative for details.

Moreover, every single surge arrester that leaves the Siemens factory undergoes a routine test and is delivered with a routine test certificate.

Siemens meets all requirements of ISO 9001:2008, ISO 14002:2004 and BS OHSAS 18001:2007. All Siemens suppliers have to be certified according to ISO standards or are audited by Siemens.

To maintain sustainable quality improvement, Siemens introduced corporate quality guidelines that contribute to each step of the quality process.

The 3EB4 and 3EB5 surge arresters comply with the following international standards:

- **IEC 60099-4**, Metal oxide surge arresters for AC systems
- **EN 50526-1**, Railway applications – Fixed installations – D.C. surge arresters and voltage limiting devices
- **EN 45545-2**, Railway applications – Fire protection on railway vehicles
- **IEC 61373**, Railway applications – Rolling stock equipment – Shock and vibration tests

Surge Arresters for Railway Applications

3EB4 surge arresters

Overview

3EB4 – silicone rubber surge arrester with composite hollow core design

Reliable and safe – 3EB4 railway surge arresters

3EB4 type railway surge arresters have to withstand a great deal, including the influence of extreme weather conditions, temperatures from -40 °C to $+70\text{ °C}$ and the effects of UV radiation and hydrophobicity. They have been designed for precisely this, and are effectively protected with suitable fault-tolerant technology and durable materials to ensure trouble-free operation under all conditions of use.

Within the composite housing, the arrester's enclosure materials consist of silicone and glass-fiber reinforced plastic (GFRP). The silicone, which is directly applied onto the GFRP tube in an injection molding process, ensures reliability and an excellent special seal at both ends of the surge arrester effectively prevents partial discharges and moisture ingress, guaranteeing decades of trouble-free operation. The combination of silicone and a glass-fiber-reinforced plastic tube also ensures excellent mechanical resilience of the design.

The 3EB4 surge arrester enclosure is designed for extreme mechanical loads and it is ideally suited for high speeds up to 420 km/h (260 mph).

The silicone arrester with composite hollow core enclosure design provides a very high degree of safety: In the case of an overload or the extremely rare case of an arrester short circuit, the arc escapes directly through a directional pressure relief device. The surge arrester, therefore, can be installed in a way that will minimize the risk of any damage to the equipment and passengers nearby. Internal parts are not ejected and the shatterproof housing remains intact.

A reliable, rugged and economical choice

Siemens 3EB4 composite hollow core design surge arresters are virtually indestructible during transportation, installation, storms, and vandalism. While the composite hollow core enclosure design provides the highest possible mechanical strength, the silicone rubber insulation is ideal for outdoor applications in severe environmental conditions. No matter how tough environmental and operating conditions may be, 3EB4 arresters assure 100% reliable pressure relief performance and provide the ultimate in protection.

Overview

3EB5 silicone rubber surge arrester in a cage design

Siemens 3EB5 surge arresters in a cage design offer excellent protection from overvoltage in railway applications.

The metal oxide varistors (MOVs) are encased in a cage of rods made out of glass-fiber-reinforced plastic (FRP), which produces a rigid, reinforced construction.

Reliability is ensured by directly injecting the silicone onto the MO varistors and the FRP rods. This ensures complete embedding of all components without entrapment and gaps, and thus excellent sealing against partial discharges or the ingress of moisture.

In the extremely rare case of an MOV overload, arcing does not produce any critical pressure in the interior because the MOV elements are not situated in a sealed mechanical enclosure. The arc can escape directly through the soft silicone housing, without damaging the mechanical enclosure support. The ejection of internal parts that could damage other nearby equipment is prevented almost completely. The innovative cage design from Siemens ensures an excellent safety response.

The silicone is highly hydrophobic and retains its water and dirt-repellent effect throughout its use. This results in high tracking and erosion resistance. The silicone enclosure is self-extinguishing and flame-retardant. These advantages ensure maintenance-free and reliable use of 3EB5 surge arresters.

Network Components

SCALANCE X – Industrial Ethernet Switches

SCALANCE X005EEC

Overview

The unmanaged Industrial Ethernet switch SCALANCE X005 is ideally suited for economical setup of small Industrial Ethernet networks with data transfer rates of 10/100 Mbps in line and star structures.

- Five electrical station or network connections
- Rugged metal housing for space-saving control cabinet installation on a standard mounting rail or S7-300 mounting rail or for wall mounting
- Rugged, industry-compatible station connections with RJ45 plug connectors that are locked into place on the housing to provide additional strain relief and bending relief
- Diagnostics on the device by means of LEDs (power, link status, data communication)

SCALANCE X005EEC

- For setting up electrical star and line structures with five electrical ports for use in rail and road transport with extended temperature range

Benefits

- Ideal solution for setup of small Industrial Ethernet line and star structures
- Space-saving installation in the control cabinet thanks to its compact size in S7-300 format
- Reliable plug-in connection thanks to rugged, industry-compatible device connection in combination with FastConnect connectors
- Installation without patch field is possible using IE FC RJ45 plug 180 and IE FC standard cable
- Integrated autocrossover function enables use of uncrossed connection cables

Application

- For economical setup of small, electrical Industrial Ethernet star and line structures with switching functionality, e.g. machine or plant islands
- For use in the control cabinet
- The SCALANCE X005EEC is suitable for use in rail and road transport due to its specification according to EN 50155 and e1/E1

Design

The SCALANCE Industrial Ethernet switches with a rugged metal housing (IP30) are optimized for mounting on a standard mounting rail and an S7-300 mounting rail. Direct wall mounting in different mounting positions is also possible. Due to the housing dimensions, which correspond to those of the SIMATIC S7-300, the devices are very well suited for integration into an automation solution with S7-300 components.

The SCALANCE X005 switch is equipped with:

- Supply voltage 1 x 24 V DC
- A row of LEDs for displaying status information (power, link status, data communication)
- 5 x 10/100BaseTX, RJ45 ports: automatic detection of the data rate (10 or 100 Mbps), with autosensing and autocrossover function for connecting IE FC cables via IE FC RJ45 Plug 180 up to 100 m

Overview

The managed Industrial Ethernet switches of the SCALANCE X-200 line are optimally suited for setup of Industrial Ethernet networks with transmission rates of 10/100 Mbps in line, star and ring structures.

- Integrated redundancy manager for setup of Fast Ethernet ring topologies with fast media redundancy
- Electrical or optical station or network connection depending on the port type of the devices
- Rugged metal housing in S7-300 format for mounting on standard mounting rail or S7-300 mounting rail or for direct wall mounting in different mounting positions
- Rugged, industry-compatible station connections with RJ45 plug connectors that are locked into place on the housing to provide additional strain relief and bending relief
- Redundant power supply
- Diagnostics on the device by means of LEDs (power, link status, data communication)
- Error signaling contact with easy setting using SET button
- PROFINET diagnostics, SNMP access, integrated web server and automatic e-mail transmission function for remote diagnostics and signaling via the network

Product versions

- Switches with electrical and optical ports for glass multimode FOC up to 5 km:
 - SCALANCE X204-2TS
for setup of optical line or ring structures with four electrical ports and two optical multimode ports especially for railway applications (EN 50155) with extended temperature range
- Switches with electrical and optical ports for glass single mode FOC up to 26 km:
 - SCALANCE X204-2LD TS
for setup of optical line or ring structures with four electrical ports and two optical single-mode ports especially for railway applications (EN 50155) with extended temperature range

Benefits

- Ideal solution for setup of Industrial Ethernet line, star and ring structures
- Reliable plug-in connection thanks to rugged, industry-compatible device connection in combination with FastConnect connectors
- High network availability through setup of redundant ring structures (redundancy manager integrated)
- Integration of the SCALANCE X-200 switches in the existing network management infrastructure through SNMP access
- Module replacement without a programming device by using the C-PLUG removable data storage medium for backing up the configuration data

SCALANCE X – Industrial Ethernet Switches

SCALANCE X204-2TS / SCALANCE X204-2LD TS

Selection and ordering data

Industrial Ethernet switches SCALANCE X-200

Industrial Ethernet switches with integrated SNMP access, web diagnostics, copper cable diagnostics and PROFINET diagnostics, for setup of line, star and ring structures; with integrated redundancy manager; incl. operating instructions, Industrial Ethernet network manual and configuration software on CD-ROM

- With electrical and optical ports for glass multimode FOC up to max. 5 km
 - **SCALANCE X204-2TS** with four 10/100 Mbps RJ45 ports and two multimode FOC ports with extended temperature range and EN 50155 approval for railway applications
- With electrical and optical glass single mode FOC ports up to max. 26 km
 - **SCALANCE X204-2LD TS** with four 10/100 Mbps RJ45 ports and two single-mode FOC ports with extended temperature range and EN 50155 approval for railway applications

6GK5204-2BB10-2CA2

6GK5204-2BC10-2CA2

Accessories

C-PLUG

Removable data storage medium (conformal coating) for easy replacement of devices under fault conditions; for recording configuration data or engineering and application data; can be used in SIMATIC NET products with C-PLUG slot

6GK1900-0AQ00

S7-1500 Mounting Kit

Mounting bracket for installation of SCALANCE X-200 on S7-1500 mounting rail

6GK5980-2EA00-0AA1

IE FC Stripping Tool

Preset insulation stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

IE FC RJ45 Plug 180 2 x 2

RJ45 plug connector for Industrial Ethernet with rugged metal housing and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; with 180° cable outlet; for network components and CPs/CPUs with Industrial Ethernet interface

- 1 pack = 1 unit

6GK1901-1BB10-2AA0

IE TP Train Cable GP 2x2 (Type C)

4-core, shielded TP installation cable for connection to IE FC outlet RJ45/IE FC RJ45 plug 180/90 for train applications; PROFINET-compliant; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

6XV1871-2T

IE Connecting Cable IE FC RJ45 Plug-180/ IE FC RJ45 Plug-180

Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two IE FC RJ45 Plug-180, IP20 degree of protection; Length:

- 1.0 m
- 5.0 m
- 10.0 m

6XV1871-5BH10
6XV1871-5BH50
6XV1871-5BN10

FC FO Termination Kit

Termination kit for local assembly of FC SC and FC BFOC connectors to FC FO standard cable; contains a stripping tool, Kevlar cutters, fiber breaking tool and microscope

6GK1900-1GL00-0AA0

FC BFOC Plug

Screw connector for on-site assembly on FC fiber-optic cable; (1 pack = 20 units + cleaning cloths)

6GK1900-1GB00-0AC0

FC FO Standard Cable GP 62.5/200/230

FC FO standard cable for fixed installation indoors with PVC sheath; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

6XV1847-2A

Multimode FO BFOC Connector Set

For FO standard cable (50/125/1400), FO ground cable (50/125/1400), flexible FO trailing cable, INDOOR FO cable (62.5/125/900), 20 units

6GK1901-0DA20-0AA0

FO Standard Cable GP 50/125/1400^{1) 2)}

Multimode cable sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

6XV1873-2A

Screw-Type Terminal Block

For SCALANCE X/W/S

- 2-pole for signaling contact (24 V DC)
1 pack = 5 units
- 4-pole for power supply (24 V DC)
1 pack = 5 units

6GK5980-0BB00-0AA5

6GK5980-1DB00-0AA5

¹⁾ Special fiber-optic cables, lengths and accessories available on request

²⁾ Special tools and specially trained personnel are required for assembling glass FOC

More information

Selection tools:

To assist in selecting the right Industrial Ethernet switches as well as configuration of modular variants, the SIMATIC NET Selection Tool and the TIA Selection Tool are available at:

SIMATIC NET Selection Tool:

Overview

The managed Industrial Ethernet switches of the SCALANCE XC-200 product line are optimized for setting up Industrial Ethernet networks with data transfer rates of 10/100 Mbps in a line, star or ring topology. Furthermore, high-performance optical structures with up to 1 000 Mbps can be set up with the SCALANCE XC206-2SFP.

- Electrical or optical connection to stations or networks according to port characteristics of the devices
- Version with SFP plug-in transceivers for transmission rates up to 1 000 Mbps
- Rugged station connections with industry-standard RJ45 connectors that offer additional strain and bending strain relief thanks to latching on the enclosure
- Redundant power supply
- Console port for direct access to device
- Display of comprehensive operating mode and status information via LEDs and selection pushbuttons
- Signaling contact for connecting to an error signaling system
- Slot for optional C-PLUG removable data storage medium for easy device replacement without additional equipment such as a field PG
- Grounding screw for external ground connection
- Virtual LANs (VLAN) for easy structuring of large networks into smaller, logical subnetworks. Reasons for the subdivision into logical subnetworks are, for example, separation of the Ethernet networks to reduce the broadcast load, separation of sensitive areas from the main network, and subdivision of the network into logical working groups
- By learning the multicast sources and destinations (Internet Group Management Protocol (IGMP) Snooping), SCALANCE XC-200 switches can also filter multicast data traffic and thus limit the load on the network
- Integrated security functions offer protection against unauthorized network access and configuration (e.g. authentication via IEEE 802.1X)

Product versions

- Switches with electrical ports:
 - SCALANCE XC208; with 8x RJ45 ports 10/100 Mbps for mounting in the control cabinet
 - SCALANCE XC216; with 16x RJ45 ports 10/100 Mbps for mounting in the control cabinet
 - SCALANCE XC224; with 24x RJ45 ports 10/100 Mbps for mounting in the control cabinet
- Switches with electrical and optical ports
 - SCALANCE XC206-2; with 6x RJ45 ports 10/100 Mbps and 2x ST/BFOC ports 100 Mbps
 - SCALANCE XC206-2; with 6x RJ45 ports 10/100 Mbps and 2x SC ports 100 Mbps
 - SCALANCE XC206-2SFP; with 6x RJ45 ports 10/100 Mbps and 2x SFP plug-in transceivers with 100 or 1 000 Mbps

Benefits

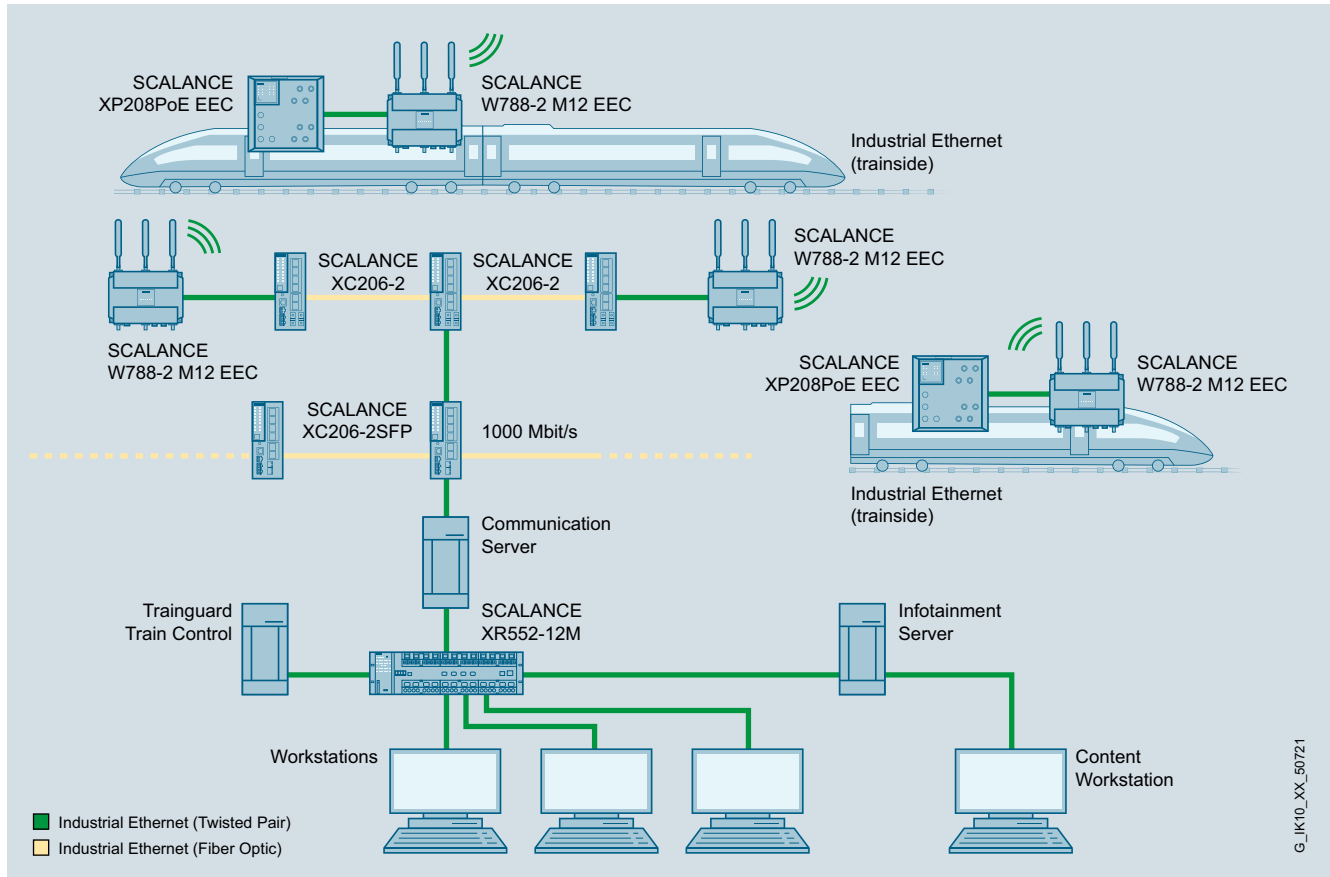

- Operational reliability in industrial environments, e.g. due to rugged enclosure, redundancy, temperature range from -40 °C to +70 °C
- Fast mobile diagnostics by smartphone or tablet in existing WLAN using NFC (near field communication)
- Integration of SCALANCE XC-200 switches into existing network management infrastructure (e.g. SINEMA Server) through SNMP accession thanks to rugged, industry-standard device connects
- Reliable plug-in connection in conjunction with industry-standard FastConnect connectors

Selection and ordering data

SCALANCE XC-200 Industrial Ethernet switches

Industrial Ethernet switches with integrated SNMP access, online diagnostics, copper cable diagnostics and PROFINET diagnostics for configuring line, star and ring topologies; with integrated redundancy manager; incl. operating instructions, Industrial Ethernet network manual and configuration software on CD-ROM

- **SCALANCE XC206-2 (ST/BFOC)** 6GK5206-2BB00-2AC2
with six RJ45 ports 10/100 Mbps and two ST/BFOC ports 100 Mbps
- **SCALANCE XC206-2 (SC)** 6GK5206-2BD00-2AC2
with six RJ45 ports 10/100 Mbps and two SC ports 100 Mbps
- **SCALANCE XC206-2SFP** 6GK5206-2BS00-2AC2
with six RJ45 ports 10/100 Mbps and two SFP slots for SFPs with 100 or 1 000 Mbps
- **SCALANCE XC208** 6GK5208-0BA00-2AC2
with eight RJ45 ports 10/100 Mbps
- **SCALANCE XC216** 6GK5216-0BA00-2AC2
with sixteen RJ45 ports 10/100 Mbps
- **SCALANCE XC224** 6GK5224-0BA00-2AC2
with twenty-four RJ45 ports 10/100 Mbps

Accessories

FC RJ 45 port lock

Mechanical locking of unused RJ45 ports at network components and end devices. For use on devices with and without retaining collar²⁾

6GK1901-1BB50-0AA0

C-PLUG

Removable data storage medium for simple replacement of devices in the event of a fault; for storing configuration or engineering and application data; can be used for SIMATIC NET products with C-PLUG slot

- 1 pack = 1 unit

6GK1900-0AB10

Push-in terminal block

For Scalance X/W/S

- 2-pin for signaling contact (24 V DC)
1 pack = 5 units
- 4-pin for power supply (24 V DC)
1 pack = 5 units

6GK5980-0BB10-0AA5

6GK5980-1DB10-0AA5

Screw-type terminal block

For Scalance X/W/S

- 2-pin for signaling contact (24 V DC)
1 pack = 5 units
- 4-pin for power supply (24 V DC)
1 pack = 5 units

6GK5980-0BB00-0AA5

6GK5980-1DB00-0AA5

Fixing screw

for SCALANCE X/W

Screw for mounting on an S7-1500 and S7-300 mounting rail
1 pack = 5 units

6GK5980-4AA00-0AA5

SFP plug-in transceiver

See "Plug-in transceivers for SCALANCE XR-500" / "Media modules for modular SCALANCE X-500"

IE FC RJ45 plug 180 2x2

Industrial Ethernet FastConnect RJ45 plug 180 2x2, RJ45 connector (10/100 Mbps) with rugged metal enclosure and FC connection technology, for IE FC cable 2x2 180° cable outlet
1 pack = 1 unit

6GK1901-1BB10-2AA0

IE FC RJ45 plug 4x2

RJ45 plug-in data connector (10/100/1000 Mbps), for connection to IE FC TP cables 4x2, with rugged metal enclosure and FastConnect connection technology

6GK1901-1BB11-2AA0

IE FC TP standard cable GP 2 x 2 (Type A)

4-core, shielded TP installation cable for connection to IE FC outlet RJ45/IE FC RJ45 plug; PROFINET-compliant; with UL approval; sold by the meter; max. length 1 000 m, minimum order 20 m

6XV1840-2AH10

IE FC TP standard cable GP 4X2

TP installation cable Cat 6 for connection to IE FC RJ45 plug 4x2, AWG24, sold by the meter; max. length 1 000 m, minimum order quantity 20 m

6XV1878-2A

IE FC TP standard cable GP 4x2

Shielded TP installation cable capable of 1 000 Mbps, for connection to FC RJ45 modular outlet, 8-wire, AWG22, with rigid cores for final assembly

6XV1870-2E

IE connecting cable IE FC RJ45 plug 180/IE FC RJ45 plug 180

IE FC trailing cable GP, preassembled with 2x IE FC RJ45 plugs 180; length:

- 1.0 m
- 5.0 m
- 10.0 m

6XV1871-5BH10
6XV1871-5BH50
6XV1871-5BN10

FastConnect stripping tool

Industrial Ethernet FastConnect stripping tool, for fast stripping of the Industrial Ethernet FastConnect cable

6GK1901-1GA00

FC FO standard cable GP 62.5/200/230 ^{1) 2)}

FC FO standard cable (62.5/200/230) for field assembly, cULus approval, standard cable divisible

6XV1847-2A

FO standard cable GP 50/125/1400 ^{1) 2)}

Multimode cable, sold by the meter; max. length 1 000 m; minimum order 20 m

6XV1873-2A

¹⁾ Special fiber-optic cables; lengths and accessories available on request

²⁾ Special tools and trained personnel are required for pre-assembling glass fiber-optic cables

Network Components

SCALANCE X - Industrial Ethernet Switches

SCALANCE XC-200 managed

MM FO cord LC/LC 50/125; preassembled with 2x2 LC duplex connectors; length 1.0 m	6XV1843-5EH10-0AA0	FC ST/ BFOC plug Screw connector for on-site assembly on FC fiber-optic cable; (1 pack = 10 units + cleaning cloths)	6GK1900-1GB00-0AC0
MM FO cord SC/LC 50/125; preassembled with 1x SC duplex connector and 1x LC duplex connector; length 1.0 m	6XV1843-5EH10-0CA0	Serial cable RJ11/RS232 Preassembled serial cable with RJ11 and RS232 connectors; length: 3 m; 1 pack = 1 unit	6GK5980-3BB00-0AA5
MM FO cord SC/BFOC 50/125; preassembled with 1x SC duplex connector and 1x BFOC connector; length 1.0 m	6XV1843-5EH10-0CB0	SCALANCE TAP104 Test access port for the reaction-free extraction of Ethernet data frames (10/100 Mbps) from both transmission directions; extracts entire data traffic (including incomplete diagrams) for further diagnostics.	6GK5104-0BA00-1SA2
MM FO cord SC/SC 50/125; preassembled with 2x SC duplex connectors; length 1.0 m	6XV1843-5EH10-0CC0		
MM FO cord LC/LC 9/125; preassembled with 2x2 LC duplex connectors; length 1.0 m	6XV1843-5FH10-0AA0		
MM FO cord SC/LC 9/125; preassembled with 1x SC duplex connector and 1x LC duplex connector; length 1.0 m	6XV1843-5FH10-0CA0		
MM FO cord SC/BFOC 9/125; preassembled with 1x SC duplex connector and 1x BFOC connector; length 1.0 m	6XV1843-5FH10-0CB0		
MM FO cord SC/SC 9/125; preassembled with 2x2 SC duplex connectors; length 1.0 m	6XV1843-5FH10-0CC0		
MM FO robust cable GP FO robust cable GP 50/125, preassembled with 2 x LC duplex connectors Length: <ul style="list-style-type: none"> • 1.0 m • 2.0 m • 3.0 m • 10.0 m • 30.0 m • 50.0 m • 100.0 m • 150.0 m 	6XV1873-5RH10 6XV1873-5RH20 6XV1873-5RH30 6XV1873-5RN10 6XV1873-5RN30 6XV1873-5RN50 6XV1873-5RT10 6XV1873-5RT15		
5 x FC SC duplex plugs FC FO SC plugs for on-site mounting on FC FO cables (62.5/200/230)	6GK1900-1LB00-0AC0		
MM FO SC connector set 10 duplex connectors for FO cable; standard, trailing, indoor and marine cable; Note: special tools and skilled personnel are required for assembly; adhesive bonding and polishing technology	6GK1901-0LB10-2AA0		
MM FO LC duplex plug 10 units for MM FO robust cable GP (2G50/125); Note: special tools and skilled personnel are required for assembly; adhesive bonding and polishing technology	6GK1901-0RB10-2AB0		
FC FO Termination Kit Termination Kit for local assembly of FC SC and FC BFOC connectors to FC FO standard cable; comprising a stripping tool, Kevlar cutters, fiber breaking tool and microscope	6GK1900-1GL00-0AA0		

More information

Selection tool:

To assist in selecting the right Industrial Ethernet switches as well as configuration of modular variants, the SIMATIC NET Selection Tool and the TIA Selection Tool are available at:

Network Components

SCALANCE X – Industrial Ethernet Switches

SCALANCE XP-200 managed

Overview

SCALANCE XP216EEC

SCALANCE XP208EEC

The managed Industrial Ethernet switches of the SCALANCE XP-200 product line with 8 or 16 Ethernet ports are optimally suited for setup of cabinet-free automation concepts of Industrial Ethernet networks with transmission rates of 10/100/1000 Mbps in a line, star or ring structure.

- Integrated redundancy manager for setup of high availability networks in a ring structure
- Electrical station or network connection
- Rugged metal housing for mounting on SIMATIC ET 200pro rack, ITEM rail mounting or direct wall mounting
- Rugged industry-compatible station connections with industrial-compatible M12 plug connectors, (M12 D-coded for FastEthernet (10/100 Mbps) interfaces, M12 X-coded for 1000 Mbps interfaces)
- Redundant power supply (M12, A-coded)
- Console port (M12, D-coded)
- Diagnostics on the device by means of prominent LED display with integrated SELECT/SET button (power, link status, data communication, display mode)
- Error signaling contact with easy setting using SELECT/SET button
- Configuration storage using C-PLUG removable data storage medium
- Grounding screw for external ground connection

Product versions

SCALANCE XP208EEC

- with 8 electrical ports (10/100 Mbps, M12 D-coded)

SCALANCE XP208PoE EEC

- with 4 electrical ports (10/100 Mbps, M12 D-coded) and 4 electrical PoE ports (10/100 Mbps M12 D-coded)

SCALANCE XP216EEC

- with 12 electrical ports (10/100 Mbps, M12 D-coded) and 4 electrical ports (10/100/1000 Mbps, M12 X-coded)

SCALANCE XP216PoE EEC

- with 12 electrical ports (10/100 Mbps, M12 D-coded) and 4 electrical ports (10/100/1000 Mbps, M12 X-coded)
A total of 8 ports with PoE can be used.

The switch is suitable for mounting outside a control cabinet especially in railway applications (EN 50155/45545), extended range (-40 to +70 °C).

Benefits

- Ideal solution for setup of Industrial Ethernet line, star and ring structures
- Industry-compatible plug-in connection (10/100 Mbps M12 D-coded and 10/100/1000 Mbps, X-coded)
- High network availability through setup of redundant ring structures (redundancy manager integrated)
- Integration of the SCALANCE XP-200 Industrial Ethernet switches in the existing network management infrastructure through SNMP access
- Easy integration in the process diagnostics and system diagnostics
- Fast device replacement under fault conditions through the use of C-PLUG
- Use under extreme ambient conditions (-40 to +70 °C)
- Use outside the control cabinet also possible (IP65/67 degree of protection)

Selection and ordering data

Industrial Ethernet switches SCALANCE XP-200

Industrial Ethernet switches with integrated SNMP access, web diagnostics, copper cable diagnostics and PROFINET diagnostics, for setup of line, star and ring structures; with integrated redundancy manager; incl. operating instructions, Industrial Ethernet network manual and configuration software on CD-ROM

- **SCALANCE XP208EEC**
with eight 10/100 Mbps M12 ports (D-coded)
- **SCALANCE XP208PoE EEC**
with four 10/100 Mbps M12 ports (D-coded) and four 10/100 Mbps M12 PoE ports (D-coded)
- **SCALANCE XP216EEC**
with twelve 10/100 Mbps M12 ports (D-coded) and four 10/100/1000 Mbps M12 ports (X-coded)
- **SCALANCE XP216PoE EEC**
with twelve 10/100 Mbps M12 ports (D-coded) and four 10/100/1000 Mbps M12 ports (X-coded)
A total of eight PoE ports are possible.

Accessories

C-PLUG

Removable data storage medium (conformal coating) for easy replacement of devices under fault conditions; for recording configuration data or engineering and application data; can be used in SIMATIC NET products with C-PLUG slot

6GK5 208-0HA00-2ES6

6GK1901-0DB40-6AA8

IE M12 Panel Feedthrough

Control cabinet bushing for transition from M12 (D-coded) connection technology (IP65) to RJ45 connection technology (IP20), 5 units

6GK1901-0DM20-2AA5

IE M12 Panel Feedthrough PRO

Control cabinet bushing for transition from M12 (D-coded) connection technology (IP65) to M12 (D-coded) connection technology (IP65), 5 units

6GK1901-0DM30-2AA5

IE M12 Panel Feedthrough 4 x 2

M12 control cabinet bushing for transition from M12 connection technology (X-coded, IP65/67) to RJ45 connection technology (X-coded, IP20), 5 units

6GK1901-0DM40-2AA5

M12 Power T-Tap

T-function for looping through the energy supply if redundant supply is not needed (24 V DC), 5 units

6GK1907-0DC00-6AA5

Serial Cable M12/RS232

Serial connection cable (M12 / Sub-D) for direct configuration of switch using laptop

6GK5980-3BC00-0AA5

IE Power M12 Plug PRO

Plug-in connector for connection to PS791-1PRO power supply for 24 V DC supply voltage with installation instructions, 4-pin, A-coded, 3 units

6GK1907-0DB10-6AA3

Signaling Contact M12 Cable Connector PRO

Connection socket for connection of SCALANCE X208PRO for signaling contact with installation instructions, 5-pin, B-coded, 3 items

6GK1908-0DC10-6AA3

More information

Selection tools:

To assist in selecting the right Industrial Ethernet switches as well as configuration of modular variants, the SIMATIC NET Selection Tool and the TIA Selection Tool are available at:

SIMATIC NET Selection Tool:

TIA Selection Tool:

<http://www.siemens.com/tia-selection-tool>

Overview

The SCALANCE X-300 product line comprises compact Industrial Ethernet switches for setup of electrical and/or optical line, star and ring structures with transmission rates of 10/100/1000 Mbps.

- Fast media redundancy through integral redundancy manager for Gigabit Ethernet (SCALANCE X-300, X-400) and Fast Ethernet (e.g. in combination with SCALANCE X-200 switches)
- Seamless integration of automation networks into existing corporate networks thanks to support of a large number of IT standards: Setup of virtual networks (VLANs)
- Redundant integration into higher-level networks thanks to support of standardized redundancy procedures (Rapid Spanning Tree Protocol)
- PROFINET diagnostics, SNMP access, integrated web server and automatic e-mail transmission function for remote diagnostics and signaling via the network

Benefits

- High availability of the network thanks to
 - Redundant power supply
 - Redundant network structures based on fiber-optic or twisted pair cable (redundancy manager, standby function and RSTP are integrated)
 - Easy device replacement by means of plug-in C-PLUG removable data storage medium
 - Very fast reconfiguration of the network in event of a fault
- Lower susceptibility to failure and higher availability of the plant networking due to locking of the RJ45 FastConnect plug connectors in place in the securing collar of the RJ45 ports
- Protection of investment through integration in existing network management systems by means of standardized SNMP access
- Easy adaptation to different network structures, and reduction in stock keeping costs through flexibility of the partially modular versions

Application

SCALANCE X-300 products enable the setup of switched networks in the field level area and the control level area where high transmission speed is required in addition to high network availability and extensive diagnostic capabilities.

The main area of application is found in high-performance plant networks with connection to the corporate network.

The X308-2M TS is suitable for use in railway applications due to its specification according to EN 50155.

SCALANCE X308-2M TS

- For setup of optical line, ring or star structures
- Hub in the plant bus (redundant connection possible)
- SCALANCE X308-2M TS (TS = Transportation Systems); 4 x 10/100/1000 Mbps RJ45 ports, electrical
2 x free module slots for 4 x 10/100/1000 Mbps media modules (electrical or optical)

SCALANCE X308-2M TS

Technical specifications

Article number	6GK5308-2GG10-2CA2
Product type designation	SCALANCE X308-2M TS
Transmission rate	
Transmission rate	10 Mbps, 100 Mbps, 1 000 Mbps
Integrated interfaces for communication	
Number of electrical connections	
• for network components or data terminal equipment	4
Number of 100 Mbps ST(BFOC) ports	
• for multimode	4
Number of 100 Mbps SC ports	
• for multimode	4
Number of 1000 Mbps LC ports	
• for multimode	4
• for single-mode (LD)	4
Other interfaces	
Number of electrical connections	
• for signaling contact	1
• for media module	2
• for power supply	1
• for redundant power supply	1
Type of electrical connection	
• for signaling contact	2-pin terminal block
• for power supply	4-pin terminal block
Type of removable data storage medium	
• C-PLUG	Yes
Signal inputs/outputs	
Operating current of the signaling contacts	
• with DC, nominal value	24 V
Operating current of the signaling contacts	
• with DC, maximum	0.1 A
Supply voltage, current consumption, power loss	
Type of power supply: redundant power supply	No
Type of supply voltage	DC
Supply voltage	
• External	12 V
• External	20 ... 30 V
Supply voltage with DC	24 V
• Rated value	20 ... 30 V
Product component: fusing at power supply input	Yes
Type of fusing at input for supply voltage	F 3 A / 32 V
Current consumption, maximum	0.7 A
Power loss [W]	
• with 24 V DC	16.6 W

Article number	6GK5308-2GG10-2CA2
Product type designation	SCALANCE X308-2M TS
Permissible ambient conditions	
Ambient temperature	
• during operation	-40 ... +70 °C
• during storage	-40 ... +70 °C
• during transport	-40 ... +70 °C
• Remark	Reduced operating temperature through use of media modules (-40 to +70 °C) or SFP plug-in transceivers (-40 to +60 °C). In the case of vertical mounting position, the maximum operating temperature is reduced to +50 °C.
Relative humidity	
• Relative humidity at 25 °C, without condensation during operation, maximum	95%
IP degree of protection	IP20
Design, dimensions and weights	
Model	Compact
Width	120 mm
Height	125 mm
Depth	124 mm
Net weight	1.4 kg
Product property: conformal coating	Yes
Mounting type	In marine applications, mounting on the 35 mm DIN rail is not permissible.
• 19-inch installation	No
• 35 mm DIN rail mounting	Yes
• Wall mounting	Yes
• S7-300 rail mounting	Yes
• S7-1500 rail mounting	No
Product properties, functions, components - General	
Cascading with redundant ring and reconfiguration time of < 0.3 s	100
Cascading with star structure	Any (only dependent on signal propagation time)
Product functions - Management, configuration, engineering	
Product function	
• CLI	Yes
• Web-based management	Yes
• MIB support	Yes
• TRAPs via e-mail	Yes
• Configuration with STEP 7	Yes
• RMON	Yes
• Port mirroring	Yes
• Multiport mirroring	Yes
• CoS	Yes
• PROFINET IO diagnostics	Yes
• Switch-managed	Yes
Protocol is supported	
• Telnet	Yes
• HTTP	Yes
• HTTPS	Yes
• TFTP	Yes
• FTP	Yes
• BOOTP	Yes
• GMRP	Yes
• DCP	Yes
• LLDP	Yes
• IGMP (snooping/querier)	Yes

Network Components

SCALANCE X – Industrial Ethernet Switches

SCALANCE X308-2M TS

Article number	6GK5308-2GG10-2CA2
Product type designation	SCALANCE X308-2M TS
Product functions - Management, configuration, engineering (continued)	
Identification & Maintenance function	
• I&MO - Device-specific information	Yes
• I&M1 - Higher level designation/location designation	Yes
Protocol is supported	
• SNMP v1	Yes
• SNMP v2	Yes
• SNMP v3	Yes
Product functions - Diagnostics	
Product function	
• Port diagnostics	Yes
• Packet size statistics	Yes
• Packet type statistics	Yes
• Error statistics	Yes
• SysLog	Yes
Product functions - VLAN	
Product function	
• VLAN - port-based	Yes
• VLAN - protocol-based	No
• VLAN - IP-based	No
• VLAN - dynamic	Yes
Number of VLANs, maximum	255
Number of dynamic VLANs, maximum	255
GVRP protocol is supported	Yes
Product functions - DHCP	
Product function	
• DHCP client	Yes
• DHCP option 82	Yes
• DHCP option 66	Yes
• DHCP option 67	Yes
Product functions - Redundancy	
Product function	
• Ring redundancy	Yes
• High Speed Redundancy Protocol (HRP)	Yes
• High Speed Redundancy Protocol (HRP) with redundancy manager	Yes
• High Speed Redundancy Protocol (HRP) with standby redundancy	Yes
Media Redundancy Protocol (MRP) is supported	Yes
Product function	
• Media Redundancy Protocol (MRP) with redundancy manager	Yes
• Redundancy procedure STP	Yes
• Redundancy procedure RSTP	Yes
• Redundancy procedure MSTP	Yes
• Parallel Redundancy Protocol (PRP)/use in PRP network	Yes
• Parallel Redundancy Protocol (PRP)/Redundant Network Access (RNA)	No
• Passive listening	Yes
Protocol is supported	
• STP/RSTP	Yes
• STP	Yes
• RSTP	Yes
• MSTP	No
• RSTP Big Network Support	Yes
• LACP	Yes

Article number	6GK5308-2GG10-2CA2
Product type designation	SCALANCE X308-2M TS
Product functions - Security	
Product function	
• ACL - MAC-based	Yes
• ACL - Port/MAC-based	Yes
• IEEE 802.1X (RADIUS)	Yes
• Broadcast/Multicast/Unicast Limiter	Yes
• Broadcast blocking	Yes
Protocol is supported	
• SSH	Yes
Product functions - Time of day	
Product function	
• SICLOCK support	Yes
Protocol is supported	
• NTP	Yes
• SNTP	Yes
• IEEE 1588 profile default	Yes
Standards, specifications, approvals	
Standard	
• for FM	FM3611: Class 1, Division 2, Group A, B, C, D / T4, Class 1, Zone 2, Group IIC, T4
• for hazardous zone	EN 60079-0: 2006, EN60079-15: 2005, II 3 G Ex nA II T4 KEMA 07 ATEX 0145X
• for safety, from CSA and UL	UL 60950-1, CSA C22.2 No. 60950-1
• for hazardous zone, from CSA and UL	UL 1604 and UL 2279-15 (Hazardous Location), CSA C22.2 No. 213-M1987, Class 1 / Division 2 / Group A, B, C, D / T4, Class 1 / Zone 2 / Group IIC / T4
• for emitted interference	EN 61000-6-4
• for noise immunity	EN 61000-6-2
Standards, specifications, approvals - CE	
Proof of suitability, CE mark	Yes
Standards, specifications, approvals - Other	
Proof of suitability	EN 61000-6-2, EN 61000-6-4
• C-Tick	Yes
• Railway application in accordance with EN 50155	Yes
• Railway application in accordance with EN 50121-4	Yes
• Fire protection in accordance with EN 45545-2	Yes
• KC approval	Yes
Standards, specifications, approvals - Product conformity	
MTBF at 40 °C	40 y

Network Components

SCALANCE X – Industrial Ethernet Switches

SCALANCE X308-2M TS

Selection and ordering data

Industrial Ethernet switches SCALANCE X-300

Industrial Ethernet switches for setting up electrical and/or optical Industrial Ethernet networks; integrated redundancy manager, IT functions (RSTP, VLAN, etc.), network management via SNMP and web server; incl. operating instructions, Industrial Ethernet network manual and configuration software on CD-ROM; C-PLUG included in scope of delivery

Full Gigabit Ethernet switches

- **SCALANCE X308-2M TS:**
4 x 10/100/1000 Mbps RJ45 ports, electrical
2 x 10/100/1000 Mbps slots for 2-port media modules, electrical or optical, with extended temperature range and EN 50155 approval for railway applications

6GK5308-2GG10-2CA2

Media modules

Electrical Media Modules

With 2 x 10/100/1000 Mbps RJ45 ports, electrical

- MM992-2CUC with securing collar and coated PCBs (conformal coating)

6GK5992-2GA00-8FA0

With 2 x 10/100/1000 Mbps M12 ports, electrical

- MM992-2 M12 interface (x-coded) and coated PCBs (conformal coating)

6GK5992-2HA00-0AA0

Optical Media Modules

with 2 x 1000 Mbps SC ports, optical

- MM992-2 multimode, glass, up to 750 m, coated PCBs (conformal coating)

6GK5992-2AL00-8FA0

Accessories

S7-1500 Mounting Kit

Mounting bracket for installation of SCALANCE X-300 on S7-1500 mounting rail

6GK5980-2EA00-0AA1

IE FC Stripping Tool

Preset insulation stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

IE FC RJ45 Plug 180 2 x 2

RJ45 plug connector for Industrial Ethernet with rugged metal housing and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; with 180° cable outlet; for network components and CPs/CPU with Industrial Ethernet interface

- 1 pack = 1 unit

6GK1901-1BB10-2AA0

IE TP Train Cable GP 2x2 (Type C)

6XV1871-2T

4-core, shielded TP installation cable for connection to IE FC outlet RJ45/IE FC RJ45 plug 180/90 for train applications: PROFINET-compliant; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

IE FC RJ45 Plug 4 x 2

RJ45 plug connector for Industrial Ethernet (10/100/1000 Mbps) with rugged metal housing and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; 180° cable outlet; for network components and CPs/CPU with Industrial Ethernet interface

- 1 pack = 1 unit

6GK1901-1BB12-2AA0

IE FC M12 Plug PRO 4x2

M12 plug connector (X-coded, IP65/IP67) that can be assembled in the field, metal enclosure, insulation displacement fast connection method, for SCALANCE W

- 1 unit

6GK1901-0DB30-6AA0

IE M12 Panel Feedthrough 4x2

Control cabinet feedthrough for transition from M12 connection method (X-coded, IP65/IP67) to RJ45 connection method (IP20)

- 1 pack = 5 units

6GK1901-0DM40-2AA5

IE FC M12 Cable Connector PRO 4x2

M12 plug-in connector (X-coded, IP65/IP67, female contact insert) that can be assembled in the field, metal housing, insulation displacement fast connection method

- 1 unit

6GK1901-0DB40-6AA0

IE Train Cable GP 4x2

6XV1878-2T

8-core, shielded TP installation cable for connection to IE FC M12 Plug PRO 4x2 for use in railway applications; with railway approval; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

IE Connecting Cable IE FC RJ45 Plug-180/IE FC RJ45 Plug-180

Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two IE FC RJ45 Plug-180, IP20 degree of protection;

Length:

- 1.0 m
- 5.0 m
- 10.0 m

6XV1871-5BH10
6XV1871-5BH50
6XV1871-5BN10

IE SC RJ POF Plug

6GK1900-0MB00-0AC0

Screw connector for local assembly on POF FOC (1 pack = 20 units)

POF Standard Cable GP 980/1000

6XV1874-2A

POF standard cable for fixed installation indoors with PVC sheath; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m.

IE SC RJ PCF Plug

6GK1900-0NB00-0AC0

Screw connector for local assembly on PCF FOC (1 pack = 10 units)

PCF Standard Cable GP 200/230

6XV1861-2A

Standard cable, fan-out, sold by the meter; Maximum delivery unit 2000 m; minimum order quantity 20 m

FC FO Termination Kit Termination kit for local assembly of FC SC and FC BFOC connectors on FC FO standard cable; contains a stripping tool, Kevlar cutters, fiber breaking tool and microscope.	6GK1900-1GL00-0AA0	Pre-Assembled FO Patch Cables Multimode	
FC BFOC Plug Screw connector for local assembly on FC FOC; (1 pack = 20 units + cleaning cloths)	6GK1900-1GB00-0AC0	MM FO Cord SC/LC With one SC duplex connector and one LC duplex connector, 1 m	6XV1843-5EH10-0CA0
FC SC Plug Screw connector for local assembly on FC FOC; (1 pack = 10 units duplex plugs + cleaning cloths)	6GK1900-1LB00-0AC0	MM FO Cord SC/BFOC With one SC duplex connector and two BFOC connectors, 1 m	6XV1843-5EH10-0CB0
FC FO Standard Cable GP 62.5/200/230 FC FO standard cable for fixed installation indoors with PVC sheath; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m	6XV1847-2A	MM FO Cord SC/SC With two SC duplex connectors, 1 m	6XV1843-5EH10-0CC0
Multimode FO BFOC Connector Set For FO standard cable (50/125/1400), FO ground cable (50/125/1400), flexible FO trailing cable, INDOOR FO cable (62.5/125/900), 20 units	6GK1901-0DA20-0AA0	Single-mode SM FO Cord SC/LC With one SC duplex connector and one LC duplex connector, 1 m	6XV1843-5FH10-0CA0
Multi-mode FO SC Duplex Connector Set For FO standard cable (50/125/1400), FO ground cable (50/125/1400), flexible FO trailing cable, INDOOR FO cable (62.5/125/900), 10 units	6GK1901-0LB10-2AA0	SM FO Cord SC/BFOC With one SC duplex connector and two BFOC connectors, 1 m	6XV1843-5FH10-0CB0
LC Plug MM²	6GK1901-0RB10-2AB0	SM FO Cord SC/SC With two SC duplex connectors, 1 m	6XV1843-5FH10-0CC0
FO Standard Cable GP 50/125/1400^{1) 2)} Multimode cable sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m	6XV1873-2A	IE TP Cord RJ45/RJ45 TP cable 4 x 2 with two RJ45 connectors • 1 m • 6 m • 10 m	6XV1870-3QH10 6XV1870-3QH60 6XV1870-3QN10
		Screw-Type Terminal Block For SCALANCE X/W/S • 2-pole for signaling contact (24 V DC) 1 pack = 5 units • 4-pole for power supply (24 V DC) 1 pack = 5 units	6GK5980-0BB00-0AA5 6GK5980-1DB00-0AA5
		C-PLUG Removable data storage medium (conformal coating) for easy replacement of devices under fault conditions; for recording configuration data or engineering and application data; can be used in SIMATIC NET products with C-PLUG slot	6GK1900-0AQ00

¹⁾ Special fiber-optic cables, lengths and accessories available on request

²⁾ Special tools and specially trained personnel are required for assembling glass FOC

Network Components

SCALANCE X – Industrial Ethernet Switches

SCALANCE XR324-4M PoE TS / SCALANCE XR324-4M EEC / SCALANCE XR324-12M TS

Overview

SCALANCE XR324-4M PoE TS

SCALANCE XR324-4M EEC

SCALANCE XR324-12M TS

- Fast media redundancy through integrated redundancy manager both for Gigabit Ethernet (with SCALANCE X-300, X-400) and Fast Ethernet (e.g. in combination with SCALANCE X-200 switches)
- Seamless integration of automation networks in existing corporate networks thanks to support of a large number of IT standard functions (VLANs, IGMP-Snooping/Querier, STP/RSTP, Link Aggregation, Quality of Service)
- Redundant integration in higher-level networks thanks to support of standardized redundancy procedures (Spanning Tree Protocol/Rapid Reconfiguration Spanning Tree Protocol/MRP)
- Remote diagnostics by means of PROFINET diagnostics, web browser, CLI or SNMP

SCALANCE XR324-4M PoE TS

The SCALANCE XR-300PoE Industrial Ethernet switches are partly modular, high-performance, industry-standard switches for setup of electrical and/or optical line, ring and star structures with transmission rates of 10/100/1000 Mbps, designed for installation in 19" control cabinets

- Up to 24 electrical and/or optical interfaces (10/100/1000 Mbps), of which 16 are integrated RJ45 ports, eight of which are PoE-capable; up to four electrical and/or optical 2-port media modules can also be inserted in the media module slots of the basic device.

SCALANCE XR324-4M EEC

The SCALANCE XR-300EEC (Enhanced Environmental Conditions) industrial Ethernet switches are partly modular, high-performance, industry-standard switches for the construction of electrical and/or optical line, ring and star topologies at data transfer rates of 10/100/1000 Mbps, designed for installation in 19" control cabinets.

- Up to 24 electrical and/or optical interfaces (10/100/1000 Mbps), of which 16 are integral RJ45 ports; up to four electrical and/or optical 2-port media modules can also be inserted in the media module slots of the basic device

SCALANCE XR324-12M TS

The SCALANCE XR-300 Industrial Ethernet switches are fully modular, high-performance, industry-standard switches for setup of electrical and optical line, ring and star structures with transmission rates of 10/100/1000 Mbps, designed for installation in 19" control cabinets.

- Up to 24 electrical and/or optical interfaces (10/100/1000 Mbps); up to 12 electrical and/or optical 2-port media modules can be inserted at any position in the basic device

Benefits

- Unlimited flexibility for network expansions (e.g. more terminals) or upgrade (e.g. switching from copper to fiber-optic cable) and reduction of stock keeping costs due to the modular configuration with port modules
- High availability of the network thanks to
 - Redundant power supply
 - Redundant network structures based on fiber-optic or twisted pair cable (redundancy manager, standby function and STP/RSTP integrated)
 - Easy device replacement by means of plug-in C-PLUG removable data storage medium
 - Very fast reconfiguration of the network in event of a fault
- Lower susceptibility to failure and higher availability of the plant networking due to locking of the RJ45 FastConnect plug connectors in place in the securing collar of the RJ45 port modules
- Protection of investment through integration in existing network management systems by means of standardized SNMP access
- Space savings in control cabinet due to flexible cable outlet on the front or rear of the device

SCALANCE XR324-4M PoE TS

- No need for additional power supply units and cabling for terminal devices due to PoE power supply

Technical specifications

Article number	6GK5324-4QG00-1CR2
Product type designation	SCALANCE XR324-4M PoE TS
Transmission rate	
Transmission rate	10 Mbps, 100 Mbps, 1 000 Mbps
Integrated interfaces for communication	
Number of electrical connections	
• for network components or data terminal equipment	16
• with Power-over-Ethernet for network components or terminal equipment	8
Number of 100 Mbps ST(BFOC) ports	
• for multimode	8
Number of 100 Mbps SC ports	
• for multimode	8
Number of 1000 Mbps LC ports	
• for multimode	8
• for single-mode (LD)	8
Other interfaces	
Number of electrical connections	
• for operation panel	1
• for signaling contact	1
• for media module	4
• for power supply	1
• for redundant power supply	0
Type of electrical connection	
• for operation panel	RJ11 port
• for signaling contact	2-pin terminal block
• for power supply	4-pin terminal block
Type of removable data storage medium	
• C-PLUG	Yes
Signal inputs/outputs	
Operating current of the signaling contacts	
• with DC, nominal value	24 V
Operating current of the signaling contacts	
• with DC, maximum	0.1 A
Supply voltage, current consumption, power loss	
Type of power supply: redundant power supply	No
Type of supply voltage	DC
Supply voltage	
• External	24 V
• External	19.2 ... 28.8 V
Product component: fusing at power supply input	Yes
Type of fusing at input for supply voltage	F 5 A / 250 V
Current consumption, maximum	4.2 A
Power loss [W]	
• with 24 V DC	46 W
Permissible ambient conditions	
Ambient temperature	
• during operation	-40 ... +70 °C
• during storage	-40 ... +85 °C
• during transport	-40 ... +85 °C
• Remark	In the case of vertical mounting position, the maximum operating temperature is reduced to 60 °C

Article number	6GK5324-4QG00-1CR2
Product type designation	SCALANCE XR324-4M PoE TS
Relative humidity	
• Relative humidity at 25 °C, without condensation during operation, maximum	95%
IP degree of protection	
	IP20
Design, dimensions and weights	
Model	19-inch rack
Number of modular height units for 19-inch cabinet	1
Width	449 mm
Height	43.6 mm
Depth	305 mm
Net weight	6.8 kg
Product property: conformal coating	Yes
Mounting type	For 19-inch rack mounting, 4-point fixing is required for marine engineering applications
• 19-inch installation	Yes
• 35 mm DIN rail mounting	No
• Wall mounting	No
• S7-300 rail mounting	No
• S7-1500 rail mounting	No
Product properties, functions, components - General	
Cascading with redundant ring and reconfiguration time of < 0.3 s	100
Cascading with star structure	Any (only dependent on signal propagation time)
Product functions - Management, configuration, engineering	
Product function	
• CLI	Yes
• Web-based management	Yes
• MIB support	Yes
• TRAPs via e-mail	Yes
• Configuration with STEP 7	Yes
• RMON	Yes
• Port mirroring	Yes
• Multiport mirroring	Yes
• CoS	Yes
• PROFINET IO diagnostics	Yes
• Switch-managed	Yes
Protocol is supported	
• Telnet	Yes
• HTTP	Yes
• HTTPS	Yes
• TFTP	Yes
• FTP	Yes
• BOOTP	Yes
• GMRP	Yes
• DCP	Yes
• LLDP	Yes
• IGMP (snooping/querier)	Yes
Identification & Maintenance function	
• I&M0 - Device-specific information	Yes
• I&M1 - Higher level designation/location designation	Yes
Protocol is supported	
• SNMP v1	Yes
• SNMP v2	Yes
• SNMP v3	Yes

Product function	
• DHCP client	Yes
• DHCP option 82	Yes
• DHCP option 66	Yes
• DHCP option 67	Yes
Product functions - Redundancy	
Product function	
• Ring redundancy	Yes
• High Speed Redundancy Protocol (HRP)	Yes
• High Speed Redundancy Protocol (HRP) with redundancy manager	Yes
• High Speed Redundancy Protocol (HRP) with standby redundancy	Yes
Media Redundancy Protocol (MRP) is supported	Yes
Product function	
• Media Redundancy Protocol (MRP) with redundancy manager	Yes
• Redundancy procedure STP	Yes
• Redundancy procedure RSTP	Yes
• Redundancy procedure MSTP	Yes
• Passive listening	Yes
Protocol is supported	
• STP/RSTP	Yes
• STP	Yes
• RSTP	Yes
• MSTP	No
• RSTP Big Network Support	Yes
• LACP	Yes
Product functions - Security	
Product function	
• ACL - MAC-based	Yes
• ACL - Port/MAC-based	Yes
• IEEE 802.1X (RADIUS)	Yes
• Broadcast/Multicast/Unicast Limiter	Yes
• Broadcast blocking	Yes
Protocol is supported	
• SSH	Yes

Article number	6GK5324-4QG00-1CR2
Product type designation	SCALANCE XR324-4M PoE TS
Product functions - Time of day	
Product function	
• SICLOCK support	Yes
Protocol is supported	
• NTP	Yes
• SNTP	Yes
• IEEE 1588 profile default	Yes
Standards, specifications, approvals	
Standard	
• for FM	FM3611: Class 1, Division 2, Group A, B, C, D / T4, Class 1, Zone 2, Group IIC, T4
• for hazardous zone	EN 60079-0: 2006, EN 60079-15: 2005, II 3 G Ex nA II T4 KEMA 07 ATEX 0145X
• for safety, from CSA and UL	UL 60950-1, CSA C22.2 No. 60950-1
• for hazardous zone, from CSA and UL	UL 1604 and UL 2279-15 (Hazardous Location), CSA C22.2 No. 213-M1987, Class 1 / Division 2 / Group A, B, C, D / T4, Class 1 / Zone 2 / Group IIC / T4
• for emitted interference	EN 61000-6-4: 2007 (Class A)
• for noise immunity	EN 61000-6-2: 2006
Standards, specifications, approvals - CE	
Proof of suitability, CE mark	Yes
Standards, specifications, approvals - Other	
Proof of suitability	EN 61000-6-2: 2006, EN 61000-6-4:2007
• C-Tick	Yes
• Railway application in accordance with EN 50155	Yes
• Railway application in accordance with EN 50121-4	Yes
• Fire protection in accordance with EN 45545-2	
• KC approval	No
Standards, specifications, approvals - Product conformity	
MTBF at 40 °C

Network Components

SCALANCE X – Industrial Ethernet Switches

SCALANCE XR324-4M PoE TS / SCALANCE XR324-4M EEC / SCALANCE XR324-12M TS

Article number	6GK5324-0GG00-1CR2
Product type designation	SCALANCE XR324-12M TS
Transmission rate	
Transmission rate	10 Mbps, 100 Mbps, 1 000 Mbps
Integrated interfaces for communication	
Number of electrical connections	
• for network components or data terminal equipment	
• with Power-over-Ethernet for network components or terminal equipment	
Number of 100 Mbps ST(BFOC) ports	
• for multimode	24
Number of 100 Mbps SC ports	
• for multimode	24
Number of 1000 Mbps LC ports	
• for multimode	24
• for single-mode (LD)	24
Other interfaces	
Number of electrical connections	
• for operation panel	1
• for signaling contact	1
• for media module	12
• for power supply	1
• for redundant power supply	1
Type of electrical connection	
• for operation panel	RJ11 port
• for signaling contact	2-pin terminal block
• for power supply	4-pin terminal block
Type of removable data storage medium	
• C-PLUG	Yes
Signal inputs/outputs	
Operating current of the signaling contacts	
• with DC, nominal value	24 V
Operating current of the signaling contacts	
• with DC, maximum	0.1 A
Supply voltage, current consumption, power loss	
Type of power supply: redundant power supply	No
Type of supply voltage	DC
Supply voltage	
• External	24 V
• External	19.2 ... 28.8 V
Product component: fusing at power supply input	Yes
Type of fusing at input for supply voltage	F 5 A / 125 V
Current consumption, maximum	1.8 A
Power loss [W]	
• with 24 V DC	44 W
Permissible ambient conditions	
Ambient temperature	
• during operation	-40 ... +70 °C
• during storage	-40 ... +85 °C
• during transport	-40 ... +85 °C
• Remark	Reduced operating temperature through use of media modules (-40 to +70 °C) or SFP plug-in transceivers (-40 to +60 °C). In the case of vertical mounting position, the maximum operating temperature is reduced to +50 °C.

Article number	6GK5324-0GG00-1CR2
Product type designation	SCALANCE XR324-12M TS
Relative humidity	
• Relative humidity at 25 °C, without condensation during operation, maximum	95%
IP degree of protection	IP20
Design, dimensions and weights	
Model	19-inch rack
Number of modular height units for 19-inch cabinet	1
Width	483 mm
Height	44 mm
Depth	305 mm
Net weight	5.5 kg
Product property: conformal coating	Yes
Mounting type	For 19-inch rack mounting, 4-point fixing is required for marine engineering applications
• 19-inch installation	Yes
• 35 mm DIN rail mounting	No
• Wall mounting	No
• S7-300 rail mounting	No
• S7-1500 rail mounting	No
Product properties, functions, components - General	
Cascading with redundant ring and reconfiguration time of < 0.3 s	100
Cascading with star structure	Any (only dependent on signal propagation time)
Product functions - Management, configuration, engineering	
Product function	
• CLI	Yes
• Web-based management	Yes
• MIB support	Yes
• TRAPs via e-mail	Yes
• Configuration with STEP 7	Yes
• RMON	Yes
• Port mirroring	Yes
• Multiport mirroring	Yes
• CoS	Yes
• PROFINET IO diagnostics	Yes
• Switch-managed	Yes
Protocol is supported	
• Telnet	Yes
• HTTP	Yes
• HTTPS	Yes
• TFTP	Yes
• FTP	Yes
• BOOTP	Yes
• GMRP	Yes
• DCP	Yes
• LLDP	Yes
• IGMP (snooping/querier)	Yes

Selection and ordering data

Industrial Ethernet switches SCALANCE XR324-4M PoE

Partially modular 19" Industrial Ethernet switches for setup of electrical and optical Industrial Ethernet networks; eight PoE-capable ports, can be optionally equipped with optical or electrical 2-port media modules; All ports support Gigabit Ethernet (blocking), integrated redundancy manager, RSTP, RMON, IGMP-Snooping/Querier, network management via SNMP, PROFINET, and web server
16 x 10/100/1000 Mbps RJ45 ports of which eight support PoE;
4 x 10/100/1000 Mbps slots for 2-port media modules, electrical or optical

SCALANCE XR324-4M PoE TS

For railway applications (EN 50155 approval); 24 V DC power supply
• Data cable outlet at front

6GK5324-4QG00-1CR2

SCALANCE XR324-4M EEC Industrial Ethernet switches

Partially modular 19" Industrial Ethernet switches for establishing electrical and optical Industrial Ethernet networks; all ports can be optionally equipped with optical or electrical 2-port media modules; All ports support Gigabit Ethernet (blocking), integrated redundancy manager, RSTP, RMON, IGMP snooping querier, network management via SNMP, PROFINET and Web server
16 x 10/100/1000 Mbps RJ45 ports, electrical 4 x 10/100/1000 Mbps slots for 2-port media modules, electrical or optical

SCALANCE XR324-4M EEC

Power supply 1 x 24 V DC

- Front data cable outlet, rear power supply
- Rear data cable outlet, front power supply

6GK5324-4GG00-1ER2

6GK5324-4GG00-1JR2

Power supply 1 x 100-240 AC/
60-250 V DC

- Front data cable outlet, rear power supply
- Rear data cable outlet, front power supply

6GK5324-4GG00-3ER2

6GK5324-4GG00-3JR2

Power supply 2 x 24 V DC

- Front data cable outlet, rear power supply
- Rear data cable outlet, front power supply

6GK5324-4GG00-2ER2

6GK5324-4GG00-2JR2

Power supply 2 x 100-240 AC/
60-250 V DC

- Front data cable outlet, rear power supply
- Rear data cable outlet, front power supply

6GK5324-4GG00-4ER2

6GK5324-4GG00-4JR2

Industrial Ethernet switches SCALANCE XR324-12M TS

Fully modular 19" Industrial Ethernet switches for setup of electrical and/or optical Industrial Ethernet networks; all ports can optionally be equipped with optical or electrical 2-port media modules; All ports support Gigabit Ethernet (blocking), integrated redundancy manager, RSTP, RMON, IGMP-Snooping/Querier, network management via SNMP, PROFINET, and web server
12 x 10/100/1000 Mbps slots for 2-port media modules, electrical or optical

SCALANCE XR324-12M TS

For railway applications (EN 50155 approval)
24 V DC power supply

- Data cable outlet at front

6GK5324-0GG00-1CR2

Media modules

Electrical Media Modules

With 2 x 10/100/1000 Mbps RJ45 ports, electrical

- MM992-2CUC with securing collar and coated PCBs (conformal coating)

6GK5992-2GA00-8FA0

With 2 x 10/100/1000 Mbps M12 ports, electrical

- MM992-2M12 interface (x-coded) and coated PCBs (conformal coating)

6GK5992-2HA00-0AA0

Optical Media Modules

With 2 x 1000 Mbps SC ports, optical

- MM992-2 multi-mode, glass, up to 750 m, coated PCBs (conformal coating)

6GK5992-2AL00-8FA0

Accessories

IE FC Stripping Tool

Preset insulation stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

IE FC RJ45 Plug 180 2 x 2

RJ45 plug connector for Industrial Ethernet with rugged metal housing and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; with 180° cable outlet; for network components and CPs/CPUs with Industrial Ethernet interface

- 1 pack = 1 unit

6GK1901-1BB10-2AA0

IE TP Train Cable GP 2x2 (Type C)

4-core, shielded TP installation cable for connection to IE FC outlet RJ45/IE FC RJ45 plug 180/90 for train applications: PROFINET-compliant; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

SCALANCE XM-400 managed

Overview

The new SCALANCE XM-400 product range comprises modular Industrial Ethernet switches, expandable by various port extenders and plug-in transceivers for a maximum configuration with up to 24 ports. It supports 10/100/1000 Mbit technology for various transmission media (twisted pair, fiber optic) and increased port requirements. Thanks to the flexible, modular design, the XM-400 product line is also designed for future requirements and can be adapted to the relevant task.

- Combo ports for the flexible use of interfaces: A combo port consists of an electric port and an SFP slot. Only one of the two ports can ever be active. If an SFP plug-in transceiver is inserted, the electric port is deactivated
- Fast mobile diagnosis with smartphone/tablet thanks to WLAN and NFC: Fast access to the web-based management of the SCALANCE XM-400 via mobile websites. The function can be started using existing WLAN and NFC (Near Field Communication)
- High-speed media redundancy through integral redundancy manager even for large networks, for both Gigabit Ethernet and Fast Ethernet
- Seamless integration of automation networks into existing corporate networks thanks to support for a host of IT standards: Establishment of virtual networks (VLANs)
- Integration into higher-level enterprise networks thanks to support for standardized redundancy procedures (Rapid Spanning Tree Protocol, Link Aggregation)
- By learning the multicast sources and destinations (Internet Group Management Protocol (IGMP) Snooping), SCALANCE XM-400 switches can also filter multicast data traffic and thus limit the load on the network
- Optional activation of the Layer 3 functions for IPv4 and IPv6 in connection with the KEY-PLUG XM-400
- Creation of IP subnets and IP router communication by means of Layer 3 switching (IP routing)
 - Static routing
 - Dynamic routing OSPF (Open Shortest Path First) and RIPv2 (Routing Information Protocol)
 - Redundant routing VRRP (Virtual Router Redundancy Protocol)

Product versions - basic devices

XM408-8C

- 8 ports available in total, of which
 - up to 8 x 10/100/1000 Mbit/s are RJ45 ports with retaining collars
 - up to 8 x SFP slots (combo ports), 100 or 1000 Mbit/s
- Two port extenders with 8 ports each can be connected to implement a maximum of 24 ports in one switch

Technical specifications

Article number	6GK5408-8GS00-2AM2	Article number	6GK5408-8GS00-2AM2
Transmission rate		Number of extender expansion interfaces	2
Transfer rate	10 Mbit/s, 100 Mbit/s, 1 000 Mbit/s	design of the removable storage	
Number of ports maximum	24	• C-PLUG/KEY-PLUG	Yes
Interfaces for communication maximum configuration for modular devices		Product feature hot-swappable interface modules	Yes
Number of electrical ports maximum	24	Signal-Inputs/outputs	
Number of electrical ports with PoE maximum	16	Operating voltage of the signaling contacts	
Number of optical ports maximum	24	• at DC Rated value	24 V
Interfaces for communication integrated		Operating current of the signaling contacts	
Number of electrical connections		• at DC maximum	0.1 A
• for network components or terminal equipment	8; RJ45 with securing collar	Supply voltage, current consumption, power loss	
Number of 10/100/1000 Mbit/s RJ45 ports Integrated	8	Type of voltage supply redundant power supply unit	No
• with securing collar		Type of voltage of the supply voltage	DC
Number of electrical connections		Supply voltage	
• for SFP	8; 100 Mbit/s or 1000 Mbit/s SFP plug-in transceiver	• external	24 V
Number of combo ports with RJ45 interface for optical plug-in transceiver	8; 100 Mbit/s or 1000 Mbit/s SFP plug-in transceiver	• external minimum	19.2 V
Number of connectable extender modules	2	• external maximum	28.8 V
Interfaces for communication pluggable maximum		Product component fusing at power supply input	Yes
Number of 10/100/1000 Mbit/s RJ45 ports		Fuse protection type at input for supply voltage	F 15 A / 125 V
• with securing collar	16	Consumed current maximum	2 A
• with securing collar with PoE	16	Power loss [W]	
Number of 100 Mbit/s LC ports		• at DC at 24 V	48 W
• for multimode	24	Supplied active power of PSE with PoE	
• for single mode (LD)	24	• per port maximum	30 W
• for single mode (LH+)	24	• total maximum	360 W
• for single mode (ELH200)	24	Permitted ambient conditions	
Number of 1000 Mbit/s LC ports		Ambient temperature	
• for multimode	24	• during operation	-40 ... +70 °C
• for single mode (LD)	24	• during storage	-40 ... +85 °C
• for single mode (LH)	24	• during transport	-40 ... +85 °C
• for single mode (LH+)	24	Relative humidity	
• for single mode (ELH)	24	• at 25 °C without condensation during operation maximum	95 %
Number of electrical connections		Protection class IP	IP20
• for SFP	24; 100 Mbit/s or 1000 Mbit/s SFP plug-in transceiver	Design, dimensions and weight	
Interfaces others		Design	modular
Number of electrical connections		Width	140 mm
• for operator console	1	Height	147 mm
• for management purposes	1	Depth	125 mm
• for signaling contact	1	Net weight	1.15 kg
• for power supply	1	Mounting type	
• for redundant voltage supply	1	• 19-inch installation	No
Type of electrical connection		• 35 mm DIN rail mounting	Yes
• for operator console	RJ11	• wall mounting	No
• for management purposes	RJ45	• S7-300 rail mounting	Yes
• for signaling contact	2-pole terminal block	• S7-1500 rail mounting	Yes
• for power supply	4-pole terminal block	Product properties, functions, components general	
		Cascading in cases of star topology	any (depending only on signal propagation time)

KEY-PLUG XM-400

Swap medium for expansion of the device functions with IP routing (Layer 3), for integration of configuration data and easy replacement of SCALANCE XM-400 in the event of a fault

6GK5904-0PA00

IE FC Stripping Tool

Pre-adjusted stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

IE FC RJ45 Plug 180 2 x 2

180° cable outlet; for network components and CPs/CPUs with Industrial Ethernet interface

- 1 pack = 1 unit

6GK1901-1BB10-2AA0

IE FC TP Standard Cable GP 2 x 2 (Type A)

4-core, shielded TP installation cable for connection to IE FC Outlet RJ45/IE FC RJ45 Plug; PROFINET-compliant; with UL approval; sold by the meter; max. length 1000 m; minimum order 20 m

6XV1840-2AH10

IE FC RJ45 Plug 4 x 2

IE FC RJ45 plug 180 4 x 2; RJ45 connector; Cat6A; (10/100/1000/10000 Mbps) with rugged metal enclosure; FC connection method; for IE FC cable 4 x 2 (AWG24); 180° cable outlet

- 1 pack = 1 unit

6GK1901-1BB12-2AA0

IE FC TP Standard Cable GP 4 x 2

8-core, shielded TP installation cable for universal applications; with UL approval; sold by the meter;

max. length per delivery unit 1000 m, minimum order 20 m

- AWG24, for connecting to IE FC RJ45 Plug 4 x 2, IE FC M12 Plug PRO 4 x 2

6XV1878-2A

IE Connecting Cable IE FC RJ45 Plug-180/IE FC RJ45 Plug-180

Preassembled IE FC TP Trailing Cable GP 2 x 2 (PROFINET type C) with two IE FC RJ45 Plug-180, IP20 degree of protection

Length:

- 1.0 m
- 5.0 m
- 10.0 m

6XV1871-5BH50

6XV1871-5BN10

FC FO Termination Kit

Termination Kit for local assembly of FC SC and FC BFOC connectors to FC FO Standard Cable, comprising a stripping tool, Kevlar cutters, fiber breaking tool and microscope

6GK1900-1GL00-0AA0

FC BFOC Plug

Screw connector for on-site assembly on FC fiber-optic cable; (1 pack = 20 units + cleaning cloths)

6GK1900-1GB00-0AC0

FC SC Plug

Screw connector for on-site assembly on FC fiber-optic cable; (1 pack = 10 duplex plugs + cleaning cloths)

6GK1900-1LB00-0AC0

FC FO Standard Cable GP 62.5/200/230

FC FO Standard Cable for fixed routing indoors with PVC sheath; sold by the meter; max. length 1000 m; minimum order 20 m

6XV1847-2A

Multi-mode FO BFOC connector set

For FO Standard Cable (50/125/1400), FO Ground Cable (50/125/1400), flexible FO Trailing Cable, INDOOR FC Cable (62.5/125/900), 20 units

6GK1901-0DA20-0AA0

Multi-mode FO SC duplex connector set

For FO Standard Cable (50/125/1400), FO Ground Cable (50/125/1400), flexible FO Trailing Cable, INDOOR FC Cable (62.5/125/900), 10 units

6GK1901-0LB10-2AA0

LC Plug MM²⁾

6GK1901-0RB10-2AB0

FO Standard Cable GP 50/125/1400^{1) 2)}

Multimode cable, sold by the meter; max. length 1000 m; minimum order 20 m

6XV1873-2A

Pre-assembled FO patch cables

Multimode

MM FO Cord SC/LC

With one SC duplex connector and one LC duplex connector, 1 m

6XV1843-5EH10-0CA0

MM FO Cord SC/BFOC

With one SC duplex connector and two BFOC connectors, 1 m

6XV1843-5EH10-0CB0

¹⁾ Special fiber-optic cables; lengths and accessories available on request

²⁾ Special tools and trained personnel are required for pre-assembling glass fiber-optic cables

More information

Selection tools:

To assist in selecting the right Industrial Ethernet switches as well as configuration of modular variants, the SIMATIC NET Selection Tool and the TIA Selection Tool are available at:

- www.siemens.com/snst-standalone
- www.siemens.com/tia-selection-tool-standalone

Overview

- Port extender for flexible expansion to up to 24 ports, can be connected to the SCALANCE XM-400 Industrial Ethernet switches
- Each port extender has eight ports
- There are three different versions, with different connections

Product versions

PE 408PoE

- 8 x 10/100/1000 Mbps RJ45 ports with retaining collar with PoE according to IEEE802.3 Type 1 and Type 2
- Extended operating temperature range from -40 °C to +60 °C
- A separate power supply is required for PoE power (SCALANCE PS924 PoE or SCALANCE PS9230 PoE are available)

Benefits

- Cost savings due to the modular system. The modular system allows the setup of electrical and optical Industrial Ethernet networks and the network topology and port type to easily be adapted to the plant structure and expanded at any time
- Integrated industrial network for data, speech, and video
- Mounting of a port extender on the basic device or another port extender without tools
- High performance due to Gigabit ports

Design

- Extender connection on the left for connection to a SCALANCE XM-400 basic device or a port extender
- Extender connection on the right for connecting another port extender
- 8 ports for Ethernet connection, different design depending on the version
- LEDs to display the port and device status
- 2 terminal blocks for Power-over-Ethernet supply with 54 V DC input (only PE408PoE)
- Operating temperature range from -40 °C to +70 °C
- IP20 degree of protection

Network Components

Communication for PC-based systems

CP 1604

Overview

ISO	TCP/UDP	PN	MRP	OPC	PG/OP	S7/S5	IT
	●	●	●				

- Integral 4-port real-time switch
- High performance through direct memory access
- Integration in network management systems through the support of SNMP
- Comprehensive diagnostics possibilities for installation, start-up and operation of the module
- Powerful configuration tools are part of the scope of delivery of the module
- The CP 1604 EEC (Enhanced Environmental Conditions) is suitable for use in extremely harsh industrial environments

Benefits

- Ideally suited for design of small local networks through integral 4-port real-time switch
- Simple portability to various operating system environments using DK-16xx PN IO development kit
- Uncrossed connecting cables can be used due to the integrated Autocrossover function
- Suitable for railway applications acc. to EN 50155 / IEC 60571 (EEC variant 6GK1160-4AT01 only)

Application

The CP 1604 provides high-performance support for control tasks on the PC (PC based Control, Numeric Control, Robot Control).

With IRT (Isochronous Real-Time), the CP is ideally suited to time-critical applications that are in the range of strictly isochronous closed-loop control in the motion control sector.

The integrated 4-port switch supports low-cost system solutions and the configuration of different topologies.

The DK-16xx PN IO development kit enables integration of the module into any operating systems.

The CP 1604 EEC (Enhanced Environmental Conditions) is suitable for use in extremely harsh industrial environments

Design

- Industrial Ethernet (via "Connection Board for CP 1604")
 - Ethernet real-time ASIC ERTEC 400
 - 4 x RJ45 connection
 - Integral 4-port real-time switch for 10/100 Mbit/s Ethernet
 - Half/full duplex
 - Autosensing/Autocrossover/Autonegotiation
- PCI-104-Plus interface:
 - PCI 2.2
 - 32 bits
 - 33 MHz or 66 MHz
 - Installation through PCI standard mechanisms (Plug & Play)
- Host interface/processor:
 - Dual-port RAM onboard
 - Flash for program memory onboard
 - ARM 946 RISK processor (32-bit) onboard for preprocessing
- Power supply:
 - Operating voltage: 5 V through PCI-104
- Size:
 - PCI-104 format

Product versions

CP 1604 EEC (6GK1160-4AT01), version suitable for use in railway applications

- Suitable for use in extreme environmental conditions

Technical specifications

Article number	6GK1160-4AT01
Product type designation	CP 1604 EEC
Transmission rate	
Transfer rate	100 Mbit/s
Interfaces	
Number of electrical connections	
• at the 1st interface acc. to Industrial Ethernet	4
• for power supply	1
Type of electrical connection	
• at the 1st interface acc. to Industrial Ethernet	RJ45 port via connection board
• for power supply	4-pole terminal block through power supply board
Supply voltage, current consumption, power loss	
Type of voltage of the supply voltage	DC
Type of voltage supply optional external supply	Yes
Supply voltage	
• 1 from backplane bus	5 V
• external	
• Note	
Relative symmetrical tolerance at DC	
• at 5 V	5 %
Consumed current	
• 1 from backplane bus at DC maximum	0.8 A
• from external supply voltage at DC at 24 V maximum	
Power loss [W]	4 W
Power loss [W] in switch mode maximum	4.1 W
Permitted ambient conditions	
Ambient temperature	
• during operation	-40 ... +70 °C
• during storage	-20 ... +60 °C
• during transport	-20 ... +60 °C
Relative humidity at 25 °C without condensation during operation maximum	95 %
Protection class IP	IP00

Article number	6GK1160-4AT01
Product type designation	CP 1604 EEC
Design, dimensions and weight	
Module format	PC/104-Plus
Width	90 mm
Height	24 mm
Depth	95 mm
Net weight	110 g
Mounting type	Screw mounting
Number of plug-in cards of same design plug-in per PC station	1
Number of units Note	-
Product functions switch	
Product feature Switch	Yes
Product function switch-managed	No
Product functions Redundancy	
Software for redundancy function required	No
Product function	
• Ring redundancy	Yes
• Redundancy manager	Yes
Protocol is supported Media Redundancy Protocol (MRP)	Yes

Overview

The RUGGEDCOM RM1224 is a small form-factor industrial 4G cellular router with integrated switch, which enables secure and cost effective connections to and from remote applications.

Features

- 4 copper fast Ethernet ports
- Available with LTE-Modem for Europe and North America
- 2 SMA antenna connectors for MIMO and diversity
- Digital in/out (I/O)
- Redundant Power Supply Inputs 24 V DC
- For use at ambient temperatures from -40 °C to +70 °C without the use of fans

Product versions

RUGGEDCOM RM1224

- Small form-factor industrial Ethernet-switch and TCP/IP router with LTE WAN option

Benefits

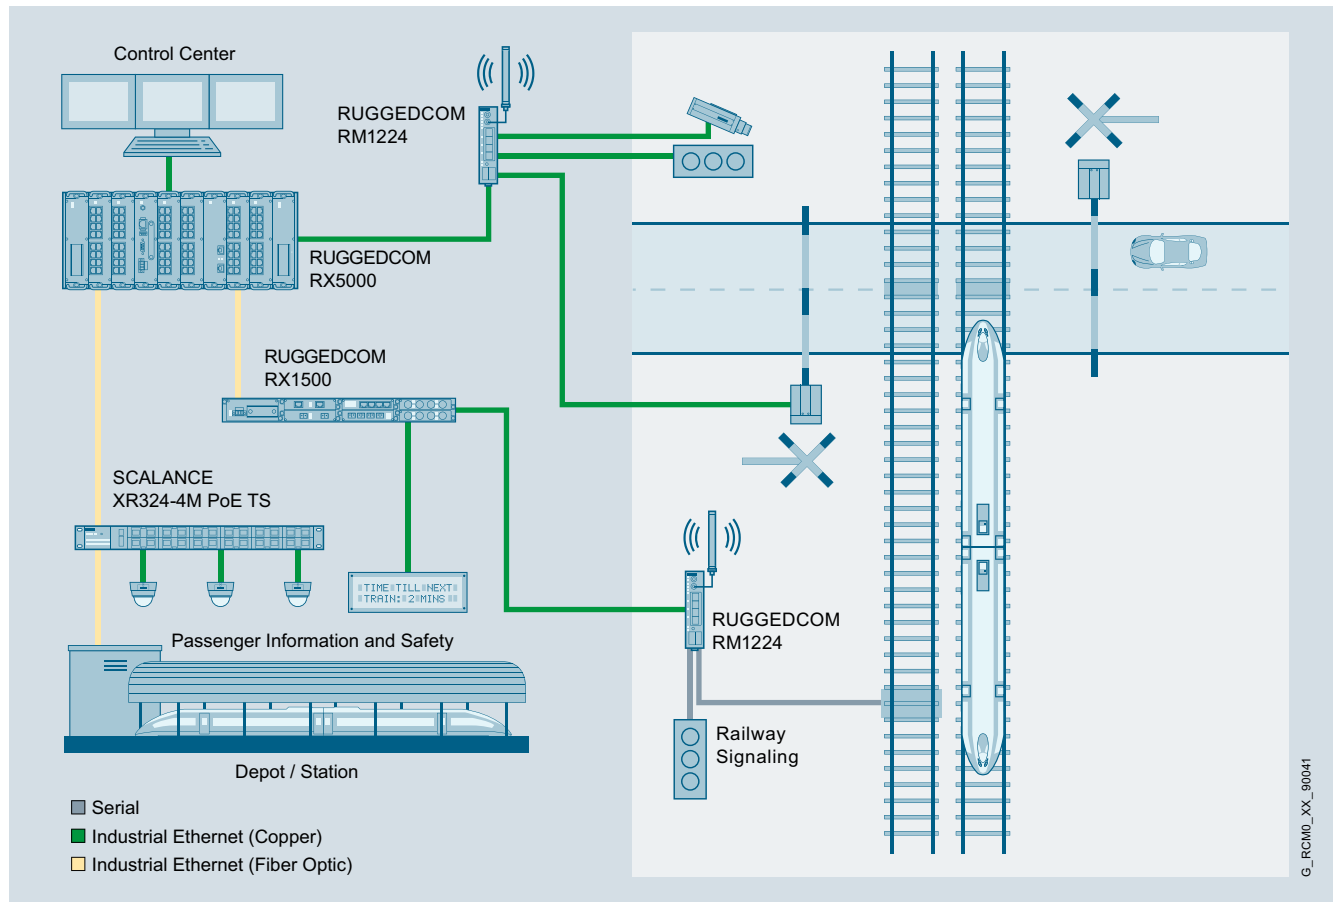

- Economical industrial graded cellular modem designed for space-saving integration in the cabinet
- Two antenna connectors for reliable wireless transmission
- Supports SINEMA Remote Connect
- Built-in Digital I/O which enables push-button VPN connectivity
- Robust plastic housing which fulfills a critical safety requirement in order to avoid using grounding in Mid & Low Voltage installations

Network Components

SCALANCE M / RUGGEDCOM – Mobile Wireless Routers

RUGGEDCOM RM1224

Integration

Redundant connection to end-devices used in conjunction with signaling and monitoring when wireline backhaul is combined with cellular connectivity.

Selection and ordering data

RUGGEDCOM RM1224

The RUGGEDCOM RM1224 is a small form-factor industrial Ethernet-switch and TCP/IP router with 4 copper Ethernet ports, 1 digital I/O, and cellular LTE modem.

Overview

SCALANCE M876-4 is a mobile wireless router for cost-effective and secure connection of Ethernet-based subnets and programmable controllers via mobile networks of the 4th (LTE), 3rd (UMTS) or 2nd (GSM) generation.

SCALANCE M876-4 supports LTE (Long Term Evolution). As a result, high transmission rates of up to 100 Mbps in the downlink and up to 50 Mbps in the uplink are possible (depending on the infrastructure of the mobile wireless provider).

Secure access and communication is ensured by the security functions of the integrated firewall and by VPN tunnels (end-to-end encryption of the communication connection by creation of IPsec tunnels).

Product versions

SCALANCE M876-4 (EU)

- Pentaband LTE with frequency bands 800/900/1800/2100/2600 MHz
- Support of LTE (Downlink: up to 100 Mbps, uplink: up to 50 Mbps)
- Optimized for use in Europe
- Without LTE network, automatic switchover to UMTS (HSPA+) or GSM (EDGE, eGPRS or GPRS mode) data services

SCALANCE M876-4 (NAM)

- Pentaband LTE with frequency bands 700/850/AWS-1 (1700/2100)/1900 MHz
- Support of LTE (Downlink: up to 100 Mbps, uplink: up to 50 Mbps)
- Optimized for use in North America
- Without LTE network, automatic switchover to UMTS (HSPA+) or GSM (EDGE, eGPRS or GPRS mode) data services

TIA Selection Tool:

<http://www.siemens.com/tia-selection-tool>

Overview

Remote antennas increase the reliability of wireless links by optimizing signal reception and emission.

- Used for routers, modems and communications processors for the mobile network standards GSM/GPRS (2G), UMTS (3G), LTE (4G)

Benefits

- Cost-effective connection to devices in remote, difficult-to-access or hostile environments
- Establishment of a reliable mobile network infrastructure through the use of remote antennas, even if the mobile network devices are installed in the control cabinet, for example

Application

Remote antennas optimize transmission and reception conditions and enable use of remote network products in a large number of industrial applications.

In addition to antennas with directional radiation characteristics, omnidirectional antennas concentrate the radio field around the antenna in the shape of a disc. Both designs therefore result in improved radio communication quality.

Technical specifications

Article No.	6GK5896-6MH00-0AA0
Product type designation	Antenna ANT896-6MH
Radio frequencies	
Type of wireless network is supported	GSM, UMTS, LTE
Operating frequency	
• For WLAN in 2.4 GHz frequency band	2.4 ... 2.7 GHz
Operating frequency	700 MHz, 800 MHz, 850 MHz, 900 MHz, 1575.42 MHz, 1700 MHz, 1800 MHz, 1900 MHz, 2100 MHz, 2600 MHz
Electrical specifications	
Impedance	50 ohms
Polarization	Linear vertical
Radiation characteristic	Omnidirectional
Antenna gain compared with the spherical radiator	
• With linear radiation	5 dB
Voltage standing wave ratio (VSWR), max.	2.2
Radiating angle of the antenna	
• Horizontal	360°
Number of electrical connections of the antenna	1
Design of the electrical connection of the antenna	N-connector
Connection version	Female
Transmit power, maximum	100 W; at 50 °C ambient temperature

Article No.	6GK5896-6MH00-0AA0
Product type designation	Antenna ANT896-6MH
Permissible ambient conditions	
Ambient temperature	
• during operation	-40 ... +85 °C
• during storage	-40 ... +85 °C
IP degree of protection	IP69K
Maximum wind load	Survival at 500 km/h
Design, dimensions and weight	
Width	100 mm
Height	40 mm
Depth	145 mm
Net weight	0.488 kg
Mounting type	
• Flat-roof mounting	Yes
• Directly on the device	No
Product properties, functions, components - General	
Product property silicone-free	Yes
Standards, specifications, approvals	
Certificate of suitability	Railway application acc. to DIN5510-2, BS6853, NF-F-16-101, NF-F-16-102
Certificate of suitability	
• RoHS compliance	Yes
• Railway application in accordance with EN 50155	Yes
• Fire protection in accordance with EN 45545-2	Yes
Wireless approval	Current national approvals can be found on the Internet under www.siemens.com/wireless-approvals

E-Mail: juergen.hertlein@siemens.com

Overview

- Industrial Wireless LAN access points for installation in control cabinets or in indoor areas with support of IEEE 802.11a/b/g/h/n and data rates of up to 300 Mbps

Design

- Low-profile, compact aluminum housing, shock and vibration resistant for stringent mechanical requirements
- Special coating of the printed circuit boards (conformal coating)
- Resistant to condensation
- Railroad approval in accordance with EN 50155
- Degree of protection IP30
- For use at ambient temperatures from -30 ... +65 °C
- Support of 2.4 GHz and 5 GHz frequency bands
- 2 x R-SMA sockets for connection of directly mountable and remote antennas
- Optimized antenna placement for 2x2 MIMO technology; antennas do not interfere with each other when mounted directly on the device
- 2 x M12 connections for 10/100 Mbps, one with Power-over-Ethernet according to IEEE 802.3at
- 1 x M12 socket for power supply (24 V DC)
- 1 x PLUG slot (KEY-PLUG/C-PLUG)
- Function LEDs for optical signaling of faults and operating states
- Mounting: Wall, S7-1500 mounting rail, S7-300 mounting rail or 35 mm standard mounting rail
- A wireless card is permanently installed in the device; functional scope can be expanded by using a KEY-PLUG W780 iFeatures

Function

The SCALANCE W774-1 M12 EEC (Extended Environmental Conditions) access points are designed for use in a railway environment. The devices are EN 50155-approved for railway applications and can thus be used for rail traffic. Combined with antennas approved for the rail sector, which are connected via R-SMA antenna connections (female), these products can be used to set up a reliable IWLAN infrastructure.

The devices can be mounted at an optimal location for the wireless link. The housing and the connection plugs are resistant to high shock and vibration loads because all the connections are screwed or locked. The SCALANCE W774 M12 EEC is ideally suited for environments in which a compact size is important. Through its coated printed-circuit boards (conformal coating), the module is resistant to condensation caused, for example, by use in environments with large temperature variations.

SCALANCE W774-1 M12 EEC access points can also be operated as client modules.

Provided that a time delay (several 100 ms), which arises from the roaming defined in IEEE 802.11, is tolerated by all communication stations following a change from one radio cell to another, the communication continues uninterrupted.

For real-time requirements, the SCALANCE W774-1 M12 EEC can be equipped with KEY-PLUG functionality for activating iFeatures.

Type of electrical connection for external antenna(s)	R-SMA (socket)
Product property: external antenna can be mounted directly on device	Yes
Supply voltage, current consumption, power loss	
Type of supply voltage	DC
Supply voltage 1	
• from M12 power connector (A-coded) for redundant power supply	16.8 V
Supply voltage 2	
• from M12 power connector (A-coded) for redundant power supply	31.2 V
Supply voltage	
• from Power-over-Ethernet in accordance with IEEE802.3af for Type 1 and IEEE802.3af	48 V

Article number	6GK5774-1FY00-0TA0 6GK5774-1FY00-0TB0 ¹⁾
Product type designation	SCALANCE W774-1 M12 EEC
Permissible ambient conditions	
Ambient temperature	
• during operation	-30 ... +65 °C
• during storage	-40 ... +85 °C
• during transport	-40 ... +85 °C
Relative humidity at 25 °C, without condensation during operation, maximum	100%
Ambient conditions for operation	When used under explosion protection conditions (Zone 2), the SCALANCE W774-1 M12 EEC product must be installed in an enclosure with at least IP54 degree of protection according to EN 60529 within the jurisdiction of EN 50021.
IP degree of protection	IP30
Design, dimensions and weights	
Width	26 mm
Height	156 mm
Depth	127 mm
Width of housing without antenna	26 mm
Height of housing without antenna	147 mm
Depth of housing without antenna	127 mm
Net weight	0.52 kg
Product property: conformal coating	Yes
Mounting type	Wall mounting only when mounted flat
• S7-300 rail mounting	Yes
• S7-1500 rail mounting	Yes
• Wall mounting	Yes
Radio frequencies	
Operating frequency	
• for WLAN in 2.4 GHz frequency band	2.41 ... 2.48 GHz
• for WLAN in 5 GHz frequency band	4.9 ... 5.8 GHz
Product properties, functions, components - General	
Product function - Access point mode	Yes
Product function - Client mode	Yes
Number of SSIDs	4
Product function	
• Dual client	No
• iPCF access point	Yes; only in combination with the 'KEY-PLUG W780 iFeatures'
• iPCF client	Yes; only in combination with the 'KEY-PLUG W740 iFeatures'
• iPCF-MC access point	No
• iPCF-MC client	Yes; only in combination with the 'KEY-PLUG W740 iFeatures'
Number of iPCF-enabled wireless modules	1
Product function - iREF	No
Number of iREF-enabled wireless modules	0

Selection and ordering data

Access Points

SCALANCE W778-1 M12 EEC

IWLAN access point with built-in wireless interfaces (radio)
IEEE 802.11a/b/g/h/n wireless network with 2.4/5 GHz up to 300 Mbps; 2x M12 max. 100 Mbps; M12 A-coded; plug slot WPA2/802.11i/e;
integrated Power over Ethernet (PoE) 2-port switch; 2 N-CON antenna port, iFeatures support via KEY-PLUG; IP65 degree of protection; redundant 24 V DC; -30 ... 75°C; Conformal Coating; EN 50155; EN45545; scope of delivery: Manuals on CD-ROM, English/German; M12 sealing caps

SCALANCE W778-1 M12 EEC

- Country approvals for operation outside the USA ¹⁾
- Country approvals for operation within the USA ¹⁾

Accessories

KEY-PLUG W780 iFeatures

Removable data storage medium for enabling additional iFeatures, simple device replacement in the event of a fault and storage of configuration data. Can be used in SCALANCE W access points with PLUG compartments

C-plug

Removable data storage medium for simple device replacement in the event of a fault and storage of configuration data; can be used in SIMATIC NET products with PLUG compartment

IE FC M12 plug PRO 2 x 2

M12 connector for on-site assembly (D-coded, IP65/IP67), metal enclosure, FastConnect connection technology, for SCALANCE W778-1 M12

- 1 unit
- 8 units

IE FC standard cable GP 2 x 2 /Type A

4-wire, shielded TP installation cable for connection to IE FC RJ45 outlet/ IE FC RJ45 plug; PROFINET-compatible; with UL approval; sold by the meter; max. length per delivery unit 1 000 m, minimum order quantity 20 m

IE FC stripping tool

Pre-adjusted stripping tool for fast stripping of Industrial Ethernet FC cables

Power M12 Cable Connector PRO

Terminal socket for connection of SCALANCE W700 for 24 V DC supply voltage; 4-pin, A-coded, with assembly instructions, 3 units

Power cable 2 x 0.75

Connecting cable for Power M12 Cable Connector PRO, sold by the meter

N-Connect/SMA female/female panel feedthrough

Cabinet bushing with fastening flange for wall thicknesses up to 5.5 mm, SMA female and N-Connect female connections

N-Connect/N-Connect female/female panel feedthrough

Cabinet bushing for wall thicknesses up to 4.5 mm, two N-Connect female connections

Network Components

SCALANCE W – Industrial Wireless LAN

SCALANCE W786-2 RJ45 for outdoor use

Overview

- Particularly well-suited to applications with high climatic requirements when installed outdoors and in areas accessible to the public

Design

- Rugged, impact-resistant plastic enclosure, shock and vibration-proof for demanding mechanical requirements
- High IP65 degree of protection against dust and water jets
- For use at ambient temperatures from -40 °C to +60 °C
- Resistant to condensation
- Resistant to UV radiation and saltwater spray
- Design for use outdoors
- 3 x R-SMA sockets for the connection of remote antennas (6 x R-SMA sockets or six internal antennas for the variants with two wireless modules)
- Suitable for 2.4 GHz and 5 GHz
- 1 x RJ45 connector for 10/100/1000 Mbit/s and Power-over-Ethernet according to IEEE 802.3at
- 1 x 24 V DC connector, optional operation with 12 to 24 V DC or 100 to 240 V AC with power supply that can be integrated in the device
- 1 x PLUG compartment (KEY-PLUG/C-PLUG)
- Function LEDs for optical signaling of faults/errors and operating statuses
- Resistant to destruction through connections within the device
- Mounting: Wall or, with optional mounting set, on S7 mounting rail, 35 mm standard mounting rail, or on a pole

SCALANCE W786-2 RJ45

- Two radio cards are permanently installed in the device; six internal antennas; functional scope can be expanded by using a KEY-PLUG W780 iFeatures

Product feature external antenna can be mounted directly on device	No
Supply voltage, current consumption, power loss	
Type of voltage of the supply voltage	DC
Supply voltage 1	
• from terminal block	19.2 V
Supply voltage 2	
• from terminal block	28.8 V
Supply voltage	
• from Power-over-Ethernet acc. to IEEE802.3at for type 1 and IEEE802.3af	48 V
• from Power-over-Ethernet acc. to IEEE802.3at for type 2	50 V
• from optional integrable power supply	
- at AC	100 ... 240 V
- at DC	12 ... 24 V
Consumed current	
• at DC at 24 V typical	0.63 A
• at AC at 230 V typical	0.07 A
• with Power-over-Ethernet according to IEEE802.3at for type 1 and IEEE802.3af typical	0.22 A

Accessories

KEY-PLUG W780 iFeatures

Swap medium for enabling additional iFeatures, for simple device replacement if a fault occurs and for storage of configuration data; Can be used in SCALANCE W access points with PLUG compartment

6GK5907-8PA00

C-PLUG

Swap medium for simple replacement of devices in the event of a fault; for storing configuration data; can be used in SIMATIC NET products with PLUG compartment

6GK1900-0AB00

Power supply PS791-2DC

24 V DC power supply for installation in SCALANCE W786 products; operating instructions in German/English

6GK5791-2DC00-0AA0

Power supply PS791-2AC

110 V AC to 230 V AC power supply for installation in the SCALANCE W786 products; operating instructions in German/English

6GK5791-2AC00-0AA0

MS1 mounting set

Mounting set for fixing SCALANCE W786 products to an S7-300 mounting rail or a 35 mm standard DIN rail

6GK5798-8MG00-0AA0

IE FC RJ45 Plug 4 x 2

RJ45 connector for Industrial Ethernet (10/100/1 000 Mbit/s) with a sturdy metal enclosure and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; 180° cable outlet; for network components and CPs/CPUs with Industrial Ethernet interface

- 1 pack = 1 unit

Network Components

SCALANCE W – Industrial Wireless LAN

SCALANCE W788-2 M12 EEC

Overview

- Industrial Wireless LAN access point for installation in control cabinets or in indoor areas with support of IEEE 802.11a/b/g/h/n and data rates of up to 450 Mbps

Design

- Rugged aluminum housing, shock and vibration-resistant, for stringent mechanical requirements
- Special coating of the printed circuit boards (conformal coating)
- Resistant to condensation
- Railway approval in accordance with EN 50155 and NEMA TS2
- High IP65 degree of protection against dust and water jets
- For use at ambient temperatures from -40 °C to +70 °C
- 6 x N-Connect sockets for the connection of direct mountable and remote antennas
- Optimized antenna placement for the 3x3 MIMO technology; antennas do not interfere with each other when mounted directly on the device
- Suitable for 2.4 GHz and 5 GHz
- 1 x M12 connection for 10/100/1000 Mbps with Power-over-Ethernet according to IEEE 802.3at
- 1 x M12 socket for power supply (24 V DC)
- 1 x C-PLUG slot (KEY-PLUG/C-PLUG)
- Function LEDs for optical signaling of faults and operating states
- Mounting: Wall, S7-1500 mounting rail, S7-300 mounting rail or 35 mm standard mounting rail
- Two wireless cards are permanently installed in the device; functional scope can be expanded by using a KEY-PLUG W780 iFeatures

Network Components

SCALANCE W – Industrial Wireless LAN

SCALANCE W1788-2 M12 EEC

Overview

- Industrial Wireless LAN access point for installation in control cabinets or in indoor areas with support of IEEE 802.11a/b/g/n/ac and data rates of up to 1733 Mbit/s

Design

- Rugged aluminum housing, shock and vibration-resistant, for stringent mechanical requirements
- Special coating of the printed circuit boards (conformal coating)
- Resistant to condensation
- Railway approval in accordance with EN 50155 and NEMA TS2
- Special features in addition to EN 50155, EN 45545-2, EN 50121-4, EN 50121-3-2, EN 50125-3
- High IP65 degree of protection against dust and water jets
- For use at ambient temperatures from -40 °C to +75 °C
- 8 x N-Connect sockets for the connection of direct mountable and remote antennas
- Optimized antenna placement for the 4x4 MIMO technology; antennas do not interfere with each other when mounted directly on the device
- Suitable for 2.4 GHz and 5 GHz
- 2 x M12 Ethernet x-coded Managed switch (1.000 Mbit/s), Power-over-Ethernet according to IEEE 802.3at
- 1 x M12 socket for power supply (24 V DC)
- 1 x C-PLUG slot (KEY-PLUG/C-PLUG)
- Function LEDs for optical signaling of faults and operating states
- VESA 100 mounting system
 - Wall mounting
 - DIN rail T35 (S7-1200) DIN rail S7-300
 - DIN rail S7-1500
- Two wireless cards are permanently installed in the device; functional scope can be expanded by using a CLP

Supply voltage 1	
• from M12 power connector (A-coded) for redundant power supply	16.8 V
Supply voltage 2	
• from M12 power connector (A-coded) for redundant power supply	31.2 V
Supply voltage	
• from Power-over-Ethernet in accordance with IEEE802.3at for Type 1 and IEEE802.3af	48 V
• from Power-over-Ethernet in accordance with IEEE802.3at for Type 2	50 V
Current consumption	
• with 24 V DC, typical	0.7 A
• with Power-over-Ethernet in accordance with IEEE802.3at for Type 1 and IEEE802.3af, typical	0.385 A
• with Power-over-Ethernet in accordance with IEEE802.3at for Type 2, typical	0.3 A
Power loss [W]	
• with 24 V DC, typical	16.8 W
• with Power-over-Ethernet in accordance with IEEE802.3at for Type 1 and IEEE802.3af, typical	18.5 W
• with Power-over-Ethernet in accordance with IEEE802.3at for Type 2, typical	15 W

Article number	6GK5788-2GY01-0TA0 6GK1788-2GY01-0TB0 ¹⁾
Product type designation	SCALANCE W1788-2 M12 EEC
Permissible ambient conditions	
Ambient temperature	
• during operation	-40 ... +75 °C
• during storage	-40 ... +85 °C
• during transport	-40 ... +85 °C
Relative humidity at 25 °C, without condensation during operation	90%
Ambient conditions for operation	When used under explosion protection conditions (Zone 2), the SCALANCE W788-x or W748-x product must be installed in an enclosure with at least IP54 degree of protection according to EN 60529 within the jurisdiction of EN 50021.
IP degree of protection	IP65
Design, dimensions and weights	
Width of housing without antenna	258 mm
Height of housing without antenna	258 mm
Depth of housing without antenna	80 mm
Net weight	2.7 kg
Mounting type	For 35 mm DIN rail mounting, an additional mounting adapter is needed
• S7-300 rail mounting	Yes
• S7-1500 rail mounting	Yes
• Wall mounting	Yes
Radio frequencies	
Operating frequency	
• for WLAN in 2.4 GHz frequency band	2.41 ... 2.48 GHz
• for WLAN in 5 GHz frequency band	4.9 ... 5.8 GHz
Product properties, functions, components - General	
Product function - Access point mode	Yes
Product function - Client mode	Yes
Number of SSIDs	16
Product function	
• Dual client	No
• iPCF access point	Yes; only in combination with the 'KEY-PLUG W780 iFeatures'
• iPCF client	Yes; only in combination with the 'KEY-PLUG W780 iFeatures' or 'KEY-PLUG W740 iFeatures'
• iPCF-MC access point	Yes; only in combination with the 'KEY-PLUG W780 iFeatures'
• iPCF-MC client	Yes; only in combination with the 'KEY-PLUG W780 iFeatures' or 'KEY-PLUG W740 iFeatures'
Number of iPCF-enabled wireless modules	0
Product function - iREF	Yes; only in combination with the 'KEY-PLUG W780 iFeatures'
Number of iREF-enabled wireless modules	0

Selection and ordering data

SCALANCE W1788-2 M12 EEC Access Points

IWLAN access points with built-in wireless interfaces; wireless networks IEEE 802.11a/ac/b/g/n at 2.4/5 GHz up to 1733 Mbps; railway approval in accordance with EN 50155 / NEMA TS2; conformal coating; WPA2/AES; Power over Ethernet (PoE), IP65 degree of protection;

scope of delivery: mounting hardware; manual on CD-ROM, German/English

SCALANCE W1788-2 M12 EEC

IWLAN dual access point with two built-in wireless interfaces

- National approvals for operation outside the U.S. ¹⁾
- National approvals for operation within the U.S. ¹⁾

6GK5788-2GY01-0TA0

6GK5788-2GY01-0TB0

Accessories

KEY-PLUG W780 iFeatures

Removable data storage medium for activating additional iFeatures, for easy device replacement under fault conditions and for recording configuration data; can be used in SCALANCE W access points with PLUG slot

6GK5907-8PA00

C-PLUG

Removable data storage medium for easy replacement of devices under fault conditions; for recording configuration data; can be used in SIMATIC NET products with PLUG slot

6GK1900-0AB00

DIN Rail Mounting Adapter

DIN rail mounting adapter for SCALANCE W788 M12 and SCALANCE W788 RJ45; screw mounting for mounting on a 35 mm DIN rail according to EN 50022; scope of delivery: 3 units per pack

6GK5798-8ML00-0AB3

IE FC M12 Plug PRO 4 x 2

M12 plug connector (X-coded, IP65/IP67) that can be assembled in the field, metal enclosure, insulation displacement fast connection method, for SCALANCE W

- 1 unit
- 8 units

6GK1901-0DB30-6AA0

6GK1901-0DB30-6AA8

IE Train Cable GP 4x2

8-core, shielded TP installation cable for connection to IE FC M12 Plug PRO 4x2 for use in railway applications; with railway approval; sold by the meter; maximum delivery unit 1000 m, minimum order quantity 20 m

6XV1878-2T

IE FC Stripping Tool

Preset insulation stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

Power M12 Cable Connector PRO

Connector socket for connection of SCALANCE W700 for 24 V DC supply voltage; 4-pin, A-coded, with assembly instructions, 3 units

6GK1907-0DC10-6AA3

Power Cable 2 x 0.75

Connecting cable for Power M12 Cable Connector PRO, sold by the meter

6XV1812-8A

SCALANCE W – Industrial Wireless LAN

ANT795-4MX / ANT795-6MN / ANT795-6MT / ANT793-8DL / ANT793-8DP / ANT795-6DC / ANT793-6DG

Overview

Remote antennas increase the reliability of wireless links by optimizing signal reception and emission.

- Use in Industrial Wireless LAN (IWLAN) and WLAN in accordance with IEEE 802.11 at 2.4 GHz and 5 GHz with transmission rates of up to 450 Mbps
- Coordinated range of antennas for the most diverse applications both indoors and outdoors

Benefits

- Investment protection thanks to compliance with the globally recognized standard IEEE 802.11 and – depending on the version – suitability for 2.4 GHz and/or 5 GHz
- Cost-effective connection to devices in remote, difficult-to-access or hostile environments
- Establishment of a reliable IWLAN wireless infrastructure through the use of remote antennas, even if the access points and client modules are installed in the control cabinet, for example

Application

Remote antennas optimize transmission and reception conditions and enable use of IWLAN products in a number of industrial applications.

With sector antennas, for example, conveyor lines or corridors can be specifically covered with radio links, or strongly directional antennas can be used to implement point-to-point connections over distances of up to several 1000 meters.

Alternatively, an omnidirectional antenna concentrates the radio field around the antenna in the shape of a disc, which enhances the quality of the connection.

Application examples:

Omnidirectional antennas

- Coverage of an area which has at its center a mast for mounting the antenna
- Installation of the antenna on the roof in the case of automated guided vehicle systems for reliable data exchange with the vehicles
- Wide-area coverage of a production cell or robot station

Directional antennas

- Communication between buildings over long distances with the help of an antenna with narrow beam angle and high gain

Sector antennas

- Selective coverage of warehouse/high-bay warehouse aisles with the help of a wide-angle antenna prevents interference with neighboring wireless fields

All antennas can be used with an N-Connect female connector.

Overview

The RUGGEDCOM RSG907R and RSG909R, two full Gigabit switches in a compact design, offering both HSR and PRP functionality to mitigate the risk of communication disruptions and downtime. These rugged Gigabit switches are designed to operate in harsh environments with widely varying climatic and environmental conditions. Tested and certified to withstand extreme temperature, vibration and shock, the RUGGEDCOM RSG907R and RSG909R offer exceptional reliability for industrial applications such as electric utility substations, transportation systems and oil&gas.

The RUGGEDCOM RSG907R and RSG909R are ideal for applications that require high bandwidths and accommodate future network expansions. Three Redundant Network Access SFP ports providing ultimate flexibility in media and distance, with support for Gigabit bandwidth. The RSG907R connects up to 4 IEDs via 100BASE-FX fiber optics and RSG909R connects up to 6 IEDs via copper Ethernet on the Singly Attached Node ports.

Both products offer various network design options and cost savings through increased redundancy, reduced downtimes and high reliability.

HSR / PRP with Gigabit/s interfaces

Avoid revenue loss by mitigating the risk of communication disruptions and downtime with a redundant fault tolerant network supporting high bandwidth.

SFP RNA ports

SFP ports can be modified at any time allowing deployment flexibility for varying customer needs.

Power redundancy

Maintain continuous safe and reliable operations even during power failures, diminishing the risk of revenue and data loss.

Full fiber solution

Reduce failure rates due to increased immunity from electromagnetic phenomena. IEEE 1588The RSG907R and RSG909R enable the creation of a future proof network with support for IEEE 1588 time synchronisation.

Overview

The RUGGEDCOM RSG920P is a rugged Layer 2 Gigabit switch with high port density in small form factor with Power-over-Ethernet (PoE) capability that has been designed for control cabinets with limited space and for high bandwidth requirements. The RUGGEDCOM RSG920P provides maximum reliability for industrial applications, such as in transportation and oil & gas applications, and is tested and certified to withstand extreme temperatures, vibrations and shocks.

The Power-over-Ethernet interfaces of the RUGGEDCOM RSG920P are fed by an external power supply. RUGGEDCOM RPS1300 is the related power supply. It is adequately sized to operate all 4 Power-over-Ethernet interfaces simultaneously.

Technical specifications

Ethernet interfaces	
RJ45	16 x 10/100/1000 Mbps
SFP FO	4 x 100/1000 Mbps
Maximum bandwidth	20 Gbps full duplex
Power over Ethernet (PoE)	
Number of ports	4
Supported specifications	IEEE 802.3af, IEEE 802.3at
Bandwidth	10/100/1000 Mbps
Maximum power	120 W (max. 30 W/port)
Power supply properties	
Input voltage ranges	85-64 V AC / 100-300 V DC, 9-60 V DC
PoE input voltage	44-57 V DC (IEEE 802.3af), 50-57 V DC (IEEE 802.3at)
Power consumption	< 30 W

Design, dimensions and weight	
Dimensions (W x H x D) in mm	154 x 152 x 176
Weight	4.7 kg
Mounting	DIN rail and panel mounting
Permissible ambient conditions	
Ambient temperature	-40 °C to +85 °C
Degree of protection	IP40

Selection and ordering data

RUGGEDCOM RSG920PNC RUGGEDCOM RSG920PNC is a fully-managed Ethernet switch with 56-bit encryption and 20 non-blocking Gigabit Ethernet ports; supports 4 SFP modules and 4 PoE ports; operating temperature -40°C to +85°C (without fan)	6GK6092-0PS1-.....
RUGGEDCOM RSG920P RUGGEDCOM RSG920P is a fully-managed Ethernet switch with 128-bit encryption and 20 non-blocking Gigabit Ethernet ports; supports 4 SFP modules and 4 PoE ports; operating temperature -40°C to +85°C (without fan)	6GK6092-0PS2-.....

RUGGEDCOM RPS1300 Power Supply 54 V/2.6 A power supply, input: 120/230 V AC, output: 54 V DC / 2.6 A, -40°C to 75°C, suitable for RUGGEDCOM PoE applications	6GK6000-8HS01-0AA0

Network Components

RUGGEDCOM – Layer 2 Switches

RUGGEDCOM RS900G / RUGGEDCOM RS900GP

Overview

The RUGGEDCOM RS900 product family for use in the power supply sector comprises a number of fully-managed Ethernet switches that are specially designed for reliable use in hostile operating environments for electrical equipment and demanding climatic conditions. They provide a high degree of immunity to electromagnetic interference and strong electrical disturbances, which are typically present in factory buildings and in roadside traffic control cabinets. A temperature range from -40 °C to +85 °C enables them to be placed almost anywhere.

Characteristics

- Many different copper and fiber-optic port configurations with transmission rates up to 1 Gbps
- Fiber-optic cable variants are available with multimode or single-mode optical transceiver-receivers and various interfaces (LC, SC, SFP)
- Options for 24 V DC to 48 V DC or high voltage (88-300 V DC / 85-264 V AC) for worldwide operation
- Operation without fans for operating temperatures from -40 °C to +85 °C
- Variety of management interfaces: web-based, Telnet, command line
- Available in a version that supports Power over Ethernet (PoE)

Product versions

RUGGEDCOM RS900G

- Managed Ethernet switch with 10 ports, Gigabit fiber-optic uplinks and 56- or 128-bit encryption

RUGGEDCOM RS900GP

- Managed Ethernet switch with 10 ports, including 8 Power over Ethernet (PoE) ports and 2 Gigabit uplinks, with 56- or 128-bit encryption

Selection and ordering data

RUGGEDCOM RS900G

The RUGGEDCOM RS900G is a fully-managed Ethernet switch that has two Gigabit Ethernet fiber-optic ports and eight Fast Ethernet copper ports; 56- or 128-bit encryption; 2 Gigabit Ethernet fiber-optic ports (1000BaseX); 8 Fast Ethernet ports (10/100BaseTX); various fiber-optic connection options (pluggable LC, SC, SFP optics); support of bidirectional single strand fiber-optic cable; long-distance fiber-optic connections enable distances up to 70 km in the Gigabit range

- **RUGGEDCOM RS900GNC**
(not subject to export controls)
- **RUGGEDCOM RS900G**
(subject to export controls)

Overview

RUGGEDCOM RSG2100

RUGGEDCOM RSG2300

RUGGEDCOM RSG2100

The RUGGEDCOM RSG2100 is a modular fully-managed Ethernet switch that is especially well-suited for use in hostile operating environments for electrical equipment and demanding climatic conditions.

RUGGEDCOM RSG2300

The RUGGEDCOM RSG2300 product family consists of fully-managed Ethernet switches with 32 ports and 4 modular Gigabit uplink ports.

Characteristics

- Fully integrated dual redundant (optional) high voltage and low voltage power supplies
- Operation without fans for operating temperatures from -40 °C to +85 °C

RUGGEDCOM RSG2100

- Modular managed Ethernet switch with 19 ports, Gigabit uplinks and 56- or 128-bit encryption
- Up to 3 Gigabit Ethernet ports and 16 Fast Ethernet ports - copper and/or fiber-optic
- 2-port modules for outstanding flexibility
- Store und Forward switching
- Support of many different fiber-optic cable types (multimode, single-mode) with a variety of connections (ST, MTRJ, LC, SC, SFP)
- Variant with 4 fixed 10/100BaseTX, 802.3af-compliant (PoE) Ethernet ports (RUGGEDCOM RSG2100P and RSG2100PNC)

RUGGEDCOM RSG2300

- Managed Ethernet switch with 32 ports, Gigabit uplinks and 56- or 128-bit encryption
- 24 Fast Ethernet copper ports
- Optional: Up to 4x 1000LX Gigabit Ethernet ports (copper and/or fiber-optic) and up to 8x 100FX Fast Ethernet fiber-optic ports
- Non-blocking, Store und Forward switching
- Support of many different fiber-optic cable types (multimode, single-mode, bidirectional single strand) with a variety of connections (ST, MTRJ, LC, SC, SFP)
- Variant available with up to four 802.3af-compliant ports (10/100BaseTX) (RUGGEDCOM RSG2300P and RSG2300PNC)

Selection and ordering data

RUGGEDCOM RSG2100

Network Components

RUGGEDCOM – Layer 2 Switches

RUGGEDCOM RST2228

Overview

The RUGGEDCOM RST2228 is a high port density field modular 19" Layer 2 rack switch with 10 Gbit/s uplinks, support for IEEE 1588.

Design

- Up to 28 Ethernet ports – 4 x 1000BASE-X/10GBASE-X integrated uplinks and up to 24 x 10/100/1000BASE-X ports
- 6 slots for 4-port Media Modules for tremendous flexibility
- Media modules with 4 x 10/100/1000 Mbit/s RJ45, FastConnect or 100/1000 Mbit/s SFP interfaces
- Supports precision timing according to IEEE 1588 (transparent clock)
- Non-blocking, store and forward switching
- Dual-redundant (optional), load sharing, high-voltage power supplies
- For use at ambient temperatures from –40 °C to +85 °C without the use of fans
- Power-over-Ethernet variant available supporting IEEE 802.3at/802.3bt (draft) with up to 60W/port and a maximum power budget from 500W.

Product versions

RUGGEDCOM RST2228

- 28-port field modular managed layer 2 Gigabit/s switch with 10 Gbit/s uplinks supporting IEEE 1588

RUGGEDCOM RST2228P

- 28-port field modular managed layer 2 Gigabit/s switch with 10 Gbit/s uplinks supporting IEEE 1588 and Power-over-Ethernet according IEEE 802.3at/803.bt (draft)

Benefits

- Future-proof Ethernet switch with high port density to minimize capital expense by reducing the number of devices needed.
- Field-modular media modules with RJ45, FastConnect & SFP interfaces and build-to-order design ensures seamless servicing and tremendous flexibility in tailoring the device configuration resulting in lower operating expenses
- Suitable for usage in electric power, transportation and oil & gas applications due to a utility grade design with immunity against EMI and heavy electrical surges
- Future-proof due to support of modern IEEE 1588 time synchronization features
- Suitable for usage in harsh environments with the minimal risk of mechanical failures due to an operating temperature from -40 °C to +85 °C without fans

Selection and ordering data

RUGGEDCOM RST2228

RUGGEDCOM RST2228 is a field modular, fully managed Layer 2 Ethernet switch with 4 x 1/10 Gbit/s and 24 x 100/1000 Mbit/s non-blocking ethernet ports. Support for up to six 4-port media modules with RJ45, SFP or LC interfaces; -40 °C ...+85 °C operating temperature (fanless)

6GK6222-6AB00-....

RUGGEDCOM RST2228P

RUGGEDCOM RST2228P is a field modular, fully managed Layer 2 Ethernet switch with 4 x 1/10 Gbit/s and 24 x 100/1000 Mbit/s non-blocking ethernet ports with Power-over-Ethernet support. Support for up to six 4-port media modules with RJ45, SFP or LC interfaces; -40 °C ...+85 °C operating temperature (fanless)

6GK6222-6PB00-....

RUGGEDCOM accessories

- **USB Console cable** 6GK6000-8DT01-0AA0
USB 2.0 A type to B type
Cable Assembly 10 feet / 3 meters
- **Power cable with lugs** 6GK6000-8BA00-0AA0
Power Cable with north-american plug for screw terminal blocks (6 ft.) for RUGGEDCOM products
- **Power cable without lugs** 6GK6000-8BB00-0AA0
Power Cable with north-american plug for pluggable terminal blocks (6 ft.) for RUGGEDCOM products
- **Pluggable terminal block RST2228** 6GK6000-8HC05-0AA0
Connector Kit RST2228
Pluggable terminal blocks (5 sets)
- **Screw terminal block RST2228** 6GK6000-8HC06-0AA0
Connector Kit RST2228
Screw terminal blocks (5 sets)
- **Rack / Panel Mounting Kit for RUGGEDCOM RST2228** 6GK6000-8MA01-0AA0
Allows for mounting in a 19" rack or in a panel

RUGGEDCOM Storage Media

- **RUGGEDCOM CLP 2GB** 6GK6000-8RA00-1HA0
Storage media for simple device exchange in case of failure, for storage of configuration or user data with 2 GB capacity.
- **RUGGEDCOM CLP 2GB CC** 6GK6000-8RA00-1HA1
Storage media for simple device exchange in case of failure, for storage of configuration or user data with 2 GB capacity and Conformal Coating.

RUGGEDCOM SFPs**Copper Ethernet SFP**

- **RUGGEDCOM SFP1112-1**
Copper SFP, 10/100/1000MBIT/S, RJ45-Interface, Copper, up to max. 100m, 0 °C ...+70 °C

Fiber Optic SFPs (Fast Ethernet)

- **RUGGEDCOM SFP1121-1FX2**
100BASE-FX, LC-Interface, Optical: Multi Mode Fiber Optic up to max. 2km, 1310nm, -40 °C ...+85 °C
- **RUGGEDCOM SFP1121-1FX2A**
100BASE-FX, LC-Interface, Optical: Multi Mode Fiber Optic up to max. 2km, 1310nm, -40 °C ...+85 °C. Active SFP which is only compatible with the RUGGEDCOM RX1400 and RST2228 uplink interfaces.
- **SFP1131-1FX20**
100BASE-FX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 20km, 1310nm, -40 °C ...+85 °C
- **SFP1131-1XF50**
100BASE-FX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 50km, 1310nm, -40 °C ...+85 °C
- **SFP1131-1FX90**
100BASE-FX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 90km, 1550nm, -40 °C ...+85 °C

Fiber Optic SFPs (Gigabit)

- **RUGGEDCOM SFP1122-1SX**
1000BASE-SX, LC-Interface, Optical: Multi Mode Fiber Optic up to max. 500m, 850nm, -40 °C ...+85 °C
- **RUGGEDCOM SFP1122-1SX2**
1000BASE-SX, LC-Interface, Optical: Multi Mode Fiber Optic up to max. 2km, 1310nm, -40 °C ...+85 °C
- **RUGGEDCOM SFP1132-1LX10**
1000BASE-LX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 10km, 1310nm, -40 °C ...+85 °C
- **RUGGEDCOM SFP1132-1LX25**
1000BASE-LX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 25km, 1310nm, -40 °C ...+85 °C
- **RUGGEDCOM SFP1132-1LX40**
1000BASE-LX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 40km, 1550nm, -40 °C ...+85 °C
- **RUGGEDCOM SFP1132-1LX70**
1000BASE-LX, LC-Interface, Optical: Single Mode Fiber Optic up to max. 70km, 1550nm, -40 °C ...+85 °C

RUGGEDCOM – Layer 2 Switches

RUGGEDCOM RSG2488

Overview

The RUGGEDCOM RSG2488 is the first locally upgradable Layer 2 switch with 28 non-blocking Gigabit ports and dual redundant power supplies that are replaceable during operation.

Characteristics

- Up to 28 Gigabit Ethernet ports - copper and/or fiber-optic; 19-inch, 1 HU rack mounting
- Fully modular; field-replaceable Ethernet media modules with 2/4 ports for outstanding flexibility
- Support of media modules with 100FX or 1000SX fiber-optic ports
- Optional PTP module provides GPS time source and IRIG-B input/output
- Support of IEEE 1588 (PTP), SNTP, IRIG-B; the time of day can be converted between all these formats
- Non-blocking, Store and Forward switching
- Support of many different fiber-optic cable types (multimode, single-mode, bidirectional single strand) with a variety of connections (LC, SC, SFP, ST)
- Dual redundant (optional) load-dividing high voltage and low voltage power supplies that are replaceable during operation
- Operation without fans for operating temperatures from -40 °C to +85 °C

Product versions

RUGGEDCOM RSG2488

- Modular managed Gigabit Ethernet switch with 28 ports and 128-bit encryption

RUGGEDCOM RSG2488NC

- Modular managed Gigabit Ethernet switch with 28 ports and 56-bit encryption

Selection and ordering data

RUGGEDCOM RSG2488

The RUGGEDCOM RSG2488 is a rugged fully-managed Ethernet switch; up to 28 non-blocking ports; configured as follows: 10/100/1000TX copper ports, 100FX or 1000SX fiber-optic ports; support of six 4-port modules plus two 2-port modules; combination of Gigabit copper and fiber-optic ports with up to 28 Gigabit Ethernet ports; operating temperatures from -40 °C to +85 °C (operation without fan)

Overview

The RUGGEDCOM RX1400 is a rugged Industrial Ethernet switch and TCP/IP router with LTE and fiber-optic WAN options in compact size for reliable, cost-effective implementation of comprehensive communication applications and a high processing output in harsh industrial environments.

Characteristics

- 4x Fast Ethernet copper ports and 2x Gigabit SFP (small form factor pluggable) slots
- Support of multimode and single-mode SFPs for distances of 500 m up to 100 km
- Equipped with GPS input
- Available with or without LTE modem for Europe, North America, the Asia-Pacific region and Japan. Fully integrated power supply, +/-12-24 V DC
- Operation without fans for operating temperatures from -40 °C to +85 °C
- RUGGEDCOM VPE1400: Virtualization enables a complete Linux image (with dedicated memory media and I/O ports) that can run in parallel with the RUGGEDCOM ROX II operating system.

Technical specifications

Transmission rate	
On Industrial Ethernet	Autosensing with 10/100 Mbps
Through WAN connection	Up to 100 Mbps
Through fiber-optic connection	1 Gbps
WAN connection	
EDGE/GPRS/GSM	850/900/1800/1900 MHz
UMTS/HSDPA+	850/900/1900/2100 MHz
LTE	B1, B2, B3, B4, B7, B8, B13, B17, B19, B20, B21, B25
Number of supported SIM cards	2
Interfaces	
Communication interfaces	LAN: 4 x RJ45 10/100, 2 x SFP slot 1000 LX SFP / Serial: 2 x DB9 connector/ Console: 1 x DB9 connector
WAN (Wide Area Network) interfaces	2 x SMA-type
GPS interface	1 x SMA-type
Permissible ambient conditions	
Operating temperature	-40 °C to +85 °C
Degree of protection	IP40
Design, dimensions and weight	
Dimensions (W x H x D) in mm	88 x 120 x 150
Weight	2.5 kg
Mounting	DIN rail, control panel, rack
Power consumption	< 15 W
Reliability	
MTBF (calculated in accordance with MIL-HDBK-217)	52 years (at 55 °C)

Selection and ordering data

RUGGEDCOM RX1400	6GK6014-0AM2-....
The RUGGEDCOM RX1400 is a rugged Industrial Ethernet switch and TCP/IP router in compact size with 4 Gigabit Ethernet copper ports, 2 serial ports (DB9) and 2 SFP slots. Optionally equipped with LTE modem, SFPs and GPS/GLONASS support.	
RUGGEDCOM VPE1400 License	6GK6014-0AL50-0AA0
License for activating the RUGGEDCOM VPE1400 virtual environment on the RX1400	
RUGGEDCOM RX1400 Layer 3 Security License	6GK6014-0AL53-0AA0
License for activating the Layer 3 security functions on the RX1400

Network Components

RUGGEDCOM – Layer 3 Switches / Routers

RUGGEDCOM RX1500 / RUGGEDCOM RX1501 / RUGGEDCOM RX1510

Overview

RUGGEDCOM RX1500

RUGGEDCOM RX1501

RUGGEDCOM RX1510

The RUGGEDCOM RX1500 series is a multi-service platform for the power supply sector, available in different sizes for 19-inch rack mounting and DIN/panel mounting. The RUGGEDCOM RX1500 series has a modular, field-replaceable platform that allows customers to choose between various WAN options, serial options and Ethernet options and is thus extremely well-suited for rail and traffic control systems.

Characteristics

- General device characteristics
 - Field-replaceable line modules
- RUGGEDCOM RX1500:
 - Up to 24x 100FX ports
 - Up to 24x 10/100TX ports
 - Up to 12x 10FL/100SX ports
 - Up to 8 Gigabit Ethernet ports
 - Up to 24 serial ports
- RUGGEDCOM RX1501:
 - Up to 36 ports 100FX
 - Up to 36 ports 10/100TX
 - Up to 18 ports 10FL / 100SX
 - Up to 4 ports Gigabit Ethernet
 - Up to 36 Serial Ports
- RUGGEDCOM RX1510:
 - Up to 24x 100FX ports
 - Up to 24x 10/100TX ports
 - Up to 12x 10FL/100SX ports
 - Up to 8 Gigabit Ethernet ports
 - Up to 24 serial ports

- WAN port options
 - T1/E1 (channelized)
 - E1 75 ohms via BNC
 - Mobile wireless
 - DDS
- Power supply
 - RUGGEDCOM RX1500, RX1510:
 - Modular power supply that is replaceable during operation
 - Input voltage range 24 V DC, 48 V DC, 88-300 V DC and 85-264 V AC for worldwide operation
 - Fully integrated power supply (no external adapters)
 - Safety approval according to CSA/UL 60950 up to +85 °C
- Cyber security
 - Integrated router, firewall and VPN functionality
 - Stateful firewall with NAT
 - Complete IPsec Virtual Private Networking
 - VPN with support for 3DES, AES128, AES256
 - RUGGEDCOM CROSSBOW for cyber security conformity in accordance with NERC CIP
 - Central RADIUS password management
 - Multilevel passwords
 - SSH/SSL encryption
 - Enable/disable ports, MAC-based port security
 - VLAN (802.1Q) for separation and protection of network traffic
 - SNMPv3-encrypted authentication and access protection
 - Optional checkpoint firewall and IPS (see RUGGEDCOM APE module)
- WAN protocols
 - Frame relay RFC 1490 or RFC 1294
 - PPP RFC 1661, 1332, 1321, 1334, PAP, CHAP authentication
 - GOOSE message support
- IP
 - Routing: OSPF, BGP, RIPv1 and RIPv2
 - VRRP
 - Traffic control, NTP server
 - IP multicast routing
 - DHCP agent (option 82 possible)
 - MPLS

- Reliability in harsh environments
 - EMC and immunity from electrical interference in the high voltage range
 - Meets requirements of IEEE 1613 (electric power stations for power supply and distribution)
 - Exceeds requirements of IEEE 61850-3 (electric power stations for power supply and distribution)
 - Exceeds requirements of IEC 61800-3 (drive systems with variable speed)
 - Exceeds requirements of IEC 61000-6-2 (general industrial environment)
 - Exceeds requirements of NEMA TS-2 (traffic control systems)
 - Operating temperature -40°C to +85°C (operation without fan)
 - Fail-safe output relay: For signaling of critical failures or errors
 - Zinc-plated steel housing (18 AWG) and adapter for 19-inch rack mounting

Product versions

RUGGEDCOM RX1500

- Modular, 19-inch rack-mounted Layer 2 and Layer 3 switch and router with optional redundant power supply

RUGGEDCOM RX1501

- Modular, 19-inch rack-mounted Layer 2 and Layer 3 switch and router with single power supply

RUGGEDCOM RX1510

- Modular Layer 2 and Layer 3 switch and router in compact size

Selection and ordering data

RUGGEDCOM RX1500

The RUGGEDCOM RX1500 series comprises Layer 2 and Layer 3 switches and routers. 2x power supplies (replaceable during operation); locally replaceable line modules; up to 24x 100FX ports; up to 24x 10/100TX ports; up to 8x Gigabit Ethernet ports; up to 12x 10FL/100SX ports - SC, ST, LC and MTRJ; pluggable fiber-optic connection (SFP); up to 4x T1/E1 ports; mobile wireless (EVDO / HSPA); DDS (56K masters/slaves, 64K slaves); up to 24x RS232/422/485 ports

RUGGEDCOM RX1501

The RUGGEDCOM RX1501 series is a utility grade Layer 2 and Layer 3 switch and router. 1x power supply Field replaceable line modules Up to 36-ports 100FX; up to 36-ports 10/100TX; up to 4-ports Gigabit Ethernet up to 18 ports 10FL/100SX SC, ST, LC and MTRJ; pluggable Optics (SFP); up to 4 T1/E1 ports cellular (EVDO / HSPA); DDS (56K master/slave, 64K slave); up to 24 RS232/422/485

6GK6015-0AM2-.....

6GK6015-0BM2-.....

RUGGEDCOM RX1510

The RUGGEDCOM RX1510 series comprises Layer 2 and Layer 3 switches and routers in compact size. 2x power supplies - redundant, load-dividing power supplies; locally replaceable line modules; up to 24x 100FX ports; up to 24x 10/100TX ports; up to 8x Gigabit Ethernet ports; up to 12x 10FL/100SX ports - SC, ST, LC and MTRJ; pluggable fiber-optic connection (SFP); up to 4x T1/E1 ports; mobile wireless (EVDO / HSPA); DDS (56K masters/slaves, 64K slaves); up to 24x RS232/422/485 ports

Network Components

RUGGEDCOM – Layer 3 Switches / Routers

RUGGEDCOM RX5000

Overview

The RUGGEDCOM RX5000 is an Ethernet routing and switching platform with high connection density for use in harsh environments. These integrated switches and routers can withstand strong electromagnetic interference and radio frequency interference as well as a wide temperature range from -40 °C to +85 °C. The platform was developed for demanding climatic and environmental conditions, such as in power generation and distribution grids as well as in the industrial and military sectors.

Characteristics

- RUGGEDCOM RX5000:
 - Up to two 10 Gigabit uplinks
 - Up to 26 Gigabit ports
 - Up to 96x 10/100TX copper ports
 - Up to 48x 100 FX optical ports
 - Long-distance fiber-optic connections enable distances up to 90 km
- Power supply
 - Modular, redundant power supplies
 - Universal high voltage ranges: 88-300 V DC or 85-264 V AC
- Reliability in harsh environments
 - EMC and immunity from electrical interference in the high voltage range
 - Exceeds requirements of NEMA TS-2 (traffic control systems)
- Operating temperature -40°C to +85°C (operation without fan)
- Printed-circuit boards with protective coating (optional)

Selection and ordering data

RUGGEDCOM RX5000

The RUGGEDCOM RX5000 is a routing and switching platform with high port density. Up to 96x 10/100TX copper ports + 2x 10/100/1000T copper ports; up to 48x 100FX fiber-optic ports; up to 2x Gigabit Ethernet ports; long-distance fiber-optic connections enable distances up to 90 km

Overview

The RUGGEDCOM WIN7200 is a light-weight IEEE 802.16e-compliant wireless broadband base station that has been developed for use in unlicensed and "lightly" licensed or completely licensed frequency bands in harsh environments. The RUGGEDCOM WIN7200 is a light-weight base station with a sector antenna that can be easily mounted on masts, street lamps or walls. It supports subscribers in a stationary or mobile environment. The RUGGEDCOM Win7200, which is singly powered and connected via a single Power over Ethernet (PoE) connection, reduces operating costs and complexity. The RUGGEDCOM WIN7200 system is powered by OFDMA radio technology, which has proven to be robust in adverse channel conditions and enables non-line-of-sight (NLOS) operation. Algorithms for link adjustment, modulation and coding are continuously adapted to the prevailing link conditions for an optimal balance between robustness and efficiency.

Characteristics

- Mobile WiMAX-compliant in accordance with IEEE 802.16e and WiMAX Forum Wave 2 (MIMO) certification
- Support of worldwide WiMAX usage in the 2.X-GHz, 3.X-GHz, 4.9-GHz and 5.8-GHz bands
- Adaptive modulation: For optimization of throughput and improvement of performance
- Ecosystem compatibility with all RUGGEDCOM WIN products or 802.16e-compliant WiMAX network equipment
- Large range: Transmission and reception diversity in combination with high output power for improved range and NLOS performance
- High bandwidth: RUGGEDCOM WIN has two integrated wireless units that operate simultaneously on the same frequency (MIMO) for improving the bandwidth (up to 40 Mbps) and spectral efficiency.
- Efficient frequency use: Use of OFDMA technology and integrated GPS so that users can use a complete network on a single frequency channel.
- Usage models: Developed for support of long-distance connections to stationary, portable and mobile end points with simultaneous support of seamless mobility of vehicles and backhaul mode
- Quality of service (QoS): With RUGGEDCOM WIN, users can separate data traffic types by air as well as guarantee latency, minimal bandwidth and jitter according to application requirements.
- Rugged design: RUGGEDCOM WIN features a rugged design and can be used flexibly outdoors. The RUGGEDCOM products have been developed for use in harsh environments, such as are found in power stations, oil refineries, the military sector, roadside traffic control cabinets and metal and mineral processing plants.
- Standalone architecture: Commercial wireless broadband equipment requires the existence of a complete network infrastructure. This includes a special mobile router called an ASN gateway that acts as a central point for all network traffic. This infrastructure can be very costly and complicated to implement. Siemens has developed a mode that requires this comprehensive infrastructure but at the same time retains the interoperability and technological advantages of wireless broadband.
- Secure: RUGGEDCOM WIN is equipped with many integrated functions for assuring compliance with NERC CIP, such as mutual authentication, AES encryption and protection of integrity of messages using CMAC

Overview

The RUGGEDCOM WIN5100 is an IEEE 802.16e-compliant wireless broadband subscriber unit that is equipped with external radio frequency connections for stationary or mobile applications in harsh environments. The self-learning subscriber device automatically detects the base station using the best

available signal and enables plug-and-play installation and maintenance-free operation. The RUGGEDCOM WIN5100 has external antenna ports and is available with optional 10-30 V DC power input.

Characteristics

- Mobile WiMAX-compliant in accordance with IEEE 802.16e and WiMAX Forum Wave 2 profiles
- 2 N-type antenna ports for connection of roof antennas
- Excellent performance in NLOS conditions – insensitive to multipath and deep fade, providing for an extended range and easy installation
- Automatic Transmit Power Control (ATPC) for optimal power system utilization, tight frequency reuse and interference prevention
- Numerous applications and services – guaranteed voice, video and data services based on enhanced quality of service (QoS)
- Rugged hardware supports an operating temperature range from -40 °C to +75 °C
- Developed for mast installation or installation in the vehicle or control cabinet

Overview

The RUGGEDCOM WIN5200 is an IEEE 802.16e-compliant wireless broadband subscriber unit that is equipped with an integrated dual-slant directional antenna for harsh environments. The RUGGEDCOM WIN5200 is much simpler to install thanks to LEDs for signal strength alignment, automatic connection to the strongest available base station and automatic service delivery based on authentication data. Specially developed for point-to-multipoint broadband applications with wireless access, the RUGGEDCOM WIN5200 enables efficient use of the wireless frequency spectrum and supports many different applications.

Characteristics

- Mobile WiMAX-compliant in accordance with IEEE 802.16e and WiMAX Forum Wave 2 profiles
- Integrated antenna with high strength
- Excellent performance in NLOS conditions – insensitive to multipath and deep fade, providing for an extended range and easy installation
- Automatic Transmit Power Control (ATPC) for optimal power system utilization, tight frequency reuse and interference prevention
- Numerous applications and services – guaranteed voice, video and data services based on enhanced quality of service (QoS)
- Low operating costs due to easy installation and needs-based expansion so that owners can quickly enter new market segments with minimum investment
- Rugged hardware supports an operating temperature range from -40 °C to +75 °C
- Mean time between failures (MTBF) of over 1 million hours
- A single Power over Ethernet (PoE) cable
- Broad frequency band supports worldwide use
- Subscriber unit for outside use

Ordering notes

Things you should know about Catalog IC 12

Catalog IC 12 contains all selection and order-relevant data.

Standard delivery time (SD)

- SD in days (d)
- ▶ Preferred type
- X On request

Preferred types are available immediately from stock, i.e. are dispatched within 24 hours.

Normal quantities of the products are usually delivered within the specified time following receipt of your order at our branch.

In exceptional cases, the actual delivery time may differ from that specified.

The delivery times apply up to the ramp at Siemens AG (products ready for dispatch). The transport times depend on the destination and type of shipping. The standard transport time for Germany is one day.

The delivery times specified here represent the situation in October 2017. They are continuously optimized. For more up-to-the-minute information, please visit www.siemens.com/sirius/mall.

Packaging sizes (PS)

The packaging size defines the number, e.g. of units, sets or meters, contained in an outer packaging.

Only the quantity defined by the packaging size or a multiple thereof can be ordered.

For multi-unit packing and reusable packaging, see page 8/5.

Price groups (PG)

Each product is assigned to a price group.

Example

3RA2110-0FA15-1AP0

SD: 2 working days
PG: 41D
Order quantity 1 unit or a multiple thereof

3RV1901-0H

SD: Preferred type
PG: 41E
Order quantity 10 units or a multiple thereof

3SU1900-0AB71-0AB0

SD: 5 working days
PG: 41J
Order quantity 10 units or a multiple thereof

SD	Article No.	Price per PU	PU (UNIT, SET, M)	PS*	PG
d					
2	3RA2110-0FA15-1AP0		1	1 unit	41D
▶	3RV1901-0H		1	10 units	41E
5	3SU1900-0AB71-0AB0		100	10 units	41J

Dimensions

All dimensions in mm.

Symbols

In Catalog IC 12 you will find the symbols and their explanations listed alongside.

They are used in conjunction with an orange background to mark and highlight special selection criteria (e.g. connections, types of coordination, etc.).

Connections	Insulation piercing method	
	Straight-through transformers	
	Spring-type terminals or spring-type terminals (push-in)	
	Flat connectors	
	Solder pin connections	
	Push-in terminals	
	Ring terminal lug connections	
	Screw terminals	
	Socket terminals (THT)	
	Types of coordination	Type of coordination "1"
Type of coordination "2"		
Distinguishing between units	Complete units	
	Modular system

Ordering notes

Logistics

General

With regard to delivery service, communications and environmental protection, our logistics service ensures "quality from the moment of ordering right through to delivery". By designing our infrastructure according to customer requirements and implementing electronic order processing, we have successfully optimized our logistics processes.

Our delivery processes are designed such that, as a rule, a confirmed deadline is not generally exceeded. In fact, wherever possible, we aim to deliver up to three working days ahead of schedule to optimize the overall delivery situation (e.g. in anticipation of holidays and peak order periods).

We are proud of our personal consulting service, on-time deliveries and 1-day transport within Germany.

To achieve this, we supply the preferred types marked with ► ex warehouse.

We regard the DIN ISO 9001 certification and consistent quality checks as an integral part of our services.

Electronic order processing is fast, cost-efficient and error-free. Please contact us if you want to benefit from these advantages.

Packaging, packing units

The packaging in which our equipment is dispatched provides protection against dust and mechanical damage during transport, thus ensuring that you receive our products in a perfect state.

We select our packaging for maximum environmental compatibility and reusability (e.g. crumpled paper for protection during transport in packages up to 32 kg) and, in particular, with a view to reducing waste.

With our multi-unit packaging and reusable packaging, we offer you specific types of packaging that are both kind to the environment and tailored to your requirements.

Your advantages at a glance:

- Lower order costs
- Cost savings through uniform-type packaging: low/no disposal costs
- Reduced time and cost thanks to short unpacking times
- "Just-in-time" delivery directly to the production line helps reduce stock: cost savings through reduction of storage area
- Fast assembly thanks to supply in sets
- Standard Euro boxes – corresponding to the Euro pallet modular system – suitable for most conveyor systems
- Active contribution to environmental protection

Unless stated otherwise in the "Selection and ordering data" of this catalog, our products are supplied individually packed.

For small parts/accessories, we offer you economical packaging units as standard packs containing more than one item, e.g. 5, 10, 50 or 100 units. It is essential that whole number multiples of these quantities be ordered to ensure satisfactory quality of the products and problem-free order processing.

The products are delivered in a neutral carton. The label includes warning notices, the CE mark and product description information in English and German.

In addition to the Article No. (MLFB) and the packed number of items in the packaging, the Instr. Order No. of the operating instructions is also specified. This can be obtained from your local Siemens representative, [see www.siemens.com/automation/partner](http://www.siemens.com/automation/partner).

The device Article No. of most devices can also be acquired through the EAN barcode to simplify ordering and storage logistics.

The related master data are available from your local Siemens representative.

Multi-unit and reusable packagings

The devices listed in the table on page 8/6 can be ordered in multi-unit or reusable packagings (other versions available on request).

If ordering multi-unit or reusable packagings for the first time, please first consult your local Siemens representative with regard to pack type, quantity, delivery time and the precise order designation. Use of the reusable packaging is reserved solely for customers that have signed a packaging return agreement with their Siemens representative in advance.

Multi-unit and reusable packagings are not available as a pack type for all products. Some products are unsuited for this pack type and would only involve an increased risk of damage in transit.

For both pack types, the quantity of devices ordered (per Article No.) must be divisible by the pack quantity. If this is not the case, the electronic order processing system rounds up to the next integer multiple of packagings.

Multi-unit packaging

Products in a quantity sufficient to fill a multi-unit packaging: 1/2 (W96) and 1/4 (W97) ENK

As standard, multi-unit packs contain uniform-type, unpacked single devices (one device type) in an appropriately sized carton made of recyclable cardboard. The products of the SIRIUS range can be ordered in units of 1/1, 1/2, 1/4 and 1/8 standard Euro boxes (ENK).

Reusable packaging (uniform type)

Standard Euro box (ENK) made of durable molded plastic with foam inserts

Standard reusable packagings contain uniform-type, non-packed individual products (one device type) in a reusable standard Euro box (ENK) made of durable molded plastic with foam inserts for protection during transport.

The standard Euro box (ENK) also serves as transport packaging. The reusable packagings (ENK) plus foam inserts are returned by the customer (free of charge) to the supply base.

Please contact your Siemens representative to clarify the delivery details or conditions for set supply or delivery in reusable packaging (ENK) (to find Siemens representatives, see www.siemens.com/automation/partner). Suitable arrangements will then be agreed with you.

Set deliveries (reusable, different devices)

On request, we also deliver order-related packs of larger quantities of devices in a standard Euro box (ENK).

Please contact your Siemens representative to clarify the delivery details or conditions for set supply or delivery in reusable packagings. Suitable arrangements will then be agreed with you.

Packaging dimensions

Packing material	Length	Height	Width
	mm	mm	mm
ENK	596	219	396
W95	575	190	375
W96	375	190	290
W97	290	190	195
W98	290	100	195

Accessories (3SU19)	
• Blanking plugs, label holders, EMERGENCY STOP backing plates, labeling plates for potentiometers, EMERGENCY STOP labeling plate for enclosures without cutouts and without inscription	100

When ordering products in multi-unit packagings, the Article No. of the product concerned must be supplemented with **"-Z"** and, in addition, the order code **X90**, or for products from the SIRIUS range, the order code **W9**.

Ordering example:
3RT2024-1AB00-Z W96
+ quantity: 24

For products packed in reusable packaging, the Article No. must be supplemented with **"-Z"** and the order code **X95**.

Ordering example:
3RT2024-1AB00-Z X95
+ quantity: 48

Ordering special versions

When ordering products that differ from the versions listed in the catalog, the article number specified in the catalog must be supplemented with "-Z"; the required features must be specified by means of the alphanumeric order codes or in plain text.

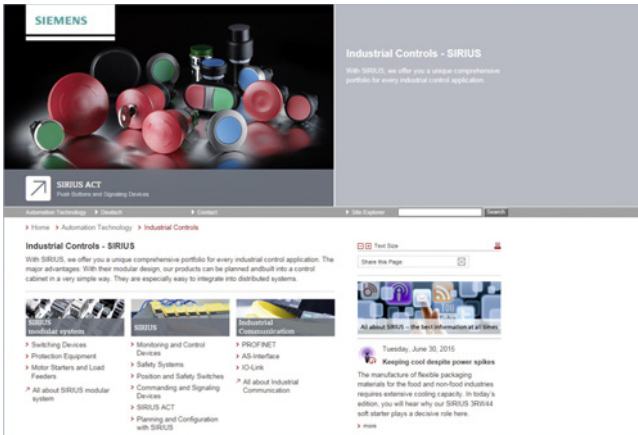

Small orders

When small orders are placed, the costs associated with order processing are greater than the order value. We recommend therefore that you combine several small orders. Where this is not possible, we unfortunately have to charge a processing supplement of € 20.– to cover our costs for order processing and invoicing for all orders with a net goods value of less than € 250.–.

Further documentation

Industrial controls

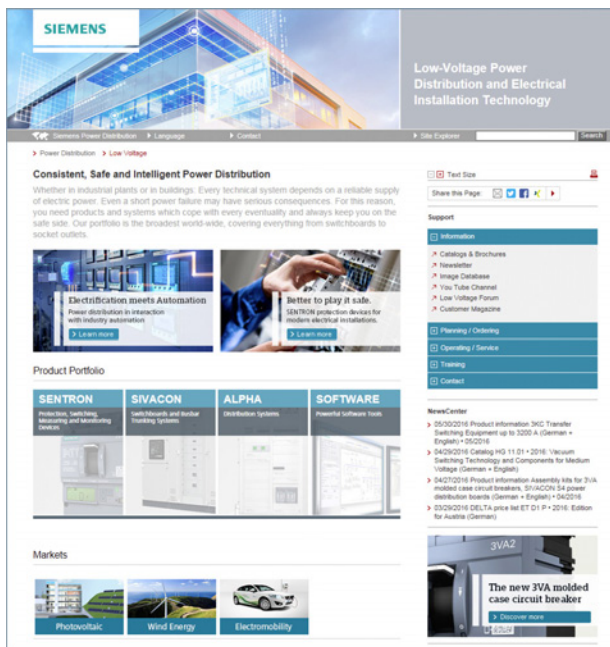

We regard product support as just as important as the products and systems themselves.

Visit our site on the Internet for a comprehensive range of material on SIRIUS Industrial Controls, such as

- Overview of the entire product portfolio
- Always up to date with newsletters, podcasts, blogs and twitter
- Access to interesting videos on the YouTube channel
- Access to contact persons in more than 190 countries
- Operating instructions and manuals for direct download and much, much more – all conveniently and easily accessible at:

www.siemens.com/sirius

Low-Voltage Power Distribution and Electrical Installation Technology on the WWW

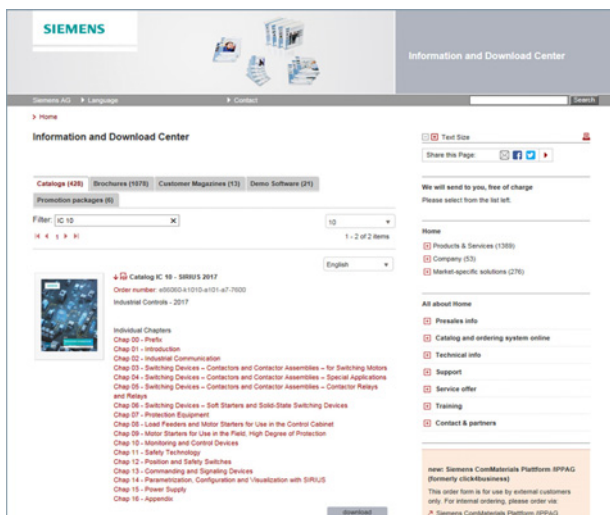

We regard product support to be just as important as the products and systems themselves.

Visit our website for a comprehensive offering of support for low-voltage power distribution and electrical installation products, such as:

- Overview of the entire product portfolio
- Keeping up to date via newsletters, podcasts, blogs and Twitter
- Access to interesting videos on YouTube
- Contact with partners around the world
- Operating instructions and manuals for direct download and much more - all conveniently and easily accessible.

www.siemens.com/lowvoltage

Information and download center

You will find information material such as catalogs, customer magazines, brochures and trial versions of software for low-voltage power distribution and electrical installations on the Internet at

www.siemens.com/industry/infocenter

Here you can order your copy of the available documentation or download it in common file formats (PDF, ZIP).

Product selection using the interactive catalog CA 01

Interactive Catalog CA 01 - Products for Automation and Drives

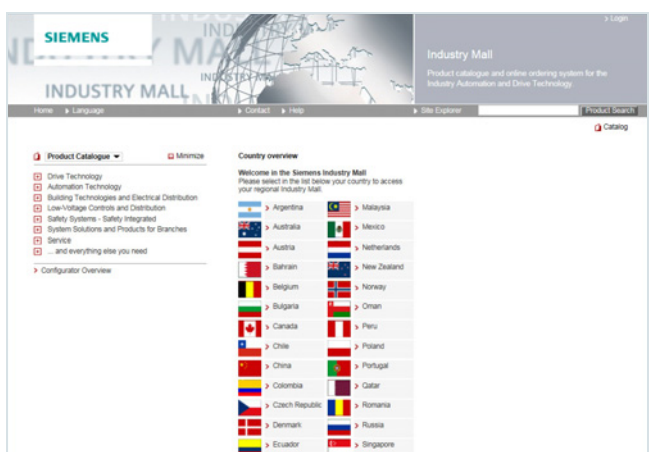

The Interactive Catalog CA 01 combined with the Siemens Industry Mall unites the benefits of offline and online media in one application – the performance of an offline catalog with the availability of manifold and up-to-date information on the Internet.

Select products and assemble orders with the CA 01, determine the availability of the selected products and track & trace via the Industry Mall.

After selecting the product of your choice you can order at the press of a button, by fax or by online link.

More information and download:
www.siemens.com/automation/ca01

Industry Mall

The Industry Mall

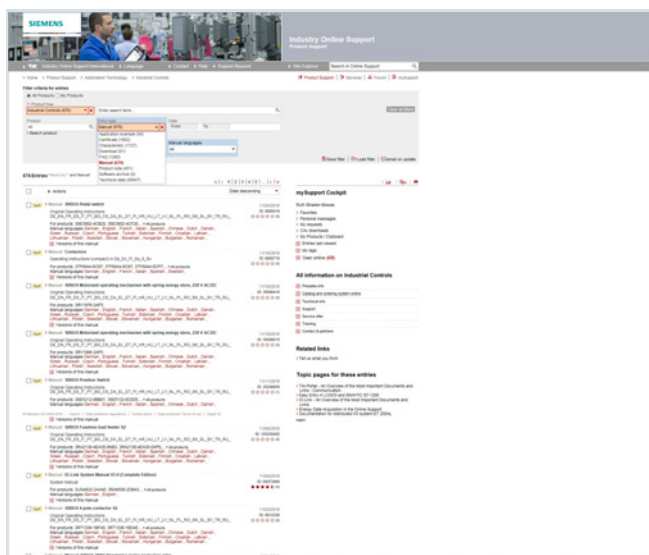

The Industry Mall is a Siemens Internet ordering platform. Here you have a clear and informative online access to a huge range of products.

Powerful search functions make it easy to select the required products. Configurators enable you to configure complex product and system components quickly and easily. CAx data types are also provided here.

Data transfer allows the whole procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, customer-specific discounts and bid creation are also possible.

www.siemens.com/industrymall

Product support

Using the "Entry type" selection box in Product Support, you can download operating instructions and manuals:

www.siemens.com/sirius/support

Here you will also find application examples, downloads, FAQs, characteristic curves, product reports, technical specifications and certificates.

Appendix

Übersicht

Apps for SIRIUS Planning Efficiency

Interactive control cabinet

The interactive control cabinet shows you a selected product overview, and provides you with useful information and technical data on the relevant components, thus allowing you to plan your control cabinet in advance, efficiently and easily. This saves precious time during project implementation.

Discover the interactive control cabinet¹⁾ at www.siemens.com/sirius/cabinet.

¹⁾ Now also available as an iPad app in the Apple App Store.

Online Support app

The Online Support app allows you to access over 300 000 documents on all Siemens Industry products, anywhere and any time. Whether you need help with implementing your project or with troubleshooting, or want to expand your plant or plan a new one, you now have around-the-clock access to FAQs, manuals, certificates, characteristic curves, sample applications and tools, product news and more.

The app is available free of charge from the Apple App Store and on Google Play (Android Market) using the search string: "Siemens Industry Online Support".

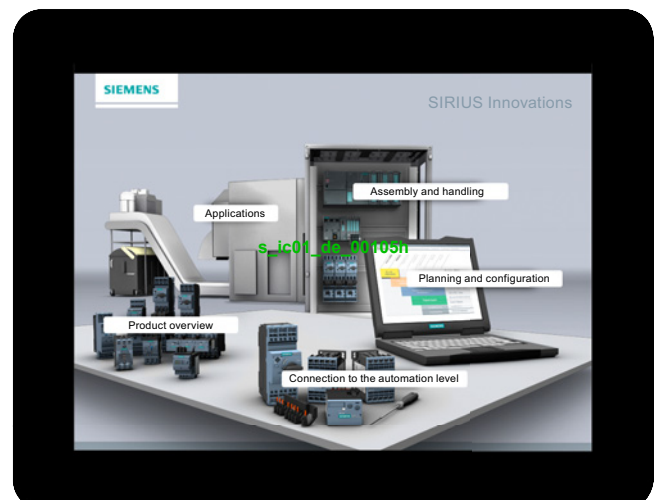

For more information, see www.siemens.com/industry/onlinesupportapp.

SIRIUS Innovations DVD – also available as a web app

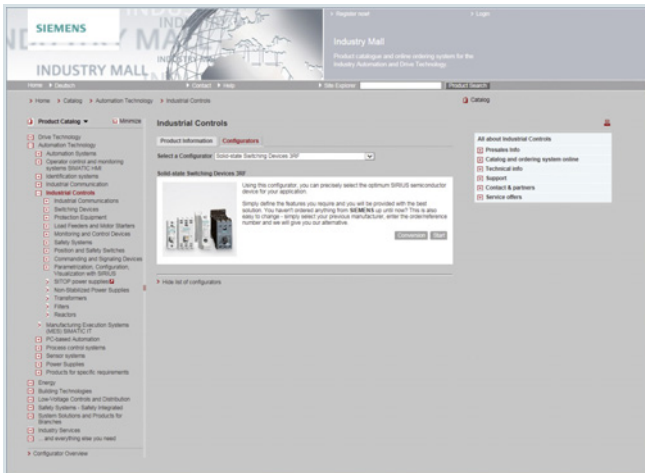

Thanks to the modular design of SIRIUS Innovations, our products are particularly easy to plan for the control cabinet, install and monitor. All the advantages of SIRIUS Innovations are available offline in 9 languages with 3D animations, films and screen recordings of our planning and configuring tools. Ask your sales contact person about the SIRIUS Innovations DVD.

The SIRIUS Innovations DVD is now also available as a web app¹⁾ (de/en): www.siemens.com/sirius/dvd.

¹⁾ Optimized for use with a resolution of 1024 x 768 on iPads and tablet PCs.

Product configurator

Get to the right product faster with intuitive product selection

- Full selection of products and systems on the basis of technical features or in accordance with application requirements
- Simple and intuitive operation
- Configuration and ordering lists can be saved in the file format of your choice (txt, pdf, xls, csv)
- Direct transfer of the ordering list to the Siemens Industry Mall shopping cart
- Fast access to product data, pictures, certificates and CAx data for the selected product and system configuration
- Available in several languages for global use

The configurators are available online in the Siemens Industry Mall and offline in the CA01 Catalog. Product selection doesn't come any faster, clearer or easier.

You will find our configurators on the Internet at

www.siemens.com/sirius/configurators

Appendix

Further documentation

CAx Download Manager

With the CAx Download Manager, all the CAx data types required for use in all commonly used CAE and CAD systems are provided for your desired products in just four selection steps, free of charge and with daily updates. Your individual download package is then available to you for further use as a zip file. This will save up to 80% of your time, because there is no need for manual data collection thanks to the universal manufacturer data for all commonly used CAE and CAD systems.

My Documentation Manager

We have developed a configurator for manuals to support you in creating plant documentation. With My Documentation Manager, the standard-compliant plant documentation can be compiled individually with just a few clicks. Simply select the desired chapters from the existing manuals of the installed Siemens products.

EPLAN Electric P8 Macro – the benefits for EPLAN users

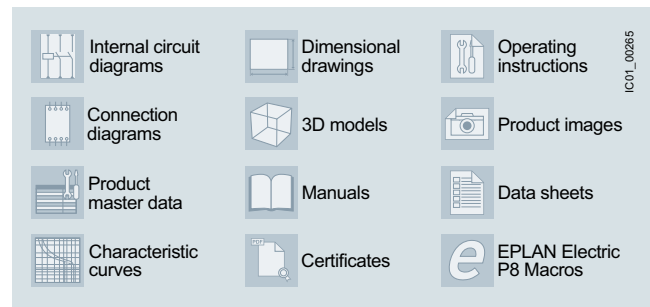

With EPLAN Electric P8 in .edz exchange format (EPLAN Data Archived Zipped), the overall time required for data integration can be reduced even further. With just a few clicks, the contained data types can be imported for any number of article numbers, and they remain linked. In this way, the installed Siemens products can be represented across different circuit diagram pages quickly and easily.

At a glance

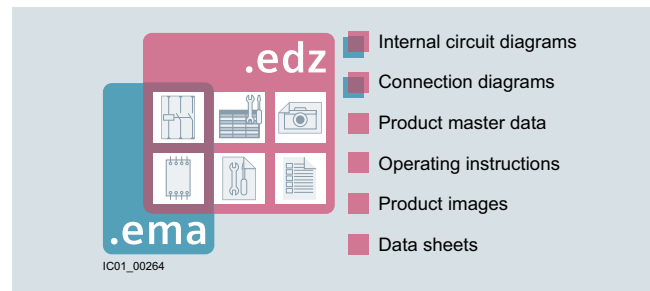

Without Planning Efficiency a lot of time used to be wasted in manual data transmission. Now you can concentrate on the essentials again. All the information and product data you need are provided by Siemens Industry and are easily accessible.

This makes configuring control cabinets more efficient and makes your everyday work easier.

For more information, see www.siemens.com/planning-efficiency.

The CAx Download Manager makes 11 universal data types and the EPLAN Electric P8 Macro available

The EPLAN Electric P8 Macro in .edz exchange format offers a lot more than the .ema exchange format

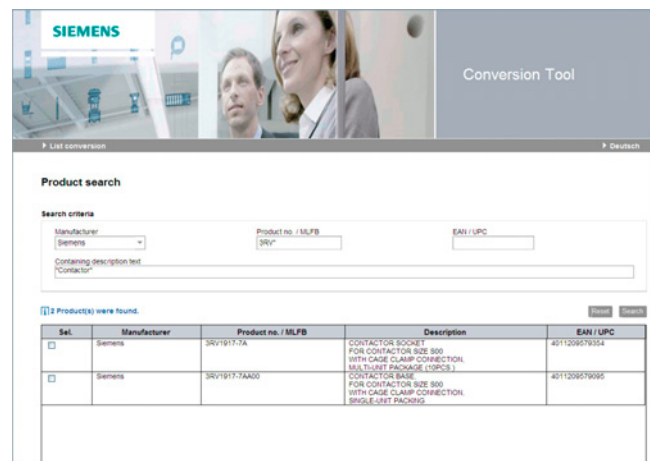

Find out more about Planning Efficiency in demonstrative videos

From old to new: The conversion tool

Every automation system becomes obsolete at some time. Replacing installed products used to involve significant time and costs. But now, with the conversion tool, you'll find the right product more quickly – this allows you to conveniently switch to SIRIUS Innovations:

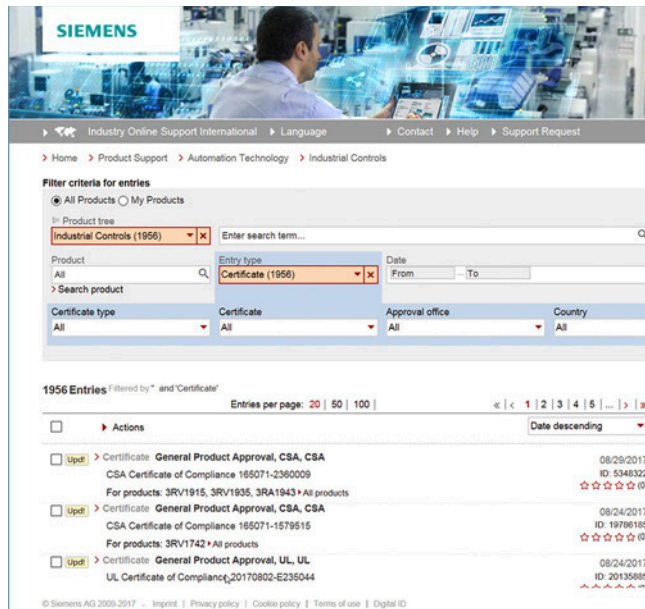

- A user-friendly interface enables intuitive searches
- Simply enter the article number of the current device or descriptive text (e.g. *contactor*)
- The search result provides you with the article number of the desired device, including current data and information for using the new product
- Order conveniently through the Industry Mall

For more information, see www.siemens.com/sirius/conversion-tool.

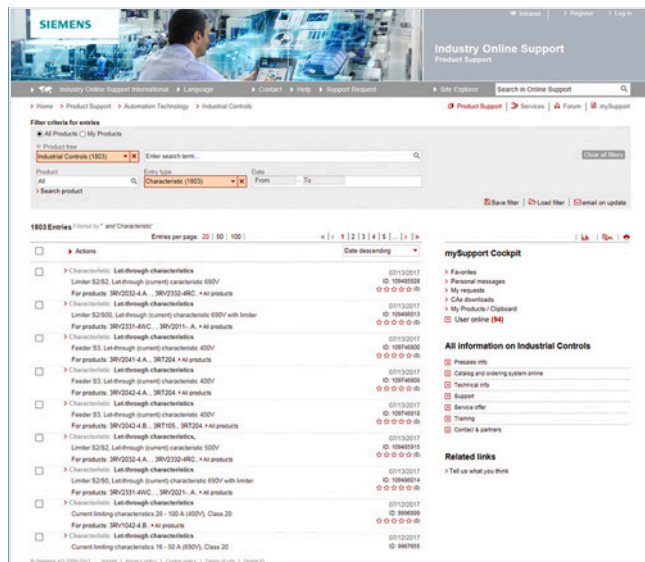

Approvals, test certificates, characteristic curves

An overview of the certificates available for Industrial Control products along with more technical documentation can be consulted daily on the Internet at: www.siemens.com/sirius/approvals

Product support: Approvals/certificates

Product support: Characteristics

Safety characteristics

In the following standards, the so-called B10 values for calculating the safety integrity or safety integrity level (SIL) in functional safety at a high or continuous demand rate are required also for electromechanical switchgear:

- IEC 62061 "Safety of machines – Functional safety of safety-related electrical, electronic and programmable electronic control systems",
- ISO 13849-1 "Safety of machines – Safety-related components of controls – Part 1: General principles".

Failure rates of electromechanical components are required for calculating the safety integrity or safety integrity level (SIL) in functional safety:

- in the manufacturing industry at a high demand rate
- in the process industry at a low demand rate

Further requirements are laid down in IEC 61511-1 "Functional safety – Safety instrumented systems for the process industry sector – Part 1: Framework, definitions, system, hardware and software requirements".

The German versions of the above standards are:

- EN 62061
- EN ISO 13849
- EN 61511-1

The TÜV-tested Safety Evaluation Tool assists in calculating the safety function as verification for the machine documentation. It is available as a free download on the Internet at www.siemens.com/safety-evaluation-tool.

At www.siemens.com/safety-integrated you will also find examples of functions with calculations according to the current standards.

Definitions

$\lambda(t) dt$ is the probability that a unit which has not failed by a certain time t will fail in the following interval $(t; t + dt)$. Failure rates have the dimension 1/time unit, e.g. 1/h. Failure rates for components are often specified in FIT (failures in time unit): 1 FIT equals 10^{-9} /h. From the failure rate it is possible to derive a (mathematical) distribution function of the failure probability:

$F(t) = 1 - \exp(-\lambda t)$, with λ as constant failure rate

- The mean value of this exponential distribution is also referred to as:
 - Mean Time To Failure (MTTF) in the case of irreparable components; 63.2% of components fail by the MTTF.
 - Mean Operating Time Between Failures (MTBF) in the case of repairable components.
- $MTTF = 1/\lambda$
(MTTF is a statistical mean value but no guarantee for endurance).

Electromechanical components are often irreparable components. In general, the failure rate of monitored units changes with age.

The B10 value for devices subject to wear is expressed in number of operating cycles:

- It is the number of operating cycles after which 10% of the test specimens fail in the course of an endurance test (or: The number of operating cycles after which 10% of the devices have failed).

For low demand rates (mainly in the process industry), the failure rate and not the B10 value is used to determine the failure probability.

The safety characteristics of electromechanical SIRIUS products can be found at <https://support.industry.siemens.com/cs/ww/en/view/109739348> or in the SIEMENS Industry Online Support Portal (<http://support.industry.siemens.com>) under the Entry ID: 109739348.

Approval requirements valid in different countries

Siemens low-voltage switchgear and controlgear are designed, manufactured and tested according to the relevant German standards (DIN and VDE), IEC publications and European standards (EN) as well as CSA and UL standards. The standards assigned to the single devices are stated in the relevant parts of this catalog.

As far as is economically viable, the requirements of the various standards valid in other countries are also taken into account in the design of the equipment.

In some countries an approval is required for certain low-voltage switchgear and controlgear components (see table below). Depending on the market requirements, these components have been submitted for approval to the authorized testing institutes.

In some cases, CSA for Canada and UL for the USA only approve special switchgear versions. Such special versions are listed separately from the standard versions in the individual parts of this catalog.

For this equipment, partial limitations of the maximum permissible voltages, currents and ratings can be imposed, or special approval and, in some cases, special identification is required.

For use on board ship, the specifications of the marine classification societies must be observed (see table below). In some cases, they require type tests of the components to be approved.

Testing bodies, approval identification and approval requirements

Country	Canada	USA	China	Russia / Belarus / Kazakhstan / ...
Government-appointed or private, officially recognized testing bodies	CSA UL (USA)	UL	CQC	Official national regulation / TR
Mark of conformity				
Approval requirement	+	+	+	+
Remarks	UL and CSA are authorized to grant approval certificates in accordance with Canadian and North American regulations. Please note: These approvals are not recognized in many cases and must be covered by additional approvals issued by the national testing agency.			Eurasian customs union

For more information about the approval marks, see page 8/18.

Marine classification societies

Country	Germany Norway	United Kingdom	France	CIS	Italy	Poland	USA

Appendix

Standards and approvals

CE marking

Manufacturers of products which fall within the subject area to which EU directives apply must identify their products, operating instructions or packaging with a CE mark of conformity.

By attaching the CE marking, the manufacturer confirms that the product conforms to the relevant basic requirements of all directives applicable to the product. The mark of conformity is a mandatory requirement for putting products into circulation throughout the EC.

All the products in this catalog are in conformance with the relevant specific EU directives and bear the CE mark of conformity **CE**.

- Low-voltage directive
- EMC directive
- Machinery directive
- ATEX directive
- RED directive
- RoHS directive

ALPHA/LOVAG

Siemens AG sits in the ALPHA committee of "ALPHA in VDE".

The responsibility of manufacturers and the high quality of products are promoted by "ALPHA in VDE" by means of supportive procedural guidelines for testing equipment according to the currently valid standards.

Providing specific conditions are fulfilled, "ALPHA in VDE" can also issue officially recognized product certificates if required. As a member of LOVAG, "ALPHA in VDE" is also working towards obtaining international recognition for declarations of conformity and certificates.

LOVAG (Low-Voltage Agreement Group) is a body comprising international specialists from certification bodies and industry who are working together to create a standardized European certificate.

List of LOVAG members

SGS BELGIUM NV	Belgium
Division SGS CEBEC	
ALPHA in VDE	Germany
ASEFA	France
ACAE	Italy
IMQ S.p.A	
Intertek SEMKO	Sweden
APPLUS + Laboratories	Spain

Accident prevention

Test certificates and approvals from IFA (institute for occupational safety and health of the German social accident insurance), SUVA (Swiss institute for accident prevention), BG ETEM (German trade association for energy, textiles, electrical goods and media products) TÜV and VDE are available for some devices in safety control systems. For details, [see the respective product descriptions](#).

Ex protection certificates for SIRIUS controls

Controls that are installed in a potentially explosive atmosphere or motor protection devices that protect a motor installed in a potentially explosive atmosphere against overloading must comply with certain special requirements. These requirements are laid down in the following standards:

- EN 50495
- EN 60079-0
- EN 60079-1
- EN 60079-7
- EN 60079-14
- EN 60079-17
- EN 60079-31
- EN 60947-1
- EN 60947-4-1
- EN 60947-4-2
- EN 60947-5-1
- EN 60947-8
- EN ISO/IEC 80079-34

Certification

The enactment of EU Directive 94/9/EC (July 2003) ushered in a new era in the field of explosion protection. Since then, only those devices and protection systems that comply with the EU directive can be brought into circulation within the European Union for operation in potentially explosive atmospheres. Since April 20, 2016 this Directive has been superseded by the new EU Directive 2014/34/EU.

Controls and motor protection devices that are brought into circulation within the member states of the EU in accordance with EU directive 2014/34/EU must have been constructed and tested according to the above-mentioned standards and must have a declaration of conformity from the manufacturer based on a prototype test certificate. Prototype test certificates that were issued in accordance with 94/9/EC have retained their validity even after 2014/34/EU came into force.

The quality management (QM) system of the manufacturer is subject to certain requirements and a "QM certificate" must be obtained for the manufacturer from a recognized authority.

Certification of the QM system

A certificate of approval for quality assurance production has been issued by DEKRA EXAM GmbH¹⁾ with the number BVS 11 ATEX ZQS/E111 of DEKRA EXAM GmbH¹⁾ according to Directive 94/9/EC (from April 20, 2016 2014/34/EU).

This certificate is valid for equipment groups I and II and categories M2 and 2: Safety and control devices for electrical equipment.

Certificates

For the 3RV, 3RU, 3RB, 3UF, 3RN and 3RW motor protection devices, the corresponding declarations of conformity and prototype test certificates for Category 2D, 2G, and in some cases M2, are available and can be supplied on request.

Declarations of conformity and prototype test certificates are available at <http://support.industry.siemens.com> for viewing and downloading.

You can find more information about industrial controls for applications in explosion-protected areas at www.siemens.com/sirius/atex.

¹⁾ DEKRA EXAM GmbH

The certification authority of "DEKRA EXAM GmbH" with authority number 0158 according to Article 13 of Directive 2014/34/EC of the European Parliament and Council, certifies that Siemens Amberg, Cham and Trutnov maintains a quality assurance system for production that satisfies Appendices IV and VII of this Directive.

The screenshot shows the Siemens Industry Online Support International website. The navigation bar includes 'Home', 'Product Support', 'Automation Technology', and 'Industrial Controls'. The main content area is titled 'Filter criteria for entries' and shows a search for 'Certificate' under the 'Industrial Controls (1956)' product tree. The results table shows three entries:

Entry type	Product	Date
Certificate (1956)	General Product Approval, CSA, CSA	08/29/2017
Certificate (1956)	General Product Approval, CSA, CSA	09/24/2017
Certificate (1956)	General Product Approval, UL, UL	08/24/2017

Selection box

The screenshot shows a detailed view of a certificate entry on the Siemens website. The entry is titled "For use in hazardous locations, ATEX-EC-Type-Examination-Certificate, DEKRA EXAM, DMT". The details include:

- Entry type: Certificate, Entry ID: 21407110, Entry date: 08/18/2017
- Certificate number: 2098
- Certificate name: Explosive Atmospheres/EXAM/EC-Type-MLFB Examination NO. BVS 06 ATEX F 001
- Certificate type: For use in hazardous locations
- Certificate: ATEX-EC-Type-Examination-Certificate
- Approval office: DEKRA EXAM, DMT
- Countries: Belgium, Denmark, Germany, Bulgaria, Estonia, Finland, France, Great Britain, Italy, The Netherlands, Austria, Poland, Sweden, Greece, Czech Republic, Hungary, Ireland, Latvia, Lithuania, Luxembourg, Malta, Portugal, Romania, Slovakia, Slovenia, Spain, Cyprus
- Description / Topic: 3UF7
- Display / Download (4482 KB)

Below the details, there are options to view the certificate in different languages (German, French, Italian, Spanish, Chinese) and a list of product tree folders it belongs to.

Description of certificate with view and download option

Identifying markings

All equipment must be marked according to the ATEX guideline. The ATEX identification code contains the equipment group, the approved environment, the number of the certification authority and other technical data that was determined from the type test.

Appendix

Standards and approvals

Certificate of the AS-International Association for AS-Interface products

AS-Interface products are tested and certified by the AS-International Association. The products have been tested in an accredited test laboratory according to testing guidelines.

Special standards for the USA and Canada

In the USA and Canada, for machine tools and processing machines in particular, supply lines are laid using rubber insulated cable enclosed in heavy-duty steel piping similar to that used for gas or water pipe systems.

The tubing system must be completely watertight and electrically conductive (especially sleeving and elbows). Since the tubing system can also be grounded, the cable entries of enclosed units equipped with heavy-gauge or metric threads must be fitted with metal adapters between these threads and the tube thread. The necessary adapters are specified for the switchgear as accessories; they should be ordered separately unless otherwise specified.

Low-voltage switchgear and controlgear for auxiliary circuits (e.g. contactor relays, commanding and signaling devices and auxiliary switches/auxiliary contacts in general) are generally only approved by CSA and UL for **"Heavy Duty"** or **"Standard Duty"** and are identified either with these specifications in addition to the maximum permissible voltage or by using an abbreviation.

The abbreviations are harmonized with IEC 60947-5-1 Appendix 1 Table A.1 and correspond to the stated utilization categories.

For various switching devices detailed in the catalog, a note has been included to the effect that, above a certain voltage, the auxiliary switches/auxiliary contacts can only be used if they have the same polarity. This means that the input terminals can only be connected to the same pole of the actuating voltage, e.g. "600 V AC above 300 V AC same polarity".

Differentiating features of UL approvals (for USA and Canada)

Recognized Component	Listed Product
Devices are identified on the rating plate using the "UL recognition mark": USA:  c  US Canada:  c  US	Devices are identified using the "UL listing mark" on the rating plate e.g. USA:  LISTED XXX Canada: c  LISTED XXX IND. CONT. EQ. IND. CONT. EQ. (XXX stands for: UL Code Classification Number)
Devices are approved as modules for "factory wiring", i.e.: as devices for installation in control systems, which are selected, installed, wired and tested entirely by trained personnel in factories, workshops or elsewhere, according to the operating conditions .	Devices are approved for "field wiring", i.e.: <ul style="list-style-type: none"> As devices for installation in control systems, which are completely wired by trained personnel in factories, workshops or elsewhere. As single devices for sale in retail outlets in the USA/Canada.

If devices are  or c  approved as "listed products", they are also approved as  or c  "recognized components".

For more information about UL and CSA, [see page 8/15](#).

Special standards for Russia, Australia and China

EAC approval for Russia/Belarus/Kazakhstan/...

EAC mark

Since 2013-02-15, Russia, Kazakhstan, Belarus and other countries have been united in the Eurasian EAC customs union. An EAC approval as replacement for the GOST mark is required for all products that are to be sold in Russia.

All devices delivered to the customs union must have these customs certifications.

RCM approval for Australia

RCM mark

The RCM mark is required for marketing Siemens electronic devices in Australia. Electronic devices must provide proof of EMC clearance in Australia, similar to the CE mark of conformity laid down by the EMC directive applicable in the EC and bear the "RCM" mark. These requirements have been in force since October 1, 1999.

Quality management

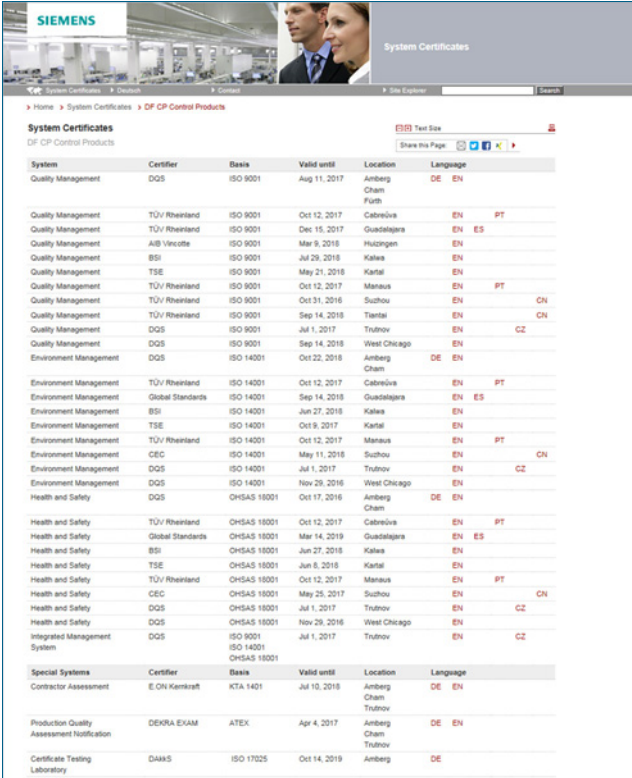

The quality management system of our "Control Products" Business Unit of the "Digital Factory" Division complies with the international standard EN ISO 9001.

The products and systems described in this catalog are developed, manufactured and sold under application of a certified quality management system according to ISO 9001.

Certificates

For information about available certifications of the quality management system for Industrial Controls products, please visit website address:

www.siemens.com/system-certificates/cp

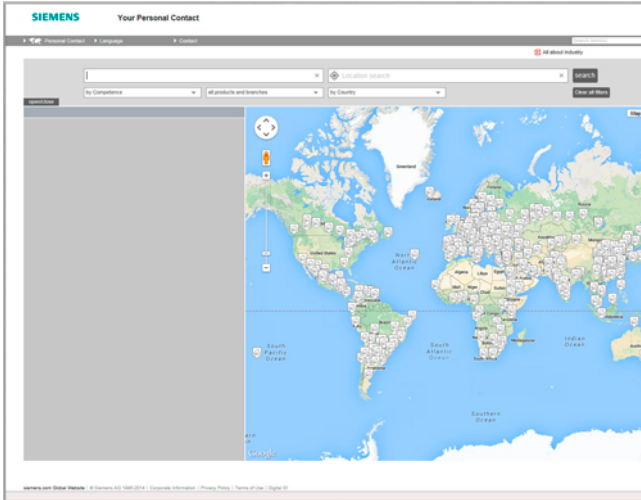

The screenshot shows the 'System Certificates' page for 'CP Control Products'. It features a table with columns for System, Certifier, Basis, Valid until, Location, and Language. The table lists various certifications for Quality Management, Environment Management, Health and Safety, and Special Systems across different locations and certifiers.

Partner at Siemens

Overview

At your service locally, around the globe for consulting, sales, training, service, support, spare parts on the entire portfolio of Digital Factory and Process Industries and Drives.

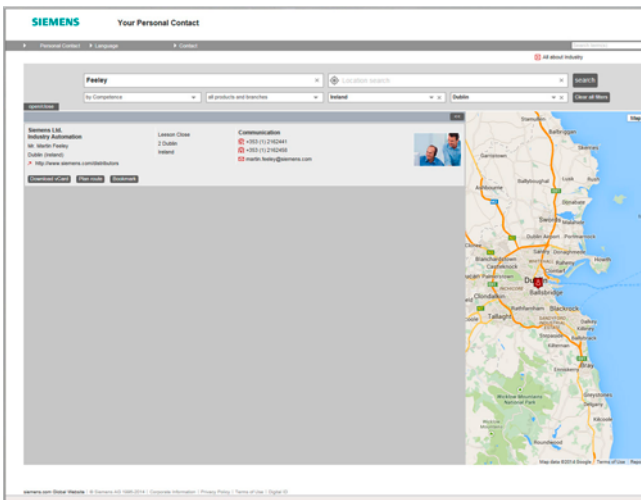

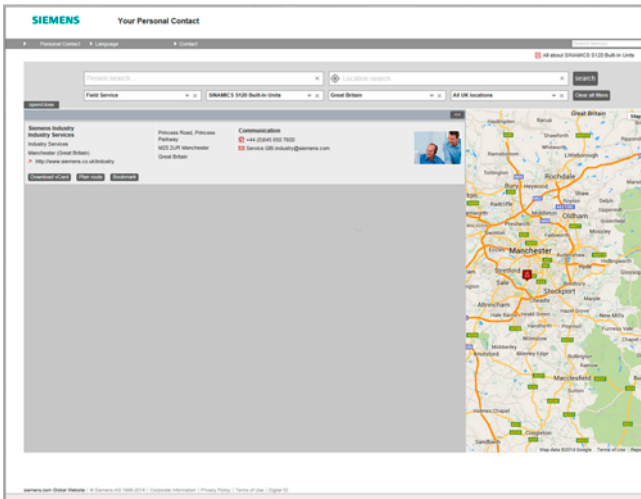

Your partner can be found in our Personal Contacts Database at: www.siemens.com/automation-contact

You start by selecting

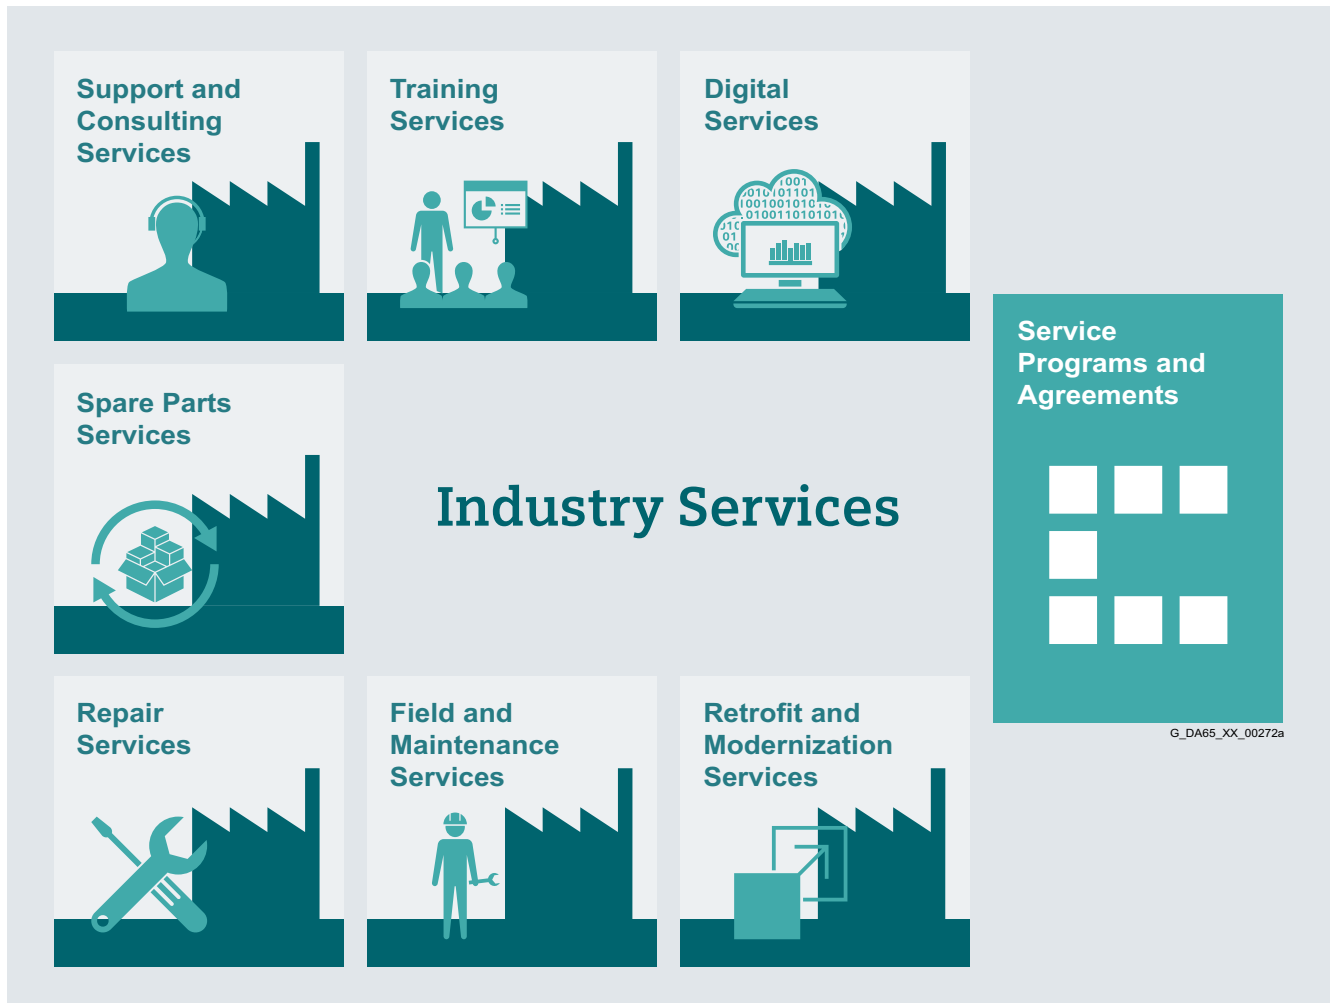

- the required competence,
- products and branches,
- a country and a city

or by a

- location search or free text search.

Overview

**Keep your business running and shaping your digital future – with Industry Services**

Optimizing the productivity of your equipment and operations can be a challenge, especially with constantly changing market conditions. Working with our service experts makes it easier. We understand your industry's unique processes and provide the services needed so that you can better achieve your business goals.

You can count on us to maximize your uptime and minimize your downtime, increasing your operations' productivity and reliability. When your operations have to be changed quickly to meet a new demand or business opportunity, our services give you the flexibility to adapt. Of course, we take care that your production is protected against cyber threats. We assist in keeping your operations as energy and resource efficient as possible and reducing your total cost of ownership. As a trendsetter, we ensure that you can capitalize on the opportunities of digitalization and by applying data analytics to enhance decision making: You can be sure that your plant reaches its full potential and retains this over the longer lifespan.

You can rely on our highly dedicated team of engineers, technicians and specialists to deliver the services you need – safely, professionally and in compliance with all regulations. We are there for you, where you need us, when you need us.

<https://www.siemens.com/global/en/home/products/services/industry.html>

Appendix

Industry Services

Overview

Digital Services

Digital Services make your industrial processes transparent to gain improvements in productivity, asset availability, and energy efficiency.

Production data is generated, filtered and translated with intelligent analytics to enhance decision-making.

This is done whilst taking data security into consideration and with continuous protection against cyber-attack threats.

<https://www.siemens.com/global/en/home/products/services/industry/digital-services.html>

Training Services

From the basics right through to advanced specialist skills, SITRAIN courses provide expertise directly from the manufacturer – and encompass the entire spectrum of Siemens products and systems for industry.

Worldwide, SITRAIN courses are available wherever you need a training course in more than 170 locations in over 60 countries.

<https://support.industry.siemens.com/cs/ww/en/sc/2226>

Support and Consulting Services

Industry Online Support site for comprehensive information, application examples, FAQs and support requests.

Technical and Engineering Support for advice and answers for all inquiries about functionality, handling, and fault clearance. The Service Card as prepaid support for value added services such as Priority Call Back or Extended Support offers the clear advantage of quick and easy purchasing.

Information & Consulting Services, e.g. SIMATIC System Audit; clarity about the state and service capability of your automation system or Lifecycle Information Services; transparency on the lifecycle of the products in your plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2235>

Spare Parts Services

Spare Parts Services are available worldwide for smooth and fast supply of spare parts – and thus optimal plant availability. Genuine spare parts are available for up to ten years. Logistic experts take care of procurement, transport, custom clearance, storage and order management. Reliable logistics processes ensure that components reach their destination as needed.

Since not all spare parts can be kept in stock at all times, Siemens offers a preventive measure for spare parts provisioning on the customer's premises with optimized **Spare Parts Packages** for individual products, custom-assembled drive components and entire integrated drive trains – including risk consulting.

Asset Optimization Services help you design a strategy for parts supply where your investment and carrying costs are reduced and the risk of obsolescence is avoided.

<https://support.industry.siemens.com/cs/ww/en/sc/2110>

Overview (continued)**Repair Services**

Repair Services are offered on-site and in regional repair centers for fast restoration of faulty devices' functionality.

Also available are extended repair services, which include additional diagnostic and repair measures, as well as emergency services.

<https://support.industry.siemens.com/cs/ww/en/sc/2154>

Retrofit and Modernization Services

Provide a cost-effective solution for the expansion of entire plants, optimization of systems or upgrading existing products to the latest technology and software, e.g. migration services for automation systems.

Service experts support projects from planning through commissioning and, if desired over the entire extended lifespan, e.g. Retrofit for Integrated Drive Systems for an extended lifetime of your machines and plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2286>

Field and Maintenance Services

Siemens specialists are available globally to provide expert field and maintenance services, including commissioning, functional testing, preventive maintenance and fault clearance. All services can be included in customized service agreements with defined reaction times or fixed maintenance intervals.

<https://support.industry.siemens.com/cs/ww/en/sc/2265>

Service Programs and Agreements

A technical Service Program or Agreement enables you to easily bundle a wide range of services into a single annual or multi-year agreement.

You pick the services you need to match your unique requirements or fill gaps in your organization's maintenance capabilities.

Programs and agreements can be customized as KPI-based and/or performance-based contracts.

Online Support for Siemens Products for Industry

Siemens Industry and Online Support with some 1.7 million visitors per month is one of the most popular web services provided by Siemens. It is the central access point for comprehensive technical know-how about products, systems and services for automation and drives applications as well as for process industries.

In connection with the challenges and opportunities related to digitalization you can look forward to continued support with innovative offerings.

Overview

Software types

Software requiring a license is categorized into types. The following software types have been defined:

- Engineering software
- Runtime software

Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning or servicing. Data generated with engineering software and executable programs can be duplicated for your own use or for use by third-parties free-of-charge.

Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc. The duplication of the runtime software and executable programs created with the runtime software for your own use or for use by third-parties is subject to a charge. You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc. Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of delivery can be found in the readme file supplied with the relevant product(s).

License types

Siemens Industry Automation & Drive Technologies offers various types of software license:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

Floating license

The software may be installed for internal use on any number of devices by the licensee. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. A license is required for each concurrent user.

Single license

Unlike the floating license, a single license permits only one installation of the software per license. The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include for example per instance, per axis, per channel, etc. One single license is required for each type of use defined.

Rental license

A rental license supports the "sporadic use" of engineering software. Once the license key has been installed, the software can be used for a specific period of time (the operating hours do not have to be consecutive). One license is required for each installation of the software.

Rental floating license

The rental floating license corresponds to the rental license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

Demo license

The demo license support the "sporadic use" of engineering software in a non-productive context, for example, use for testing and evaluation purposes. It can be transferred to another license. After the installation of the license key, the software can be operated for a specific period of time, whereby usage can be interrupted as often as required.

One license is required per installation of the software.

Demo floating license

The demo floating license corresponds to the demo license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

Delivery versions

Software is constantly being updated. The following delivery versions

- PowerPack
- Upgrade

can be used to access updates.

Existing bug fixes are supplied with the ServicePack version.

PowerPack

PowerPacks can be used to upgrade to more powerful software. The licensee receives a new license agreement and CoL (Certificate of License) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.

A separate PowerPack must be purchased for each original license of the software to be replaced.

Upgrade

An upgrade permits the use of a new version of the software on the condition that a license for a previous version of the product is already held.

The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous product, proves that the new version is licensed.

A separate upgrade must be purchased for each original license of the software to be upgraded.

Appendix

Software licenses

Overview

ServicePack

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

License key

Siemens Industry Automation & Drive Technologies supplies software products with and without license keys.

The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.).

The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

Software Update Service (SUS)

As part of the SUS contract, all software updates for the respective product are made available to you free of charge for a period of one year from the invoice date. The contract will automatically be extended for one year if it is not canceled three months before it expires.

The possession of the current version of the respective software is a basic condition for entering into an SUS contract.

You can download explanations concerning license conditions from www.siemens.com/automation/salesmaterial-as/catalog/en/terms_of_trade_en.pdf

1. General Provisions

By using this catalog you can acquire hardware and software products described therein from Siemens AG subject to the following Terms and Conditions of Sale and Delivery (hereinafter referred to as "T&C"). Please note that the scope, the quality and the conditions for supplies and services, including software products, by any Siemens entity having a registered office outside Germany, shall be subject exclusively to the General Terms and Conditions of the respective Siemens entity. The following T&C apply exclusively for orders placed with Siemens Aktiengesellschaft, Germany.

1.1 For customers with a seat or registered office in Germany

For customers with a seat or registered office in Germany, the following applies subordinate to the T&C:

- the "General Terms of Payment"¹⁾ and,
- for software products, the "General License Conditions for Software Products for Automation and Drives for Customers with a Seat or Registered Office in Germany"¹⁾ and,
- for other supplies and services, the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"¹⁾.

1.2 For customers with a seat or registered office outside Germany

For customers with a seat or registered office outside Germany, the following applies subordinate to the T&C:

- the "General Terms of Payment"¹⁾ and,
- for software products, the "General License Conditions for Software Products for Automation and Drives for Customers with a Seat or Registered Office outside of Germany"¹⁾ and
- for other supplies and services, the "General Conditions for Supplies of Siemens Industry for Customers with a Seat or Registered Office outside of Germany"¹⁾.

2. Prices

The prices are in € (Euro) ex point of delivery, exclusive of packaging.

The sales tax (value added tax) is not included in the prices. It shall be charged separately at the respective rate according to the applicable statutory legal regulations.

Prices are subject to change without prior notice. We will charge the prices valid at the time of delivery.

To compensate for variations in the price of raw materials (e.g. silver, copper, aluminum, lead, gold, dysprosium and neodym), surcharges are calculated on a daily basis using the so-called metal factor for products containing these raw materials. A surcharge for the respective raw material is calculated as a supplement to the price of a product if the basic official price of the raw material in question is exceeded.

The metal factor of a product indicates the basic official price (for those raw materials concerned) as of which the surcharges on the price of the product are applied, and with what method of calculation.

An exact explanation of the metal factor can be downloaded at:

www.siemens.com/automation/salesmaterial-as/catalog/en/terms_of_trade_en.pdf

To calculate the surcharge (except in the cases of dysprosium and neodym), the official price from the day prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to dysprosium and neodym ("rare earths"), the corresponding three-month basic average price in the quarter prior to that in which the order was received or the release order was effected is used with a one-month buffer (details on the calculation can be found in the explanation of the metal factor).

3. Additional Terms and Conditions

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches apply only to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the individual pages of this catalog - especially with regard to data, dimensions and weights given - these are subject to change without prior notice.

4. Export Regulations

We shall not be obligated to fulfill any agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes and/or other sanctions.

Export of goods listed in this catalog may be subject to licensing requirements. We will indicate in the delivery details whether licenses are required under German, European and US export lists. Goods labeled with "AL" not equal to "N" are subject to European or German export authorization when being exported out of the EU. Goods labeled with "ECCN" not equal to "N" are subject to US re-export authorization.

The export indications can be viewed in advance in the description of the respective goods on the Industry Mall, our online catalog system. Only the export labels "AL" and "ECCN" indicated on order confirmations, delivery notes and invoices are authoritative.

Even without a label, or with label "AL:N" or "ECCN:N", authorization may be required i .a. due to the final disposition and intended use of goods.

If you transfer goods (hardware and/or software and/or technology as well as corresponding documentation, regardless of the mode of provision) delivered by us or works and services (including all kinds of technical support) performed by us to a third party worldwide, you must comply with all applicable national and international (re-)export control regulations.

If required for the purpose of conducting export control checks, you (upon request by us) shall promptly provide us with all information pertaining to the particular end customer, final disposition and intended use of goods delivered by us respectively works and services provided by us, as well as to any export control restrictions existing in this relation.

The products listed in this catalog may be subject to European/German and/or US export regulations. Any export requiring approval is therefore subject to authorization by the relevant authorities.

Errors excepted and subject to change without prior notice.

Security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial security measures that may be implemented, please visit <http://www.siemens.com/industrialsecurity>.

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under <http://www.siemens.com/industrialsecurity>.
